A. Harley is erecting a new residence at Showers Corners, Ont.

Harry Chestnut is building a new residence at Fredericton, N.B.

A new hotel, the Dominion, is being built at New Westminster, B.C.

Tenders are being asked for the erection of a church at Shelburne, Ont.

A new town hall will be erected at Athens, Ont., at a cost of $6,000.

Stanley Ball will erect a new residence on Victoria avenue, Chatham, Ont.

The Canadian Pacific Railway will erect a new $100,000 hotel at Banff, B.C.

H. E. Theker is building a butcher shop and dwelling house at Stratton, Ont.

The Lake Erie and Detroit River Railway will erect a summer hotel at Rondeau, Ont.

Dr. Hall is advertising for tenders for the erection of a new office at Chatham, Ont.

Jos. S. McKay and Jos. D. McKay, are each building a new dwelling at Barrington, Ont.

J. H. Ashdown is erecting a new four-storey warehouse on Bannatyne street, Winnipeg.

Tenders are being advertised for a brick and stone academy building at Truro, N.S.

The Baldwin Iron Works Co. are building an addition to their premises on Bridge street, Ottawa.

Four storeys are being added to the Bullman Block, Bannatyne street, Winnipeg, at a cost of $40,000.

Mitchell & Hembroff are advertising for tenders for the erection of a new store at Moose Jaw, N.W.T.

A warehouse is to be erected on the corner of James and Dalhousie streets, Montreal, for L. H. Gaudry.

BUILDING AT BRANDON.

There will be extensive building operations going on at Brandon during the coming summer. Residences will be built for Dr. More, H. C. Graham and Peter Payne. A large business block will be erected by Zink Bros. on Rosser avenue, 48 x 90, of three storeys and a basement. The cost will be about $18,000. A two-storey block will be built on Rosser avenue, 48 x 85, by Burchill & Howey, for $12,000, and F. Higginbotham will build a two-storey brick block on Rosser street. The Brand Binder Twine Co. will soon have their factory and warehouse completed, and Alexander & Law Bros. are working on the building of a large mill. A business block is also being built by Senator Kirchhoffer on Rosser avenue for $4,000.

PLUMBING AND HEATING CONTRACTS.

Guest & Co., plumbers, etc., Toronto, have secured the contract for the heating of a greenhouse on the corner of King street and Lee avenue for Walter S. Lee, and the installation of a water motor in St. Paul's Methodist Church, on Avenue Road.

BUILDING AT MIDLAND.

At Midland, Ont., a house is being built for Miss Annie Ward; a residence is being constructed for Fred. Edwards; Wm. Ardle is building a house; a residence is being erected for C. Colmer; Joseph Grey is building a house; S. Nugent is building an addition to his residence; S. Campbell's cold storage warehouse has been started; Wm. Grey has the contract for the building of two houses, and Campbell Bros. are enlarging their residence.

BUILDING AT ORILLIA.

At Orillia, Ont., a new schoolhouse is being erected for St. James' Church; a two-storey addition is being made to the residence of Geo. Thompson; I. Armstrong is building a brick residence, and R. E. Watson is having a residence that he recently purchased remodelled.

CALGARY MERCHANTS ORGANIZE.

The merchants of Calgary, N.W.T., have organized themselves into the Calgary Retail Merchants' Association. This work was perfected on April 24, and the president is John Sharp.

The objects of the association are to maintain just and equitable principles in business; to further the interests of trade, and to acquire knowledge relative to the business in which its members are engaged. This organization embraces a large number of influential merchants of the place.

747 and 749 Craig St., Montreal.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."

It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

DON'T FORGET ONE THING:

THAT THE RECOLLECTION OF QUALITY WILL REMAIN LONG AFTER THE PRICE HAS BEEN FORGOTTEN. If you sell your Farrier customers a box of **"C"** brand Horse Nails, they will always associate you with the purchase of the best quality they ever used. The higher price will be forgotten when the satisfaction derived from their use has demonstrated that they proved to be the cheapest, because they were the best. The only claim that we advance for our higher price is better quality. If we did not give you something better than you can buy at a lower price, then our Horse Nail trade would soon diminish. We have during the past year sold our **"C"** brand Nails in the open market against all comers, at a higher price than any other Maker in Canada, and done as large a business as any two of them put together. Why? The reason is not far to seek; the public have confidence in our Horse Nails, and believe them to be the best and to be worth more than any others. The public are not fools. "YOU CAN FOOL ALL THE PEOPLE SOME TIME, AND SOME PEOPLE ALL THE TIME, BUT YOU CANNOT FOOL ALL THE PEOPLE ALL THE TIME."

We have been manufacturing Horse Nails since 1865, and we are the original and largest manufacturers of Horse Nails exclusively in Canada. Thirty-seven years' experience is embodied in every box of **"C"** Nails. You are "getting a sure thing."

We make only one quality—the best that our long experience can produce. Every box is warranted perfect, and so guaranteed to every dealer or they may be returned at our expense.

Every box made by us has our registered trade mark—the one Gothic letter **"C"**—and our name in full. Imitations of our brand have been made, and we are the only Makers of Horse Nails in Canada whose brand has had the compliment of having counterfeit imitations. WHY? BECAUSE IT WAS THE ONLY ONE WORTH IMITATING.

Every Nail is hot-forged from a solid rod of SWEDISH CHARCOAL STEEL of a special mild tough quality, and is the best material known or used by any Maker in the world for making Horse Nails.

Every dealer will consult his own and customers' interest, by keeping his stock of Horse Nails exclusively of the **"C"** brand. Try it!

Your orders are solicited through any Wholesale Merchant; if you cannot obtain them we will supply you. Don't accept substitutes!

Canada Horse Nail Company
MONTREAL.

INQUIRIES ABOUT CANADIAN TRADE.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London :

1. A salesman of chilled meats at Manchester desires to get into communication with Canadian shippers.

BEST RESULTS IN ADVERTISING.

THE merchant who, having built up a successful business on a certain plan or business method, is adverse to accepting new ideas for his store management and advertising, and in staying with the ship which carries his business safely through the channel and frequent squalls near shore, says Marshall W. Dorsey in The Saint Paul Trade Journal, finds new and even greater dangers facing his business ship in the mid-ocean of commercialism.

It is with justifiable pride that a retail merchant who has so successfully managed his business as to build up a large trade and store refuses to adopt new ideas or change his plan of advertising in the least. But when he balks at the hilt of progress he falls into the one-idea rut which will sooner or later relegate him to the class of has-beens—mossbacks. New and more progressive business methods adopted by some other store will capture his customers' trade ; draw the trade from his store just as his method and plan of doing business pulled trade from others when his were new.

The business methods and advertisements which attract buyers to a store to-day will be antiquated in a few years hence and called fogyism. Business men who doubt this would confer a great favor on and place the young business man of to-day under lasting obligations to him if they would explain the reason or reasons for the comparatively short life of so many retail stores to-day ; many concerns which prosper for a short period, two, five or 10 years, and then their trade begins to wane until closed out or absorbed by a rival with new business ideas and methods.

Think a minute, Mr. Merchant, see how many firms were in business and successful. Jot down the names of those who have quit for various reasons ; make a list of the most successful and progressive stores in your town to-day and the number of years each have been in business under its present ownership or management. You'll be surprised at the figures in the three columns. Why is it ? I say we all fall in a rut when we get stuck on our own business ideas so much that we refuse to listen to others and use the knowledge thus gained in improving our system and keep our business methods abreast of the times.

There are many merchants who fear to change their plan or way of advertising because it proved successful five years ago and built up their business, and although they realize that their trade is not as good as it should be—that several thousand new people have moved into their town or city, many of whom have seen business conducted on more modern methods—still cling to the old way and find fault with the new ideas suggested. It is a good plan for one member of the firm or one of the managers to take a few weeks vacation once or twice a year and visit larger cities, or at least get away from your locality and see how the most successful stores are conducted, get new ideas, pointers, and utilize them for the betterment of your own store.

The advertising methods of the average successful advertiser undergo decided changes after success has crowned the earlier campaign. To advertise successfully and make it pay you must study the trade conditions, people's wants, whims, modes, and the new goods you have to offer ; study all the time, there's no resting place. The advertising manager and writer who is successful is always at the highest tension—the most strenuous life of all professions.

The world is full of schemers who plan to get rich quickly, and who rely on advertising to do the trick, but they do not understand the advertising business or they would devote their attention to some other field. Advertising is not the soft proposition many imagine it to be.

Many advertisers hamper their advertisement writers with their own ideas to such an extent that the material turned out is directly opposite in character to that which would have resulted without any interference. If you have a good ad. writer let him do the writing. Suggest any good ideas that may occur to you, but do not pester him with your views on phraseology or the use of individual words. If he is a good ad. writer he knows what he is doing, and it is a waste of time and grey matter to grasp at fancied flaws in his work. They may be his strong card and if he always submitted his copy to you and changed it to conform with your ideas of grammar and correct phraseology, your advertising would fall into old ruts. That's why he needs your ideas and you need an ad. writer.

The only way to avoid it is to read your trade journals. Every wide-awake merchant should take at least one or more good trade journals, and the ad. writer will find good brain food, new ideas, get other progressive merchants' opinions, will have an opportunity to criticize and compare theirs with his own, and if he is not too narrow gauged he'll avoid the ruts.

NEW ART OF COLORING GLASS.

The Joliet, Ill., News, is authority for the statement that George Corner, formerly a resident of that city, is the inventor and patentee of a process of coloring glass without leading it. This means that the art of coloring glass may be revolutionized, and that by a very simple process, for instance, lettering may be done in bottles, in colors, making a much superior finish to that produced by pasting labels on the bottles. The Consolidated Art Glass Company is handling the patent, and Mr. Corner holds the presidency. The company, it is said, has spent $8,000 acquiring home and foreign rights, and has purchased a glass plant in Streator. The secret of the process is very closely guarded. The formula and other important papers are locked in a safety deposit vault in New York City, access to which can only be had when Mr. Corner and two associate officers are present. The company has only recently started and expects to do a great business.

SANITARY BUILDING PAPERS.

Any Building Paper that will turn musty after being exposed to dampness is unsanitary and dangerous to health.

A first-class Building Paper should be Water-proof, Vermin-proof, Air-tight and Durable. Our Tarred Fibre and O. K. Building Papers meet all the above requirements.

Don't be afraid to use Tarred Building Paper as it is healthy and the odor soon passes away. If you will use an Untarred Building Paper, however, try our Dry and Resin Sized Fibre which won't turn musty under any circumstances.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"A WORD TO THE WISE IS SUFFICIENT."

Gold Dollars at 90c. each won't sell until you have convinced the customer that they are genuine. Have you the time to make the argument to do the convincing?

ALABASTINE is the standard wall-coating **"The World Over."** Would any dealer want to spend the time to convince a customer that a substitute, or something else, is "just as good" as **CHURCH'S**

ALABASTINE ?

Besides, substitution is suspicious, and often bears earmarks of a swindle.

We do not claim to know all that can be learned about the manufacture of wall coatings, but twenty-five years of experience must count for something, and the fact that **ALABASTINE** is the goods that are in demand speaks volumes in its favor.

Never until **M. B. Church** introduced **ALABASTINE** was it found practicable to make wall-coating adapted to be mixed with cold water.

We own the patents on the cold water process, and this statement is our only argument at this time on that point.

ALABASTINE is healthful and beautiful, has stood the test of time; is manufactured in Canada, and recommended by leading sanitarians throughout the country. There is nothing "just as good." Buy only the genuine.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

CANADIAN AND FOREIGN HANDLES.

THE agreement reached by the Canadian Handle Association has not been attended with the results that it was expected would follow therefrom.

It is stated that the handle manufacturers were under the impression that the members of the Canadian Hardware Association would consent to confine their purchases of handles to the Canadian article. This was in part agreed upon by Western firms, who virtually gave the manufacturers to understand that all the houses in Canada would do likewise. But when a deputation from The Canadian Handle Association was met by the Montreal hardwaremen, in a meeting at which the trade was well represented, there was not by any means a unanimity of opinion on the subject.

While some firms agreed to buy only the Canadian handle, others have so far refused to bind themselves to any such agreement. The members of The Canadian Handle Association were very much disappointed over this, and a meeting is being held to consider whether to take any further steps in the matter. No definite and final answer, however, has been given by the hardware firms, and it is thought by some that they will yet agree to handle only the Canadian goods.

While it is to be regretted that the trade cannot see their way clear to come to the manufacturers' terms, yet it must be said that such is much easier to do in the West, where American handles have not taken such a hold, than in Montreal and that vicinity where a demand has sprung up for the white handles of the United States that must be met, and where a prejudice—though a very silly one—has existed against the red wood handles. Why it is that the matter of color enters into the purchase of a handle so much is hard to tell. Our manufacturers have no difficulty in selling their goods in England, no matter what may be the amount of red wood they contain. The wood is certainly superior to that of the United States, the handles are as well made, and are of greater value, notwithstanding color, than anything of the kind produced by American manufacturers.

He is a foolish man who believes he is perfect; but he is a wise man who strives to get as near perfection as possible.

UNCLEAN BANK BILLS.

IN the House of Commons, on Tuesday, the question of unclean bank bills in circulation in the Dominion was briefly discussed. It was brought to the attention of the House by Dr. Sproule. The Hon. Mr. Mulock explained that clean Dominion notes could be obtained if anyone asked the banks for them.

This is a matter which has been discussed in these columns before, and it is a pity that something has not been done to rectify the matter. Everyone who is conversant with the unclean character of many of the bills knows that they are not only dirty in appearance, but frequently emit an offensive odor.

Were it not a fact that coin is bulky, and often inconvenient, the unpopularity of paper money, on account of its uncleanliness, would certainly cause people to use the coinage rather than the latter.

As Mr. Mulock pointed out, clean bills can be obtained on application to the banks, and it is to be hoped that business men, particularly, will, by carrying out this suggestion, bring about the use of cleaner money, and cause that which is unclean to be kept out of circulation.

A more drastic, and perhaps a more effective, remedy would be to compel in some way the banks to keep back from circulation dirty and offensive bills that pass through their hands.

It is obvious that some severe measures should be adopted to abate the evil. It is to be hoped that some good will result from the ventilation which the subject received in Parliament, superficial and all as that ventilation was.

WHY GOODS ARE NOT DELIVERED PROMPTLY.

HARDWARE AND METAL has on several occasions within the last few months referred to the scarcity of steel and iron, and the difficulty of getting delivery, in many instances the manufacturers refusing to accept orders unless for delivery from three to nine months hence. The scarcity in these particular lines is to some extent reflected in products of a higher state of manufacture. The wholesale hardware houses are receiving letters from the manufacturers explaining that it is impossible for them to fill orders promptly.

While this does not apply to manufacturers in all lines, yet it does to quite a few. This is particularly true in many lines of builders' hardware and tools, such as Maydole's hammers, Disston's saws, auger bits, and many other lines in mechanics' tools.

One manufacturer writes this week to a Canadian jobber to the effect that he would not be able to fill an order recently placed with him for a least four and a half months from the date of receipt of same. Many of the manufacturers, particularly in the United States, report when being pressed on account of the non delivery of goods that they are in many instances five months behind with their orders.

A good many importers in Canada, who were closely watching the trend of affairs in the iron and steel market, placed early in the season orders for goods which they thought would carry them over until the fall. In not a few lines, stocks of these goods are already exhausted, and they are unable to fill either their customers' orders or to get an immediate supply of goods from the manufacturers.

As we pointed out in a previous issue, the harvest tool manufacturers in Canada are very much handicapped on account of the scarcity of malleable iron.

There does not appear to be any sign of relief, particularly in view of the continued scarcity of iron and steel in their cruder forms. The rolling mills in Canada are all overtaxed to supply the demand for bar iron, and the representatives of some of the mills are still refusing to book orders, particularly if they are required to be filled within the next few months. The bolt manufacturers are, in turn, also getting more business than they can take care of, at any rate in a way that would satisfy their customers. The machine men and boilermakers are all very busy, and find it difficult to get a sufficient number of hands to carry on their work. Some of them, we learn, desire to run night and day shifts, but are unable to do so for this reason.

HARDWARE AND STRUCTURAL IRON

AS hardwaremen are already aware there is a large and increasing use of steel in the construction of buildings throughout Canada, as well as in the United States. While hardwaremen do not carry structural material in stock, it is no reason why they should not derive some benefit from the business in this line.

No doubt, by keeping their eyes open they would learn of opportunities whereby they might become the medium for doing business with the structural manufacturers. The Hamilton Bridge Works Co., of Hamilton, Ont., is, for example, one of the Canadian manufacturing firms who are making a specialty of structural material, and they are prepared to quote prices to the hardware trade. We would advise hardwaremen throughout the country to communicate with this company, and thus be placed in a position to take advantage of any business that might be offered in their respective localities.

NOVA SCOTIAN COAL FOR ONTARIO.

THE question of Nova Scotian coal being supplied to consumers in Ontario has been at times for a generation or more a subject for discussion. When, in 1879, a duty was put on bituminous coal, it was for the purpose of encouraging the home industry, and, possibly, eventually getting Nova Scotian coal into the Western Provinces.

The farthest, up to the present, any coal from Nova Scotia has come west is Brockville, and that was only one cargo.

In 1886, finding that the efforts to bring Nova Scotian coal into Ontario had failed, and, in order to encourage the establishment of blast furnaces in that Province, anthracite coal was placed on the free list, leaving the duty on bituminous as before.

The question of bringing Nova Scotian coal into Ontario has again been revived within the last week. A despatch from Sydney, Cape Breton, stating that arrangements were being made whereby barges would carry grain from Kingston to Montreal, and bring back coal on the return trip. Mr. Elias Rogers, of Toronto, the well-known coal merchant, and Senator Cox, who are both directors of the Dominion Coal Co., are said to be strong advocates of the undertaking. It remains to be seen whether the present efforts will be any more successful than those which have hitherto been made.

Ontario, of course, is a large buyer of bituminous coal, importing, as she does, nearly 3,000,000 tons, valued at about $4,227,000.

APPEALING TO THE PREMIER.

A DEPUTATION, representing the Toronto Board of Trade and the Canadian manufacturers, is to wait upon Sir Wilfrid Laurier on Tuesday next in order to impress upon him the necessity for the establishment of a Canadian trade office in London, and also the appointment of a Canadian trade commissioner there.

We are glad to see that these two influential bodies have taken upon themselves the task of jointly impressing this most important matter upon the attention of the Government. It is now two or three years at least since HARDWARE AND METAL first took this matter up, urging it upon the attention of Sir Richard Cartwright, the Minister of Trade and Commerce. Since then the Manufacturers' Association has been most active and persistent in the advocacy of the same, but Sir Richard seems to remain obdurate, and it is only proper that the matter should now be pressed upon the Premier himself.

There is no question about the need of such an office and of such a commissioner in London. Canada in this respect is far behind Australia. Canadian manufacturers and merchants who visit London on business have had this necessity impressed upon them time and again, but so far they appear to be unable to impress it upon the Minister of Trade and Commerce. The Premier has shown himself to be more impressible in other matters affecting the welfare of Canada, and, it is to be hoped, that he will also in this particular.

HARDWARE WINDOW DISPLAYS.

Hints and Suggestions . . . by an Expert.

NOW that housecleaning time is around once more and as many articles in the hardware line will be required "it's up to" the hardware window man to keep his trims frequently changed with such lines of merchandise as are required at this season. This journal presents in this issue an illustration of a catchy window display of paints and brushes. The illustration describes itself. The sign in centre is the main feature of this trim. The sign is painted on black cotton or print. Lettering is done in white. The cotton is stretched tightly on a frame. A display of somines are shown, as they are necessary adjuncts of each other. The general display usually seen in hardware windows is more or less confusing. All kinds of articles are jumbled in together and no special line appeals to the passer-by. It is therefore better, when possible, to stick to one line at a time. A good plan to try just at this time of year would be to make a trim (say, on Monday), of paints and brushes, then on Wednesday or Thursday change the display to one of, say, step-ladders only. These are in great demand just now for housecleaning. Price ticket difficult to display. An attractive exhibit of these goods was recently made in one of the big concerns in Toronto. The rough drawing shows design made of one-inch lumber on which the various articles were shown. This design was covered in green felt. The goods were composed of the following, and were attached to the design with wire nails : Chisels, bits, planes, squares, files, braces, levels, etc. (See design.)

The design was propped up by supports from behind. The goods were arranged in fancy designs. The floor was covered in

NO. 1.—CATCHY DISPLAY OF PAINTS AND BRUSHES.

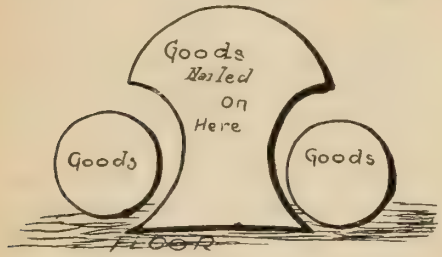
this kind is sure to be a business-bringing window. Any one in need of paints, or such goods as are shown here, could not help being impressed with the idea that this was the place to purchase.

Individual Displays.

Much better results will be obtained by showing only one line of goods at a time. In this way one particular line is brought to the observer's notice. There are exceptions to this idea, however, as in the case of the display of paints, where brushes and kal- each window, or each line of goods shown. Leave the ladders in a few days, and then change the window to one of garden tools. When these have had a few days' showing, make a display of screen doors and window screens, or refrigerators, or some such seasonable goods.

Don't forget that where goods are price-ticketed in the window the chances for disposing of them are greatly enhanced.

Builders' tools are also in demand just at this season of the year. This is a line very green felt, and the heavier articles were arranged neatly on it.



Cutlery and Plated Ware Display.

The illustration No. 3 shows a neat arrangement of table cutlery and plated ware. A solid background of ½-inch lumber is covered in black canton or felt. A design is drawn out with a piece of chalk and the goods are placeed on over the out-lining. The spoons are attached with pins. Bottom of window is puffed with black material, and the goods are arranged on

it. A neat ticket calling attention to the complete stock of cutlery would have added to the effectiveness of this trim.

Displays of Small Articles.

A good idea for stimulating trade through the windows is to take about a dozen small baskets, or as many as the window space

No. 2—Background for Displaying Tools.

will allow, and fill each basket with a line of small articles, staple goods, or little things that are in demand for everyday use. For instance, fill one with, say, tack-pullers, another with can-openers, scissors, corkscrews, penknives, forks, spoons, yard measures, screwdrivers, tack-hammers, files, gimlets, stove polishes, or any lines of small articles in tinware, agateware, etc. Arrange these on the floor of window and in each place a price ticket in large, bold letters. From this style of window great results are generally obtained. People are always attracted to a window by price tickets. Try this idea by way of experiment.

A Neat Trim.

A neat trim of hardware was recently seen in one of the big city stores. Carpenters' tools were used exclusively. Three wooden panels were used to show the goods on. They were about 3 ft. wide and about 7 ft. high, made of 1 in. thick lumber and covered in red felt. Two of them were covered with tools and placed in the window on an angle. The other was placed in centre of window and had nothing on it but a sample of every kind of door knob kept in the stock. A card on this read "A Knobby Door." The other panels had every article priced with a small, neat price-ticket. The floor was covered with the larger articles among the builders' stock. H.H.

No. 3.—Cutlery and Plated-ware Design.

LONDON BOARD OF TRADE.

THE London, Ont., Board of Trade held its annual meeting on May 3, and elected officers for the year ensuing. The result of the elections was as follows :

President—C. B. Hunt.

Vice-President — J. R. Minhinnick.

Secretary - Treasurer — J. A. Nelles.

Auditor—John Bowman.

Council—John Bowman, Jeremy Taylor, W. M. Gartshore, James Mattinson, John McClary, P. W. D. Broderick, A. B. Greer, J. W. Little, R. D. McDonald, G. deC. O'Grady, W. J. Reid and T. H. Smallman.

Board of Arbitration — W. C. Allen, J. H Ginge, C. S. Hyman, A St. L. McIntosh, John Pringle, J. A. Carrick, A. O. Graydon, C. W. Leonard, John McClary, D. S. Perrin, A. H. Beddome and F. G. Rumball.

Board of Examiners—J. I. A. Hunt, J. A. Carrick, John Sutherland.

Western Fair Representatives—John Bowman, J. W. Little, John Minhinnick, A. B. Greer, James Mattinson, W. J. Reid.

According to the yearly financial statement of the secretary-treasurer, the cash on hand in April, 1901, was $3.06 ; members' fees for 1901, in April 1902, $385 ; members' fees for 1902 paid, $150 ; total, $538.06. The disbursements amounted to $454.47. The assets were given as $933.59, with liabilities of $433. This report was adopted.

Statistics regarding the lead mining industry of British Columbia were received from the Nelson, B.C., Board of Trade, who are seeking assistance in their endeavor to have a higher import duty placed on lead.

The London, England, Chamber of Commerce wrote, urging that Canadian boards press for the enactment of a Dominion Insolvency Law.

A letter was received from Paul Jarvis, secretary of the Toronto Board of Trade, inviting representatives from the different boards of trade in the Dominion to be present at a conference to be held in Toronto on June 4, 5 and 6. The conference of the Colonial Premiers at London was deemed an exceptional opportunity for the presentation of many questions of great importance to Canada and resolutions will be submitted at the Toronto conference, and if adopted they will be given to Sir Wilfrid Laurier to bring before the conference in London. Among the questions instanced as deserving the consideration of the conference were cited the following : Trade relations within the Empire, transportation, defence, postal and telegraph communication, the recent action of the Imperial Government whereby a duty has been levied upon wheat and its products, without preference to the colonies.

President Hunt and James Mattinson were appointed to attend the conference in Toronto.

The secretary was instructed to write to the Post Office Department, asking for better mail arrangements on the L. E. & D. R. R.

SILVERWARE FOR HOTELS AND STEAMERS.

As mentioned in our previous issue The Toronto Silver Plate Co., Limited, are exceptionally busy. Another large order in hand is the silverware for "The King Royal" Hotel Co., of Owen Sound. It speaks well for the designs and quality of this company's goods that they are successful in securing so many orders of the kind, as no severer test for silverware can be had than hotel, club, steamboat and dining-car use.

Last week this company also shipped the silverware for the new steamer Huronic, built by The Northwest Transportation Company, and the week before for the steamer Montreal, built by The Richelieu and Ontario Navigation Company. In both cases they supplied complete services.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

James P. Carey, tinsmith, Granton, Ont., has assigned to Annie Carey.

H. Cairns & Co., general merchants, Sawyerville, Que., have assigned.

Edgar S. Durham, harnessmaker, Bradford, Ont., has assigned to John Elliott.

John Heppler, jr., harnessmaker, New Hamburg, Ont., has assigned to Jacob Heppler.

George Tuck & Co., asbestos and mill supplies, Montreal, have assigned to Kent & Turcotte.

The creditors of Joseph Savarie, general merchant, St. Antoine Abbe, Que., have held a meeting.

The creditors of George H. Harshaw, general merchant and hotelkeeper, held a meeting on April 8.

Wm. James Chapman, harnessmaker, Port Elgin, Ont., has assigned to J. A. Chapman, and his creditors held a meeting on May 9.

The creditors of E. N. Hurtubise & Co., general merchants and sawmill proprietors, Ottawa and West Aylwin, will hold a meeting on May 14.

PARTNERSHIPS FORMED AND DISSOLVED.

McDonald & Werner, stove and tinware merchants, Mitchell, Ont., have dissolved. Angus McDonald continues.

David Campbell & Son, coopers, etc., Montreal, have dissolved, and David Campbell has now registered.

Thompson & Allen, general merchants, Port Elgin, N.B., have admitted J. G. Lamb as partner, and the style is now Thompson, Allen & Lamb.

SALES MADE AND PENDING.

The assets of F. G. Dunning, general merchant, Beloeil, Que., have been sold.

J. Cobley, blacksmith, Caistor Centre, Ont., is advertising his business for sale.

Jacob Gallinger, blacksmith, McDonald's Corners, Ont., is advertising his business for sale.

Zryd & Co., hardware and paint and oil merchants, Hespeler, Ont., are selling out.

The real estate and book debts of James Ritchie, sr., blacksmith, Amherst, N.S., have been sold.

The stock of Hawkins Bros., general merchants, Blind River, Ont., has been sold.

The assets of P. Langlois, general merchant, St. Gregoire, Que., are to be sold on May 14.

The assets of C. A. Miller, general merchant, Windsor Mills, Que., are to be sold on May 14.

The assets of L. B. Fontaine, general merchant, St. Jacques L'Achigan, Que., have been sold.

The assets of Ovide Martin, general merchant, St. Guillaume D'Upton, Que., are to be sold on May 9.

CHANGES.

Brunet & Calestagne, painters, Montreal, have registered.

F. F. Powell & Co., roofers, etc., Montreal, have registered.

Urgele Carriere has registered for A. Carriere, painter, Montreal.

RIGHT NOW

during the busy paint season is when the full value of

THE SHERWIN-WILLIAMS
PAINT AND VARNISH AGENCY

is best appreciated.

It is now that our agents are reaping the greatest benefit from our immense selling organization. It is now that we are working hardest for them, giving them helps that enable them to do the biggest paint business in town—helps that bring paint orders every day in the week—helps that increase the sales in every department of the store.

There is more money and greater satisfaction for the dealer and consumer in The Sherwin-Williams Paints and Varnishes than in any other paints and varnishes in the market.

If you want to investigate the real worth of our goods—if you want to know how we get business for our agents—if you want information that will lead to a good paying paint trade, let us know and we'll send you the B-13 booklet, and refer you to merchants in towns near by you who are making money out of our goods.

THE SHERWIN-WILLIAMS CO.
PAINT AND VARNISH MAKERS.
CLEVELAND.
CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

P. W. Cass, blacksmith, Hartland, N.W.T., has closed business.

W. H. McIntyre, pumps, Brandon, Man., is out of business.

Goulet & Tetreault, general merchants, Beloeil, Que., have registered.

Sam Rosenhek, general merchant, Oxford, N.S., has sold out to M. Cohen.

R. E. Reardon succeeds the late Wm. Reardon, broom manufacturer, Ottawa.

M. M. Tingley, general merchant, Albert, N.B., has removed to Amherst, N.S.

J. Rosenhek, general merchant, Campbellton, N.B., is succeeded by Rosenhek Bros.

Frank Dowkes, general merchant, Venlaw, N.W.T., is succeeded by F. L. Walker.

L. Guibord, general merchant, St. Ligouri, Que., is removing to St. Felix de Valois.

The estate of W. K. Kains, general merchant, Treadwell, Ont., is to be succeeded by J. O. Smith.

A. O. Veitch, general merchant, Richmond, Bayhan P. O., Ont., has sold out to M. C. Moore.

David F. Williams, general merchant, Port Burwell, Ont., has sold out to Savage & Wilson.

A. J. Hughes, lumber and implement agent, Souris, Man., has sold out to T. L. Arnett.

The Metallic Roofing Co., of Canada, Limited, Toronto, has opened a branch at Winnipeg.

The estate of James Hamilton, hardware merchant, Woodstock, Ont., has been sold to W. S. Rogers.

W. G. Elliott, agricultural implement agent, Pilot Mound, Man., is succeeded by Elliott & Gemmell.

A. M. McLean, general merchant, Jacquet River, N.B., is selling off his stock to close his business.

John Sussex, blacksmith and agricultural implement agent, London, Ont., is succeeded in blacksmithing by Alex. Johnston.

Fred Mullet, harnessmaker and dealer in leather and findings, Bancroft, Ont., has sold his harness department to Geo. Mitchell.

Douglas & Co., wholesale and retail hardware merchants, Amherst, N.S., are closing their grocery branch.

George Elliot, general merchant, Hamiota, Man., has sold his branch store at Crandell to Larimer & Brown.

FIRES.

F. G. Wurster, general merchant, Preston, Ont., has suffered loss by fire.

J. Arthur Gardiner, blacksmith, Villagedale, N.S., was burned out. There was no insurance.

DEATHS.

Wm. Hearle, tinsmith, Beamsville, Ont., is dead.

Alphonse Goyer, hide merchant, etc., Montreal, is dead.

Angus McDonald, general merchant, River Hebert, N.S., is dead.

J. Wesley Ross, wood merchant, Northeast Margaree, N.S., is dead.

Moses Staunton, president of Stauntons Limited, manufacturers of wall paper and window shades, Toronto, is dead.

A GOOD LINE TO PUSH.

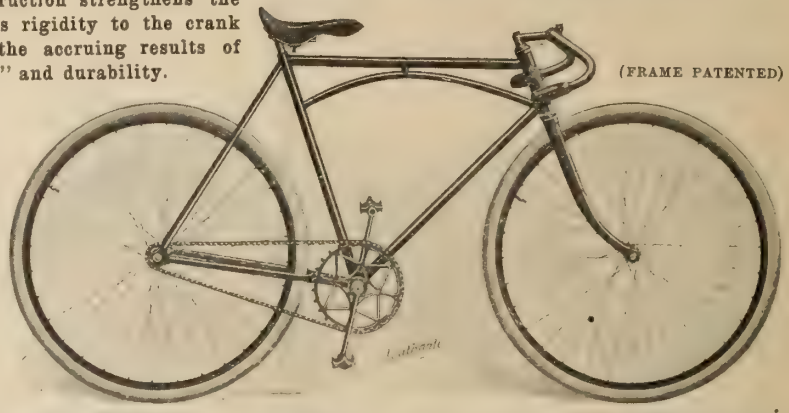
THE World's Knife-cleaning Machine (which is fully patented all over the world) is a line which should at once attract the attention of every Canadian hardware buyer, as this little machine is a perfect wonder, and does the work much better than the large and expensive machines that are only suitable for hotel use. The price of the "World's" being but $4.50 places it within the reach of every housewife, being suitable for restaurant, hotel, club, etc., and it only requires to be shown to sell very rapidly.

In England, during the past year, over 25,000 machines were sold, and the sales are increasing each month. The proprietors, viz., The World's Manufacturing Co., 66 and 68 Victoria street, London, S. W. Eng., are enterprising and supply all their customers with most expensive and attractive display cards to boom sales.

On page 18 will be found their full-page advertisement which speaks for itself. The machine is of English make throughout.

The following description of the machine will no doubt be of interest. The use of two buff-covered discs for the purpose has been tried before with success, but to the best of our recollection this is the first time that the method has been employed horizontally. The result, as will be gathered from the illustration, is a compact machine. The base is of cast iron, and the internal frames, guards and neck are substantially constructed of the same material with steel spindle. The whole is neatly encased in a domed-sheet steel case. By a simple but ingenious device, the pressure of the upper disc on the lower can be nicely regulated by means of a screwed cap on the boss of the handle, and there is nothing whatever to damage or wear the knife, the spindle only being attached to

the top disc, driving power being given to the bottom disc by an ingenious contrivance. The knife is inserted on one side, and a guard is fixed here to support the handle whilst cleaning the bolsters, the back of the knife being also cleaned in the one operation. On the opposite side a second opening is provided through which the point of a large carver or any other long knife projects whilst the lower portion is being cleaned. Both openings are thoroughly well protected with leathers. Provision is made for the introduction of powder at the top, which automatically feeds through holes in the upper disc, and should any eventually collect in the base, the blade of a knife will withdraw this powder, which may be used repeatedly.



"Honest Cycles at Honest Prices"

A Bicycle so constructed that, with each thrust of the pedal, its hanger is forced to move out of alignment, **RUNS HARD** and will not wear well, as chain, sprockets, bearings and rear wheel are all subjected to unusual strains.

The Iver Johnson Truss Frame is the Solution

as this construction strengthens the frame and adds rigidity to the crank hanger, with the accruing results of "easy running" and durability.

IVER JOHNSON'S ARMS & CYCLE WORKS,

New York Salesrooms - 99 Chambers St. FITCHBURG, MASS.

THE BELLEVILLE BUSINESS COLLEGE, LIMITED

BELLEVILLE, ONTARIO.

Send for handsome Catalogue fully describing all Courses taught. J. Frith Jeffers, M.A, Principal.

We saw a machine tested in the company's warehouse, and have since subjected another to several tests under ordinary household conditions. We find that the knives are well and quickly cleaned with very little labor, and no strain whatever on the handle of the knife, and that there is nothing approaching dust or mess attending the operation. The base, dome and handle of the machines are highly finished in electro copper plated. The other external mountings are brass, and the dome is lettered in gold and makes a handsome ornament for any kitchen. There seems very little indeed to get out of order, but should any part require renewing at any time, the fittings are made interchangeable, and as everything is put together with screws and nuts, repairs should be easy and inexpensive. The weight of the machine, each packed in a wood case, is about 12 lb., and the size 11 x 11 in. and 7½ in. high.

We regret space forbids us to say more about this invention, and should recommend every dealer or merchant to order a stock at once, and feel sure he will never regret it.

A BIG TRANSPORTATION SCHEME.

A SYNDICATE has taken it in hand to provide a proper system of grain and general freight transportation from the great lakes to Montreal. Several prominent Canadians are interested in this scheme, among them being James Playfair, vice-president and general manager of The Midland Navigation Co., Midland, Ont.; John Bertram, president of The Bertram Engine Works, Toronto, and Joseph Kilgour, of Kilgour Bros., Toronto.

This company is at present in communication with the Montreal Harbor Board, asking them to recommend their project to the Government. As stated in the communication their plans are to erect elevators at Montreal and the Upper Welland canal. The elevator at Montreal would have a capacity of 1,000,000 bushels, and the other, at Port Colborne, a storage capacity of 2,000,000 bushels.

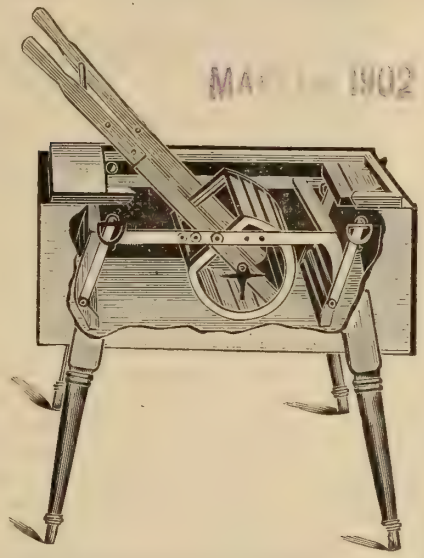
To provide the money for the building of these elevators a bond issue to run 30 years and bearing interest at the rate of 4 or 4½ per cent. is proposed. A sinking fund will be provided for in the bonds sufficient to pay them off at maturity.

The Government is desired to support the measure to the extent of guaranteeing the interest of the bonds of the company and the furnishing of free sites in localities where Government lands were suitable for the purpose.

It is hoped that by having elevators at Montreal ocean vessels could regularly come up the St. Lawrence for cargoes, as freight would be always awaiting them there. Grain would be attracted to Montreal through Canadian waterways and railways, and a regular and continuous carriage of Western grain to Montreal would take the place of that carriage which is now intermittent.

At present a large portion of the products of Western Canada reach the sea through United States channels. It is hoped by the scheme mooted to remedy this.

SATURDAY HALF-HOLIDAY IN ST. JOHN.



A number of hardware stores in St. John, N.B., have decided to give a Saturday half-holiday during the three months of summer. The firms are as follows: W. H. Thorne & Co., Kerr & Robertson, John W. Addison, Emerson & Fisher, H. Horton & Son, T. McAvity & Sons, S. Hayward Co., Limited, Miles E. Agar, I. & E. R. Burpee, John J. Barry.

POSSIBILITIES OF STEEL SHIP-BUILDING IN NOVA SCOTIA.

A PAPER was recently read before the Imperial Institute, London, Eng., by Mr. John Howard, the Agent General in Great Britain for Nova Scotia, on the possibilities of steel shipbuilding in the Province he represents. In part, he said :

"With such magnificent coal resources in our possession, and the establishment of the steel and iron works already referred to producing the cheapest material in the world, the attention of capitalists was bound to be drawn to the advantages which exist for the building of steel ships. Thirty years ago, when most of the carrying trade of the world was done in wooden ships, Nova Scotia owned more tonnage in proportion to population than any other country, and her flag was to be met with in every important port of the world. With suitable timber at hand to be had for the cutting, almost every little fishing village boasted its shipbuilding yard, and the busy hammers of the workers were to be heard all day long. As, however, the substitution of iron ships increased, this industry gradually decayed, and although there are still a large number of small wooden vessels being built it does not attain to anything like its former proportions.

"There is no doubt that if Nova Scotia is again to compete in the carrying trade of the world, with a view of attaining to her old, proud position, it must be achieved by iron and steel vessels. I may point out that New Glasgow has already had the distinction of constructing some steel vessels (due, no doubt, to the proximity of the old Nova Scotia Steel Company's works), but they have been of small tonnage owing to the character of the East River. It is to be hoped, however, that in this respect New Glasgow will follow in the footsteps of her old namesake.

"The Nova Scotia Government has already offered a large bonus to the first company establishing a shipyard, capable of building steamers of 5,000 tons, with exemption from taxation for 20 years on all ships built and registered in Nova Scotia. A member of one of the principal shipbuilding firms in this country, who has lately visited the Province, after emphasizing the difficulties in the way of establishing a steel shipbuilding plant in Nova Scotia, is reported to have said : 'I am persuaded that the cheapest steel ships in the world can be produced in Nova Scotia.' Whilst reminding us that the cost of skilled labor will probably remain higher than in Europe, he confidently anticipates a very superior class springing up which will do credit to the country. The higher cost of labor, moreover, will be more than counterbalanced by the cheapness of steel production and in other directions.

"In view of the disabilities under which the industry would labor in its initial stages, it is thought necessary that sufficient encouragement should be forthcoming from the Dominion Government in the shape of a bonus, in order to equalize the situation with that prevailing in Great Britain, Germany and the United States. It may safely be said that there is no industry so weill calculated to meet the aspirations of Nova Scotians as that of steel shipbuilding. Their strong maritime characters, knowledge of construction, and practical acquaintance with its details, are such important factors in the successful prosecution of such an enterprise, that we may look forward to the result with every confidence."

MOISTENING AIR.

THE process of contributing moisture, in quantities desired, to the moving air which is supplied to the modern public school houses in Rochester, N.Y., says The Press, of that city, is claimed to contribute materially to the comfort and health of the teachers and pupils and is warmly approved by physicians. Under the new system the water is evaporated in the boilers and supplied to the moving air in the form of vapor, under conditions which insure automatic regulation. Standards differ somewhat, but the ideal English system is said to be air at a temperature of 50 degrees F., with 55 per cent. moisture. The temperature of the school rooms in Rochester varies from 60 to 65 degrees F., and the percentage of moisture is somewhat lower than in English practice. When the temperature is at 70, or above, the plentiful supply of moisture is said to make the atmosphere in the school rooms oppressively humid. Under modern conditions this humidity is under absolute control.

It is stated that 15,000,000 cubic feet of air is driven through the rooms and halls of the new No. 6 school building daily. To supply the desirable moisture requires as much horse power as is required for supplying the pure air. It is held by physicians that the addition of moisture to the air supplied to the school rooms is absolutely necessary, in order to avoid catarrhal and other similar difficulties. The affinity of the air for moisture is so great that the absorption of moisture from the system goes on very rapidly, with the bad effects referred to. So great is the amount of water added to the air furnished to the school rooms, that it is stated that the effect is equivalent to that of hanging cloth, saturated with water, on all the walls and ceilings. When properly supplied, and not in excessive quantities, the moisture is said to materially improve conditions.

CARS FOR THE SAULT.

Eight cars have just been completed by The Ottawa Car Co., Ottawa, for the electric street railway company of Sault Ste. Marie, Mich. They are 30 feet in length over the cover posts and 42 feet over the bumpers, eight feet high, and mounted on double trucks with two sets of coil springs and a half elliptic spring on each set, making an easy-riding car. The car is equipped with five cross seats in the centre, on each side, and longitudinal seats at each end. The ends are vestibuled and the cars will be entirely open in summer. They will be heated and lighted by electricity.

INQUIRIES ABOUT CANADIAN TRADE

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London.

1. A firm of organ makers have asked to be furnished with the names of shippers of whitewood from Canada.

2. A French firm, manufacturing ladies' Parisian clothing of the highest class, make inquiry respecting the best means of getting into touch with Canadian importers of such goods.

3. A firm at Leith, Scotland, make inquiry respecting the wood pulp trade of Canada, their object being to interest themselves in the importation of sulphite pulp.

4. A Lancashire firm desires to correspond wit buyers in Canada of steel wire screening, such as is used in stamp batteries in the gold mining districts.

5. An English firm of manufacturers of table glass of the best quality make inquiry respecting the market that exists in Canada for these goods.

6. A firm in Scotland manufacturing tweeds are desirous of opening up business relations with Canadian houses purchasing such goods as they export.

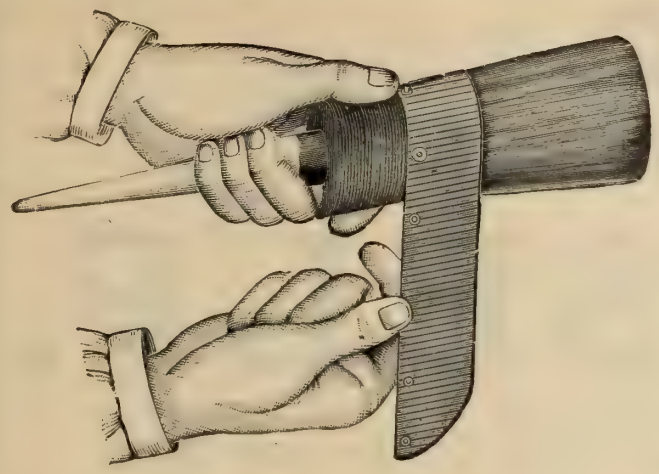
7. A general commission merchant at Nannheim, Germany, is interested in the importation of wood pulp and feeding stuffs, bran, etc., from Canada, and wishes to get into touch with exporters.

8. The English manager for a firm of Dutch cigarmakers makes inquiry respecting the export of these goods to Canada.

Inquiries received by the Canadian section of the Imperial Institute:

1. A London house dealing in macaroni, vermicelli, essential oils, candied peels and similar lines, wishes to get into touch with Canadian importers.

2. A manufacturer of cycle rubber goods asks to be placed in communication with Canadian houses using these articles.



3. A North Country manufacturer of grocers' and druggists' specialties is prepared to appoint Canadian resident agent.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

NEW ENGINE AND BOILER COMPANY.

LETTERS PATENT have been issued incorporating Alexander Watt, baker; Jacob Abraham Jacobs, merchant; Edward Albert Mahon, manager; Frank Henry Sleeper, inventor; Allan Robinson Oughtred, all of Montreal, for the following purposes: The manufacture of engines and boilers and all the accessories thereof, of fans, electrical machines of every description, and generally all machinery for the production of motive power, by the name of The Sleeper Engine Co., Limited, with a total capital stock of $250,000 divided into 2,500 shares of $100 each.

AN IMPORTANT AMALGAMATION.

The John Abell Machine and Engine Company, of Toronto, has amalgamated with The Advance Thresher Works, of Battle Creek, Mich.; and The Minneapolis Engine and Threshing and Engine Company, of Minneapolis, Minn.

Although the directorate of the amalgamated company or the amount of capital stock has not yet been announced, it is stated that the control will be in the hands of the United States capitalists.

The John Abell works will be run at full capacity to supply the Canadian trade and foreign markets.

The present John Abell Engine and Machine Company has an authorized capital of $500,000, of which $375,000 is paid up. The president and general manager is John Abell; assistant general manager, Henry Abell, and secretary, Chas. J. Agar. Last February the prospectus was issued for a reorganized company with a capital of $1,000,000, and W. D. Matthews, Robert Kilgour and others were named as directors. No stock was sold under this prospectus and it had nothing to do with the present amalgamation.

PUTTING IN A MODERN MACHINERY PLANT.

The Hamburg Manufacturing Company are erecting a large sash and door factory at Brandon, Man. The new factory will be on Fifth street and Assiniboine avenue, and will consist of the factory proper, boilerhouse and engine room, and a drying kiln. The factory itself will be two storeys high, of solid brick, 50 x 100 feet, and will contain modern machinery to manufacture all kinds of sashes, doors, blinds and interior house furnishings.

A system of exhaust fans and pressure blowers for driving away all chips and shavings from the machinery will be installed and the machinery will include planers, matchers, rib, rip, cut and band saws, three and four-sided moulders, blind machinery, door polishers, buzz planers, grooving machines, blind mortiser, turning lathes and other labor-saving machines.

The engine room and boiler room will be 25 x 50 feet and will contain an 80-horse power engine and two 75 horse-power boilers.

Above the boiler and engine room will be the veneer and glueing department. It will be separated from the rest of the building and will be heated with hot steam pipes. The drying kiln, 36 x 60 feet, will be fitted up with the Surtevant system, and will be run by a separate engine.

Tubs and pails will also be manufactured in connection with the factory. They will be made of spruce, and special machinery is to be installed for their manufacture.

ENLARGING BRANTFORD FACTORIES.

Several Brantford, Ont., factories are enlarging their premises. The Goold, Shapely & Muir Company are preparing plans to make a large addition to their factory owing to the increasing demands for their gas engines. The Pratt & Latchworth Iron Works are building a new structure 71 x 175 feet. The Cockshutt Plough Company are hunting for a new site on which to erect buildings of double their present capacity. The Ham & Nott Company are constructing two shops, one 30 x 80 feet, and the other, 40 x 50 feet. The Shultz Bros. Company are enlarging their factory, and The Verity Plough Company are making ready to construct two additions to their foundry and pattern departments that will double their capacity.

SANTOS-DUMONT AND EDISON

One of the first visits of Santos Dumont was paid to Thomas A. Edison, at his Orange laboratory. According to the daily press, the chief topic discussed was the provision of a light motor for the young Brazilian's airship. Edison is said to have remarked that he never gave his attention to the airship, for the reason that it seemed to him of no commercial practicability as yet, and that he concerned himself only with inventions of commercial promise.

AN OLD ENGINE'S RESTING PLACE.

A Watt engine which had done service for 102 years was removed lately from its sphere of usefulness to a London museum. In the old days substantial work must have been done or this engine could not have lasted so long. It is believed that the oldest engine now in service is one at a colliery near Rutherglen, Scotland. This is a Newcomen engine erected in 1802. Since that time it has been in continuous service, and has needed no important repairs. Brasses, of course, have had to be replaced, and a wheel or two, but otherwise the engine needed no fixing, and still is in good repair.

MACHINERY TRADE NOTES.

Robb & Sons, machinists, Pictou, N.S., have registered their dissolution of partnership.

At a meeting of the London, Ont., Board of Trade held on May 3 a letter was read from The Bertram Engine Works, Toronto, stating that they were considering the advisibility of establishing shipyards at Port Stanley, and that they would inform the board of their movements in the matter.

A NEW FIRM.

Ballard Tool and Equipment Co. is the style of a new firm that has recently started in business at 128 Bay street, Toronto. The firm makes a specialty of machine shop tools.

MAKE MOTORS AND MACHINES.

Among the recent new firms which have opened up in Toronto is The Dominion Motor and Machine Co. The place of business is on Esplanade street. The members of the firm are practical machinists, and attention is to be given to the making and repairing of motors, gasoline engines, and machinery in general.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN' - DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."

It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

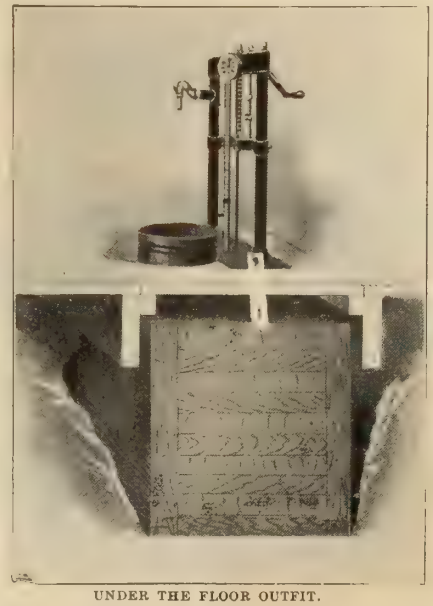
$500 in Cash and Diamond Prizes

For Record Bait-Casting.



You can enter the great Shakespeare Bait-casting Tournament without expense, make all your trials at your own home and win some of the magnificent prizes offered each month this season, for the longest bait-cast. Many beginners can equal professionals the first month and win prizes and break the world's records.

$100 in Prizes for Largest Fish

Write me to-day. The New Shakespeare Reel meets the wants of the critical fisherman whose purse is limited. It is the highest grade reel on the market and none sold at twice the price can touch it. Shakespeare Reels and Baits are sent free on trial, express charges prepaid, to any angler who sends name and address. The Shakespeare Revolution Bait makes the biggest black bass strike when no other bait—live minnows or frogs—can tempt him. They catch big strings of fish for people who never caught fish before. In the water they struggle as if alive and attract game fish from many yards away. Write to-day and try them free of all expense to you.

3 MEASURE SELF MEASURING

Oil Tank?

THERE ARE

100 REASONS 100 WHY YOU SHOULD.

Space will not permit us to enumerate them all and we want an opportunity to tell you all about it.

WE CAN POINT OUT TO YOU DEFINITELY

WHY IT WILL PAY YOU.

To Be Brief, It Will Pay You

Because it will save you money.
Because it measures accurate Gallons, Half-Gallons and Quarts.
Because it gives the customer what he buys and no more.
Because it will prevent all waste and slop.
Because it will soon pay its cost and become a profit-earner.
Because the Bowser is the only All Metal oil pump built.
Because it has the Anti-Drip nozzle.
Because it has the Dial Discharge Register.
Because it has the Double Float Indicator.
Because it has the Double Plungers.
Because it has Full Brass Cone Valves.
Because the tank is of Galvanized Steel.
Because it is the best oil outfit ever built.
Because it is sold under an absolute three years' guarantee.
Because its price is commensurate with its value.
Because you can have your oil tank in the store, under the floor, or in the cellar.

Our Catalogue and "Terse Tank Talks" tell the rest. They are free.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 9, 1902.

HARDWARE.

THE business of the week in hardware has not been as active as during the previous week, the early boats having relieved the rush of shipments and allowed the trade to settle down to more normal conditions. There is, however, still an active demand for goods for delivery at all points, and business with Ontario and places still further west is in good condition. Bamboo fishing rods, which have been rather backward in arriving, have now reached the hands of the trade. Per dozen, the price is 80c. for 16 ft. poles; 90c. for 18 ft. poles, and $1 for 20 ft. poles.

SCYTHES. The demand for scythes at quoted prices is excellent. We quote as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE. There is a scarcity of barb wire still among part of the trade. Some houses, however, have recently received large shipments and are disposing of the goods rapidly. There has been no quotable change, $3 per 100 lb. f.o.b. Montreal being still obtained.

GALVANIZED WIRE. In this market there is a fair to good demand at steady prices, and our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE. A small amount of business is passing at the prices we quoted, but the market is still far from being active. We quote as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is not much doing. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—The market in general has not improved to a great extent. One mill is busy turning out a large order for copper wire, but otherwise there has been no change. Both brass and copper wire are discounted at 60 per cent.

FENCE STAPLES. The demand has been heavy throughout the week, and it is reported that supplies are becoming scarce. We quote as follows: Bright, $2.90 per 100 lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.

WIRE NAILS.—Jobbers report a better business doing in wire nails this week, and a fairly active market has prevailed. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—These are moving rapidly at the price made last week, viz., $2.45 per keg, in small lots, and $2.37½ per keg, in carlots. The discount on flour barrel and coopers' nails is 40 per cent. Three-inch cut nails are not in very good supply at present.

HORSE NAILS.—There is an active inquiry for horse nails. No quotable change has been made, and the discounts are as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Business is brisk. Our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L

steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The market for screws has been active, the demand showing some improvement over that of last week. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—There is an excellent demand for bolts and nuts. No change in price has occurred. Our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Business in building paper is at its best, all houses reporting a good demand. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The demand keeps up well, and no changes have been made in the prices. We quote: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The inquiry for these during the week has been no more than moderate, the trade having become pretty well supplied. Discounts follow: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—A good demand continues, the price remaining at $1.37½ per 100 square feet.

POULTRY NETTING.—There is a good trade doing in this market at unchanged prices. Canadian or English is discounted as follows: 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—A fair trade is doing. The discount is 60 per cent.

FIREBRICKS.—The market has improved somewhat under several shipments which arrived last week. There has been no change in the price. Scotch sell for $19 to $23.50 and English for $18.50 to $22.50 per 1,000.

YOU ARE FACE TO FACE WITH A SERIOUS PROBLEM

when you come to determine whether your business shall be done on cheap goods or on true, honest, fair-priced goods.

"Ark Brand" Paint

is not cheap—but fair-price. It will assist you in building up trade. Cheap stuff will work the other way. Your customers remember quality—they forget price.

If we have not an agency established in your town write to us and we will give you our terms.

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

CEMENT.—Trade in cement is fair and improved. A number of arrivals from abroad have provided good supplies, but no quotable change has occurred. The quotations following are summer prices: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The English metal market, according to recent cables, remains as firm as ever, though displaying much more steadiness. No changes in price, either one way or the other, are reported. Locally, there is a very good trade doing in the general list of metals. Supplies are on the increase, several shipments having been received during the week. Those mills which were closed down owing to the water being out of the canal, have now commenced operations again, turning out flat and round iron in whatever sizes their customers have become short on.

PIG IRON.—An active inquiry exists for pig iron, but the amount of business done is not in proportion, as the scarcity has not been relieved. A contract is said to have been put through for 500 tons of Summerlee. Canadian is quoted at $18.50 to $19 and Summerlee at $21.50 to $22.

BAR IRON.—There is a very good demand for bar iron, merchants' bar being now quoted at $2 by all the jobbers, and horseshoe iron at $2.20. Some sizes in which there was a shortage have become in better supply as the mills have commenced work again. There is still some difficulty, however, in obtaining the small sizes.

BLACK SHEETS.—There is an active demand, and stocks have been increased considerably by recent arrivals. Our quotations are now as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is active and firm. Quotations are: No. 28, Queen's Head, $4.40; "Bell" brand, $4.30; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—There is a fair trade doing in this market. The price is 14c.

INGOT TIN.—The firm feeling in this market continues, but no further advance has occurred. Straits sells for 31c.

PIG LEAD.—The inquiry for pig lead is not active, and the price remains at $3.25.

LEAD PIPE.—There has been no quotable change in this market and the demand is good. Composition waste is quoted at 7½c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—Business continues quite brisk at unchanged quotations, as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ⅛, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Trade is only fair. Charcoals are worth $4.75 to $5.25 per box and cokes, $4.25 per box.

CANADA PLATE.—Quite a few shipments of Canada plates have been received this week, but the market remains firm and prices are unchanged. Some houses are short on 60-sheet Canada plates. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—The market continues active. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.70.

SHEET STEEL.—Trade is quiet and no changes have occurred in quotations: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is nothing new to report in this market. There is not much doing. Jessop's is quoted at 13c.; Diamond at 8c., and Leonard's at $7.50 per 100 lb.

TERNE PLATES.—A considerable quantity of terne plates have lately arrived on this market, but the demand is still light. The price is $7.75 to $8.

COIL CHAIN.—There has been a quiet market during the past week, and the present demand is not active. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—No further change has been made in the price, which is now

$5.85 to $6.25. The market is quiet.

ANTIMONY.—There is little doing. The price is 10c.

ZINC SPELTER.—Trade is fair and the price is unchanged from 5c.

SOLDER.—Business in this line continues satisfactory all round. There has been no change in the price. We quote: Bar solder, 18c., and wire solder, 20c.

PAINTS AND OILS.

Turpentine was reduced in price on May 1 2c. per gallon. Dealers here refuse to admit that this was on account of any great weakness in the Southern market, which, although it did not develop the strength that was expected, still gave no cause for a reduction in the price here. It is stated that the reduction was brought about under pressure from Toronto. Meanwhile the local market is steady. In linseed oil there has been no quotable change. The market, however, is practically bare of oil, and dealers are awaiting the arrivals of the first shipments next week. Paris green continues very active at the prices we quote. In mixed paints and paint materials generally, the demand has been excellent. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Large shipments of scrap metals have arrived on this market, and the scarcity in some lines has been relieved. The local price has been affected by the large orders placed abroad by the rolling mills, deliveries of which are now being made. Machinery scrap is now quoted at $16, an advance of $1, and stove plate at $12, an advance of $1 to $2. Quotations are as follows: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅞ to 2⅝c.; zinc, 2½c.; iron, No. 1, wrought, $17; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼c. per lb.

GLASS.

The market for glass remains very quiet. Shipments have not yet arrived. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There has been no change in the price of hides this week though the market in all lines is firmer and sales of beef hides are said to have taken place at an advance of ½c., owing to the small deliveries. Calfskins are plentiful, and our quotations are as follows: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. No. 1 calfskins, 12c. Sheepskins, 70c. Lambskins, 10c. per lb.

MONTREAL NOTES.

Turpentine is 2c. per gallon lower.

Machinery scrap iron has advanced $1 and stove plate is $1 to $2 higher.

ONTARIO MARKETS.

Toronto, May 9, 1902.

HARDWARE.

BUSINESS is still of a fairly brisk character, but the movement is not as brisk as it was a week or so ago. This, of course, is only natural. The spring sorting-up trade is yet to be done. The difficulty of getting goods in certain lines of builders' hardware is one of the features of the trade, in some instances manufacturers reporting that they cannot fill orders less than three to five months from receipt of same. Prices, generally, are firm in tone, and in some lines there have been actual advances during the week. Mrs. Potts' sad irons are up 5c. a set. Cotton wrapping twine and "Hercules" sash cord are ½c. per lb. dearer. A readjustment of prices has been made in black and galvanized pipe, the result of which is a slight advance in some sizes and a decline in others.

BARB WIRE.—The movement from stock has been quite brisk during the past week. Prices are steady and unchanged. We quote: F.o.b. Cleveland, $2.27½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—Business continues fairly brisk. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3.30 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There is a fairly good demand for oiled and annealed wire at firm prices. We quote the base price as follows: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Business continues fair. Discount is 22½ per cent.

WIRE NAILS.—Trade is keeping up well. Quite a few carload lots have gone out during the week. Quotations are: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—The movement is still light. We quote base price at $2.45 per keg with an allowance of 7½c. per keg on carlots.

HORSE NAILS.—Trade is quiet, and the discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Very little business is being done. We quote f.o.b. Toronto: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; feather weight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

PRESSED SPIKES.—There is a fair trade at the recent advance. Discount, 22½ per cent.

SCREWS.—Business continues good and prices steady. Discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Activity is still the feature of trade in this line. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for nuts is as brisk as ever and prices are firm. Quotations are as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

ROPE.—There is a good steady trade being done in rope and prices are firm. We quote as follows: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lath-yarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—There is not a great deal going out at the moment, but prices rule firm at the recent advance. Our quotations are as follows: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

SASH CORD.—An advance of ½c. per lb. has been made in the price of "Hercules" sash cord.

TWINE.—No. 3-ply cotton wrapping twine has been advanced ½c. per lb., and is now being quoted at 18½ to 19c.

SAD IRONS.—The price of Mrs. Potts sad irons has been advanced and polished are now quoted at 70c. per set, and nickleplated at 75c.

EAVETROUGH, ETC.—Manufacturers and wholesale dealers report a continuance of a good demand for eavetrough and conductor pipe. Eavetrough is quoted at $3.10 per 100 square feet for 10-in., and conductor pipe at $4 for 3-in. and $5.25 for 4-in.

SCREEN DOORS AND WINDOWS.—Forward orders are complated and as it is early yet for the sorting-up trade there is not much doing at present. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—A fairly steady business is being done and prices are steady and unchanged. Discount, 40 and 5 per cent.

HARVEST TOOLS.—Malleable "D" goods are still scarce and the demand is good. Discount, 60 per cent.

BUILDING PAPER.—The demand is fairly good. We quote as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—Business is fairly good. The discount on high-wheel mowers is 50 per cent.; "Star" mowers, 9-inch wheels, $2.50 to $3; "Daisy" mowers, 17-inch wheels, $2.25 to $2.50.

POULTRY NETTING.—The season is about over although a few orders are still coming forward.

GREEN WIRE CLOTH.—A good sorting up business is being done at $1.. per 100 square feet.

TINWARE AND ENAMELLED WARE.—A good trade is being done this week.

REFRIGERATORS AND FREEZERS.—The demand the past week has been active for both refrigerators and ice cream freezers.

GAS AND OIL STOVES.—There is a good movement this week.

STOVES.—Travellers are booking orders for stoves for fall delivery. The number booked appears to be fairly good.

SPORTING GOODS.—Quite a few loaded shells are going out this week, but there is not much doing in guns and rifles.

CEMENT.—The demand is improving with the warmer weather, but the prices continue weak. Our quotations are as follows: Canadian Portland, $1.90 to $2.50; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

METALS.

The pig iron market continues to gather strength. Prices in the United States are 50c. to $1.50 per ton higher. In nearly all kinds of metals business is seasonably good, and copper is about the only kind that shows any weakness in price.

PIG IRON.—The market is still very strong with supplies scarce. Prices are advancing sharply in the United States. During the past week prices there have appreciated 50c. to $1.50 per ton. Pig iron is about $4.50 per ton higher than it was a year ago.

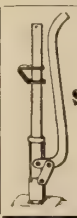
BAR IRON.—The demand continues good with prices firm. We quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The situation remains much about the same, prices being high and supplies scarce. We quote: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BOILER TUBES.—These continue scarce and dear. We quote, per foot: 1½, 1¾ and 4 in., 10c.; 2½-in., 17½c.; 3-in., 14c.

BLACK SHEETS—There is a good, steady demand for black sheets this week. We quote: Common, $3 15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES — A fair amount of business is being done. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.



GALVANIZED SHEETS — The demand is brisk and stocks are light. We quote in case lots as follows. Queen's Head, $4.50 for 28 gauge; American, $4 40 for 29 gauge; Bell brand, $4 20 for 28 gauge.

PIG TIN—The outside markets are decidedly strong and much higher than a week ago. Locally, orders are numerous, but small, with prices firm at $30 to $31 per 100 lb.

Walter Grose, Montreal,

Selling Agent for the Dominion of Canada.

One or other of the above brands may be purchased from all prominent Hardware Merchants throughout the Dominion who carry an assorted stock.

SEP 12 1902

TINPLATES—The demand is good and prices keep firm. Local stocks are in fairly good condition. We quote I C, 14x20, at $4.25.

TINNED SHEETS—The demand is good. We quote: 70 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—The London market is weak and lower, but in New York prices are a little steadier and more in sellers' favor than they were. Locally there is a fair demand for ingot copper, and trade in sheet copper is a little better than it was. We quote ingot at $15 per 100 lb., and sheet copper at $22 to $23.

BRASS—A moderate amount of business is being done. Discount, 15 per cent.

PIG LEAD—Inquiries are numerous, but orders are for small quantities. Quotations rule at $3.50 to $3 75 for pig lead and $5 for bar lead.

IRON PIPE—A good business is being done. Some good orders have recently been received on British Columbia and Klondike account. Under date of May 7, a new list of prices went into force. In some sizes prices are slightly higher, while in others they are lower. In sizes above 2-in. there is no change. We quote per 100 ft.: ¼-in., $2.40; ⅜ in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8 95; 2-in., $12.55; galvanized, 1 in., $7.20. Trade discount 4 per cent.

ZINC SPELTER—Business is more active. Prices are steady. We quote $5.50 to $6.

ZINC SHEET—The demand is good. We still quote cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER—A good business is being done. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—Trade is quite active this week at $9 50 per 100 lb.

PAINTS AND OILS.

The raw and boiled linseed oil market has developed considerable strength during the last ten days. In Great Britain several advances, equivalent to an advance of 5c. per gal. laid down here, have occurred, and this is causing the Canadian manufacturers to raise their prices. A change has been made in the way raw and boiled oil is being quoted here and considerable advances will take place, should the English market continue in its upward career. The turpentine market in the South is much stronger and the prices here have a strong upward tendency. In white leads ground in oil, and mixed paints, the prices are firm, in sympathy with the strong market for linseed oil. Locally, there has been a quiet trade doing in paint and oil lines. The weather has been wet and cold during the week, hindering outdoor work. Besides, painters already have purchased supplies sufficient to last them for a few days. There is a good demand for dry colors and white leads ground in oil for shipment to points outside of this city, but the uncertainty of the turpentine market is causing that article to be bought sparingly. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5 87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6 25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100-lb. kegs, $2 40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 82c.; boiled, 85c.; 3 to 5 barrels, raw, 81c.; boiled, 84c.; 6 to 9 barrels, raw, 79c.; boiled, 82c.; 10 to 60 barrels, raw, 77c.; boiled, 80c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 69c.; 2 to 4 barrels, 68c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a good local demand: We quote: Under 26 in., $4 45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5 75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There are large receipts and the demand for all kinds of metals is good. Prices are steady and unchanged. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14.50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—Hides have advanced another ½c on account of their scarcity. We quote: No, 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½c.

SKINS—The season for sheepskins is about over. The receipts of calfskins are large. We quote: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies) 60 to 70c. each; sheepskins, 80c. to $1; lambskins, 20c.

WOOL—Very little trade is doing. We quote: Fleece wool, 12½c., and unwashed, 7c. per lb.

SEEDS.

Trade is slackening as the season is nearly over. We quote out of store at Toronto: Red clover, $6.50 to $9; alsike, $10 to $16, and timothy, $7.80 to $8.25.

COAL.

There is a good demand for soft coal, but trade in hard coal is light. We quote prices at international bridges as follows: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

Trade continues steady at unchanged prices. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Mrs. Potts sad irons are 5c. per set dearer.

Prices on black and galvanized pipe have been readjusted.

Cotton wrapping twine and "Hercules" sash cord are ½c. per lb. higher.

DOING A GOOD BUSINESS.

J. S. Bennett, of Toronto, is doing a large business these days in shelf boxes and screw and bolt cases. Among the orders received are the following: Russill & Co., Toronto, for their new hardware store; E. Lapierre, Buckingham, Que., and Cote, Boivin & Co., Chicoutimi, Que. The last named firm has also ordered a screw case. An order from Fletcher & Hunter, Toronto, has also been received for a screw case. Bolt cases have been ordered by M. Sutton, Andover, N.B., and James Dillon, Fort Qu'Appelle, N.W.T.

TO PUSH THEIR VARNISH HERE.

Mr. W. H. Ennis, representing The Murphy Varnish Co., No. 80 Dattery Marsh, Boston, was in Toronto last week in the interest of his firm. The Murphy Varnish Co. have decided to push business in Canada, and are establishing agencies throughout the country.

HIS BODY FOUND.

A few weeks ago, HARDWARE AND METAL reported the disappearance of Mr. J. B. McDonough, a traveller representing Henderson & Potts, paint manufacturers, Montreal, who went from his hotel at Prescott, Ont., and had not been seen since. It was supposed that he had been drowned, and this has turned out to be correct. The body was found on Saturday, May 3, in the bay at Prescott.

Mr. McDonough disappeared during the latter part of February, while visiting the trade in Ontario.

PERSONAL MENTION.

Mr. J. L. Richardson, who has been representing D. K. McLaren, of Montreal, in the Province of Ontario, has accepted a position as salesman for The Durham Rubber Co., Limited.

NAILING MACHINE WANTED.

A manufacturer in Toronto is desirous of purchasing a nailing machine for handling boot rivets, ½ to 1 inch in size. Can any of our readers inform us where such a machine can be obtained?

INDUSTRIAL GOSSIP.

A NEW BRUNSWICK COMPANY.

The Hartland Mercantile Company, Limited, Hartland, N.B., is applying for incorporation. Twenty thousand dollars, divided into 200 shares of $100 each, is the amount of the capital stock, and the following are the incorporators, the first three named being the provisional directors:

J. T. Allen Dibblee, merchant, Woodstock, N.B.; George M. Shaw, merchant, Arthur R. Rigby, bookkeeper, Arthur L. Baird, clerk, Hartland, N.B.; W. Jack Dibblee, clerk, Woodstock, N. B., and Mary E. Shaw, married woman, Hartland, N. B.

The reasons for incorporating are to purchase the business of J. T. Allen Diblee and George M. Shaw, at present conducted under the style of Shaw & Dibblee, general merchants, Hartland, N B., and to carry on a business as plumbers, tinsmiths, hardware merchants, grocers and agricultural implement agents in the Province of New Brunswick and elsewhere.

A. R. McDonald is preparing to erect a number of tenement houses on property he recently purchased at the corner of Grand Allee and Scott streets, Quebec.

At London, Ont., D. McL. Grange is building a 1½-storey brick-veneered residence on Burwell street, and J. E. Downs a 1½-storey brick-veneered dwelling on Hamilton Road.

HEATING AND PLUMBING

PECULIAR DETERIORATION OF WROUGHT IRON PIPE.

In a communication to The Proceedings of the British Institution of Civil Engineers, William Wark reports an unusual experience with wrought iron pipe buried in light sandy soil at Hay, New South Wales. In the year 1885 the gas works were built, and the usual course was adopted of laying the consumers' services of ordinary black wrought iron pipe. The conditions of climate appeared to warrant the expectation that precautions such as are usual in the humid climate of the United Kingdom would not require the same consideration in New South Wales. It was assumed that the dryness of the climate would constitute a factor in the preservation of all ironwork, and this has proved to be so, but only in the case of iron not in contact with the soil.

After the lapse of 11 years attention was drawn to a steady increase in the amount of gas unaccounted for, and examination led to the discovery that the pipes had completely perished, and exposure to the air had caused them in some instances to crumble to pieces, while in others the granulated appearance on the external surface suggested galvanic action between the metallic base of the soil and the wrought iron. The suggestion that the action of coal gas was in any measure accountable for the corrosion was not upheld by any facts elicited during the investigation. The interior of the pipes may, through the action of impurities in the gas, scale and become filled with rust, but the evidence in the case strongly supported the assumption that the injury was due principally to external causes, and this theory is partially borne out by the fact that wrought iron water service pipes, in the town, have a life of only seven years.

The influence of soil in contact with the metal has been held responsible for the structural alteration of its character, but it has not been proved that the deterioration is due to the constituents of the soil, to dampness or to the alterations of moisture and dryness, and it is probable that, owing to the light character of the soil, the great variations of temperature throughout the seasons exercised some influence. Analysis of the soil disclosed the presence of large quantities of common salt and magnesium chloride, in addition to iron, alumina, silica, lime and phosphates. Owing to the dryness, heat and length of the summer season, it is customary to water the streets frequently, and, as they are uniformly level and without any system of drainage, the subsoil is continuously damp. It is conjectured that, as the result of this periodical street-watering, the combination of carbonic acid with the moisture so readily absorbed by the porous earth formed the basis of chemical action, and the alternate moisture and dryness no doubt greatly facilitated the process of deterioration. To all appearance, the trouble is confined to wrought iron, the cast mains not showing any signs of unusual injury. Experience in other parts of the colony is quite at variance with that at Hay. In Bathurst, where the soil is of a rotten granite nature, services are still in use, and appparently quite sound, after a life of 27 years.

In relaying the Hay services the preservative measures adopted consisted in applying heat to the pipe and then coating it with boiling coal tar, with a little lime added to neutralize the carbonic acid before application, and in imbedding the pipe in a layer of asphalt. Raw tar is not well suited for coating iron. Instances have been known of damage resulting from its use, the injurious action arising from the presence of carbonic acid. Exception has been taken to the inference that lime exerts a protective influence over wrought iron, since from its hygroscopic character it must act as the vehicle for conveying the very element which it should be the aim to exclude. Where clay is obtainable, puddle is recommended for the envelopment of pipes as a preventive against injury by corrosion.

BUILDING PERMITS IN OTTAWA.

The building permits taken out at Ottawa during the week are as follows: Robert Crain, for a brick-veneered dwelling on John street, for $800; Edwin McElroy, for a brick-veneered dwelling on Bell street, for $1,200; J. G. Kilt, for a brick-veneered dwelling on Stewart street, for $2,000; A. T. Grant, for two brick-veneered dwellings on Besserer street, for $1,500; James Paget, for a brick-veneered dwelling on Thornton street, for $1,800; James Baxter, for a brick-veneered dwelling on Maple street, for $1,300; Eugene Charbonneau, for a frame dwelling on Preston street, for $500; F. E. White, for two brick-veneered dwellings on James street, for $3,500; M. Corrigan, for a brick-veneered dwelling on Wellington street, for $1,800; Dennis Burke, for a brick addition to dwelling on Wilbrod street, for $400; Thomas Lawson, for a frame dwelling on Arthur street, for $300.

PLUMBING AND HEATING CONTRACTS.

Purdy, Mansell & Co., plumbers, Toronto, have secured plumbing and heating contracts for the hot water heating of a residence at 111 Dowling avenue, for D. Woolviston; the hot water heating in the conservatory of John Ryan, on Jarvis street; and the plumbing and gasfitting of a store and dwelling at 497 Yonge street.

BUILDING PERMITS IN TORONTO.

During the week building permits have been issued from the office of the city commissioner, Toronto, to the following: E. B. Taylor, for a two-storey brick residence on 54 Golden avenue, for $1,600; J. H. Craggs, for a two-storey brick addition to dwelling in rear of 196 Clinton street, for $450; Building Committee of Wycliffe College, for a two-storey brick and stone convocation hall, for $15,000, on Hoskin avenue; H. Ritchie, for a two-storey brick and stone dwelling on the north side of Woodlawn avenue, for $4,000; A. T. Howe, for a two-storey roughcast addition to factory on 118 Ossington avenue, for $300; Queen City Curling Club, for a two-storey brick rink on the north side of Hayden street, for $8,000; S. Cross, jr., for a two-storey brick and roughcast dwelling on 680 Gerrard street east, for $900; Mrs. P. Corcoran, for a two-storey roughcast dwelling on 385 St. Clarens avenue, for $900; Mrs. M. A. Bishop, for a two-storey brick residence on 179 Roxborough street, for $6,000; J. Donovan, for a two-storey brick and roughcast dwelling on 210 Van Horne street, for $750; Mrs. Jennie Preston, for alterations and brick addition to dwelling on 25 Earl street, for $1,200; Peter Steels, for a two-storey brick and roughcast dwelling on 12 Cobourg avenue, for $800; Macpherson Estate, for a two-storey brick residence on the north side of Cluny avenue, for $5,500; and the Macpherson Estate, for two houses, one on the south side of Crescent road and the other on the north side of Cluny avenue, each two-storeys high, of brick, and costing $4,500.

PAINT AND LEAD

There's plenty of money in Paint and Lead if you get the right kind.

RAMSAY PAINTS pay, because they are the best paints at the best price, with the proper advertising to assist you, and we shall tell you all about it if you ask.

RAMSAYS EXTERIOR LEAD pays, because the painter must and will have lead, and here is a lead proved better than pure lead or any other make and cheaper than pure lead as well.

MONTREAL PLUMBERS.

THE plumbers' strike in the city of Montreal has not come to the sudden end that was expected by the unions. When over half of the city's master plumbers agreed to the men's demands, it was thought that the others would soon follow. But those remaining out have determined to fight the unions, and a settlement looks to be farther off than ever, for the men are also determined not to go back except under the conditions they have named.

Those journeymen plumbers who were working outside the city for employers who have not signed the agreement with the unions, have been ordered to stop work immediately, and they have done so. Thus a good deal of the building going on about the city has been terminated, and the effects of the strike are far wider reaching than at first. It is said that if non-union men are put to work on these contracts the carpenters, painters, etc., will refuse to work with them. A few more firms have signed the men's demands, bringing the number of men now out on strike down to 130.

The master plumbers who have not acceeded to the men's demands, drew up the following resolution :

We, the master plumbers of Montreal, do hereby agree to stand by one and all in the strike now taking place between the men and ourselves ;

We, moreover, bind ourselves not to agree to the conditions now asked by our men, for any consideration ;

We also agree to help one another in time of need to complete any contract which would put one of our confreres in a close call to his disadvantage.

This was signed by Messrs. Thomas Mall, John Date, Bourbonniere & Lapierre, Drapeau & Champagne, M. Walsh & Co., C. E. Thibault, The Garth Company (per H. Garth, director), C. Rousin, James A. Sadler ; Blouin, Desforges & Latourelle ; E. F. Froidevaux, D. Duquette, M. Germain & Co., E. Dufort, P. Page, G. Quinal, J. A. Labelle, P. Krasel, Navert & Lauzon, J. Lafrauce & Co., N. Belanger, J. P. Lamarche, W. A. Stephenson & Co., Carroll Bros. & Co., Alex. Mackay & Co., Ogilvie Bros., Denman & Bethune, Henri Thibault, John A. Gordon, J. A. Giroux, V. Sicard, J. Perrault, E. Rousseau, Charette & Frere, L. Dalcourt, C. Prevost, J. E. H. Paddon, E. Riopelle, Armstrong & Petit, F. Hakey, T. O'Connell, Emery L'Esperance, John Burns & Co., Gordon & Egan, H. A. Egan, Joseph Laurier, D. Ouimet, Jos. Roy, J. W. Hughes, R. N. Sevigny, J. Lachapelle, J. Vezina, A. Belanger, A. Gagnon, D. Dugas & Co , G. Rosser, J. Markum, L. Gladu, J. Boucher, Hane & Montpetit, P. Lemay, P. Leclerc & Son, F. Forest & Co., F. Laurin, E. Blackhim, Z. St. Aubin, J. Young, D. Brunet, J. Turcotte, H. Bowles, J. Roy and E. J. Morin.

The employers declare that if they signed the contract required of them by the union it would have the effect of practically giving the conduct of their business over to their employes, and they decline to give up the management of their own shops.

The men give it as their opinion that the strike may last two weeks, but do not think that any journeymen plumbers will come to Montreal from other places and work for the wages now paid.

Meanwhile, many people have been put to a great deal of inconvenience. The May movings included as large a number of people as ever, and the houses which had to be attended to have, in many cases, gone without a bit of work done on them.

SOME BUILDING NOTES.

W. CARROL is building a brick house at the corner of King William and Emerald streets, Hamilton at a cost of $1,600.

A new schoolhouse is being built at New Denver, B.C.

A new Roman Catholic imfirmary is being built at Halifax.

A new town hall is being erected at Waterford, Ont.

George Berkner is building a house at Milverton, Ont.

A $30,000 public school is being erected at Edmonton, N.W.T.

A workshop is being erected at Halifax for the waterworks department.

S. Brant is preparing to build a new house at Elsinore, Ont.

A new public building has been commenced at Granby, Que.

W. R. Hull is going to erect a large business block at Calgary, N.W.T.

Tenders have been asked for the erection of a new public library at Windsor, Ont.

J. Costigan will erect a new block at Portage la Prairie, Man.

John Duncan will erect a new post office building and residence at Thamesville, Ont.

Alex. Armstrong is building a house and D. McLean a residence at Loveville, Man.

A sash and door and butter box factory is being built at Hillsbury, Ont., by Cockburn & Harrison.

F. G. Kamstedt is building a brick store, and J. A. and W. J. Boyd are each erecting new residences at Flesherton, Ont.

The Chatham Manufacturing Co. are building an addition, 145 x 145 ft., to their factory at Chatham, Ont.

A new three-storey hotel, 50 x 100 ft., will be erected at the corner of Pender and Howe streets, Vancouver.

A three-storey building will be erected on Sebastopol street, Montreal, for the Railroad Y.M.C.A and the Grand Trunk Literary and Scientific Institute.

J. H. G. Russel is receiving tenders for the erection of a brick and stone store on Portage avenue, Winnipeg.

FIDDES AND HOGARTH HAVE SEVERAL CONTRACTS.

Fiddes & Hogarth have received the contracts for the plumbing and heating of a residence for Gerhard Heintzman on Bloor street, the plumbing and heating of six houses on Gerrard street for W. H. Gibbs, the plumbing and heating of a house on Jarvis street for Dr. Sheard ; the plumbing and heating of a house on Walker avenue for Dr. Trigg ; the plumbing and gasfitting of a house on Maitland Place for Thomas Wilkins, and the heating of the St. Charles Hotel on Yonge street for John O'Neill.

THE THOS. DAVIDSON MFG. CO., Limited

ESTABLISHED 1869. MONTREAL, CANADA. INCORPORATED 1895.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

ASBESTOS AND MICA COMPANY. The Columbia Asbestos and Mica Mining Co., Limited, has been incorporated. The incorporators are James Arthur Seybold, merchant, and Oscar Forest, merchant, Ottawa; Joseph Henry Simmons Cass, broker, Montreal; Edmund Smith Hopkins, counsellor-at-law, Providence, R.I., and Frank Bradford Mott, manufacturer, Providence, R.I., and the purposes of incorporation are for the purchasing, acquiring and operating of certain asbestos mines in Denholm township, Wright county, Quebec, together with the mills, plants and machinery connected therewith, and to develop these mines and prepare their products for market; also to acquire asbestos and mica mines all over the Dominion of Canada and operate them, and to build and operate steam and sailing vessels for the conveyance of their products from their mines and elsewhere. The total capital stock of the company is placed at $150,000, divided into 15,000 shares of $10 each.

RAILWAY SUPPLY ENTERPRISE. The Canadian Rolling Stock Co., an organization promoted by F. H. Clergue, has been incorporated with an authorized capital of $2,000,000. The charter empowers the company "to manufacture, construct, or acquire, purchase, lease, or any other method whatsoever, cars, locomotives and all kinds of railway supplies and rolling stock, and to sell, lease and otherwise dispose of the same."

The provisional directors are Theodore S. Leach and E. V. Douglas, Philadelphia; Francis H. Clergue, Bertram J. Clergue and Henry C. Hamilton, Sault Ste. Marie, Ont. The head office is at Toronto, but the works are at the "Soo," where they are already turning out cars.

AN ELECTRIC COMPANY TO BUILD. The Canadian General Electric Company will erect a building this summer on the old Upper Canada College property, at the corner of King and Simcoe Streets, Toronto. Of the 200 feet frontage on King street, 150 feet will be used for the building, which will extend back 185 feet 6 inches, the depth of the lot. The remaining 50 feet frontage will be laid out as a park with walks and flower beds. Fountains, vases, statuary, and other products of The Canadian General Electric Company and The Canada Foundry Company will be placed on these grounds. They will be provided with seats and thrown open to the public. The first storey of the building will be 25 feet high, and it will be used as a hall to exhibit the manufactures of these companies. The second floor and basement will be used as a warehouse and the third storey will be fitted up into offices, to be the finest in Canada it is claimed,

ENLARGING THEIR PLANT. The Ham & Nott Manufacturing Co., Limited, makers of refrigerators, etc., Brantford, Ont., will enlarge their plant shortly. They will build a workshop 80 x 80, a machine shop 40 x 50, and an addition to the engine-room. The last named will be fitted with machinery, the equal of that in use by the leading firms of the United States. The total cost of these additions will be about $9,000, and about 30 new hands will be employed when the factory is completed.

OPENING A HARDWARE BRANCH.

The Blonde Lumber and Manufacturing Co., of Chatham, Ont., is opening up in the hardware business in connection with its mill and lumber lines. The hardware department will be conducted under the management of Mr. A. J. Graber, who has had much experience in this line.

GOODS THAT GIVE RESULTS.

No brooms, brushes and woodenware upon the Canadian market are better or more favorably known than Boeckh's Toronto brooms and brushes, Bryan's London brushes, and Cane's Newmarket woodenware. They are the kind of goods it pays the dealer to handle. Progressive merchants realize that the true test of goods is their worth, not their selling price, and that the safest kind of an investment is in the goods manufactured by The United Factories, Limited. The United Factories know their business and are proud of it.

HEAVY SHIPMENTS OF METALS.

The Canada Hardware Co. are just in receipt of heavy shipments of Canada plate, terne plate, black sheets, barb wire, hoop iron, differential pulley blocks, cutlery, English tools, etc. See their advertisement on page 7 of this issue.

A SILVERWARE CATALOGUE.

This is the season of the year when there are many sales for this class of goods for sporting competitions. If interested write The Toronto Silver Plate Co., Limited, for their special catalogue, which they are now having printed, illustrating this class of goods, and which they are only too pleased to send a copy off to the trade on application.

PARIS GREEN!

We beg to advise the trade that the second shipment of Paris Green is now ready. Our customers will do well to let us have their additional specifications early to ensure a supply before the rush in June sets in.

Indications point to a very heavy demand, and the packages required should be stated at once. Note our Government standard Paris Green is put up as follows:

Arsenic Kegs (about 250 lbs.)
50-lb. Drums.
25-lb. "
1-lb. Packages.
½-lb. "
1-lb. Tins.
½-lb. "

NOTES.

Craig Bros. have just opened a new hardware and furnishing business at Franklin. They have erected large premises of their own for the new business.

The Western Implement Manufacturing Co. is the latest addition to manufacturing interests in the West. The capital is $60,000, and business will be commenced almost immediately. The first directors and officers are: Robert Muir, E. L. Drewry, F. Atchison, Ald. Barclay, James McDiarmid and W. A. Black. F. J. C. Cox is the secretary.

CURRENT MARKET QUOTATIONS

May 9, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

SANITARY BUILDING PAPERS.

Any Building Paper that will turn musty after being exposed to dampness is unsanitary and dangerous to health.

A first-class Building Paper should be Water-proof, Vermin-proof, Air-tight and Durable. Our Tarred Fibre and O. K. Building Papers meet all the above requirements.

Don't be afraid to use Tarred Building Paper as it is healthy and the odor soon passes away. If you will use an Untarred Building Paper, however, try our Dry and Resin Sized Fibre which won't turn musty under any circumstances.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

"FACTS ARE STUBBORN THINGS."

Enterprising Merchants understand that it is easy to sell goods that are in demand, and are known to be reliable. It is an admitted fact that **CHURCH'S** Cold Water

ALABASTINE

is a wall-coating of wide merit. It has stood the test of time.

M. B. Church was the first to offer to the trade a practical wall-coating adapted for use by mixing in cold water. The compound is patented, and the process of manufacturing is patented in Canada and other countries.

If offered a substitute, or something "just as good," bear in mind that the party so offering may well be regarded with suspicion. There is only one **CHURCH'S ALABASTINE,** and nothing manufactured for the purpose equal to it.

Attempts have been made to imitate **ALABASTINE,** which of course is the "sincerest flattery," but it is the genuine **ALABASTINE** that is in demand, and in selling it there is no risk on account of infringement on anybody's rights.

Our goods, our advertising, our business methods are up-to-date. Prices are right, terms easy, and supply of advertising matter liberal. Is your assortment complete? Prompt service to all.

AN INTERESTING CASE.

A CASE which will, no doubt, have some interest for business men generally was decided the other day in the United States Circuit Court. A capitalist named Young had been advancing money to a firm in New York, which subsequently became insolvent. These advances were made according to an understanding with the president of the company long before it was known to be in an insolvent conditon. The company, in turn, gave demand notes for each advance made and signed bills receivable and collateral thereon. The amount finally owed Mr. Young was nearly $54,000. After the company became bankrupt this sum of money was collected and deposited with a trust company on the joint account of the trustee of the estate and Mr. Young. But when the latter endeavored to secure payment the trustee contended that the collateral held by the plaintiff did not constitute tangible assets, and that he was not entitled to go beyond the company to recover liabilities of the concern, and thus deprive the other creditors of a certain sum of money.

As our readers are well aware, the bankruptcy law which is in force in the United States allows no preference, and the object of the trustee of the estate was to present the case of Mr. Young in the light of a preference claim. The Court held, however, that, as the agreement was entered into prior to any knowledge on the part of either concern impending insolvency, the plaintiff was entitled to the fund held in the joint account.

We fancy that this decision will receive the endorsation of the business men generally, those, of course, excepted who are directly interested in preventing this large sum of money from being paid to one claimant against the estate.

A PECULIAR HALIFAX LAW.

They have a somewhat peculiar by-law in force in Halifax, which prohibits the washing of store windows after eight o'clock in the mornings. In spite of this by-law one of the local storekeepers undertook one night after 11 o'clock to wash his windows, and for this offence he was brought before the Police Magistrate and compelled to pay a fine.

This somewhat peculiar and antiquated law is evidently a sort of a twin brother to the celebrated curfew law. Now that a fine has been imposed on one of the local merchants who is ambitious to have his store windows present a cleanly appearance, it is possible an agitation may arise which will cause its repeal.

There is no question about the necessity of repealing such a law, and it is to be hoped that the merchants of Halifax will unite their efforts in trying to bring it about.

A FAST SERVICE.

IT IS stated that the Ottawa Government is considering an arrangement for the inauguration of a fast transatlantic steamship line having connections with a transcontinental railway. It is said that, with this end in view, negotiations have been opened with the C. P. R. for a weekly passenger service between Great Britain and Canada equal to the best that sails from New York. A dozen steamers would be required to maintain a good freight service, and the total cost of the undertaking would be $20,000,000. The Government has power at present to subsidize a line at $700,000 a year, but for a passenger and freight service $1,000,000 yearly would be required.

When Sir Wilfrid Laurier and his colleagues go to Great Britain in June, this project is likely to be discussed with the C.P.R. directors and representatives of the British Government.

NEED OF BUSINESS MEN.

THERE never was a time when the demand for business men in Governments was so reasonable as it is just now.

Nearly all the principal questions which are before the Canadian Government are of a business or trade character. Most of them are questions which merchants could settle much better than politicians. There are certain questions, we admit, which lawyers and professional politicians can deal with more readily than persons without political or legal training. But no questions of this class are as important to Canada at the present time as those purely commercial.

For example, take the matter of the Imperial conference, shortly to be held in London to discuss the relations of Great Britain with her colonies. To us the most vital of these relations is that of trade. Canada will have four Ministers of the Crown in London at that time. Of the four, but one, Mr. Paterson, is a business man.

We do not mean to say that the others are not able and distinguished men, but they are not business men. All the issues which arise out of the trade discussions in London must to some extent be new ground to three or four of our representatives. We do not say this in any complaining spirit, but only for the purpose of emphasizing what has been contended for in these columns during many years, namely, that there should be a larger representation of business men in all our Governments.

Canada is represented in London by an experienced and successful business man, Lord Strathcona. This is greatly to our advantage. We ought to induce our big men of like attainments to take a more prominent part in our public affairs. This is no idle complaint. In England itself, an agitation has been on foot for some time against the filling up of the most important offices in the State with men who do not understand business.

During the last ten years the commercial interests of the world have been getting more and more important. Even war is now conducted on a business basis. Everything is being systematized.

Surely, then, there is nothing surprising in the demand that national commercial interests should, as far as possible, be attended to by commercial men of national standing?

Of course, political considerations often interpose and prevent Prime Ministers from filling up vacant offices with the best men. If so, we ought to change the political conditions, instead of going on year after year allowing the business of the country to fall more and more into the hands of politicians who, however honest and capable they may be, are men of theory and of vague ideas, instead of with practical experience and business insight.

There is some good in all advertising and all advertising does some good, but the best advertising and the advertising that does the greatest good is newspaper advertising.

THE ADVANCE IN LINSEED OIL.

THE strong market for raw and boiled linseed oil during the last two or three weeks has resulted in an advance of 1c. per gal. There continues to be a scarcity of that article on hand in Toronto and other western points, and the manufacturers seem to be unable to fill the orders of the wholesale jobbers of paints and oils. There is apparently a scarcity of the linseed from which the oil is extracted, and an oil famine may be on hand in Canada. Some think the manufacturers are only holding back for higher prices. The import prices of oil from Great Britain are much higher than they were two weeks ago, and as the Canadian market is at present regulated by these prices the advance here has taken place.

Last week the way in which raw and boiled linseed oil was being quoted was changed. Under the old schedule prices were fixed for quantities of one to four and five to nine barrels. Ten barrels and over were left open. In the new scale linseed oil is quoted in quantities of one to two, three to five, six to nine, and ten to sixty barrels.

The week's quotations of raw oil for the cities of Toronto, Hamilton and London are 81c. for 1 to 2 barrels, 80c. for 3 to 5 barrels, 78c. for 6 to 9 barrels, and 76c. for 10 to 60 barrels. Boiled oil is worth 2c. more per gallon. Two cents extra will be charged to outside western points, but freight will be allowed. All quantities of 10 barrels and over are sold f.o.b. Toronto, Hamilton, London and Guelph.

WORTH EMULATING.

A SOMEWHAT unique step is being taken on the Pacific Coast in regard to tourist travel.

In Victoria, B.C., and Tacoma, Wash., there are two live tourist associations. They hold regular meetings and are led by live men who are continually devising ways and means of attracting tourists to their respective localities. Fortunately they do not appear to to be actuated by any spirit of jealousy, for, instead of working against each other, they are cooperating, in order that the one may be able to help the other in attracting tourists to their respective cities.

Such mutual cooperation is seldom witnessed, even among cities in the same country, but we do not remember ever having heard before of tourist associations in different countries cooperating together as the two cities of Victoria and Tacoma are doing.

It is to be hoped that they have set an example which tourist associations, at least in Canada, will emulate. And there is no reason why it should not extend, also, to tourist associations in border cities on both sides of the line.

AN ADVANCE IN TURPENTINE.

An advance of 2c. per gal. has taken place in turpentine. The firmer feeling and advances in the South have caused the appreciation here, but the well-known uncertainty regarding the Southern markets makes it impossible to predict with certainty whether or not this advance will be sustained.

This week's quotations of turpentine are for one barrel 70c. per gal., and 69c. for two to four, while five barrels and over will be left open. These prices are for Toronto, Hamilton and London, and 1c. extra will be charged to outside western points. The terms are net 30 days.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

An application has been made for a winding-up order of W. C. Wilson & Co., mill supplies, etc., Toronto.

N. Jutras, general merchant, St. Prosper, Que., has assigned.

A. Hogarth & Son, general merchants, Mattawa, Ont., have assigned to D. A. Dunlop.

D. Marcotte & Co., general merchants, Claireux, Que., have assigned to Gagnon & Caron.

D. N. Kinzie, general merchant, Dutton, Ont., is offering to compromise at 30c. on the dollar.

Jos. Savarie, general merchant, St. Antoine Abbe, Que., is offering 65c. on the dollar cash.

The creditors of John Heppler, jr., harnessmaker, Hanover, Ont., held a meeting on May 13.

Max Rosenstein, general merchant, Barachois de Malbaie, Que., has assigned to Kent & Turcotte.

The creditors of Wm. W. Montague, general merchant, Dunnville, Ont., held a meeting on May 15.

Joseph Ethier, tinsmith, Weymouth Bridge, N.S., has assigned to the official assignee, and his creditors will meet on May 22.

A writ has been issued to set aside the sale of stock of Thomas Dunn & Co., wholesale and retail hardware merchants, Vancouver, B.C.

PARTNERSHIPS FORMED AND DISSOLVED.

The American Bottle Exchange, Montreal, has dissolved.

Andrews, Bell & Co., general merchants, Montreal, are about dissolving.

Winch & Bower, fish merchants, fruiterers, etc., Vancouver, B.C., have dissolved.

Clark & Melanson, general merchants, Joggins Mines, N.B., have dissolved; T. G. Melanson continues.

Lundy & Money, agricultural implement agents, Rapid City, Man., have dissolved; ——. Lundy continues.

Elder, Dempster & Co., shipowners, Montreal, have dissolved, and a new partnership has been registered.

Dobell, Beckett & Co., lumber merchants, Montreal, have dissolved, and a new partnership has been registered.

John Brown and Sanford Munsie, painters, Pictou, N.S., have registered as partners under the style of Brown & Munsie.

N. E. Chute & H. Miller, wagon and implement agents, Bridgetown, N.S., have registered as partners under the style of Chute & Miller.

SALES MADE AND PENDING.

The stock of P. Ferland, general merchant, St. Jean Chrysostome, Que., has been sold at 26c. on the dollar.

C. W. Lent, general merchant, Courtice, Ont., is advertising his business for sale.

M. W. Stroud, general merchant, Beaverton, Ont., is advertising his stock for sale.

SATISFACTION—

deep-down satisfaction—the kind of satisfaction that brings a man back again and again and builds up business—is what every Sherwin-Williams Agent is able to insure his paint customers. There's the best kind of satisfaction in every can of The Sherwin-Williams goods. There's satisfaction for the dealer and consumer alike.

For the dealer there is paint profit that grows greater as the years go by, and there is paint reputation that has been gained by more than thirty continuous years of good paint making. There is a volume of business that cannot be had by selling other inferior and less widely advertised goods, and there are helps the like of which are unknown to other than Sherwin-Williams dealers.

If you do not now hold

THE SHERWIN-WILLIAMS AGENCY,

it will pay you well to write at once for our B-13 booklet, which explains some of the reasons why we give satisfaction, and why our dealers to-day, wherever located, are doing the largest and best paint business.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

The assets of O. Martin, general merchant, St. Guillaume D'Upton, Que., have been sold.

CHANGES.

V. Wensley, bicycle dealer, Belleville, Ont., is giving up business.

Brown & Munsie are successors to John Brown, painter, Pictou, N.S.

Mrs. Ernest Trudel has registered for E. Trudel & Co., painters, Montreal.

Aurele Roy has registered for Roy, Eusebe & Co., contractors, Montreal.

L. A. Levesque, hardware merchant, Ville Marie, Que., is starting business.

E. B. Eaton, blacksmith, Canning, N.S., is succeeded by Wilbur Brown.

Isabella Yemen, general merchant, Honeywood, Ont., has sold out to G. A. East.

Smith Bros., sawmill owners, etc., Stewart, Ont., have sold out to John Cooper.

The estate of W. M. Willis, carriagemaker, Halifax, N.S., is succeeded by Willis Bros.

A. Earle & Co., general merchants, Stayner, Ont., have sold out to Bell & McEachern.

The Page Wire Fence Co., of Ontario, Limited, have registered at Montreal and Walkerville.

A. M. Brown, general merchant, Petitcodiac, N.B., has opened a branch store at Anagance.

Wilbert Ross, agricultural implement dealer, Manitou, Man., has sold out to Wm. Winram.

N. C. Urquhart, general merchant, Mount of Keswick, N.B., has sold out to S. E. Barker.

H. D. McEwen, general merchant, Morell, P.E.I., is succeeded by H. D. McEwen & Co.

R. P. Roblin & Sons, general merchants, Carman, Man., are succeeded by W. L. Roblin & Co.

Noe Menard, general merchant and painter, New Carlisle, Que., has recently added a hotel business.

John Walker, lumber merchant, Grenfel, N.W.T., has sold out to The Grenfel Milling and Elevator Co.

FIRES.

John McAffee, tinsmith, Woodstock, Ont., was burned out.

Guest & Co., manufacturers of brooms, etc., London, were partially burned out; their loss is covered by insurance.

E. R. Rogers, hardware and tinware merchant, Toronto Junction, Ont., was damaged by fire and water; the stock is fully insured.

The Van Buren Lumber Co.'s shingle and grist mills at Edmundston, N.B., were burned; the loss is about $15,000 and the insurance is $4,500.

DEATHS.

W. H. Cleave, cabinetmaker, Neepawa, Man., is dead.

James Vair, hardware merchant, Kamloops, B.C., is dead.

Samuel Henry, wood and coal merchant, Montreal, is dead.

H. J. Belanger, general merchant, Chambord Junction, Que., is dead.

Neil McLeod, of McLeod Bros., general merchants, George's River, N.S., is dead.

IRONMOULDERS' STRIKE.

The ironmoulders working at the C.P.R. foundry in Hochelaga asked for a minimum rate of wages of $2.50 per day, on the refusal of which about 300 went out on strike on May 14.

It is claimed by the men that they are paid less than workmen in any other foundry in the city by between 15 and 60c. per day. There are no men left now in the C.P.R. foundry, and should any other foundry do work for the railway company the strike will become general, affecting some 700 men.

Mr. D. McNichol, the general manager, stated that the men had promised to give the officials a memorandum that morning, but had gone out on strike instead.

Although the opinion is not very generally held by those acquainted with the conditions, yet it is possible that a general strike might be ordered. This, however, could not be done until Friday, May 16, as the agreement binds the parties to arbitrate the question first.

"ROYAL CANADIAN" RAZORS.

H. Boker & Co. have put on the Canadian market lately a plain full-concaved razor branded with the registered mark "Royal Canadian." This is Boker's best grade and equal in every respect (except the fancy finish) to their "King Cutter" razors.

It is H. Boker & Co.'s highest possible production in quality at a moderate price. No expense is put to finish, and quality only is the main consideration. Every razor bearing the name of H. Boker & Co., "Royal Canadian," is fully warranted, and it will no doubt be a satisfactory money-maker for every retailer handling it.

WANT A ROPE FACTORY.

It is stated that conditions are favorable for the manufacture of rope in Vancouver. At present the raw material is imported to the United States through that port, manufactured, and some of the manufactured article is brought back to Canada. Hemp is constantly being brought over from Australia in vessels of the Australian Line to Vancouver and then sent to manufacturing concerns in the United States, who send back their manufactured product to Canada. The Canadian consumer on the Pacific coast thus has to pay duty and freight both ways. This extra expense would be saved by the establishment of a factory in Victoria, New Westminister or Vancouver.

INSTALLING A TELEPHONE LINE.

A telephone line is to be installed by G. R. Ashwell & Sons, general merchants, Chilliwack, B C., between their store in Chilliwack and their branch store in Sadis.

The firm is now in the market for the necessary plant.

NOVA SCOTIA MARKETS.

HALIFAX, May 13, 1902.

THE general activity in the hardware business still continues, and all firms were kept busy last week. The volume of business done compares favorably with this season in other years. The wholesalers report that the orders coming in from the various parts of Nova Scotia, New Brunswick, Prince Edward Island and even Newfoundland, show that there is unusual activity in all lines of business requiring hardware material, and that there is every appearance that the demand will be well sustained throughout the season.

* * *

This is the season when the householder commences to brighten up both the interior and exterior of his home, and the retailers are having a good demand for kalsomine, ready-mixed paint, glass, putty, nails, screen doors and windows and other small wares necessary for light repairing.

* * *

As the fishing vessels have all fitted out and started on their season's work, there is a light demand in this line, but the demand for building materials of all kinds is still well sustained, showing an extraordinary activity in all parts of the country. There is also a considerable demand for mining machinery. New mines have been opened up, while older ones are increrising or renewing their plant. There is every appearance of much activity in this line this summer. New methods and new machinery are being successfully worked.

* * *

The price situation in hardware is very changeable. The iron and steel markets continuing firm has had a tendency to advance many lines. Builders' hardware is 10 per cent. higher than a month ago. Harvest tools have undergone two or three advances, and are now 33⅓ per cent. higher than at the opening of the season. Screen wire cloth has advanced 7½c. per roll. Locks, knobs, hinges, screws and other building material now so much in demand have all slightly advanced. The base price on nails is now $2.35 to $2.45. All metals are firm, and further advances are not unexpected.

* * *

The same difficulty is recurring this year as experienced last year, that of getting orders filled promptly by the manufacturers and producers, all of which indicates that the demand is greatly in excess of the production. This is a good state for the industries of the country to be in, but in many cases it seriously affects the jobbers who do not carry heavy stocks. Some of the wholesalers, too, are compelled to partially fill orders through other firms.

* * *

The cordage and twine situation is very firm at recent advances. Linseed oil is easier, yet there is no reduction in the local prices on account of the season's heavy demand. Turpentine is firm at recently noted advance. Both of these articles will no doubt be subject to a decline when the present demand is over. All other oils are firm and prices unchanged. Glass is firm, and on account of labor troubles in Germany may advance. There are fairly large stocks held here of recent importation.

* * *

The general conditions, affecting all lines of trade in the city, may be gauged by the fact that the total exports from Halifax since last September aggregated about $600,000 more than during the preceding year.

R. C. H.

PERSONAL MENTION.

Mr. J. H. Roper, representing Mr. Alexander Gibb, left on May 10 for the Maritime Provinces. He will be gone about two months.

Mr. Booth, representing the Corbin Cabinet Lock Co., of New Britain, Connecticut, has been visiting the Montreal trade this week. Mr. Booth made a number of the hardwaremen presents of a pair of novel cuff links, with a small key (a real one) as one of the studs. They were finished in old silver, and were the products of the factory.

INQUIRIES ABOUT CANADIAN TRADE

Inquiries received by the Canadian section of the Imperial Institute, London, Eng.:

1. A Glasgow firm wishes to appoint reliable agents in the leading Canadian cities for the sale of Clyde refined sugar.

2. A London agent, long established, wishes to hear from Canadian manufacturers and shippers seeking representation.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL]

HAVE COMPROMISED.

McKenzie, Meldrum & Co., general merchants, Thedford, Ont., have compromised at 50c. on the dollar, cash. This arrangement was made at a meeting of their creditors in Toronto on May 13. The firm was burned out about a month ago sustaining a total loss. The insurance was $6,000, and $3 500 of this was paid to the firm which McKenzie, Meldrum & Co. had bought out and the balance left to pay the creditors. The liabilities are about $5,500.

HALIFAX-JAMAICA SERVICE.

A monthly service between Halifax and Jamaica has been contracted for by the Dominion Government with the Halifax and West India Steamship Co. The company will receive a subsidy of $1,150 a trip, or $13,800 per annum for 12 trips. The steamer Beta is the vessel to be put on the route. Her registered tonnage is 1,037.

CATALOGUES, BOOKLETS, ETC.

CATALOGUE OF A RIFLE FIRM.

The different styles of rifles and shotguns, made by the Marlin Fire Arms Co., New Haven, Conn., together with parts of their mechanism, and the different types of shells and shell loading apparatus are described and illustrated in a handsome catalogue of 120 pages. These repeating rifles are made of the best materials and in many ways are superior weapons in that they have few parts, are easy to handle, shoot accurately, and are light of weight. Their solid top prevents rain or snow from entering into their mechanism and their side ejection prohibits shells being thrown into the face of the operator and never allows an ejected shell to break into the line of sight. These rifles are made of various calibres from .22 to .45 and several different styles of cartridges can be used. Their repeating shotguns are also widely used. This catalogne can be had by any of our readers writing to this firm, mentioning HARDWARE AND METAL.

A FIRE IN TORONTO JUNCTION.

Early on Sunday morning, May 11, fire broke out in the store of Edwin R. Rogers, general hardware merchant, Toronto Junction. The varnish and oil room in the rear of the main store was where the blaze started, and before long the room was a mass of fire and smoke.

An alarm was quickly sent in, the firemen responding instantly, and, owing to their good work, the flames were soon got under control, but none too soon, for in a building adjoining a large quantity of oils, turpentine and gasoline was stored. Had these caught fire, the results would have been serious.

The damage was confined principally to the room in which the fire started, and is estimated to amount to between $1,500 and $2,000, fully covered by insurance in the British-American and Scottish Union Companies. The damage to the building is about $500 or $600, also covered by insurance.

Geo. H. Milne, will erect two brick dwellings on Wellington street, Hamilton, for Thomas M. Williamson, for $2,400.

MANITOBA MARKETS.

WINNIPEG, May 12, 1902.

THE week has shown good business in nearly all lines, but without change of price. The complaint of inability to get stocks in fast enough continues. The disagreeable weather has retarded building somewhat, and also the threatened strike amongst several lines of mechanics connected with the building trade is having an effect, though it is now thought that these troubles may be gotten over without coming to a strike.

Paints, oils and glass are in fair demand and without change of price.

The situation in binder twine shows no change for the week; in fact, trade in twine is at a standstill here at present.

The price list for the week is as follows:

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire, 10	3 85

TINPLATE GOING OVERLAND TO BRITISH COLUMBIA.

The Province, Vancouver, B.C.

IT is not the usual practice to bring large consignments of tinplate to this coast by rail across the continent, but at the present moment there is a shipment of 1,000 tons somewhere between this city and New York, and it is expected here at an early date. Heretofore tinplate has crossed the continent from New York, but the consignments have been small rush orders, and no comment was excited.

Another peculiarity about the shipment now en route is the fact that it will be laid down in Vancouver at less cost than was the consignment of 1,000 tons recently brought by the China Mutual liner Yangtsze, Lest it be thought that the above statement is foolish, it becomes necessary to explain that the tinplate was bought in Liverpool at the bottom notch of a falling market. Prices have risen, and the tinplate recently landed in this port was bought either on the rising market or before the drop, and laid down here by steamer travelling via the Suez Canal, it cost more than that which is now coming by rail. According to the latest quotations tinplate bought now would cost $4.10 per box of about 108 lb. delivered in Vancouver.

The consignment of tinplate now crossing the continent must have been purchased very cheaply, when it is considered that the freight overland is 60s. and by steamer the cost of transportation is but 35s. from Liverpool to this coast.

The overland consignment is coming to the order of A. L. Russell. Upon arrival it will be distributed among the various canneries on the British Columbian coast.

May 1902

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

ELECTRIC RAILWAY IN SWITZERLAND.

UNDER date of April 3, Henry H. Morgan, the United States Consul at Aarau, Switzerland, writes: "The old fashioned diligence which up to the present has been the means of transportation between the smaller towns and villages of Switzerland, which are off the lines of railway, is being rapidly superseded by electric railways, and the day is not far distant when most of the towns of the country will be so connected. A short time ago, an electric line was opened connecting Aarau with Schoftland, a distance of about 10 miles. Until the opening of this line, the time consumed in making the journey (by diligence), was one hour and ten minutes. Now, including several stops at villages along the line, the time occupied is 40 minutes.

A company is seeking a concession for a line from Aarau to Menziken, on the border of the Canton of Lucerne, and this will be joined by a line running from the city of Sursee northward, thus making an electric tramway connection for a distance of about 30 miles. Still another line is projected to run from Aarau to Frick—a most important plan, as it will place Aarau in direct communication with Laufenburg, Sackingen, and other towns in the Rhine Valley. The length of this line will be also about 30 miles.

The power to be used by these different roads will be derived from the waterfalls of the country.

Under date of April 22, Mr. Morgan refers to the efforts in Sweden to replace steam by electricity on the railways. He notes that the Maschinenfabrik Oerlikon, a firm of Switzerland, which has petitioned the Swiss Government for a concession to construct a line of 20 kilometers (12.4 miles) of standard-gauge electrical railway for experimental purposes, has agreed to furnish a Swedish company, free of all charge, the necessary electrical engines and motors for the trials in Sweden, provided said company would furnish the electrical force.

MEN OF WEALTH AS INVENTORS.

In an article on wealthy men who have become noted as inventors, Scientific American says that perhaps the most widely-known rich inventor is Cornelius Vanderbilt. Most newspaper readers have learned merely that he is the patentee of a locomotive boiler of some peculiar construction. Exactly what the peculiarity of this construction is, perhaps only the readers of technical papers know. As a matter of fact, the main feature of the invention consists in a firebox made cylindrical in cross section and having its rim corrugated in a transverse direction; the firebox being located eccentrically within a firebox section inclined to the horizontal, to reduce the water space below the firebox line at the back end, the forward end being submerged to a less extent than the rear, to increase the effective heating surface for a rapid generation of steam. So efficient is this improved construction, that the Vanderbilt boiler is used by the principal roads throughout the country. In 1900 six locomotives were built at the Baldwin Works equipped with Vanderbilt boilers, in 1901 23 were in use on various railroads. Mr. Vanderbilt has not stopped with the invention of a firebox. He has also devised a new type of locomotive-tender which is now in practical use: a process of making truck-bolsters, brake-beams, etc.; a draft-gear; a car-truck, and a tank-car which is now widely used. The annual royalties accruing from these various inventions are substantial and must represent a handsome amount.

Col. John Jacob Astor likewise finds time to invent new machinery. Several years ago he patented a pneumatic road-cleaning machine; and only a few weeks ago he received a patent for a novel turbine which is to be used primarily for the propulsion of steamers.

Both Mr. Astor and Mr. Vanderbilt have devoted their attention exclusively to industrial invention. Mr. P. Cooper Hewitt, on the other hand, has branched out in the field of electricity and physics. At a conversazione held last year at Columbia University, and at a recent meeting of the American Society of Electrical Engineers, his mercury vapor lamp was exhibited the practical combination of research in a new field in electro-physics. Turning his attention to the manufacture of glue, with which the name of his inventive and philanthropic grandfather, Peter Cooper, is associated, he devised noteworthy improvements in apparatus and means for glue making, among which may be mentioned a glue-manipulating machine, a process of purifying glue, a glue-stock cutter and feeder, an evaporator, and a drier. Besides these, the long catalogues of his inventions includes a condenser, a spring-tire, a centrifugal machine, an apparatus for aerating liuqids, an apparatus for manufacturing beer, a sheet spacer, and a leaf for flybooks. Mr. Hewitt has for the past few years bent his energies principally to the perfection of the above-mentioned vapor lamp, which bears his name and for which he has taken out a score or more of patents.

Like his brother, Mr. Edward R. Hewitt has also devised improvements in glue-making, among which is a preparation of glue-stock for boiling. In the fields of physics and mechanics he has also come forward as an inventor. Several years ago he patented a new method of printing photographs in color, and recently began a series of researches in those branches of engineering with which the names of Sadi-Carnot and Dr. Maynard are linked.

Still other well-known wealthy inventors are David Wolfe Bishop, Anson P. Stokes, jr., and Clarence G. Dinsmore. Mr. Bishop, as one might infer from the prominent part that he has taken in the development of automobilism in America, has been concerned chiefly with improving the motor carriage. Mr. Stokes has invented an ingenious apparatus for playing golf indoors. Mr. Dinsmore has patented a tire-removing and replacing device, and has applied for a patent on a pneumatic-tire protector.

Incomplete though this list may be, it serves to indicate a serious purpose on the part of some of our young men of wealth, which is sure to be highly commended.

ELECTRICAL APPLIANCES ON TRAINS.

George Westinghouse, according to an exchange, has stirred up what may prove to be a hornet's nest in pointing out certain dangers which, in his opinion, should be guarded against in the fitting of trains with electrical apparatus. Mr. Westinghouse says: "It is not very apparent how the e dangers can be guarded against. A lifelong experience, however, in connection with safety appliances upon railroads has caused me to view the subject from quite a different standpoint

STANYON ENGINEERING CO.

402 McKINNON BUILDING,
Phone Main 2177. TORONTO

CONTRACTING AND CONSULTING ENGINEERS.

Steel Works, all kinds of Rolling Mills, Wire Mills, etc., all built complete. Machinery designed for any purpose

GENERAL OFFICES, PITTSBURG, Pa.

from that usually taken, especially by inventors and promoters, and in some cases by manufacturers of electrical apparatus, who evidently dislike to emphasize the dangers attending the application of such electrical machinery beneath the ordinary combustible cars now generally in use and the utilization of which has been contemplated in order to keep down the total cost of installation.

"I believe a further useful purpose will be served by particularizing some of the dangers to be guarded against in the fitting of trains with electrical apparatus.

"1. A great advantage of electric traction is the possibility of a much higher speed. This, however, while not extending the vision of the engineer in charge of the apparatus, will require a greater distance within which to stop the train.

"2. When many tons of electrical apparatus are distributed beneath several cars of a train, and of necessity more or less loosely supported, and between which and the rails and roadbed there is but a small clearance, it is evident that much greater precautions will have to be taken than is ordinarily the case with the running gear of the present steam cars, derangements in which have often been the cause of accident.

"3. Electrical apparatus supported beneath the car can develop, by means of a short circuit, heat energy sufficient to ignite cars of wood construction, and this has occurred repeatedly, notwithstanding the presence of safety appliances, intended to guard against such occurrences.

"4. When a total wreck results from an accident, and experience has shown that accidents are inevitable, whatever the mode of propulsion, the debris scattered over the 'live' and other rails would render useless the ordinary circuit controlling devices which may be located upon the cars. This emphasizes the importance of a non-combustible construction of cars."

SECOND-HAND MACHINERY.

In another column our readers will note the advertisement of The Prentiss Tool and Supply Co., of New York, offering some genuine bargains in second-hand metal working tools. This is one of the most reliable firms in the business, and customers can, with every confidence, trust them in regard to descriptions. Many of these machines are, for all practical purposes, just as good as the day they were turned out, and at the prices they are offered it is no misnomer to call them "bargains." Ask for their quotations if you are wanting metal working machinery; they will most assuredly interest you.

TO MAKE CARS.

The Nova Scotia Steel and Coal Co. have decided to manufacture railway cars and are going to extend their works at Trenton, N.S. This will mean an expenditure of over $1,000,000. The Trenton car works will have a capacity of over 10 cars per day, using in their construction about 150 tons of steel. The estimated weight of plates, angles and other steel used in the construction of an ordinary freight car is not less than 30,000 lb.

The new plant will be equipped at first with machinery for the building of only ordinary wooden-box cars, but eventually a plant will be installed for the manufacture of steel cars.

A HEAT-DETECTING MACHINERY-PAINT.

Machinery suffers, perhaps, as much from overheating as it does from general wear. In order to indicate when the moving parts have become excessively heated, a German inventor has devised a paint composed of an amalgam of the iodides of mercury and copper—a composition which, he claims, will turn color when heated bearings to which it is applied are red in color under normal conditions. But when a temperature of 140 degrees Fahr. is reached, the paint turns black.

AN ELECTRIC LIGHT COMPANY.

The Cumberland, B.C., Electric Lighting Co., Limited, has been incorporated with a capital of $25,000 divided into 2,500 shares of $10 each to establish an electric light system at Cumberland.

VICTORIA MACHINERY DEPOT.

An industry of Victoria, B.C., that is rapidly assuming large proportions is the Victoria Machinery Depot. This firm was established 16 years ago by Joseph Spratt and Andrew Gray, and has grown ever since until now over 100 hands are employed. Six years ago the business passed under the control of Andrew Gray, who was succeeded in 1899 by The Victoria Machinery Depot as at present organized. The present value of the plant is about $100,000 and the annual pay roll amounts to about $60,000.

The company has lately decided to construct a marine railway on four water lots recently purchased, and it will be capable of handling all sized vessels up to 2,500 tons. About $50,000 will be expended on this work.

At present this concern is at work on the Venture, a steamer of about 650 tons tonnage, a steamer for river service on the Skeena river for The Hudson's Bay Co., 100 feet in length; three boilers for a new smelter at Osborne Bay; a 17-ton boiler for a tug, the St. Clair, and two submarine launches for the War Department, which will cost about $50,000.

TELEPHONES ON TRAINS.

An experiment is now being made by the Chicago and Northwestern Railroad on the new Overland express which will be watched with much interest both by railroadmen and the public at large. The express in question is equipped with telephones, which connect not only the several cars, but can be connected with local and long-distance wires at any station along the line. If this experiment proves successful the company will probably install a service, which will enable passengers to telephone from a moving train.

ALUMINUM SAW HANDLES.

Aluminum saw handles are being introduced which are said to be both lighter and stronger than those of wood. There are several shapes, but they are all made of thin sheet metal worked into the desired form and supplied with perforations for the purpose of enabling workmen to get a secure hold of the tool. One of the designs offered is adjustable so that the righthand side of the handle is flush with the saw, permitting the operator to work close to the floor or in other inconvenient places.

The McLachlan-Joy Electric Co. and McLachlan Gasoline Engine Co. will occupy their new premises, 201 Queen street east, about the 25th of May. They have secured much larger shops and intend greatly increasing their manufacturing capacity.

A CASE OF NECESSITY.

"My son," said the parson to a small boy who was digging in a back lot, "don't you know that it is a sin to dig on the Sabbath, except in a case of necessity?" "Yes, sir," replied the youngster. "Then, why don't you stop it?" asked the good man. "'Cause this is a case of necessity," replied the young philosopher. "A feller can't fish without bait."—Chicago Daily News.

A WORD OF APPRECIATION

Mr. H. Macaulay, proprietor of "The Ark," Chatham, Ont., an old subscriber, in renewing his subscription to HARDWARE AND METAL, says: "I always feel that I am getting good value for my money when paying my subscription to your paper."

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 16, 1902.

HARDWARE.

BUSINESS in hardware is still active, though now that the trade have received their supplies to a great extent, the hurry to deliver goods which characterized the wholesale trade a short time ago is over, and the trade is steadier, and, as a whole, more satisfactory to all concerned. The steamboats are still taking heavy cargoes up the canals and also to the lower ports. Prices on practically all lines of general hardware have been steady, poultry netting, which has advanced, being the only notable exception. New lists have been issued on builders' hardware, in which chisels, padlocks and a few lines of cabinet locks show an advance of about 10 per cent. Lawn mowers, shears, etc., have been moving very well. Ice-cream freezers are also in excellent demand. Canadian-made rotary door bells have advanced 50c. per dozen.

SCYTHES.—There is no change to report in this market. Scythes of all grades continue to move rapidly. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—The demand for barb wire is still good. The market is much better supplied now, several large shipments having been received. The price is $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—Trade is fair, and our quotations are now as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is a moderate inquiry for this, but no improvement can be reported over last week's trade. We quote as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Trade in this line continues rather slow. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—There is only a fair demand for these. Both wires are discounted at 60 per cent.

FENCE STAPLES.—The movement in this market is still heavy. We quote: Bright, $2.90 per 100-lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.

WIRE NAILS.—Trade continues fairly good this week at unchanged prices. Quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a good demand. Our quotations are now as follows: $2.45 per keg, in small lots, and $2.37½ per keg, in carlots. The discount on flour barrel and coopers' nails is 40 per cent. Three inch cut nails are not in very good supply at present.

HORSE NAILS.—The market is not as active as it has been. Discounts are as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Trade in horseshoes has also fallen off, the rush being over for the season. Quotations are: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger,

$3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

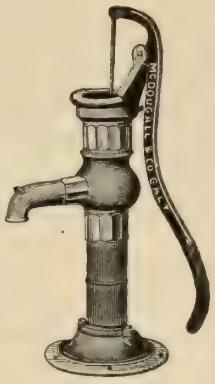
SCREWS.—Trade has continued to improve, and the movement during the past week has been heavy. The discounts are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—These are selling rapidly at steady and unchanged prices. We quote as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The demand for building paper continues active, and there is no change to report in price. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—No change in prices is reported this week. The market keeps active and steady, and our quotations are as follows: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c. Redeat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11¼c sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There has been a better demand this week than last, and a fairly good business is doing. We quote: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.



SCREEN WIRE CLOTH.—The market is active and steady. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—The discount on 2 x 2 mesh, 19 wire, has been changed to 50 and 10 per cent. instead of 60 per cent., and that on heavier wire is now 50 per cent. instead of 55 per cent. We quote: Canadian or English, 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—The market is fairly active. There has been no change in the discount, which remains at 60 per cent.

FIREBRICKS.—There has been no

If we have not an agency established in your town write to us and we will give you our terms.

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

change to report in this market. Supplies have come in from abroad, and the demand is fair.

CEMENT.—The inquiry for cement is no more than moderate. Several shipments have now arrived. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The local metal market has been fairly steady throughout the week. The demand for most lines is good, and a lot of English metals which have arrived provide a sufficient supply. Some houses have made an advance of 10c. in toecalk steel.

PIG IRON.—There is still a good demand and the market is steady, though firm. We quote: Canadian, $18.50 to $19, and Summerlee, $21.50 to $22.

BAR IRON.—The difficulty in obtaining sufficient supplies of the small sizes still exists, though the general supply is increasing. Merchants' bar is worth $2, and horseshoe iron, $2.20.

BLACK SHEETS.—These are moving out well. Several shipments have been received this week. Quotations are: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is somewhat easier owing to arrivals of galvanized iron from abroad. We quote: No. 28, Queen's Head, $4.40; "Bell" brand, $4.30; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—The market is firmer. Trade is only fair; the price remains at 14c.

INGOT TIN.—There is a somewhat easier feeling in this market, though prices are well maintained. Straits are quoted at 31c.

PIG LEAD.—There has been no change. The market is quiet, and the price is $3.25.

LEAD PIPE.—Trade is still very good at the prices quoted. Composition waste sells at 7½c., and ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—There has been no change. Jobbers are keeping up the prices all round. Our quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ¼, $4.35; ⅜, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ¼, $5.35; ⅜, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—The demand has not materially improved. We quote: Charcoal tinplates, $4.75 to $5.25 per box, and cokes, $4.25 per box.

CANADA PLATE.—The arrivals of Canada plate have eased the market off a little. There is a good demand. We quote as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is still an active inquiry. The price of toecalk steel has been advanced by Montreal houses 10c. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.70.

SHEET STEEL.—There has been an improvement in the market during the week, and a fair inquiry is now experienced at steady prices, which follow: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Trade is quiet and the market is unchanged. Jessop's is worth 13c.; Diamond, 8c., and Leonard's, 7½c.

TERNE PLATES.—There is not much doing in this line. The price remains at $7.75 to $8.

COIL CHAIN.—Business has not improved. The market is quiet and prices are unchanged. Quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—New goods are now in, and the demand has improved. The price is $5.85 to $6.25.

ANTIMONY.—There has been no change in this market. The inquiry is light, and the price remains at 10c.

ZINC SPELTER.—The market is reported somewhat firmer. A moderate demand keeps up, and the price is 5c.

SOLDER.—The market is active. Bar solder sells for 18c. and wire, 20c.

PAINTS AND OILS.

Turpentine is back again to its price of two weeks ago. This has been looked for by operators on this market, who have considered the market to be gradually strengthening. The feeling all round is much better. One firm report paying last week a higher price than they have at any other time this year. In linseed oil there has been no quotable change. Shipments have arrived, but they are not in such quantity that any reduction of price is anticipated, and the demand is very heavy. White lead has been going off in large quantities, and the stock which was ground during the winter months is rapidly being reduced. Red lead, which has been anxiously looked for for some time has now been landed at this port, and back orders are being cleared off. Structural paints are in great demand, and manufacturers making a specialty of oxides and graphites are pushed to their utmost capacity. There is nothing new in paris green. Dry colors are unchanged in price; the volume for shipment is about the same as last year. Ready-mixed paints are in active demand. Putty has so far been somewhat scarce, but with the arrival of fresh stocks of whiting and the greater supplies of linseed oil, heavy shipments of putty are now being made. Varnishes continue to be extremely firm, and gums are still high. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1 lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is a fair business passing in scrap metals. Iron is in greater supply, and prices paid for No. 1 wrought are $1 per ton lower. Heavy red brass is worth ½c. less. Our quotations are as follows: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅞ to 2¾c.; zinc, 2½c.; iron, No. 1, wrought, $16; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½c. per lb.

GLASS.

The expected shipments of glass have now arrived and the market is well supplied. The jobbers are now busy making deliveries. There is but a small demand. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There is still an upward tendency in the hide market, notwithstanding the present high prices. Beef hides are quoted ½c. higher and prices on lambskins are very irregular, going as high as 15c. in some cases. There is a good deal of competition on the market, and tanners are buying in small lots only, merely for immediate requirements. We quote: No. 1 hides, 9 to 9½c.; No. 2, 8c.; No. 3, 7c. No. 1 calfskins, 12c.; sheepskins, 70c.; lambskins, 10c. per lb.

MONTREAL NOTES.

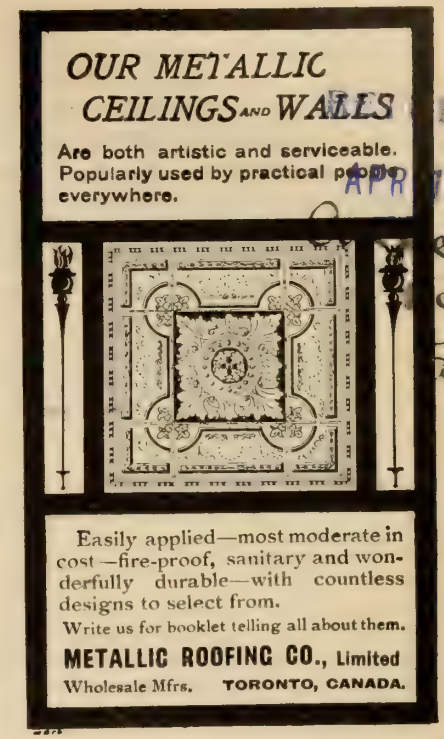
Turpentine is 2c. higher.

Poultry netting has gone up.

Heavy red scrap brass is ½c. lower.

Toecalk steel has been advanced 10c.

American chisels, padlocks, and some cabinet locks are about 10 per cent. higher.



No. 1 wrought scrap iron is $1 per ton lower.

ONTARIO MARKETS.

TORONTO, May 16, 1902.

HARDWARE.

TRADE has considerably improved and the prices are steady. The advance in poultry netting of last week has been sustained. The difficulty in procuring certain lines of goods from the manufacturers is as great as ever. All iron and steel mills in the United States are filled up with orders for months ahead, and it appears as if the present condition of affairs will be unaltered for some time to come. A number of advance sorting-up orders have come in and this is keeping business brisk. The demand is improving in screen doors, window screens, forks, hoes, rakes and scythes, and the movement in wire nails is good. The demand for black and galvanized iron pipe continues steady and the market is strong, several United States manufacturers being behind with their orders.

BARB WIRE—Trade is about the same as it was last week, and the prices continue steady. We quote: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE—In plain galvanized wire there is a good demand. We quote as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—There is a fair business doing, and prices are about the same as before. We quote the base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE—The demand is fair. The discount is 22½ per cent.

WIRE NAILS—Trade still continues to keep up in wire nails. The demand is mostly for small lots. Quotations are: $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS — Trade is quiet and prices are unchanged. The base price is still quoted at $2.45 per keg, and an allowance of 7½c. per keg is made on carlots.

HORSE NAILS—The demand is slack and the following are the discounts: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES—Business remains about as quiet as it was a week ago. We quote f.o.b. Toronto: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

PRESSED SPIKES—The demand is only fair and the discount remains unchanged at 22½ per cent.

SCREWS—There is a good steady trade in screws. Discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS—The demand continues to increase and the prices are firm, but unchanged. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS—Owing to a scarcity of bar iron prompt shipment is impossible. We quote as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66⅔ per cent.; elevator, shaft and whiffletree bolts, 50 per cent.

ROPE — The trade in rope continues fair and the prices are unaltered. We quote: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE — Business still remains only moderate, but there is a firm feeling in the market sustaining the recent advance. We quote as follows: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

SASH CORD—The prices are steady, with a slow demand.

TWINE—No. 3 ply cotton wrapping twine is still quoted at 18½ and 19c., the advance of last week being sustained.

SAD IRONS—The demand for sad irons is fair. Mrs. Potts sad irons are quoted at 70c. per set for polished and 75c. for nickel-plated.

EAVETROUGH, ETC.—For eavetrough and conductor pipe there continues to be a good demand at unchanged prices. Eavetrough is quoted at $3.10 per 100 feet for 10-inch, and conductor pipe at $4 for 3-inch and $5.25 for 4-inch.

SCREEN DOORS AND WINDOWS—Trade has improved during the week. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4 in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS—The demand for spades and shovels is improving. The discount is unchanged at 40 and 5 per cent.

HARVEST TOOLS—There is a fair trade doing, but the scarcity of malleable "D" goods continues. Discount 60 per cent.

BUILDING PAPER—The demand continues fair. We quote: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

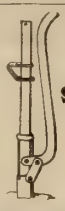
LAWN MOWERS—Business has improved with the advancement of spring and the prices are unchanged. The discount is 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9 in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

POULTRY NETTING—As the season continues to advance trade keeps falling off.

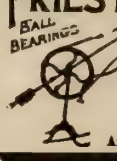
GREEN WIRE CLOTH—Business continues about the same as last week with a good sorting-up demand. Prices are quoted at $1.30 per 100 square feet.

TINWARE AND ENAMELLED WARE — There continues to be a brisk business being done at steady prices.

REFRIGERATORS AND FREEZERS — Quite a number of refrigerators and ice cream freezers have been sold.



GAS AND OIL STOVES—The demand is good with the approaching of warm weather.



STOVES — The sales in stoves for future delivery continue good.

SPORTING GOODS—There is a good trade doing for this time of the year.

CEMENT — There has been a brisk demand for cement during the week and the market is steady. We quote: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex cars.

KEARNEY & FOOTE BRAND

GREAT WESTERN BRAND

AMERICAN BRAND

ARCADE BRAND

GLOBE BRAND

J. BARTON SMITH BRAND

The largest manufacturers in the world.

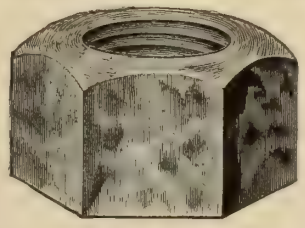
We manufacture the well-known brands of Cast-steel Files and Rasps shown herewith, all of which are warranted for high-class material and superior workmanship.

Our goods are now sold in the four quarters of the globe, command the highest prices, and have won for themselves an enviable reputation, acquired as the result of many years' experience.

Walter Grose, Montreal,

Selling Agent for the Dominion of Canada.

One or other of the above brands may be purchased from all prominent Hardware Merchants throughout the Dominion who carry an assorted stock.



METALS.

There is a great scarcity in all grades of pig iron in the United States, and this scarcity is being felt here. Although there has been no quotable change over the prices of a week ago, the market is still on the upward turn, and both basic and Bessemer are in good demand and the prices for each are about the same. For next year's delivery manufacturers are holding both basic and Bessemer at very high figures. Business in nearly all kinds of metals keeps up fairly well and pig tin has advanced $2 per 100 lb.

PIG IRON—The market continues bare of supplies and the prices are very firm. The advances in the United States have not been so large as they were a week ago and what is on hand is held for future delivery at high figures. There have been advances in some classes of pig iron of from 50c. to $1 per ton.

BAR IRON — The demand has improved and the market is strong. The local supplies are smaller than they were a week ago. We quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft. 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The supplies are scarce, but the market is not particularly active. The prices are unchanged. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

BOILER TUBES — The market is still strong for boiler tubes and the demand is keeping the supplies on hand light.

BLACK SHEETS—There is a fair trade doing. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES — These are in better demand. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — Trade continues good and prices are unchanged. We quote in case lots as follows: Queen's Head, $4.50 for 28 gauge; American, $4 40 for 29 gauge; Bell brand, $4.20 for 28 gauge.

PIG TIN—The strength in the outside markets has resulted in an advance of $2 locally per 100 lb. Trade is brisk. We quote prices at $32 to $33 per 100 lb.

TINPLATES—There has been an improvement in the demand and the local market is in a fair condition. We quote I C, 14x20, at $4 25.

TINNED SHEETS—There is still a good trade doing. We quote: 70 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—The English copper market is steadier, and the new prices are commencing to harden. The local demand for ingot copper is good, and a continued improvement in the market for sheet copper is noted. We quote ingot at $14 per 100 lb., and sheet copper at $22 to $23.

BRASS—The demand is fair. The discount is unchanged at 15 per cent.

PIG LEAD—The market is steady with a fair demand. The quotations are $3.50 to $3.75 for pig and $5 for bar lead.

IRON PIPE—Trade continues fair with a good demand from the west. We quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3 65; 1 in., $5.20; 1¼-in., $7.35; 1½-in., $8 95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER—The demand is moderate. We quote $5.50 to $6.

ZINC SHEET—There is a good demand for zinc sheet at unchanged prices. We are quoting cask lots at $6 to $6.25, and part casks at $6 25 to $6.50.

SOLDER—The market is steady and trade is fair. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—The demand is fair and prices are unchanged at $9.50 per 100 lb.

PAINTS AND OILS.

The features of this week's market are the advances in linseed oil and turpentine of 1c. and 2c. each per gal., respectively. The linseed oil market has been strong, owing to the advances in Great Britain and the scarcity of oil in Toronto and elsewhere, and the present advance was not unexpected. The turpentine market has been firm, and the appreciation of 2c. here is in sympathy with a similar appreciation in the Southern States. Nothing definite is known about the turpentine situation there, and the prices may decline again in a week or so. Locally, the trade in paints and oils during the week has been fair. White leads and dry colors are active. Varnishes are firm and in good demand. Shingle stains are selling freely, and large quantities of them are being used this year. Castor oil is slow, and the demand for it has not yet been large. Paris green is quiet. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 83c.; boiled, 86c.; 3 to 5 barrels, raw, 82c.; boiled, 85c.; 6 to 9 barrels, raw, 80c.; boiled, 83c.; 10 to 60 barrels, raw, 78c.; boiled, 81c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The demand continues brisk and the prices are firm. We quote as follows: Under 26 in., $4.45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is a good trade doing, and prices are steady. The warm weather is increasing the receipts. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14.50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The scarcity of hides is still felt. The demand for them is good. We quote: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½c.

SKINS—The receipts of sheep and lambskins are small. We quote: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies) 60 to 70c. each; sheepskins, 80c. to $1; lambskins, 20 to 25c.

WOOL — There is scarcely any trade doing. We quote: Fleece wool, 12½c., and unwashed, 7c. per lb.

SEEDS.

The season is nearly over and the demand is slack. We quote out of store at Toronto: Red clover, $6.50 to $9; alsike, $10 to $16, and timothy, $7.80 to $8.25.

COAL.

The arrivals of soft and hard coal have been large, and there is a heavy stock on hand. We quote prices at international bridges as follows: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

There is a fair demand and the market is steady. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Pig tin has advanced $2 per 100 lb.

Turpentine has advanced 2c. per gal.

Raw and boiled linseed oils have advanced 1c. per gal.

FIFTY YEARS AGO.

The following is from The Toronto Globe of 50 years ago:

It is proposed to construct a substantial new suspension bridge at the Falls for the use of the Great Western and the other railway companies, whose lines will meet at that point on both sides of the river. It is not intended that trains of passenger carriages shall pass over it, but only baggage and freight cars, slowly propelled by horses or stationary engines. It is supposed that travellers would prefer to walk over, and, with a great deal of reason, too.

The business on the Ottawa may be looked upon now as having fairly commenced. On Monday last 14 cribs of white pine passed through the North Chaudiere slide. Apropos, speaking of timber, we understand that several parcels of white pine have changed hands among the merchants in Quebec at 8d. per foot.

We observe that a ship direct from China with teas for Messrs. Gibb & Ross has arrived at Quebec.

HEATING AND PLUMBING

THE SITUATION IN MONTREAL.

THE plumbers' strike in Montreal has not taken on any new features. A few of the master plumbers who at first held out are said to have yielded, but there are still a large number of employers who are resolved to stick to their original position.

The master plmbers issued a statement explaining their position, in which they said: "We have no objection to employing union men, but if the union cannot supply us with enough good men we want to employ others." As to the wages to be paid, they thought that from 17½ to 27½c. an hour was fair enough, and they were also willing to allow the 9-hour workday. They do object, however, to giving the full day's pay for work only commenced on a day, which is demanded by the unions. They declare that the men should be paid for so many hours in the day as the master may charge his customer.

Both masters and workmen are apparently satisfied with the way they are progressing under the strike. The former think they will be able to get along very well in a short time, as several outside men are coming into the city, while the journeymen declare that the strike will be ended by Saturday night. About 70 employers now hold out.

BUILDING IN TORONTO.

During the week building permits from the office of the city commissioner in Toronto have been issued as follows; Rowenak Smith, for a two-storey brick dwelling on the west side of Albany avenue, for $2,300; Dr. Bentley, for a two storey brick and stone addition to dwelling on the northeast corner of College and Markham streets, for $700; Mrs. Drohan, for alterations to dwelling on 57 Arthur street, for $400; S. Frame, for a two-storey brick residence on the south side of West Marion street, for $1,700; Consumer's Gas Co., Limited, for a one-storey boiler house on Parliament street, for $5,000; The Eby, Blain Co., Limited, for the erection of three additional storeys to warehouse on the south west corner of Scott and Front streets, for $10,000; City Corporation, for yards and cattle shed on Walnut avenue, for $11,500; Rev. A. Macfadyen, for a two-storey brick and roughcast dwelling on the south side of Danforth avenue, for $1,000; Consumer's Gas Co., Limited, for a large one-storey brick addition to premises on Front street east, near Parliament street, for $5,000; R. C. Clute, K. C., for a two-storey dwelling on 196 Bloor street west, for $5,000; William Apps, for a pair of two-storey brick dwellings on Albany avenue, for $5,000; Mr. Knowles, for a brick-clad dwelling on 29 Linden street, for $200; J. W. Hoover, for a brick-clad two-storey dwelling on 51 Edward street, for $600; Mark Dodson, for a two-storey roughcast dwelling on the south side of Regent avenue, for $450; S. Allsopp, for a two-storey roughcast addition to dwelling on 389 Givens street, for $400; Walter Bebbington, for a two-storey brick dwelling on 101 Summerhill avenue, for $800; Frank B. Poucher, for a pair of two-storey brick and roughcast dwellings on the south-west corner of Hamilton and Mountstephen streets, for $4 400; F. W. Baillie, for a two-storey brick stable on the north side of Crescent Road, for $5,000; Harry Barclay, for a one-storey wood and plaster addition to warehouse on 35 Shaftesbury avenue, for $300; E. Rush, for a two-storey and attic detached brick dwelling on 97 Lippincott street, for $2,100.

PLUMBING AND HEATING NOTES.

Fiddes & Hogarth, plumbers, etc., Toronto, have secured the contract for the plumbing of the summer residence of A. E. Ames, in East Toronto, and the plumbing of Geo. Pearson's summer residence at Centre Island.

Guest & Co., plumbers, Toronto, have secured the contract for the plumbing and gasfitting in connection with O'Leary's livery stable on Spadina Crescent.

A NEW PLUMBERS' ASSOCIATION.

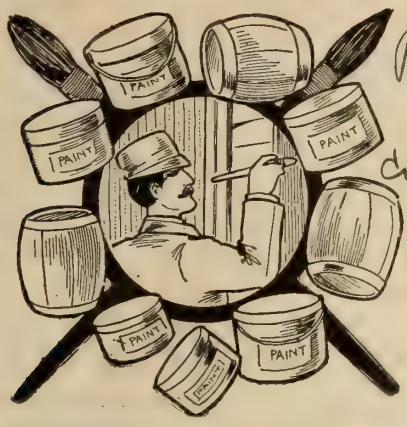
The master plumbers of Sherbrooke, Que., have formed an association. They have drawn up a constitution and by-laws, and will be known as the Master Plumbers' Association of Sherbrooke and District of St. Francis. The officers elected were as follows:

President—J. Brown.
1st Vice-President—R. Sampson.
2nd Vice-President—Ed. Roy.
Secretary—W. Pilotte.
Treasurer—N. Labrecque.

The aim of the Association is to create and foster feelings of fraternity and social intercourse amongst the members of the craft and to promote some much needed sanitary improvements in the city.

BUILDING AT OTTAWA.

DURING the week the following building permits have been issued in Ottawa: The Ottawa Collegiate Institute, for a stone addition, for $22,500; C. W. Bangs, for a brick dwelling on Frank street, for $5,000; Andrew Kerr, for a frame dwelling on Division street, for $600; Andrew Kerr, for a frame dwelling on Andrew street, for $1,000; Alphonse Bolduc, for a brick-veneered dwelling on Murray street, for $1,200; Alex. Tibeau, for four brick-veneered dwellings on Henderson avenue, for $4,000; A. Laudels, for a double tenement house, frame, on Flora street, for $1,900; P. A. Vaillincourt, for an ironclad dwelling on St. Patrick street, for $900; Robert Davidson, for a brick-veneered dwelling on Henderson avenue for $1,000; D. V. Ranger, for alterations to hotel on York street, for $1,500; W. E. Calvert, for a brick-veneered dwelling on Bay street, for $1,100; A. F. Hurdman, for two brick-veneered dwellings on Henderson avenue, for $3,000; Mr. Woolcomb, for a solid brick addition to Ashbury College, Argyle avenue, for $2,000; John Brouse, for a brick shop and dwelling on O'Connor street, for $3,000; Jos. McVeigh, for a roughcast house on James street, for $1,000; J. H. Currie, for a brick-veneered dwelling on Henderson avenue, for $1,000; Michael Cunningham, for a frame dwelling on Mary street, for $200; A. E. Shaver, for a frame dwelling on Percy street, for $900; Mrs. D. Shielmacher, for a frame dwelling on Rochester street, for $500; S. J. Davis, for a double brick-veneered dwelling on Lorne avenue, for $2,600; Alex. Fleck, for a solid brick dwelling on Concession street, for $7,000; Mrs. Wooding, for a brick-veneered dwelling on Bank street, for $1,500; The Ottawa Gas Co., for a round brick building at gas works on King street, for $15,000, and J. Long, for a brick-veneered dwelling on Besserer street, for $1,200.



PLUMBING AND HEATING NOTES.

St. George, Guildbaut, Oulette and Desjardins, plumbers, Montreal, have registered.

Listowel, Ont., has carried a by-law for the construction of a sewage system in that town.

Blackmore & Morgan have started business as plumbers at 737 Pender street, Vancouver.

PAINT AND LEAD

Returned 20/5/03 Out Book 8 page 91

There's plenty of money in Paint and Lead if you get the right kind.

RAMSAY PAINTS pay, because they are the best paints at the best price, with the proper advertising to assist you, and we shall tell you all about it if you ask.

RAMSAYS EXTERIOR LEAD pays, because the painter must and will have lead, and here is a lead proved better than pure lead or any other make and cheaper than pure lead as well.

SOME BUILDING NOTES.

A new school will be erected at Melita, Man.

A nurses' home is being erected at Hamilton.

A schoolhouse will be built at New Denver, Ont.

Mrs. Davis is erecting an hotel at North Augusta, Ont.

A. C. Thorburn will erect a residence at Niagara Falls, Ont.

George Cummings is building a brick block at Emerson, Man.

J. W. Woodworth is building a $7,000 brick block at Sydney, C.B.

J. J. Flannagan intends erecting a brick double house at Fort William, Ont.

John Duncan will erect a new residence and post office building at Thamesville, Ont.

A business block will be built at Owen Sound, Ont., by George Holmes and A. J. Creighton.

J. E. Earl is erecting a new building, and the Union Bank is building offices at Winchester, Ont.

C. P. Moore will erect a three-storey brick building at the corner of Charlotte and Pitt streets, Sydney, C.B.

A. N. McCutcheon is building a residence at the corner of Edmonton and Sargent streets, Winnipeg.

George Oakes will erect a building to be used as a fruit and confectionery store at Weymouth Bridge, N.S.

St. Stephen's Chapel at the corner of Atwater avenue and Dorchester street, Montreal, will be enlarged at a cost of $4 000.

BUILDING IN WINNIPEG.

Quite a number of buildings will be built this summer in Winnipeg. Amongst these is an apartment house of three storeys and a basement, and containing 12 suites of rooms, each suite having four or five rooms, a bathroom, lavatory, closet and pantries, and a storage larder in the basement. The building will be on the corner of Ellice avenue and Carleton streets. Three frame houses with stone foundations will be erected on Lily street for $7,000. A new three storey hotel, having large sample rooms, will be built at St. Jean Baptiste, and a new block is being finished on Main street for Wm. Guest, with a frontage of 22 ft. and a depth of 72 ft., and three storeys high. Besides the Canada Life Building, a block will be erected for Porter & Co., of pressed brick, and of four storeys and a basement. F. O. Maber will build a frame house on Neva street to cost $3,000 when completed.

CUSSIN' — DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."

It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed.

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

Sole Manufacturers in Canada. **Hamilton.**

Brisk Business Builders

Every dealer who sells Lucas Famous Greens and Dry Colors adds to the reputation of his establishment. Lucas products are brisk business builders; and they hold trade too.

Reasons Why—

(1) Because Lucas Greens and Dry Colors are all time-tested products that are absolutely reliable. Their sale has been established for upwards of half a century. They are sold all over the civilized world.

(2) Because Lucas advertising is liberal, original and effective. It's the kind that interests consumers and moves the goods off the dealers' shelves. Write us.

THE THOS. DAVIDSON MFG. CO., Limited

ESTABLISHED 1869. MONTREAL, CANADA. INCORPORATED 1895.

A NEWFOUNDLANDER'S VIEWS ON UNION WITH CANADA.

JUDGE MORISON, of Newfoundland, was in Toronto early this week. Judge Morison is the gentleman whom the press despatches recently announced was about to leave the bench in order that he might lead the party in Newfoundland that is favorable to Confederation with Canada. He was born in St. John's in 1857, was educated at the Academy there, and studied law with Sir John Winter, whose partner he subsequently became. He sat for Bonavista from 1888 to 1895, and at his last election received the largest vote ever given in the island. He entered the Cabinet in 1894 as Attorney-General.

To a newspaper reporter he said he had nothing to say upon the question of his personal relations to parties or to Confederation. He did not affirm or deny the Halifax report. The rumor, he said, was simply a rumor, and he had nothing whatever to say as to what he intended to do.

He was not disinclined to talk upon the general subject, and stated that whereas, in 1869, Newfoundland was strongly against Confederation, she was being driven by the logic of events towards

UNION WITH CANADA.

In 1869 the colony had no debt, and the taxation upon imports was about 10 per cent. To-day, chiefly through the building of railways, the debt had risen to about $20,000,000, the interest on which was alone equal to the total expenditure of the colony in 1869. To meet this, import duties had been increased until now they averaged about 33 per cent. or about $10 per head of the population of 200,000. Thus the colony which stayed out of Confederation because it wanted low duties finds itself forced to charge higher duties than Canada does. The other cause which helped to keep Newfoundland out of Confederation was ignorance, the people believing that Canada was largely a wilderness that would take much from Newfoundland and return little. Now they knew that Canada was a big and rich country, and that Confederation was not pressed by Canada from mercenary motives.

WHAT BOTH WOULD GAIN.

Newfoundland would gain from Confederation reduced cost of government: her post office, lighthouse, wharves and marine service and Customs Department would all be taken over by Canada, leaving the island education, roads and administration of justice.

Canada on her part would gain an increased market, as the, in round numbers, $7,000,000 worth of goods imported into Newfoundland, largely from the United States and Britain, would, to a great extent, come from Canada, when Canadian goods came in free and all other goods paid 33 per cent. Canada would gain control of the fisheries of the whole North Atlantic, and would be able to dictate her own terms to the United States, instead of allowing that country to play off Canada and Newfoundland one against the other.

Judge Morison says that Newfoundland is a

COUNTRY OF GREAT RESOURCES

in timber, pulpwood and minerals, and, that once joined to Canada, her development would be rapid. He does not think the present Reid contract is as good as the previous one, as it practically gives Mr. Reid the railway for nothing for 50 years, and does not impose the necessity of development upon him, which the old one did.

As to the French Shore difficulty, he believes it would be settled in a year if the Newfoundland claim had the weight of the Dominion of Canada behind it.

OUTPUT OF BRITISH STEEL RAILS.

From the records of the British Iron Trade Association, the following record of the output of Bessemer steel rails in Great Britain since the year 1880 is taken:

Year.	Output Tons.	Year.	Output Tons.
1880	739,910	1890.....	1,019,606
1881	1,023,740	1891.....	662,676
1882	1,235,785	1892.....	535,836
1883	1,079,174	1893.....	579,386
1884	784,968	1894.....	598,530
1885	706,583	1895.....	604,338
1886	730,343	1896.....	817,476
1887	1,021,847	1897.....	921,131
1888	979,083	1898.....	751,591
1889	943,048	1899.....	838,148
		1900.....	759,844

The British railway system, in point of length, is rather more than a tenth of that of the United States, while the British steel rail output over the last six years, according to Iron and Coal Trades Review, has averaged over one-third of the American rail production.

TAKING CARE OF OIL STONES

"Oil Stones: How to Select and Use Them" is the name of a booklet issued by The Pike Manufacturing Co., Pike Station, N.H., having for its object the giving of a few brief practical suggestions on the selection, use and care of oil stones. Amongst other points touched on are the selection of oil stones, the principal oil stones on the market, how they are used, and the best oil for them. The introduction gives a brief history of oilstones and whetstones.

THE ONTARIO HARDWARE MERCHANTS' ASSOCIATION.

FIRST ANNUAL MEETING AND ELECTION OF OFFICERS.

THE Retail Hardware Merchants' Association of Ontario held their first annual meeting on Thursday evening, May 8, in Bathurst Street Hall, Toronto.

Many delegates from the city were present and a few from a distance, and numerous letters were received from hardware merchants in Fordwich, Caledonia, Oshawa, Brampton, Smith's Falls, Guelph, Hamilton, Woodstock, London, Stratford and other commercial centres, asking admission to membership. Most of the evening was taken up with the election of officers, which resulted as follows:

President—Edwin R. Rogers, Dundas street, Toronto Junction.

1st Vice-President—J. E. Hawkins, Oshawa.

2nd Vice-President—Geo. Pearsall, corner Yonge and Ann streets, Toronto.

Secretary—S. J. Greer, 108 Queen street east, Toronto.

Treasurer—John Caslor, 628 Queen street west, Toronto.

Executive Committee—A. Welch, 302 Queen street west, Toronto; Mr. Hunter, of R. Fletcher & Son, 1424 Queen street west, Toronto; Morley W. Shepherd, of The Shepherd Hardware Co., 140 Dundas street, Toronto; George Munn, Spadina avenue, Toronto.

J. E. Hawkins, of Oshawa, gave an address on how business should be conducted in the retail hardware store. He was followed by Secretary Trowern, of the Retail Merchants' Association of Canada, who spoke to them on the advantages to be had by their amalgamating with the Retail Merchants' Association.

On the invitation of Mr. Trowern, the Toronto branch of the Hardware Merchants' Association will hold their meetings from this out at the headquarters of the Retail Merchants' Association on Bay street, instead of Bathurst Street Hall, the place where they have hitherto held their gatherings.

It is proposed to establish a debt collection system in connection with the Association, and plans are now being considered with that end in view. They will be taken up at some future meeting for consideration.

Although it is only about a year since this Association was formed, it has rapidly grown and its membership now is between 80 and 100. Of these about 50 belong to Toronto. A number are joining from a distance, and as soon as sufficient members have been secured in any of the many trade centres of the Province branch associations in affiliation with the Provincial Association will be made.

This Association has for its objects the securing of a friendly co-operation of all retail hardware merchants in the Province; the promotion of the general interests of the retail dealer and the bringing about of closer business relations between the retailer and the wholesaler. Membership to the Association is eligible for any person, firm or corporation in the Province of Ontario engaged in the retail business of selling hardware, tinware, stoves, paints, oils and glass and recognized as a regular retail dealer.

The Association is asking the co-operation of the Wholesale Hardware Merchants' Association to prevent the sale of goods direct to the consumer by wholesale houses and the selling off at bargain prices of the different lines of hardware, tinware and graniteware by the departmental stores. The different jobbers who cater to these stores will be approached and asked to use their influence against this slaughtering of goods.

ITS SALE ALWAYS INCREASING.

Shaking hands with yourself is one way of expressing satisfaction with something that pleases you. Our way when anything in our line pleases us is to tell the trade about it.

The extraordinary increase in the sales of Lucas Imperial French Green more than pleases. It confirms our belief that it pays to make a green that is the painters' standby. Imperial French Green is durable and practically unfading, is positively non-poisonous, brilliant in color and has great covering qualities.

Lucas Imperial French Green has been a recognized standard for over 50 years. It has been analyzed by almost all the painters' associations in Canada and the United States, and has come out of the test always with great credit. It can be used wherever a green is needed, and will always give the best results.

Every dealer should carry in stock Lucas Imperial Green. It will add to the reputation of his store; it will lead to other sales.

MERIT BRINGS RESULTS.

There is comfort in doing business when you know the goods are right. On the other hand, nothing is more annoying than to have complaints from customers regarding quality.

Every merchant has had this experience; he knows the real pleasure in selling goods which invariably give satisfaction. This is especially true of cutlery.

The "Griffon" brand can always be recommended with confidence. Their trade is being built up on genuine merit, and their goods always have the quality.

The "Carbo Magnetic" razor is an instance in proof of this. Their sales in 1898 were 19,672 razors; 1899, 35,654; 1900, 77,268; 1901, 194,362, all due to the high standard of excellence of the goods. This phenomenal growth proves conclusively that it pays to push a good article.

Apollo galvanized iron is all alike; if not, send back to your jobber at our expense—we shall hear of it.

CURRENT MARKET QUOTATIONS.

May 16, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

SANITARY BUILDING PAPERS.

Any Building Paper that will turn musty after being exposed to dampness is unsanitary and dangerous to health.

A first-class Building Paper should be Water-proof, Vermin-proof, Air-tight and Durable. Our Tarred Fibre and O. K. Building Papers meet all the above requirements.

Don't be afraid to use Tarred Building Paper as it is healthy and the odor soon passes away. If you will use an Untarred Building Paper, however, try our Dry and Resin Sized Fibre which won't turn musty under any circumstances.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

"FACTS ARE STUBBORN THINGS."

Enterprising Merchants understand that it is easy to sell goods that are in demand, and are known to be reliable. It is an admitted fact that CHURCH'S Cold Water

ALABASTINE

is a wall-coating of wide merit. It has stood the test of time.

M. B. Church was the first to offer to the trade a practical wall-coating adapted for use by mixing in cold water. The compound is patented, and the process of manufacturing is patented in Canada and other countries.

If offered a substitute, or something "just as good," bear in mind that the party so offering may well be regarded with suspicion. There is only one CHURCH'S ALABASTINE, and nothing manufactured for the purpose equal to it.

Attempts have been made to imitate ALABASTINE, which of course is the "sincerest flattery," but it is the genuine ALABASTINE that is in demand, and in selling it there is no risk on account of infringement on anybody's rights.

Our goods, our advertising, our business methods are up-to-date. Prices are right, terms easy, and supply of advertising matter liberal. Is your assortment complete? Prompt service to all.

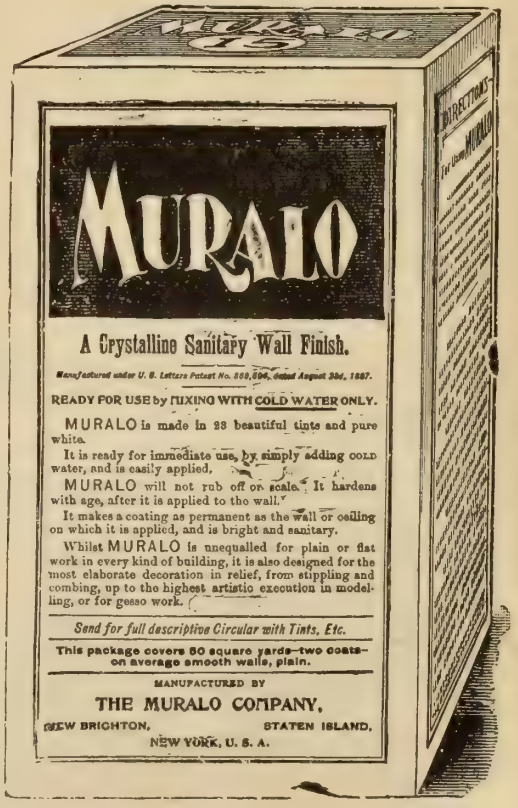
WE TALK

FACTS, PATENTS, QUALITY QUANTITY, PRICE. . .

FOR FACTS. Here are a **few samples** from all parts of the world:

Messrs. Williamson, Croft & Co'y, Sydney, Australia, write: "For over six years we have been supplying our clients with Muralo. The increasing business in same is sufficient proof of the satisfaction it is giving."



Lyman-Eliel Drug Co., of Minneapolis, Minn., write; "We are now going into our sixth year on Muralo, and can say that no other wall coating we have ever sold gives the satisfaction that Muralo does."

Carpenter-Morton Co., of Boston, Mass., write: "We are perfectly satisfied your products are the best made in their line."

Cleveland Window Glass Co., of Cleveland, Ohio, write: "Would say we have had the best of satisfaction from Muralo and all goods furnished by you."

S. E. M. Rice, of Newark, N.J., writes: "We have never had any wall coating which compares with Muralo and Calcimo, as shown in the increase of our business. We have enjoyed handling same."

D. M. Murray Co., of Cape Town, S.A., write: "Muralo is a satisfactory wall coating, and we herewith enclose our order as usual."

FOR PATENTS. See the fac-simile of Muralo package for the number of the "original patent and process" for making "cold water" wall coatings.

FOR QUALITY. We allow our customers' words to speak for us. Every up-to-date dealer will confirm the above statements. Besides this, Muralo is made from the best selected stone taken from our Nova Scotia quarries.

FOR QUANTITY. Each package contains five pounds, full weight, which will make more paint when in solution than wall coatings of other manufacture and will cover more surface. Muralo is the recognized "Standard" the "wide World over."

FOR PRICE. Making the best goods and selling in large quantities, we can afford to give our agents lowest prices with the most liberal discounts.

Our factory covering many acres, and our large fully equipped printing plant is at your service. We supply advertising matter that talks for our Agents.

Shakespeare Reels and Baits.

Wm. Shakespeare, Jr., of Kalamazoo, Mich., "maker of fine reels and baits that catch fish," wants every dealer in the U. S. and Canada to have a personal knowledge of the fine points of the Shakespeare reels and the marvelous attractiveness of the Shakespeare Baits. He will gladly send samples of his reels and baits for examination, express prepaid, to any reliable sporting goods dealer, or dealer who handles a line of fishing tackle, upon receipt of his name and address. After examination, if he does not wish to keep the assortment in stock the dealer may return the tackle to Mr. Shakespeare and he will pay the return charges.

Wm. Shakespeare, Jr., devotes all his time and ability to making fine reels and bait that catch fish. The baits are so successful in attracting and catching the biggest fish and the reels are so beautiful in design, so exquisitely finished and withal so strong and serviceable the angler who is so fortunate as to own one cherishes it as his dearest and most valued possession.

Write to-day to Mr. Shakespeare; ask him to send you samples of reels and baits together with his charming and delightful little books on "How to Catch Bass," "The Fine Points About Tackle" and "The Art of Bait Casting" all of which are free.

THE TRADE COMMISSIONERSHIP.

A JOINT deputation of the Canadian Manufacturers' Association and the Boards of Trade of Toronto and Ottawa waited upon the Dominion Government last week in regard to the appointment of a trade commissioner in Great Britain. The following memorial was presented :

That the Dominion Government be urged to secure a building in a suitable district of London for the purpose of exhibiting the food and other natural products and the manufactures of Canada ; that this building contain not only exhibits of Canadian goods, but that office facilities and sample-rooms be provided there, to be rented to Canadian firms ; that the whole building be under the control of a trade commissioner, appointed by the Dominion Government, who shall be thoroughly acquainted with the resources and manufactures of the Dominion ; that each Province be represented by a Provincial commissioner, who shall serve under the commissioner-in-chief, and shall be appointed and remunerated by the Provincial Government ; that the cost of the enterprise be defrayed by an annual appropriation from the Dominion Government, together with the rent derived from the various offices.

The demands of this memorial were pressed on the Ministers by Messrs. J. D. Allan, Hees, Ellis, Coats and Reid. Mr. J. D. Allan, of Toronto, was the chief speaker, and the fact that he has been making trips to Europe during the last 30 years eminenely fitted him for presenting the case of the petitioners.

The movement for the establishment of a trade commissioner in Great Britain, it is worthy of note, did not originate with any political organization, or party. It is purely a business movement and is the result of the visits of such business men as Mr. Allan to England. They have recognized time and again the necessity of such an official, but in spite of all their representations nothing has been done to carry out the views of the business men of this country.

Sir Richard Cartwright has persistently set his face against the requests of business men of this country in this particular. At any rate he has failed to do anything, notwithstanding the representations that have been repeatedly made to him. It is significant, therefore, that he was not present to meet the representatives of the boards of trade and The Canadian Manufacturers' Association in Ottawa last week. The Ministers present were : Sir Wilfrid Laurier, Hon. Wm. Mulock, and Hon. Wm. Paterson. Is Sir Richard so strongly opposed to the idea that he would not be one of the group of Ministers to meet the deputation of business men ?

It is gratifying to those who have been advocating the establishment of a trade commissionership in London to know that the deputation seems to have been more successful than any of its predecessors. At any rate, the reply of the Premier was more promising than anything yet experienced. He intimated that the Government was prepared to appoint a trade commissioner, and that $20,000 had been set apart for the purpose.

It is hoped that there will now be no futher delay in the matter, and that a suitable man will be appointed. It is to be hoped that whoever is appointed will receive the endorsation of the principal boards of trade and of the Canadian Manufacturers' Association. It would be an utter folly to appoint anyone to the position whose chief recommendation is political service. The man to represent Canada as trade commissioner must be a practical and able business man. Nothing else will suit the requirements of the case.

WISH THEY WERE IN CANADA.

The cables inform us that severe cold weather is being experienced in Great Britain, and that skating is going on in the north, while those who have visited England early for the Coronation are standing around shivering.

No doubt the many Canadians who are already in London for the purpose of taking part in or witnessing the Coronation proceedings are wishing they were back in the dry, balmy spring climate of their "old Canadian home."

EXPORT TRADE IN CANADIAN PIG IRON.

OUR exchanges just to hand announce the recent arrival on the Clyde of two more cargoes of Canadian pig iron, aggregating 10,200 tons, while still another cargo is on the way.

This again draws attention to the export trade of Canadian pig iron to the British market. This export trade during the present fiscal year has increased enormously in comparison with other years. Our own trade returns show that, for the nine months ending March, the total exports to Great Britain were 70,554 tons, valued at $672,740. Last year the quantity of pig iron exported to Great Britain during the nine months was only 1,524 tons, valued at $34,295. Our exports for the same period to all countries have very much increased also. To the United States, for example, we exported 5,109 tons, against 418 tons for the same period last year. The total exports for the nine months to all countries were 76,276 tons, valued at $738,442, compared with 2,958 tons, valued at $72,459, for the same period in 1901. The following table gives the exports for the nine months:

EXPORTS FOR NINE MONTHS.

	1902. Tons.	1901. Tons.
Great Britain	70,754	1,524
United States	5,109	418
Other countries	413	1,016
Total	76,276	2,958
Value of the above	$738,442	$72,459

It is significant that the exports of pig iron to Great Britain alone during the past nine months were in excess of the total production of pig iron in Canada in 1898. And it must be remembered that in the totals we have given for the nine months no account is taken of the cargoes of pig iron which have been sent to England since March, which would, of course, include the shipments noted above, so that even taking the two cargoes for which we have figures the total would be increased by over 10,000 tons, making it at least 86,475 tons.

These figures are most gratifying. Canada has now definitely taken her place among the iron exporting countries of the world. The total production of pig iron in Canada last year was, as we have already pointed out in a previous issue, about 245,000 gross tons, compared with about 87,000 tons the year before. Six years ago the production was less than 38,000 tons. Taking the furnaces in course of construction, and those which are already in operation, the aggregate capacity of the Canadian concerns is now about 1,100,000 gross tons.

There are furnaces at Ferrona, N.S., Hamilton, Ont., Midland, Ont., Deseronto, Ont., Radnor, Que., Drummondville, Que., and Sydney, N.S.

The most important furnaces in the course of construction are those at Sault Ste. Marie, where, as our readers are well aware, steel rails are already being turned out by the Clergue interest from iron made at the Midland furnace.

BRITISH HARDWARE EXPORTS TO CANADA.

The British trade returns continue to show an increase in the export of hardware and metals to Canada. In cutlery, the exports for the first four months of the present year were valued at £17,677, compared with £13 341 the same period last year. In pig iron there was also quite an increase, the total being 4,495 tons, compared with 706 tons. In tinplates, almost double the quantity was sent to Canada as compared with a few years ago, the figures being 6,073 tons, against 3,492.

The greatest increase of all was in railroad iron, there being for the four months 6,434 tons against 106 last year. In hardware, there was also an increase, the exports to Canada being valued at £9,411, while for the four months in 1901 the total was £7,218.

AN ADVANCE IN CEMENT.

THERE has been an advance of 10c. per bbl. in the carload price of Canadian portland and hydraulic cements. The demand for cement has been heavier than usual of late, both in Canada and the United States, owing to the large extent of the building operations this year in the two countries and to the increased uses to which that article is being put every season. The unparalleled demand for it in the United States has resulted in none of their cement being offered on the Canadian market for some time, leaving the field clear for our own manufacturers. Combined with this big demand, the indications of a scarcity and advance in coal, on account of the lock-out of the coal-miners in the United States, have induced the manufacturers here to advance their prices.

A large quantity of coal is used in the manufacture of cement, and the cement people over here have taken the above action as a preventative of excessive buying by their customers in anticipation of such an advance.

EXAMINATIONS FOR HARDWARE CLERKS.

A SOMEWHAT interesting position has been taken by the Ironmongers' Federated Association at its recent conference in Birmingham in regard to the apprenticeship question. A resolution, which reads as follows, was introduced by one of the hardwaremen present: "That this conference deems it advisable to form an educational committee, which committee when appointed shall have power to hold examinations at given centres of apprentices and assistants employed by, or connected with, the members of the I.F.A."

This resolution was discussed at some length. The mover of the resolution contended that the adoption of his scheme would strengthen the federation, because the youth who had passed the examination would be relied upon to join the Association when he started in business for himself, and he suggested that the members pledge themselves to take no apprentices who would not submit themselves for examination. He furthermore suggested that certificates of merit should be awarded to deserving candidates. Handwriting, he held, should be one of the examination subjects. We are told in the reports of the proceedings that this created some laughter. Is it possible that business men in Great Britain are finding the same difficulty as business men in Canada, of getting boys from the public schools who can write legibly and well?

When the resolution came to a vote it was carried with only two dissenting votes.

This is a subject that the few hardware associations which are in existence in Canada might take into their consideration as well. The better class of youths who enter the hardware trade as clerks will, of course, be the merchants in years to come.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

WIRE NAILS IN THE STATES.

AN active demand continues for wire nails, but there is a noticeable improvement in the promptness with which mills are making shipments. Outside mills are seeking business to a considerable extent, and the opinion is expressed that but for the fancy prices which can be obtained for steel there would be more or less inequality in nail quotations. While the base price appears to be firmly maintained the differentials between carload lots to jobbers and retailers are not strictly adhered to. In some instances quotations for jobbers are made to retailers.—Iron Age.

EXTRAS ON CUT NAILS IN THE STATES.

The new list of extras on cut nails, adopted at the recent meeting of the manufacturers, carry considerable advances on the smaller sizes. The trade are somewhat skeptical as to whether the advances made in certain sizes, especially on 3d. fine, can be maintained. There is a good demand for cut nails, and some of the mills report that they are still unable to get steel as fast as needed. We quote cut nails at $2.05 base, in carloads, and $2.10 in less than carloads, f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination.—Iron Age.

SHEETS IN THE UNITED STATES.

The demand for black and galvanized sheets is not so large as it was some time ago, but the mills are comfortably filled. However, reasonably prompt deliveries of both black and galvanized can be had. We quote No. 27 black sheets, box annealed, one pass through cold rolls, for desirable orders, at 2.95c. to 3c., and No. 28 at 3.05c. to 3.10c. Small lots from store bring 3.15c. to 3.25c. for No. 28. Galvanized sheets are somewhat quiet in demand, but the mills are pretty well filled up on old contracts. We quote at 70, 10 and 5 in carloads and 70 and 5 in small lots from store. All above prices are f.o.b. maker's mill.—Iron Age.

PIG IRON IN GREAT BRITAIN.

In the pig-iron branch of the trade the demand has fallen away to some extent; but the market has only been slightly affected as regards prices, which, however, have shaded off slightly as compared with last week. The change has, perhaps, been most acutely felt in connection with the better qualities of Cleveland pig iron; but as most of the producers have plenty of work on hand they have not pressed iron upon the market, and consequently quotations have only receded slightly, the reduction in the case of No. 3 Cleveland, amounting to about 3d. per ton. Hematite iron remains about the same, with mixed numbers at 60s. to 61s. in Barrow, and 57s. in Middlesbrough. The following is a statement of the present stocks in public stores :—

Public stores stocks, in tons :	Wednesday.
Connal's at Glasgow	52,900
Connal's at Middlesbrough	143,000
Connal's at Middlesbrough, hematite	300
West Coast hematite	15,350
N.E.R. Stores, Middlesbrough	360

During the week ending May 6, the stocks at Middlesbrough increased by 2,500 tons, while at Barrow and Glasgow there were decreases of 600 and 60 tons respectively. On the year there is an increase of 1,090 tons at Middlesbrough, and 400 tons at Barrow, but a decrease of 5,200 tons in Glasgow. The net change during the week is an increase of 1,800 tons, and during the year to date a decrease of 3,780 tons.—Iron and Coal Trades' Review, May 9.

MANUFACTURED IRON AND STEEL IN ENGLAND.

The market for finished materials shows but little change. The majority of manufacturers are fairly well placed in regard to orders, and many are well sold ahead. Prices remain at about the same level as last week and any changes in the future are likely to be in an upward, rather than a downward, direction. The rail trade is doing well and the output in this branch has been large of late. In Middlesbrough several good orders have recently been booked, both for railway and tramway rails, and inquiries continue somewhat numerous, it evidently having become apparent to consumers that the time to buy has arrived. Prices of heavy steel rails, which are 10s. higher than they were at the commencement of the year, are tending upwards, and £5 10s. net can now be realized, while for steel railway sleepers £6 7s 6d. is asked, and for cast-iron chairs £3 10s. net. The bar trade continues good and prices are unchanged, marked bars in South Staffordshire remaining at £8 10s. and common at £6 15s.—Iron and Coal Trades' Review, May 9.

BRITISH TINPLATE MARKET.

The tinplate market is firm, and prices have not materially altered. Russian buyers are ordering freely of oil-sizes—particularly 18¾ by 14—on the basis of 13s. 6d. to 13s. 9d., and there has also been a good demand for Siemens C. 10 by 20, which are firmly held for 19s. 9d. to 20s. per box. Finished black plate continues steady at from £11 7s. 6d. to £11 10s. per ton. As soon as the wage question is settled it is believed that The Blaina Iron and Tinplate Co. will recommence operations. Other firms are also preparing for increased trade. Messrs. Thomas, who control about 120 mills, and who have done much to dispel the charge so frequently made that Welsh makers are satisfied with antiquated machinery, are pushing on with their improvements.—Ironmonger, May 10.

NEW YORK METAL MARKET.

IRON.—The pig iron market is quiet. Although belated buyers are said to be taking full advantage of the opportunity afforded them to cover wants for the last five months of the year through the offerings of at least one of the large Southern furnace companies, there does not seem to be any very important businesses even in that direction. A number of sales of lots of 100 to 250 tons each are reported, with one or two orders for 500 tons. These were all for delivery from August forward and were made on the basis of $16 for No. 2 at the furnace. There is some inquiry for earlier deliveries, but very little material is procurable. For No. 2 to be shipped in June $17.50 Birmingham was the lowest figure named, and 100 tons sold at that. The Pennsylvania furnaces, it is reported, are not entertaining orders as the coal strike has put them out of the market for the present. Pittsburg reports a very quiet market, the large foundries in that district being fairly well supplied.

STEEL.—The steel situation is as strong as ever. None but foreign billets or sheet bars are now to be had, and these are scarce and high. Sales of steel rails for 1903 delivery are being made at $28 at the mill. Structural material is very hard to get in any quantity for reasonably early delivery, and is bringing premiums of 50 to 70c. per 100 lb. on list quotations. Bar iron is said to readily command 1.95 to 2c. when available for prompt delivery. Mail advices received from London to-day report no important change in the iron and steel situation on the other side, except that the market has been quieter, neither buyers nor sellers showing much disposition to enter into engagements far ahead.

TINPLATE.—Continued dullness characterizes this market, about the only movement being that on regular contract deliveries. Prices are unchanged.

The tone of the copper market was firm, but there was no further advance except in the price of electrolytic. There was some demand from consumers, but not much actual business was reported. There were sales of 100 tons standard for August delivery at 11.90c. and 900,000 lb. of casting for delivery, equal parts, in June, July and August, at 12c. The closing quotations for standard, spot to August delivery, were 11.85c. bid and 12c. asked; Lake, same deliveries, 12.25 @ 12.50c.; electrolytic, spot to June, 12.12½ @ 12.25, and July-August, 12 @ 12.25c.; casting was quoted at 12c. The London market opened firm and advanced 7s. 6d. by noon, but later it eased off, closing quiet at 2s. 6d. below the highest point for the day.

PIG TIN.—Under the influence heretofore noted the market was firm and closed ⅛ @ ¼c. higher than last night, though the business accomplished was comparatively small. The only reported sale was of 5 tons for June delivery at 29.87½c. The market closed quiet, with 30.12½c. bid and 30.50c. asked for spot, 30 @ 30.50c. for May and 29.75 @ 29.95c. for June. There was comparatively little business on the London market to-day. Spot closed 5c. lower than on Friday, while futures were 5s. higher. The tone was firm. The Minneapolis from London is here with 250 tons, which makes the total arrivals since the beginning of the month 2,090 tons. The Menominee has sailed from London for New York with 365 tons.

PIG LEAD.—There is nothing new in the situation, the market being quiet but steady. Quotations are based on 4.12½c. for lots of 50 tons or more. St. Louis was reported quiet at 3.95 @ 3.97½c. for soft Missouri, and 4c. for chemical hard. There was no change in London.

SPELTER.—The market remains very firm, but we hear of little business. Quotations remain at 4.45c. for spot and 4.37½ @ 4.42c. for June-July shipment from the West. The St. Louis market was firmer, with 4.25c. bid. No change was reported from London.

REGULUS ANTIMONY.—Trade was quiet but prices remained steady at 10½c. for Cookson's; 8 @ 8¼c. for Hallett's, and 7½ @ 8c. for other brands.—N. Y. Journal of Commerce, May 21.

WHY TWO YOUNG MEN OBTAINED GOOD POSITIONS.

"THERE is no dodging it any longer. We must have help. We could keep three men comfortably at work and where they are coming from I don't know. I'm sick and tired of these fellows with recommendations written by people who will write anything to get rid of a nuisance, and it seems to me I can stand a run of fever better than I can endure being besieged by the riffraff that the advertisement brings. I don't see any other way out of it. So here goes for the advertisement. We want three, but we'd better say one and take our pick. There'll be an army of them."

The junior member, on the well-established theory that silence gives consent, turned to his desk, wrote the advertisement and had it in the newspaper office in due time and came down in the morning braced for the dreaded task by an unusually good breakfast. He was not early enough to do any waiting for two applicants were there before him. A glance told him that these were not of his kind and after a brief exchange of questions and answers he found himself alone. At 9 o'clock a shadow fell upon the floor and, looking up, his glance took in a young man of something more than medium height, a good enough face, a bright eye and well dressed.

There was a simultaneous "Good morning" and the caller slipped into the chair by the desk, pushed his hat back from his forehead, crossed his legs, put his right elbow on the leaf which separated him from the man at the desk and began :

"Saw your advertisement in the morning paper and thought I'd drop in and see 'f there was anything in it. Live over 'n Belchertown. Good place enough, but no place for business. Pretty town, laid out fine, but don't grow any. Old Abner Belcher, way back, bought it from the Injuns and set up blacksmith's shop and set up business shoeing grasshoppers."

"May I ask what particular work you been doing."

"Well, I was coming to that. 'Tain't a great ways ahead and I'm one of these men that have to do things just so if I'm going to do 'em' at all. I've got it and my father's got it and I'm told my grandfather had it, so I guess you can put it down as a family trait. I had it dinged into me ever since I can remember : 'Boy, learn to do things your own way and then stick to it.' —Well, old Abner Belcher—"

At this moment the man at the desk was well aware that his suffering had begun, and, with the spirit of a martyr, had turned to his desk under the pretense of giving attention to some letters that were lying there, with the intention of ending the interview at the earliest possible moment. To his great relief another shadow darkened his office door, and a man of about the same age of the talker advanced, hat in hand, to the desk, where, after a respectful bow, he stood and waited for the man with his hat on to finish his sentence. It wasn't finished. By a series of "ands" and "buts," with no end of dashes, accompanied by numberless gestures of the elbow-resting arm, the narrative went on until Abner Belcher's story was told. Long before the tale was ended the office added to its number of callers, all of whom were barred back by the respectful but determined young fellow who, with his hat in hand, waited for his turn.

It is no exaggeration to say that a good half hour was wasted by the irrelevant nonsense. When it was well on its way there was a bustle at the door as if someone was going to have a look in, if it cost a leg, and then another bustle to get out if he had to sacrifice the other.

This done, he begged a sheet of paper and envelope of the bookkeeper, asked for the privilege of using a corner of his desk, wrote a few words, and, placing the note in the envelope, elbowed his way through the crowd now in the office, with a "Beg pardon for interrupting you, sir, but may I ask you to read this at your earliest opportunity?" and then, with a bow, elbowed his way out.

The story finished, the applicant came down to business :

"Now about this posish. I'd like to start in in the morning. You see, I haint got nothing to do and—"

"We sha'n't want you—allow this gentleman to take your chair. Good morning. Have a seat, sir ;" and the willing crowd gave way to the rejected candidate.

It is pleasant to say that the interview with the second man was short.

"I came to apply for the advertised position. My name is John Gray and I am at present with Coolidge & Blair. I have charge of the linen department."

There was a good look that took him all in, aided materially by the long study the man at the desk had been forced to give him, and then, with those few words that said enough and no more, came the following : "Call to-morrow at 9—I think I may engage you."

The rest of the morning passed drearily to the over-tasked merchant and when noon came he hurried to his luncheon, giving the office boy permission to murder any applicants that should come during his absence. He took with him the note that had been given to him and, having given his order, took it out to have the whole disagreeable morning's work finished and off his hands. This is what he read, in a plain and neat handwriting :

"Dear Sir—I came to see about the place. The office is full and I can't afford to wait. I have been with Willis & Coleman for five years and want to find a more responsible place where there is more work and more pay. Should you want to know more of me please call me over the Willis & Coleman phone and I will come at once.

"Respectfully,

"CALVIN WINTERS."

The junior member of the firm opened wide his eyes and mouth at the letter and beckoned to a waiter.

"Find Willis & Coleman's phone number and ask for Calvin Winters. Tell him I'm here and want him to come right over."

In five minutes the clerk who couldn't afford to wait was seated at the junior member's right and was answering questions at the rate of 60 miles an hour. The result was a good luncheon and an engagement where there was "more work and more pay." The next day at 9 o'clock sharp the young man who knew enough to take off his hat, to state directly and concisely what he wanted, and above all things to stop when he had got through, came in and in less than five minutes left with the understanding that his place would be ready for him the following Monday morning. He came and found the note-writer's hat-peg next his own. The two hats are hanging side by side to this day.

It is getting to be more and more the custom to probe successful salesmen and men of mark to find from them to what leading trait they attribute their prosperity and when these two men, now in middle life, were asked to answer the question the man who wrote the note replied : "How

is it, Jack? Don't you think that knowing what you want and stating it and stopping your noise when you get through will cover the ground?" and "Jack" answered: "I guess, Cal., that's the size of it"; and that is exactly what did the business.—RICHARD MALCOLM STRONG, in Michigan Tradesman.

NO DEBT—NO BUSINESS.

BY HENRY CLEWS.

"DEBT" is another term for "credit." If there were no debtors there would be no creditors, and if there were no such thing as credit the entire fabric of business enterprise would dwindle to infinitesimal proportions, and we would be carrying on a hand-to-mouth retail business, circumscribed in its possibilities and cumbersome in its manipulation.

Suppose, for example, business were done on the strict cash basis. A customer comes to me to purchase $5,000 worth of stock. He laboriously counts out his $5,000, which is recounted by my clerk or myself. I have to buy that stock and I have to count the money again when I present it to my seller, who, in turn, must go through the same process when he wishes to be a purchaser. We would soon have time for nothing but counting money, and our mercantile and financial transactions would dwindle until we had little, if any, money to count.

But see the process as it is in vogue to-day! One cheque pays 20 debts, and in its circuit from the maker to the seller and from one banking house to another it stands for the liquidation of a debt, and if these debts were not contracted business would wane and most of the Wall Street bankers and brokers would have to shut up shop.

Debt, instead of being a detriment, is a positive benefit to business. It is the spur for the honest man; it is the synonym for credit.

Credit means literally "belief." It is the belief—the credo of the business world. Once eliminate it from the equation and every commercial transaction will be the child of suspicion and mistrust. For if we can inspire no belief in our fellow-man we can obtain no credit. And it is who has the most credit who is deepest in debt.

A NEW MATCH.

Another kind of match, intended to supplant the phosphorous matches, which have been prohibited for a year, has lately been introduced in the Swedish market. The inventors of the new match are the engineers Landin and Jernander, of Stockholm, who have patented their invention in several countries. This match looks like the well-known potash and paraffin matches, which, however, by reason of the fact that they contain poisonous phosphorus, come under the same prohibition as the old and worthy lucifer match. But the new match, which has been named "Repstickan" (the scratch match), possesses a property which the potash match lacks, viz, it is damp-proof, and can therefore be lighted against a damp or wet surface, provided this is hard. The inventors claim that Repstickan is the least poisonous match in existence, the safety match not excepted.

The manufacture of the new matches, which at present is carried on for the inventors, has been entrusted to Lidkopings Tandsticksfabrik. It it is said that negotiations are going on for the sale of the patent in other countries.

A Wonderful Paint

The Sherwin-Williams Aluminum Paint

is a truly wonderful paint. It is one of the most adaptable paints on the market and is the best paint specialty a dealer can have on his shelves.

There are dozens of places around the house where it can be used to splendid advantage. It's the best thing in the world for steam pipes, steam radiators, stoves, hot water tanks, etc.

THE SHERWIN-WILLIAMS ALUMINUM PAINT outranks all similar products in so many respects as to practically stand alone. It has a velvety lustre, doesn't discolor, has no nauseating odor, won't blister, scale or crack, and has large covering capacity. In fact, it is such a useful paint and such a good paint, no dealer should be without it.

If you are not selling The S.-W. Aluminum Paint now, you would better send for a sample can, prices and full details.

CUSTOMS REGULATIONS AT SKAGWAY.

The Toronto Board of Trade received a communication on May 12 from Skagway regarding Customs affairs at that place. The document is as follows:

The Skagway Chamber of Commerce ask your co-operation in obtaining from your Government Customs regulations at Skagway that will permit the warehousing in bond and subsequent re-entry of Canadian goods into Canada in broken bulk as the trade may require. The immense benefits that the people of the Canadian Yukon would derive from such a Customs regulation are too self-evident to require more than a mere mention. Dealers could hold their stocks in bond at Skagway, breaking the bulk as demanded by their trade, and relieved of the necessity of ordering their every invoice from a distance of a thousand miles further away than the port of Skagway, would be under no necessity of carrying large sums of money in the high freight between Skagway and interior points. It would further obviate the necessity of buying beyond current needs, as under these circumstances Canadian wholesalers would certainly carry adequate stocks in bond at Skagway. The benefit to the Dominion at large would by no means be inconsiderable. The impetus thus given to Canadian trade would displace United States goods in the Skagway market by enabling merchants of this city to fill their orders with Canadian goods. The business which Skagway now carries on with the Canadian interior consists almost solely in filling orders to satisfy the requirements of trade that cannot wait for shipments from Vancouver. Under present circumstances this trade, which in the aggregate is by no means inconsiderable, must apply to dutiable merchandise of the United States. The merchants of Skagway could not find it profitable to do business with an interior patronage with dutiable merchandise were they brought in competition with local stocks of like non-dutiable goods.

An arrangement of this kind would, moreover, greatly tend to obliterate border ill-feeling over matters of present international controversy.

This matter will be taken up for consideration by the council later on.

The Colborne, Ont., Council has decided not to pass an early-closing by-law.

SOME TRAVELLERS' YARNS.

"Weary Willie" in Manitoba Free Press.

AND who has not read with pleasure the narrative, so clearly portrayed, of the great battle of Blenheim, drawn from the old man's memories of the past, by the finding of a skull, and entered into the interest of the boys who listened so attentively, and the "man is only the boy grown tall," and as we sat at eventide in the rotunda of the "Clarendon," Winnipeg, a chance remark brought the chairs of the circle closer, while one of the fraternity said: "A funny thing happened in our office recently. We have a man in charge of our enamel department named Daniels and 'Dan,' as he is popularly known, can handle travellers as easily as he does some of the 'children of Israel.' Recently a small boy came into the office and accosted the information clerk with a request to see Mr. 'Lyons.' On being informed that no man of that name worked there, he said, 'It's Mr. Daniels I want to see.' 'Well,' was the reply, 'why did you ask for Mr. Lyons?' 'Because,' said the urchin, 'mother said if I forgot the name to think of Daniel in the lion's den.'"

* * *

When the laugh subsided, another of the party said, "I had the pleasure of calling on Mr. James Lindsay, of The J. H. Ashdown Co., and he is telling a good story on one of our 'profession.' You all know Mr. Soper, in charge of the house-furnishing department? (Every head bowed assent.) Well, recently a traveller called who happened to have partaken somewhat freely of the 'oil of gladness,' and having explained his mission, Mr. Lindsay said, 'Let us go round to see Soper.' Thereupon our travelling friend drew himself up to his full height and with much dignity replied,' 'I think I am sober enough to take all your requirements now, avoiding the necessity of coming round when I'm sober.'"

* * *

"Did you ever hear the story about the non-conductor?" said Bill ———, and he cocked his hat to one side and gazed wisely at the ceiling. "No," chorused all hands, and while Bill's gaze was still elevated sundry winks and nudges were exchanged. Proceeding, Bill said: "Once a certain street car conductor was discharged for a certain misdemeanor, and was afterwards arrested for murder, tried, and sentenced to death by electrocution. On the day of the execution, being placed in the chair, it was found that all the electric currents had no effect, and it was discovered that the phenomena was caused by his being a 'non-conductor,'" concluded the narrator, and a broad smile suffused his countenance. But not a muscle in the faces of his hearers changed, and the look of expectancy still remained, while one broke the silence by saying, "Go on with the story, Bill." The smile of the narrator disappeared, being replaced by a look of disgust, and with dignified contempt, he arose and left the circle, and to-day a request for the story of the "non-conductor" is considered in the light of an unfriendly act.

MANITOBA CROP PROSPECTS.

Reports received at the Winnipeg Grain Exchange from about 50 correspondents residing in all parts of Manitoba and the Northwest Territories show the following to be an average of the condition of the crop prospects by percentage, compared with last year, up to May 1:

Land ready for crop last fall, 111.40 per cent.

Land to be plowed this spring, 111.55 per cent.

Aggregate of wheat, 111.105 per cent.

Aggregate of barley, 111.110 per cent.

Aggregate of flax, 111.169 per cent.

Wheat land seeded May 5, 111.35 per cent.

Estimated quantity of wheat in farmers' hands, 8,000,000 bushels, of which about 4,000,000 bushels will be required for seed.

Freeman Bros., carpenters, Halifax, N.S., have dissolved.

O. Rollin & Cie, hardware merchants, Montreal, have dissolved.

Edward Davidson, builder, Medicine Hat, N.W.T., has admitted H. C. Yuill as partner.

F. Decary & Fils, plasterers, Montreal, have dissolved, and a new partnership has been registered.

Fredenberg & Lowrey, general merchants, Milestone, N.W.T., have dissolved; M. S. Fredenberg continues.

Dobell, Beckett & Co., lumber merchants, Quebec, have dissolved, and a new firm has been formed under the same name and registered.

SALES MADE AND PENDING.

C. J. Watson, harnessmaker, Shoal Lake, Man., is giving up business.

The stock of C. A. Miller, general merchant, Windsor Mills, Que., has been sold.

The stock of M. Shields, general merchant, Osgoode Station, Ont., has been sold.

Chas. E. Santo & Co., importers of hardware, London, Ont., are about selling out.

John A. Logan, general merchant, Howick, Que., is advertising his business for sale.

The assets of Mrs. J. Poulin, general merchant, Ste. Brigitte des Saults, Que., have been sold.

The business of the late M. F. Goodwin, coal and wood merchant, Stratford, Ont., is advertised for sale.

The assets of The Canada Can Co., Limited, Dundas, Ont., are to be sold by auction by the liquidator on June 2.

CHANGES.

Talbot & Frere, general merchants, Kingsville, Que., have registered.

S. A. Clark has opened a hardware store at Saskatoon, N.W.T.

The T. F. Moore Co., coal merchants, etc., Montreal, have registered.

H. H. May, bicycle agent, Port Perry, Ont., has sold out to G. W. Schell.

A. J. Hughes, lumber merchant, Elgin, Man., is selling out to T. L. Arnett.

Mrs. G. Lamoureux has registered for Lamoureux & Cie, painters, Montreal.

Wm. Gilmor, lumber merchant, is commencing business at Blackfolds, N.W.T.

Rollin & Lamoureux, hardware merchants, etc., Montreal, have registered.

Carriere & Villeneuve, builders, St. Louis de Mile End, Que., have registered.

Stoddard Bros., harnessmakers, Morden, Man., have sold out to H. Stoddard.

S. N. Barnes, blacksmith, Smith's Falls, Ont., has sold out to Stewart Montgomery.

Johnston Bros., hardware merchants, Arnprior, Ont., have sold out to J. G. White & Co.

The estate of R. Robson, lumber merchant, Killarney, Man., has sold out to W. Wellman.

George Winram, agricultural implement agent, Killarney, Man., is succeeded by Winram & Irvin.

Marguerite Valiquette has registered for A. A. Valiquette & Co., coal and wood merchants, Montreal.

G. B. Housser & Co., lumber merchants, Macdonald, N.W.T., have sold out to Roger & Glennie.

George Kemp, blacksmith and agricultural implement agent, Navan, Ont., is succeeded by his son, John Kemp, in the blacksmith business.

Richard Craig, general merchant, Smith's Falls, Ont., is succeeded by D. W. McConnell & Co.

P. N. Pouliot has registered as proprietor of Arthur Pouliot & Cie, manufacturers' agents and commission merchants, Montreal.

The stock of P. Langlois, general merchant, St. Gregoire, Nicolet Co., Que., has been sold at 66⅔c. on the dollar to N. Pratte, St. Celestin.

FIRES.

G. R. Smith, general merchant, Acadia Mines, N.S., has sustained a small loss by fire.

J. Splane & Co., ship chandlers, St. John, N.B., have been burned out; the insurance is $8,000.

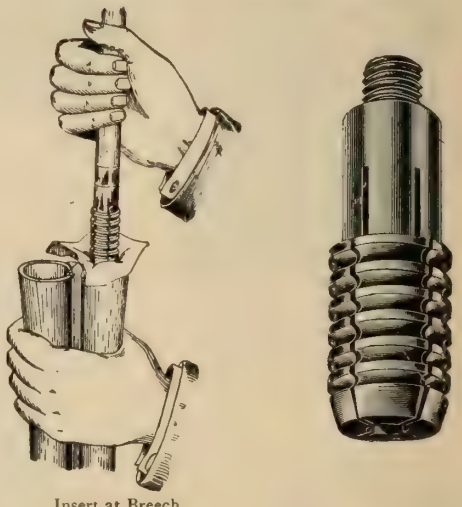
Thomas Hunter, paint merchant, Ottawa, was burned out; the loss was partially insured.

J. Splane & Co., ship chandlers, St. John, N.B., were burned out; the insurance amounts to $8,000.

H. A. Webber, hardware merchant, Hamilton, Ont., has sustained loss by fire; the property was insured.

Gurd & Co., manufacturers of brooms, London, Ont., were partially burned out; their loss is covered by insurance.

S. H. Smith, hardware merchant, Acadia Mines, N.S., was burned out; the loss is $5,000 and insurance, $1,000.



The sawmill of Boyd, Caldwell & Co., mill owners, etc., Lanark, Ont., was destroyed by fire; there was no insurance.

DEATHS.

John Cassils, of Shaw, Cassils & Co., tanners of shoe leather, Montreal, is dead.

A NEW GUN CLEANER.

A new gun cleaner is offered the sportsmen by The J. Stevens Arms and Tool Co., of Chicopee, Mass., that is calculated to exactly fill the wants of the gunner. It applies the patch with a firm and hard rubbing contact to every portion of the barrel's interior, and adjusts itself to the smaller as well as the larger portion of the bore. It supersedes the indiscriminate use

Insert at Breech.

of scraping and scratching devices, thereby preventing any injury to the finished surface of the bore arising from their use. Being made of soft brass, it is indestructible and never requires cleaning. It is made for 10, 12 and 16 gauge guns, and sells, including a cotton patch and one of fine brass wire cloth, for 50c. It is a practical outfit, and fits all standard rods.

INDUSTRIAL GOSSIP.

TWENTY NEW ELEVATORS.

The W. W. Ogilvie Milling Company will erect 20 grain elevators in Manitoba and the Northwest Territories this summer. Six of these elevators will be built in the Northwest, at Pierce, Balgonie, Grenfell, Arnaud, Manner and Carlyle, and the remaining 14 will be in Manitoba, at Brookdale, Bradwardine, Sinclair, Newdale, Lenore, Arcola, Carnegie, Kenton, Oakville; Grandview, Margaret, Gilbert Plain, Dunrea and at the terminal of the Waskada branch of the C. P. R.

MONTREAL, QUE.

TO MAKE THEIR OWN LINSEED OIL.

THE SHERWIN-WILLIAMS CO., the large paint and varnish makers, are beginning the crushing of seed and making their own linseed oil.

A large plant has just been completed for this purpose at Cleveland. It will not only supply all the oil used by the company in the manufacture of their products, but will also place them in position to go into the general market with oil.

For many years The Sherwin-Williams Co. have been the largest consumers of linseed oil in America, and probably in the world, larger even than the great oilcloth manufacturers, who use enormous quantities. Their consumption of oil became so large that it was a serious matter for them to be dependant upon others for their supply, and they have for some time been quietly at work on the plans of the new plant.

New Linseed Oil Plant of The Sherwin-Williams Co.

The plant is of the most modern type, and is probably one of the best equipped and arranged in existance. It is located on the Cuyahoga River, a short distance from plant No. 1 of the Sherwin-Williams Co., and is admirably situated, with fine shipping facilities, both by water and rail. It has been built with a view to expansion, the plat of ground and engine and boiler capacity making it possible to double the output within a few months' time if necessary.

The company owns its own steamship, the A. G. Lindsay, for carrying the seed down the lakes from the Northwest, and will, therefore, be perfectly independent of outsiders for everything connected with their oil supply. They will go direct to the farmer for the seed and be able to make certain of good oil from the very foundation up. They can be depended upon to produce the best oil it is possible to make, holding to the uniform high standard of quality that has been found in all their other products.

The Sherwin-Williams Co. have always refined their own oil, and have arrived at very fine results in clarifying and purifying the linseed oil they have used. In the new plant they have included splendid refining facilities, and a house for making pure, free and unadulterated kettle-boiled oil.

The plant is under the direct management of Mr. J. W. Daniels, a well-known old-time linseed oil man, who has been in the business since 1878. Before his connection with The Sherwin-Williams Co. he was a director in The American Linseed Co., and manager of their plant at Buffalo, N.Y.

The establishment of this plant is characteristic of the policy of The Sherwin-Williams Co. to manufacture and control everything entering into the making and marketing of their products. They have for years made all their own varnishes and dry colors, ground their own lead, made their own tin cans, packing cases and barrels, done their own printing and manufactured their machinery in their own machine shops. A few years ago they added a steam laundry, a barge for carrying the lumber for their box factory and very greatly enlarged their facilities for the manufacture of varnish and dry colors, so as to be able to market these two products as well as to make them for their own use.

The linseed oil plant will greatly strengthen the position of the company and make it possible for them to go after business with greater vigor than ever before. Their wonderful growth since their establishment in 1866, and especially in the last half-dozen years, has placed this company in an enviable position. They are probably the largest paint concern in the world, operating, as they do, four large plants at Cleveland, Chicago, Newark and Montreal, with warehouses and offices in seven other cities.

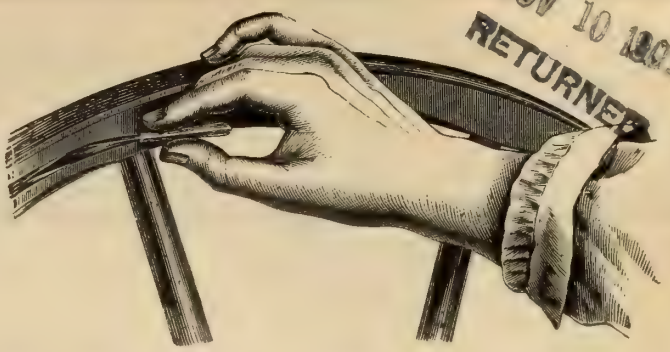
Their entrance into the linseed oil field is of distinct and significant importance.

ENLARGING THEIR PREMISES.

The business of The Toronto Silver Plate Co., Limited has grown so extensively the last couple of years that they have found it necessary to make provision for space that will permit of their largely increasing their staff. This they are doing by converting their stables in the back of their present premises into casting rooms, using their present casting room with the addition to it of another storey for the manufacture of German silver, a new line of manufacture that they have lately taken up and referred to in one of our previous issues. Additional to this they are building another storey over their present plating room, which they will use for the manufacture of sterling silver. This will give them their original factory premises for the manufacture of electro plated ware which line we are pleased to hear from Manager Gooderham has grown proportionate to the increase in their other lines.

VANCOUVER MERCHANTS AND KLONDIKE TRADE.

"Orders are coming rather slowly from the North this season," said a local commercial man who has large interests in the Klondike, recently. "The large companies are doing most of the importing so far, and they are, I think, buying more of their goods in Canada. The N. A. T. and other companies are making purchases in Toronto, Montreal and other places, and some also in Vancouver, especially in goods handled locally, which have come from England, around the Horn.



"I think that if Vancouver merchants want to do a big business in the North, they should combine and open a large store and warehouse in Dawson, and ship in their own goods for sale. If the wholesalers of the city would make such an arrangement, they would have an opportunity of competing with the N. A. T. and other companies, a business which now presents a great many difficulties." — The Province, Vancouver.

NEW VICE-PRESIDENT.

Mr. A. J. Moxham, vice-president of The Dominion Iron and Steel Co. has resigned that office, and has been succeeded by Mr. James Ross, a change that has been expected for some time. The seat which was occupied by Mr. Moxham on the directorate of the company, and which he resigned also, has been taken by Hon. Senator L. J. Forget.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

NEW GERMAN ACETYLENE GENERATOR.

In answer to inquiries from the United States, Consul-General O. J. D. Hughes, of Coburg, reports, April 18, 1902, that Mr. Erik Cornelius, chemist at the carbide factory at Trollhattan, has invented a new acetylene generator. This generator, says the consul-general, is described as being much simpler in construction than any yet placed upon the market, and occupies but little space. In its operation, the falling of the carbide into the water is automatically regulated by a hollow rubber ball, which, as soon as it is filled with gas, closes the valve between the carbide and the water. When the volume of gas decreases, the rubber ball contracts and the feed valve again permits the carbide to drop. The gas is stored partly in the rubber ball and partly in the space between the funnel-shaped carbide magazine and the water. If more than the normal amount of gas is generated, it secures more room by forcing the water through valves into the water jacket in the sides of the apparatus. A separate gas tank is therefore not needed. Should too much gas be produced, both the water and the gas escape through a safety valve. Common carbide is used; no cartridges. The gas is dried by being allowed to pass through the carbide magazine, where the carbide absorbs the moisture. As there is no gas tank, and as the quantity of gas thus stored is insignificant, it is considered that the fire insurance companies will, without raising the premiums, approve of the apparatus, even when it is placed in dwelling houses.

BRIEF HISTORY OF SAFETY RAZORS.

Safety razors were received with much distrust by the trade and public when first introduced by the inventors, Kampfe Brothers, about 25 years ago. The "Star" safety razor, the first make of this kind, has proved its value to such an extent that to-day same can be found in any part of the globe. The sales have increased so marvellously that it is one of the best-liked and most profitable staple articles of the hardware business. Every dealer should be up to date in A1 novelties of this description. The standard make only should be sold, as the success of the reliable makers, on whose reputation the trade of the safety razor has been developed, has prompted a number of unscrupulous imitations being placed on the market.

Our readers' interests will be well looked after by the original inventors and makers of the genuine "Star" safety razor, and there will be only words of the highest praise from your customers. In fact, we have heard of cases where gentlemen of high reputation would not part with their "Star" safety razor for thousands of dollars, providing they could not obtain another one to take its place.

A WIRE FENCE MACHINE FIRM.

The Cyclone Woven Wire Wire Fence Company, Toronto, have been incorporated for the manufacture and sale of wire fence and fence machines, and wire of every kind or description; to do all things necessary to carry on the business of the construction of fence machines, wire, and of dealing with patents connected therewith and to continue any existing wire fence business. The chief place of business will be Toronto and the amount of the capital stock of the company is placed at $30,000, divided into 600 shares of $50 each.

The applicants are Joshua H. Wilcox, manufacturer; Henry Buckle, manufacturer; James Edgar McGarvin, druggist; Frances Wilcox, married woman, and Alice M. Buckel, married woman, all of Toronto, and these will be the directors of the company.

CHANGED THEIR OFFICES.

The New York office of The J. Stevens Arms and Tool Company has been changed from 318 Broadway to 80 Chambers street. They are now located in the wholesale sporting goods dealers' district, in a desirable locality, and have five times the floor space they formerly had. This will enable them to better attend to their increased business.

STEEL FOR FAST-CUTTING MACHINERY.

What is to become of all our patterns, drawings and expensive jigs for our machine tools? Are we on the verge of a revolution? I refer, of course, to the "new steel" that is going to make us "get up," as they say out West. Many of our machines have even been regarded by us here, quite aside from the constantly heard criticism of our English purchasers, as on the verge of lightness. With the demand for machines that will give a cutting speed of 50 to 100 feet per minute with a greater rate of feed, there is going to be plenty of work for draftsmen and patternmakers, and an unlimited supply of firewood for the cupola until our cherished patterns are replaced. In England and on the continent there is a "boom" on tap at present. Making of the special steel have sprung up as if by magic. There are several in England, and French, German and Austrian steel makers have also produced this strange raw material which can become hot when working without losing its temper and hardness. Specifications for new machines call for higher speeds with a large increase of power. There appears to have been but little success in getting a steel that will show such marked results in cast iron as in wrought iron or steel, but in a recent letter I learn that Messrs. Whitworth, of Manchester, have found a steel that is equally good for cast iron. What a simple plan of "doubling the production" by simply changing the engine governor, until everything in the shop runs at double the former speed! I am told that this steel has come to stay, and if so, it is simply a beginning of the revolutions predicted for this new-born twentieth century.—American Machinist.

A NEW HIGH-SPEED STEEL.

Since the invention of the Taylor-White steel and our publication of an account of it, steel makers all over the world have been stimulated to produce a steel which can cut continuously at high speeds, and the latest addition to the list is made by the well-known steel manufacturers, Jonas & Colver, of Sheffield, Eng. This concern has long been known as a maker of very high-grade steel, and has had a considerable trade in America. Their new steel is called "Novo Air Steel," and it hardens in air or hot water, whichever may be preferred. In forging this steel it is heated to a higher temperature than the ordinary carbon steel—in fact, to a lemon color—but it is advisable to be particular to heat it thoroughly and evenly. It can then be worked at this high heat, and works with greater facility than most other steels, it being perfectly practicable to draw it down to as small a size as may be desired under the steam ham-

GENERAL OFFICES, PITTSBURG, Pa.

mer, or it can be bent at right angles. In hardening it is necessary only to hold it in a blast of air or to plunge it in hot water.

It is claimed that this steel is absolutely not liable to cracking and that it will maintain fine edges. It can be annealed in the ordinary way, and when so annealed can be worked by milling, planing or any of the ordinary operations of steel working, so that taps, milling cutters, reamers, or whatever may be desired, can be made of it.

We have information regarding some remarkable tests of this steel, showing that it is capable of giving very high duty. For instance, a tool, 1 x 2, took a roughing cut on a shaft for a hoisting engine, the shaft being 11¼ diameter, the cut ½-in. deep, with feeds varying from 1 32 to 1 16 and up to ⅛-in. at a speed of 93 feet per minute, the length of the cut on the shaft being 1 feet. The same tool did the finishing cut at 70 feet per minute, and was in perfect condition.

On cast iron one of these tools took a cut ⅜-in. deep with ¼-in. feed at 50 feet per minute, the same tool taking the finishing cut at a speed of 165 feet per minute. On nickel steel, steel castings, brass of government composition and other metals, great superiority to ordinary steel, so far as capacity to stand high cutting speeds is concerned, and the steel is an interesting addition to the list of such steel. It is being introduced here by Hermann Boker & Co., of New York.

American Machinist, New York.

(Mr. William Abbott has been appointed Canadian representative for Jonas & Colver, of Sheffield, manufacturers of "Novo Air Steel" referred to above, as well as all other classes of steel.

Editor "Hardware and Metal.")

STOCK LIST OF MACHINERY.

A new feature in connection with the business of H. W. Petrie, 141 145 Front street west, Toronto, is his monthly stock list of machinery, tools, and power. This list contains a complete list of all the stock he has on hand, and all are numbered so that a full and complete description can be given of each item on the list upon application. All the machines enumerated on the list are for immediate delivery, and the book is completely indexed.

NEW FACTORY IN RUNNING ORDER.

The Bailey Cutlery Co., Limited, Brantford, Ont., have moved all their plant to their new factory and are now running at their full capacity. Their business has increased so rapidly that they are behind with their orders and so far have been unable to catch up. Their capacity in every line has been increased and they are adding constantly new lines to those they are at present manufacturing. Their razors and butcher knives are proving satisfactory and the orders they receive for them keep them busy in the filling.

SHOULD BE IN EVERY RETAILER'S HANDS.

In renewing his subscription to "Hardware and Metal" R. Gamble, hardware, paint and oil merchant, Manotick, Ont., writes: "I appreciate your paper very much and think it should be in the hands of everyone in the hardware business."

KERR ENGINE CO., WALKERVILLE.

Mr. R. Kerr, of The Kerr Engine Co., Walkerville, Ont., has just returned from a trip to Northern Ontario and reports business exceptionally good. In fact, they have great difficulty in securing skilled workmen to turn out fast enough the goods that are already ordered. They have prepared plans and propose to build at once a new brass foundry, in addition to their extensive works. They are also equipping the machine shop with several new tools.

CANADIAN AUTOMOBILES FOR ENGLAND.

The Canadian Motors, Limited, of Toronto, are just about shipping their fifth electric automobile to England. The last one is being sent to Mr. Ernest Bremner, of London, Eng., who has been visiting Canada in the interest of the pulp and paper mills at Fenelon Falls. They are also building a new "Stanhope" automobile for Dr. Cotton, of Toronto, and also one for Dr. Macdonald. Mr. C. F. Grantham, manager of The Imperial Cotton Co., Hamilton, Ont., has given them an order for a handsome electric automobile. This will be one of the finest carriages that has been constructed anywhere. Mr. W. G. Bronson, the well-known lumberman of Ottawa, is also getting an electric automobile, "Stanhope," of the very latest pattern.

IRONMOULDERS' STRIKE.

The iron moulders of the Canadian Pacific Railway are still out on strike, and as a result of the strike at the Hochelaga foundry, others have been ordered by the union to quit work, so that several men employed by The Laurie Engine Co., on a C.P.R. job, had to stop working there although they had no grievance whatever. A number of other moulders, employed in the Caledonia iron foundry on C.P.R. work were also compelled to refuse to do this work.

The union expects an amicable settlement of the difficulty in a short time, though it will have to be at their own terms apparently, for the officers issued the following statement on Saturday:

"All the moulders, as well as the coremakers that were employed in the Canadian Pacific Railway foundry are members of the union, and not one of these men have returned to work, nor do they intend to return until their demands have been agreed to. We are strongly of the opinion that Mr. McNicoll has been misinformed about the men returning to work, and also about no demands having been made on the company by the moulders. As a matter of fact, the demand was sent in early in April, but no notice whatever was taken of it until the first of May, when a committee of moulders, selected by the foreman, was sent to the master car builder's office to discuss the demands. The committee had no power whatever from the rest of the moulders working in the Canadian Pacific Railway foundry, and could do abrolutely nothing. A committee, with power to act, then waited on the master car builder, and in an answer to their question as to what had been done in regard to the demand of the men, they were told it had been thrown in the waste-paper basket. It was then we decided to go on strike. We are convinced that if Mr. McNicoll only knew the true state of affairs in the foundry the men would have their demands granted at once. But, unfortunately, for the men, he does not. Mr. McNicoll has also been misinformed as to the moulders wanting the laborers' wages reduced. This, we claim, is most absurd. On the contrary, we would be only pleased to see the laborers get an increase in wages. Our new schedule provides for a minimum wage of $2.50 a day, and none of the men will return to work until it has been granted."

ELECTRICAL AND MACHINERY NOTES.

The National Electro Co., Limited, Toronto, has obtained a charter.

The Hinton Electric Co., Limited, electric supplies, etc., Victoria, B.C., is discontinuing the Vancouver branch.

The Canadian General Electric Co., Limited, is opening a branch at Ottawa.

W. A. and G. L. MacKay have registered as partners at North Sydney, C.B., under the style of W. A. MacKay & Co., electrical supplies.

A DURHAM MERCHANT'S CHANGES.

James A. Hunter, general merchant, Durham, Ont., has removed his hardware stock from the main store into a room adjoining and placed it in charge of Mr. Theobald, late of Scott & Murphy, Mount Forest. He has a fine store, consisting of two flats and a basement, 25 x 90 feet. The grocery department is in the basement.

BOWSER

3 MEASURE SELF MEASURING

OIL TANKS

FEDERAL SUPPLY CO., 232 Fifth Avenue,
PITTSBURGH, PA., April 29, 1902.

S. F. BOWSER & CO., INC., FORT WAYNE, IND.

GENTLEMEN:—We are operating at the present time forty-six stores, all of which are equipped with your Self-Measuring Oil Outfits. Of the many different makes upon the market which we have used, we find yours to be the best tank we have ever used, both as regards durability and cleanliness. In measuring the old way from the barrel there is considerable loss through evaporation and wastage which is entirely eliminated by your tanks, and we do not hesitate to say this saving will pay for the outfit in a very short period. We cheerfully recommend your tanks to the trade. Yours very truly,

W. J. Phillips, Pres't & Gen. Mgr. FEDERAL SUPPLY CO.

SEND YOUR NAME TODAY, LET US TELL YOU MORE.

S. F. BOWSER & CO., 65 Front St. East, TORONTO. Factory, FORT WAYNE, Ind.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."

It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed.

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 23, 1902.

HARDWARE.

THE demand for general hardware has kept up well during the past week, though trade has settled down to more normal conditions. There have been very few alterations in prices since our last report. Barn-door tracks are among the exceptions, the price having been advanced ¼c. per foot, making the present quotation 3¾c. per foot. Cut nails are in better supply this week. Binder twine, poultry netting, and builders' hardware are among the rapidly moving lines of the week.

SCYTHES.—There is a good demand and no change has been made in the price. Our quotations are now as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—The inquiry keeps up, and the market being well supplied, a good trade is being done. The price per 100 lb. f.o.b. Montreal is $3.

GALVANIZED WIRE.—Business is about as usual, and prices are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Trade in this line is only fair. We quote as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is not much doing. The discount remains at 22½ per cent.

BRASS AND COPPER WIRE.—The demand is moderate and steady. Both brass and copper wire are discounted at 60 per cent.

FENCE STAPLES.—These are going well. Our quotations are as follows: Bright, $2.90 per 100-lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.

WIRE NAILS.—There is no change to report. The market is fairly active. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There has been some shortage in 3-inch cut nails, but factories have made deliveries this week. In small lots the price of cut nails is $2.45 per keg, and in carlots, $2.37½ per keg. Flour barrel and coopers' nails are discounted at 10 per cent.

HORSE NAILS.—There is a fair trade still doing in horse nails. Discounts follow: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—The demand is moderate and steady. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is a good demand for screws. We quote the discounts as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—This is an active market. No

"MODEL" REFRIGERATOR.

Just As We Predicted

a couple of weeks ago, Old King Sol has come in full force and somewhat suddenly—did not even give a day's notice to those dealers who handle refrigerators and who delayed putting in a stock.

But it's not **too** late yet.

We can ship all orders the day we receive them, in

"Model" and "Leonard" Cleanable Refrigerators.

"Dangler," "Golden Star," "Summer Queen," and "Triumph" Oil Stoves.

quotable change has been made. We quote : Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—This is one of the best selling lines in the hardware list at present, and prices are steady and unchanged. Our quotations are as follows : Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll ; 3- ply, $1.10 per roll ; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll ; tar sheathing, 40c. per roll ; dry fibre, 50c. per roll; tarred fibre, 60c. per roll ; O K and I X L, 65c. per roll ; heavy straw sheathing, $30 per ton ; slaters' felt, 60c. per roll.

CORDAGE.—Business in cordage is still brisk. Binder twine is moving rapidly. Quotations follow : Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows : Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c. ; Tiger, 550 feet to the pound, 13c. ; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—Trade is fair, and our quotations are as follows : Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off ; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—The demand for this on the local market keeps up well. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—The market is active and unchanged from last week's report. We quote : Canadian or English, 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—Business is still brisk. The discount is 60 per cent.

FIREBRICKS.—There is some improvement in this market this week, but the demand is no more than moderate. Scotch are selling at $19 to $23.50, and English at $18.50 to $22.50 per 1,000.

CEMENT.—Some business is passing in cement at the prices here quoted, but the market is not active. Quotations are : German cement, $2.30 to $2.40 ; English, $2.25 to $2.35 ; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The week on the English market has been a holiday (Whitsuntide) and nothing has occurred to alter the position of metals there. Locally, the only change has been the advance in pig tin of 2c. Supplies of most metals here are quite ample for the demand, though the feeling on the market, as a whole, is firm.

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

PIG IRON.—The demand keeps up at unchanged prices. Owing to the difficulty of obtaining supplies, the market remains very firm. We quote: Canadian, $18.50 to $19, and Summerlee, $21.50 to $22.

BAR IRON.—This market has been better supplied during the week, but the feeling is still firm. Merchants' bar is quoted at $2, and horseshoe iron at $2.20.

BLACK SHEETS.—The market is active and steady. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is a fair demand. Quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10 oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than caselots, 10c. extra.

INGOT COPPER.—There has been no quotable change, and the price is still 14c., with a moderate demand.

INGOT TIN.—The demand for ingot tin is little more than fair. Straits are now quoted at 33c.

PIG LEAD.—There is not much doing. We quote $3.25.

LEAD PIPE.—The market is fairly active. The price of composition waste is 7½c. and ordinary, 7c. Discount, 37½ per cent.

IRON PIPE.—A very good demand keeps up for iron pipe, and the market is steady at unchanged prices. We quote: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2 in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Trade is not very active. We quote: Charcoals, $4.75 to $5.25 per box, and cokes, $4.25 per box.

CANADA PLATE.—The market is steady but quite firm. The demand is good. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Trade continues active and no change has been made in the price. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.70.

SHEET STEEL.—This is in fair demand. Quotations are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is a little improvement in the market this week. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c., and Leonard's, 7½c.

TERNE PLATES.—The market is dull. The price is $7.75 to $8.

COIL CHAIN.—There is a fair trade still doing at the prices quoted, which are unchanged from our last report. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7½c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The inquiry is not active, but some improvement is noted in the market. The price remains at $5.85 to $6.25.

ANTIMONY.—The market is featureless and the price is 10c.

ZINC SPELTER.—We quote 5c.

SOLDER.—There has been no abatement in the demand for solder, and both bar and wire solder are moving out well. Bar solder is worth 18c. and wire, 20c.

PAINTS AND OILS.

The most recent advices from the Southern markets give evidence of greater strength in turpentine. The market cannot be called firm, but there is, at least, none of the weakness which characterized it for some time past. Locally, there is an active inquiry, and prices are unchanged. Linseed oil is still scarce. Shipments have been delayed and we have heard of no more arrivals since our last report. The demand, however, is still heavy; so much so that it is difficult for the crushers to keep up with it. Following the advance in Toronto, an advance of 1c. was made on this market the next day. Dealers, at present, do not seem inclined to make further advances, although nothing certain can be said of the future. In paints and oils the brisk movement continues, and from all appearances is likely to keep up through the summer months. No change having been made in the price of white lead at the quarterly meeting held last week, the market is steadier, and orders have come in at a good rate. Dry colors are going well. Window-blind greens are particu-

larly active, and it is reported that some scarcity is being felt on account of the run on this article. Ultramarine blues are quiet. Golden ochres are firm in price and in good demand. Supplies of English vermilion are now to hand, and the movement is active. Manufacturers report good sized orders from all over the Dominion for colors ground in oil, marine paints, stains and varnishes. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 81c.; boiled, 84c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1 lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Trade continues fair and prices are unchanged. Our quotations are as follows : Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅞ to 2⅝c.; zinc, 2¼c.; iron, No. 1, wrought, $16 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

GLASS.

A few deliveries of glass are still in progress, but the market, in general, is quiet. We quote: First break, 50 ft., $2.10 second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

The hide market is somewhat easier, and 9½c. is not obtained now. Lambskins, however, have advanced 5 to 10c. We quote : No. 1 hides, 9c.; No. 2, 8c. ; No. 3, 7c. No. 1 calfskins, 12c.; sheepskins, 70c.; lambskins, 15 to 20c. per lb.

MONTREAL NOTES.

Linseed oil is 1c. higher.

Ingot tin has advanced 2c.

Barn door track is ¼c. per foot higher.

Lambskins have gone up 5 to 10c. per pound.

ONTARIO MARKETS.

Toronto, May 23, 1902.

HARDWARE.

A GOOD business is still being done in the wholesale hardware trade. The activity is not as pronounced as it was, but little else is to be expected, especially in view of the heavy business that was done in March and April. Increased activity is expected with the advent of June. No important changes have taken place in the price of hardware during the past week, but the few unimportant changes which have been made have been in an upward direction. Harvest tools are in rather better supply, but some difficulty is being experienced in promptly filling orders for lawn mowers, poultry netting and screen doors. Payments appear to be fairly satisfactory.

BARB WIRE.—The demand is quite active, although the individual quantities going forward are not large. We quote : F.o.b. Cleveland, $2.27½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—The demand is fair. We quote as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There is not a great deal doing in oiled and annealed wire, and there is no demand for hay baling wire. We quote base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Trade keeps fair. The discount is 22½ per cent.

WIRE NAILS.—The demand is good and there is quite an active movement in small lots. Quotations are as follows : $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—There is no improvement in the demand. Base price is $2.45 per keg with an allowance of 7½c. per keg on carlots.

HORSE NAILS.—These continue quiet. Discounts are : "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 per cent. Countersunk head, 60 per cent.

HORSESHOES.—Trade is quiet, and we quote as follows f.o.b. Toronto : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—A good trade is being done. The discounts are as follows : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Orders are still numerous and our quotations are as follows : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Our quotations are as follows : Carriage bolts, common ($1.00 list), 50 per cent. ; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

ROPE.—Trade is fair although not as brisk as it was. We quote: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 18 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—The manufacturers are well filled with orders, but not much new business is coming to hand at present. Quotations are as follows : "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—There has been a good movement during the week. Eavetrough is quoted at $3.10 per 100 feet for 10 inch, and conductor pipe at $4 for 3 inch and $5.25 for 4 inch.

SCREEN DOORS AND WINDOWS.—There is quite a good movement, but

screen doors are scarce. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Through an inadvertence the price of green wire cloth was quoted in this column last week at $1.30. It should have read $1.37½, as given in our prices current. Business is fairly good.

SPADES AND SHOVELS.—The movement is only fair. Discount, 40 and 5 per cent.

HARVEST TOOLS.—The demand is good, particularly for forks, scythes and swaths. The manufacturers are in a better position than they were to fill orders. Discount, 60 per cent.

BUILDING PAPER.—The demand is fair. Quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—There is a big demand and the manufacturers have more orders than they can fill. The discount is 50 per cent. on high wheeled lawn mowers. "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

POULTRY NETTING.—Quite a few orders have been received during the past week, and difficulty is being experienced in getting supplies from factory.

TINWARE AND ENAMELLED WARE.—In general lines of tinware there is a good demand. Discount, 40 per cent. There is a fair business in enamelled ware.

FREEZERS AND REFRIGERATORS.—The demand is good.

STOVES.—Quite a few cooking stoves and ranges are being shipped. The season has opened up well and stocks in some lines are lower than they were last year at this time.

GAS AND OIL STOVES.—The demand for oil stoves is particularly good. Some of the dealers report it the best in their experience. Gas stoves are in fair demand.

MILK CAN TRIMMINGS.—The demand has been active the past week. It is nearing the end of the season for milk can trimmings, but nearly everyone seems to be in a hurry to get his orders filled. Discount, 25 per cent.

SPORTING GOODS.—A fair business is being done. Quite a number of orders for loaded shells, cartridges, guns and rifles for fall delivery are being received.

CEMENT.—The improved demand for cement and the scarcity of coal combined have resulted in an advance in that article of 10c. per barrel. The market is strong. We quote: Canadian Portland, $2 to $2.85; Canadian hydraulic, $1.35 to $1.60; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex cars.

METALS.

The iron market continues to gather strength, while steel is as scarce as ever. In metals generally, trade is brisk and prices firm.

PIG IRON—The furnaces are still well supplied with orders, and prices rule firm. No. 2 Canadian foundry iron is quoted at $21 on track Toronto.

BAR IRON—The demand continues brisk and prices firm. We quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft. 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The market keeps very strong, and supplies are scarce. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS—There is a good demand and a good deal of difficulty is being experienced in getting supplies, both in dead flat and in commom. We quote: Common, $3 15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—This is a slack period in the trade in Canada plates, but the outside markets are firm. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — The demand is good and stocks are light. A good many orders are being placed both for prompt shipment and for importation. We quote in case lots as follows: Queen's Head, $4.50 for 28 gauge; American, $4 40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN—The outside markets are strong and higher. Locally, the demand is good and prices higher at $33 to $34.

TINPLATES—The demand has improved and prices are firmer in Great Britain, where the makers are well employed. We quote I C, 14x20, at $4.25.

TINNED SHEETS — Quotations are 50c. higher in sympathy with a similar advance in Great Britain. The cable announcing the advance was received on Thursday. We quote: 70 x 30, up to 24 gauge, $8; ditto, up to 26 gauge, $8.50.

COPPER—The strength of the outside markets has stimulated the demand locally for ingot copper. Prices have been steadily advancing in both England and the United States all the week. Sheet copper is in fair demand and unchanged in price. We quote ingot at $14 per 100 lb., and sheet copper at $22 to $23.

BRASS—Trade is fair and discount unchanged at 15 per cent.

PIG LEAD—The demand is good. We quote $3.50 to $3.75 for pig and $5 for bar lead.

A RECORD

Out of 6,000 Axes sold under guarantee in 1901 we did not have six returned broken.

Dundas Axe Works, Dundas, Ont.

W. L. Haldimand, Jr., Montreal Agent.

IRON PIPE — A fair business is being done and prices are steady and unchanged. We quote per 100 ft. : ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3 65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1 in., $7.20. Trade discount 4 per cent.

ZINC SPELTER—There is only a small movement. We quote $5.50 to $6.

ZINC SHEET—Orders are numerous, but only for small lots. We are quoting cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER—The demand is good. We quote: Half-and-half, guaranteed, 20c.; do. commercial, 19½c.; refined, 19c.; wiping, 18½c.

ANTIMONY—Trade is actice and prices are unchanged at $9.50 per 100 lb.

PAINTS AND OILS.

Raw and boiled linseed oils are very scarce here and the market has a strong tendency to advance. The oil manufacturers are behind with their orders and several seem to be on the point of closing down owing to a scarcity of seed or some other cause. The prices in Great Britain have increased until now raw oil is worth 33s. 1½d. per cwt. This is the highest point reached in five years. Up to time of writing there have been no changes here. Turpentine continues firm. The prices of white leads ground in oil, in sympathy with the high prices of linseed oil, are strong. The demand for all kinds of paints continues steady. A number of repeat orders are commencing to come in, keeping the local jobbers busy. The local trade has not been so heavy this year as it might have been, but the great number of buildings projected and in course of erection will create a large demand for paints of all descriptions before the season is over. Paris green is still quiet and not much trade is expected in it for two or three weeks to come. The dealers are well stocked and will not send in repeat orders until the present supply they have on hand is sold. We quote :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL— Raw, 1 to 2 barrels, 83c.; boiled, 86c.; 3 to 5 barrels, raw, 82c.; boiled, 85c.; 6 to 9 barrels, raw, 80c.; boiled, 83c.; 10 to 60 barrels, raw, 78c.; boiled, 81c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The local demand continues fair. Jobbers are commencing to stock up for the fall trade. Recent advices from Europe show considerable advances in prices over there, and the market here will be strong. We quote: Under 26 in., $4.45; 26 to 40 in., $4 65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5 75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is a moderate trade doing and the prices are unchanged. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14.50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

COAL.

The lockout amongst the coal miners has stopped the supply of hard coal, but no famine here is anticipated by the coalmen, as they have sufficient supplies on hand to last three or four months to come. The retail prices of hard coal have been advanced 50c. per ton. We quote prices at international bridges: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

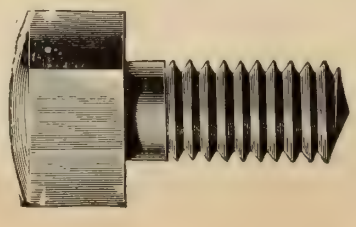
Prices are unchanged and trade continues fair. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

HIDES, SKINS AND WOOL.

HIDES—There is a small supply of hides on hand, and the prices are firm. We quote: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8½c.

SKINS — The season for sheepskins is about over. The arrivals of calfskins are large. We quote as follows: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies) 60 to 70c. each; sheepskins, 80c. to $1; lambskins, 20 to 25c.

WOOL — This season's clip will soon be on the market, but there are no prospects of better prices being obtained, as there are still 400,000 or 500,000 lb. of last season's wool in the local storehouses still unsold.



TALLOW—Trade is quiet. Quotations are 6¼ to 6½c., but dealers are asking 6¾c.

MARKET NOTES.

Pig tin is higher at $33 to $34.

Solder has advanced 1c. per lb.

Tinned sheets are quoted 50c. higher, in sympathy with the British market.

INGERSOLL, ONT.

CECIL RHODES' PRACTICAL IDEALISM.

THE stirring events of the past few years have raised the progressive nations of the earth to a new level. They have a wider outlook than ever before. They are more keenly interested in general movements and policies than at any earlier time. Millions of men follow eagerly the steps in the settlement of the Chinese question. No great man now works in a corner, or in the dark; the whole world watches him, and either applauds or finds fault.

Cecil Rhodes had won the attention of the world. He talked little, but he worked mightily. He worked on great plans. He possessed the first requisite for success in any great undertaking, a powerful imagination. He could see far enough ahead to look upon a settled, civilized, and self governing South Africa, a part of the Great British Empire, a part more important and richer than Canada or Australia. He saw the tropical forests of the African continent pierced by an English railway, from the Cape to Cairo. He saw, too, that if England was to maintain her place in the world it must expand. It must expand in sympathy, in view point, in methods. It must conquer its insularity and acquire a stock of ideas in consonance with its remarkable powers.

These were great ideas. Mr. Rhodes labored for them in life, and the provisions of his will devote a large share of his fortune to them.

Consider a moment. Here is a hard headed, practical man, who has spent a quarter of a century in winning fame and a fortune in what we usually think of as an out-of-the-way corner of the world. He dies in the early prime of life and leaves his fortune to his ideals. Moreover, he selects education as the surest and best method of accomplishing his ideals. Nothing more significant than this has happened in a long time. It is an astonishing tribute to the power of education in bringing about results. There is a lesson in it which touches directly the interest of every boy and girl. It says, get education, get all of it you can. Do not sacrifice education for money getting. Get education and you get something that money cannot buy, and you will improve your chances of getting money as well.

Cecil Rhodes was a man of iron will. He believed in the Anglo Saxon stock, and in its will-power. He did not want it to yield before the Slavic or the Latin races, as Greece went down before Rome. To win in the world race, to assert itself effectively, the Anglo-Saxon will must be educated. It must be educated in such a way as to bring the various branches of the race together, in harmony and sympathy, rather than waste time and strength in quarreling with each other. This explains the scholarships at Oxford University which Mr. Rhodes founded for American and colonial students.

A practical idealist is a very high type of man. Mr. Rhodes was a practical idealist.

FIXED THEIR ASSESSMENT.

The Cockshutt Plow Co., Limited, of Brantford, Ont., have been granted, by the city council of that place, a fixed assessment of $60,000 on a new factory they will erect on Eagle Place, and $20,000 on the old one, with other concessions. Fire protection and water connection will also be supplied. This will cost about $1,500. The streets leading to the factory will be kept in a good state of repair and the city agrees to make no objection to the construction of a railway switch. The company will protect the city against all possible claims. Under this arrangement the plow company will pay the city $1,300 annually where at present they pay $400.

DEATH OF A HARDWAREMAN.

A noted hardware merchant of Kamloops, B.C., died recently in the person of Mr. James Vair. Born at Cobourg, Ont., in 1855, Mr. Vair went to British Columbia in 1883 settling at Spence's Bridge and afterwards removing to Kamloops, where he resided for 16 years. He was one of the first councillors elected at the incorporation of that city. He has also been secretary-treasurer of the school board, treasurer of the hospital, a member of the board of trade, and a member of the agricultural association. He belonged to the Oddfellows and has filled many important positions in that Order. He leaves a wife and three children.

INCREASED THEIR CAPACITY.

Burman & Sons, Limited, Birmingham, Eng., have purchased the plant, stock, patents and trade marks appertaining to the business of W. Bown, Limited, Sheffield, and will carry it on in future at the Lee Bank Works. They will spare no pains to keep intact the reputation gained at home and abroad by the "Newmarket" clipper, and, if possible, increase its fame. This "Newmarket" was the first capped or centre-adjustment clipper ever produced, and all similar types are only copies or modifications of Wm. Bown's original patent taken out in 1874.

ACCURATE MARKET REPORTS.

"I find HARDWARE AND METAL very useful and the market reports very convenient and accurate," writes J. W. Franks, dealer in stoves, tinware, farm implements, lumber, paints, etc., Woodbridge, Ont.

APATHY, THEN A RUSH.

Three months ago the demand for plates was so light that the market for this product was in striking contrast to that of most other branches of iron and steel. To-day all the plate mills are so well sold ahead that it is most difficult to buy for deliveries this year. It then looked as if the producing capacity of the plate mills was far in excess of requirements. Now it looks as if there should be additional mills to those in operation. No magical new markets have opened. The demand comes from old sources, with, of course, the usual widening of consumption that is going on in all branches of trade. This new business may be a little heavier in plates than some other lines, for the Southwest is a large and insistent inquirer for plates, owing to needs arising out of the Texas oil development. Still, the demand comes from all parts of the West, and the radical change in conditions can be attributed only in a small degree to the Southwestern purchases.—Iron and Steel.

FIRST IMPRESSIONS.

FIRST impressions, remarks Stoves and Hardware Reporter, are sometimes the best, in both business and personal matters. If a stranger comes into the store and is received and waited upon in a cheerful and courteous manner, obtaining what he asks for and not being overcharged, he is more apt to repeat his visit than if given a scant courtesy and practically asked to go about his business. He may buy only a paper of tacks, but he may also be a financial angel in disguise with a strong desire to purchase and an ability to carry out his wishes. It is a curious and not always creditable phase of human character that many of us, most of us, in fact, do not appreciate a courtesy so much as we resent any form of shabby treatment. This is as true of business life as it is of the personal side of it. If we are not well treated in a business way we do not care to subject ourselves to a further experience of the same kind and in the same place, but we are also inclined to talk about it, to the detriment of those who injured our feelings.

There is hardly a community, no matter how small, in which strangers do not put in an occasional appearance. They can generally be told at a glance. They deserve a courteous treatment for two reasons, one being the broad ground of hospitality and the other the more personal ground occupied by a new customer who may possibly prove to be a very profitable one. Where courtesy and self interest are linked together for the accomplishment of a given purpose, such as building up a business from a small beginning, they form a combination far more fruitful of results than when self-interest becomes independent and will only condescend to use the other advantage in its own behalf.

Ingram, for a pair of two-storey brick and roughcast dwellings on the west side of West avenue, for $3,200; Matthew Murphy, for a pair of two-storey brick dwellings on the west side of Huron street, for $7,000; George R. Copping, for a two-storey brick residence on the south side of South Drive, Rosedale, for $7,000; John Beatty, for a two-storey brick and stone dwelling on the south side of Crescent Road, for $5,350; Mrs. James Macdonald for alterations and additions to dwelling on 63 Spadina avenue, for $3,000; Consumers' Gas Co., for a 135 ft. brick and stone chimney on the east side of Parliament street near Front, for $8,000; J. Barrett, for a brick cellar and front to dwelling on 257 Deleware avenue, for $300; J. D. Young, for a pair of two-storey brick dwellings on 341-343 Markham street, for $4,500; J. M. Purvis, for a one-storey frame hay shed in rear of 86 Don Esplanade covered with galvanized non-corrosive iron, for $500; A. F. Millar, for a pair of semi-detached two-storey brick and roughcast dwellings on the east side of Sumach street, for $2,600; James Lumbers, for three two-storey roughcast dwellings on the north side of Queen street, near Woodbine avenue, for $3,600, John Wighton, for a pair of two-storey brick and roughcast dwellings on 47 and 49 Summerhill avenue, for $5,000; H. S. Mara, for a pair of two-storey brick dwellings on 475 and 477 Dovercourt Road, for $3,000; H. S. Mara, for a pair of two-storey brick dwellings on Gorevale avenue near Arthur street, for $2,500; J. W. Shuter, for a two-storey brick and roughcast dwelling on 189 Ossington avenue, for $1,200; Alfred A. Vaughan, for a two-storey frame stable, covered with galvanized corrugated iron, on 256 Brunswick avenue, for $225; L. H. Bryce, for a one-storey frame and roughcast addition in rear of 284 King street east, for $150; James A. Mallon, for a two storey summer dwelling on Mohawk avenue, near Lake Shore Road, for $600; J. T. Wood, for a one storey addition to 683 Crawford street, for $90; W. T. Prior, for a two-storey brick dwelling on Burnfield avenue, near Ossington avenue, for $500; A. H. Williams, for a two-storey roughcast dwelling on 46 Essex street, for $500; F. M. Noble, for underpinning dwelling with brick and stone on 14 and 16 Classic avenue, for $200; Mrs. Ivy B. Lesser, for a two-storey brick dwelling on McMaster avenue, near Avenue Road, for $2,200; Lawrence Boyd, for a two-storey brick residence on the west side of Hawthorne avenue, near Wanton Crescent, for $4,000; John Murray, for alterations to three attached dwellings on 232, 234 and 236 Berkeley street, for $2,000; Henry Swan, for alterations to dwellings on 72 Woodlawn avenue, for $800; W. Richardson, for a two-storey brick residence on the north side of Dupont street, near Spadina Road, for $3,000, and James Wilson, for a two-storey roughcast stable, near Barton avenue, on Manning avenue, for $40.

SOME BUILDING NOTES.

A NEW branch post office will be erected at the corner of Queen and Abell streets, Toronto, at a cost of $35,000.

J. C. Manzer is building a brick residence at Andover, N.B.

A new Roman Catholic church is being erected at Westmount, Que.

G. H. Moore is erecting a new business block at Vancouver.

Thos. Dalgleish is erecting a brick block at Sault Ste. Marie, Ont.

W. W. Carruthers will erect a brick block at Morris, Man, this summer.

W. F. Longworthy is building a new residence at Port Arthur, Ont.

Two large hotels will be erected shortly at Winnipeg, one on Water street for Mr. Fitzgerald, and the other near The Hudson's Bay Co.'s stores, for Jas. O'Donohue.

Fred. Hanan is erecting a cottage at Cæsarea, Ont.

The R. McDougall Co. will erect a pattern shop at Galt, Ont.

W. R. Hull has commenced building his new block at Calgary, N.W.T.

A new Anglican church, costing about $5,000, will be built at Carberry, Man.

A two storey brick building is being erected by Mrs. J. Jefferson, at Paris, Ont.

A new Roman Catholic church is being erected in the Little Farm District, Hull, Que.

Dixi H. Ross is building a new warehouse at Vancouver that will cost $3,000 when completed.

A brick dwelling is being erected on Marguerite street, Hamilton, for Mrs. La Belle, to cost $900.

Alterations are being made to the premises of the Bank of British North America at Vancouver, B.C., at a cost of $7,000.

A new brick block, 62 x 120 ft. and three storeys high, is being built at St. Thomas, Ont., for The J. Mickleborough Co., Limited.

C P. Moore will erect a new three-storey dwelling on Charlotte and Pitt streets, Sydney, C.B.

A block to cost $60,000 is on the point of being erected at Vancouver, B.C., for the purposes of a Turkish bath.

THE NATIONAL CONVENTION.

At a meeting of the sub-committee of the National Association of Master Plumbers of Canada held in Montreal the other day, it was decided that the seventh annual convention should be held in Halifax on July 1 and 2.

All master plumbers who possibly can attend should do so, for they will no doubt be compensated for the expenditure entailed by the study of the questions which will come up for discussion.

It is particularly requested that the delegates appointed by the different subordinate associations shall arrange to attend.

BUILDING AT OTTAWA.

During the week, building permits at Ottawa have been granted to Charles Robertson, for a frame kitchen on McLeod street, for $200; Eclipse Office Furnishing Co., for a brick addition to their factory for

The Fairbanks Company

747 and 749 Craig Street, **Montreal**

$1,500; J. G. York, for a brick-veneered dwelling, on Nepean street, for $1,500; Baker & Co., for a brick store on Rideau street, for $2,000; George Lester, for a brick dwelling on Second avenue, for $1,500; Mrs. J. E. Parker, for two brick-veneered dwellings on Somerset street, for $2,500; J. A. Smart, for a veneered addition to dwelling on Bank street, for $1,000; D. Welch, for a brick-veneered dwelling on Second avenue, for $2,000; A. F. Laudells, for two frame tenements on Flora street, for $1,800; J. G. Butterworth, for alterations to stores on Bank street, for $500; Wm. Mackay, for addition to shop on Sparks street, for $4,000, and F. W. Howe, for a brick-veneered dwelling on Second avenue, for $1,000.

PLUMBING AND HEATING CONTRACTS.

The Bennett & Wright Co., of Toronto, Limited, plumbers, have secured contracts for the plumbing and gasfitting of the new premises of the Queen City Club, at the corner of Church and Hayden streets, and an extensive contract for the plumbing, steamfitting and ventilation of the premises of The Consumers' Gas Co., Limited, on Front street east. Four laboratories, all finely fitted up and lined with enamelled brick, will be installed. They will have expanded metal lockers and a high class of plumbing goods will be used in fitting them up, consisting of showers, closets, urinals and washbasins.

Menzies & Hayes, plumbers, Toronto, have contracts for the plumbing and gasfitting of two houses on Dufferin street; two houses on Spencer avence, and one on Park Road, Rosedale, for J. J. Walsh & Co., and a residence on Cluny avenue for the Macpherson Estate.

STRIKE STILL ON.

The plumbers' strike in Montreal continues, and, as before, both masters and men are confident that their respective sides will win in the end. Although a few more employers have given in to the demands of the men, the largest firms—those who practically control the trade—are still determined on keeping their position.

A great many buildings are going up, and improvements of all sorts are being made in the city and vicinity; and in a short time the situation will be keenly felt by property holders who cannot get their work done.

CONTRACT FOR IRONWORK.

The Canada Foundry Co., Toronto, has been awarded the contract for the ornamental ironwork for the new head office building in Montreal of The London, Liverpool and Globe Fire Insurance Co.

THE ST. LAWRENCE WATERWAY.

PARLIAMENT at its last session voted an appropriation for the proposed deep - water accommodation at Quebec, and tenders will be immediately called for the work. The site was last week inspected by the Minister of Public Works, Hon. J. Israel Tarte, and he is determined to rush the undertaking through in anticipation of its being used by the fast Atlantic line. The basin will probably be formed by adding 470 feet to the present breakwater and constructing in the form of a square 1,200 feet of cribwork, thus giving sufficient depth and mooring for steamers of the largest class.

The Minister also visited the Government shipyard at Sorel where the big suction dredge was built. It is now ready to go into commission and will be put to work dredging the channel in Lake St. Peter. This channel will be deepened to 27 feet at low water and will have at present a width of 300 feet. It will finally be extended to a width of 500 feet and a depth of 30 feet. There is at extreme low tide a depth of only 24 feet in that part of the channel. Work in improving the channels and aids to navigation on the St. Lawrence will be pushed forward with vigor this summer.

VALUATION OF THE GRAVENHURST PLANT.

Mr. W. Gee, of The Gee Electrical Engineering Co., Limited, Toronto, has been engaged by the Gravenhurst, Ont., Town Council as expert on the valuation of their electrical plant and the advising of them as to their future needs for alterations and equipment.

CONTRACTS FOR MOTOR DYNAMOS.

THE Gee Electrical Engineering Co., Limited, Toronto, have numerous contracts. At present they are working on contracts for the supplying of 10 dynamos for train lighting for The Gould Coupler Co., New York; a booster, dynamo and switchboard for the Berlin, Ont., Street Railway Co.; a 10 horse power motor for the pump works of the Ontario Engine and Pump Co. of Toronto; a 10 horse power motor for The Barber & Ellis Co., Toronto; the electric lighting and insulation work on St. Mary's Roman Catholic Church, Toronto; the extension work for the Wm. Davies Co.; the wiring of houses for M. Rawlinson and Fred Armstrong, Toronto, and for the manufacturers and dairy buildings at the Exhibition grounds, Toronto, and 29 other similar contracts in the city and outside.

They have recently installed a 30 horse-power motor for The Wm. Davies Co., Toronto; a 30 horse-power motor for The Toronto Star; a 6 horse-power motor for the Pump Works, Toronto; an 8 horse-power motor for Bates & Dodds, Toronto, and a 6 horse-power motor for The Duffett Furniture Co., Toronto, and motors of various sizes for Messrs. Whittaker, Robinson, Goodman, Clancy, Wheeler & Wilson, of Toronto, and others.

PROHIBITS TRADING STAMPS.

The Town Council of Sarnia, Ont., have passed a by-law prohibiting the use of trading stamps, coupons or other devices within the limits of the corporation. It will come into force on August 1, 1902.

AN ELECTIONEERING INCIDENT.

"Well, old man, you're with me in this election, aint you?"

"Marse Jim, did I ever fail you?"

"No, but one can't always tell how things are going, you know. Is there anything I can do for you?"

"No, suh—not ez I knows on—onless you got 'bout six dollars wuth er house rent in yo' pocket."

"Here it is."

"En three dollars wuth er groceries?"

"Here's the money."

"En two dollars worth er street tax?"

"I'll fix it."

"En a couple er loose dollars, so's ef I drap dead dey'll fin' enough in my pocket ter sen me home in a cab?"

"Is that all?"

"Dat's all, suh; 'cept dat I so glad ter see you I feels lak takin' a dram ter drink yo' good helt!"—Atlanta Constitution.

CANADIAN ADVERTISING is best done by THE E. DESBARATS ADVERTISING AGENCY, MONTREAL.

Sealed tenders, addressed to the undersigned, and endorsed "Tender for Post Office, Clinton," will be received at this office until Tuesday, 3rd June next, inclusively, for the erection of a Post Office, at Clinton, Ont., according to plans and specifications to be seen at the Department of Public Works, Ottawa, and on application to the Macpherson & Hovey Co., Clinton.

Tenders will not be considered unless made on the form supplied, and signed with the actual signatures of the tenderers.

An accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of tender, must accompany each tender. The cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS.

Secretary.

Department of Public Works, Ottawa, 12th May 1902.

MANITOBA MARKETS.

WINNIPEG, May 19, 1902.

BUSINESS continues very fair, and there is a noticeable demand for such specially seasonable articles as poultry netting, wire screening, freezers, churns, butter workers and dairy appliances generally. Building hardware continues to show a steady demand, as do also paints and oils. Turpentine has not advanced in sympathy with the Southern advance, but the market is very firm with an upward tendency.

Poultry netting has advanced in price, and is now quoted at $1.35 for the 24-inch width. An advance of ½c. per lb. is quoted on malleable clevises, making the price here 7c. per lb. Other prices are without change for the week.

The price list for the week is as follows :

Barbed wire, 100 lb	$3 30

CANADIAN MANUFACTURERS DISCUSS THE WEST INDIES.

THE banquet of the Canadian Manufacturers' Association, held at McConkey's, Toronto, on Thursday evening, May 15, was attended by over 100 members, representing the different branches of industry. The vice-president of the Association, Mr. Birge, of Hamilton, presided. After the banquet was over a number of patriotic toasts were given and responded to, and the chairman, in a brief address, referred to the growth of the Association, and referred to Mr. Munro and Mr. Stewart in terms of praise concerning their recent visit to the West Indies on behalf of the Association.

Mr. Munro mentioned the importance of the Canadian Manufacturers' Association to the business world and said its membership had increased from 130 to 900 during Mr. Russell's term of office.

At this stage of the proceedings Mr. T. A. Russell, former secretary of the Association, was presented with a gold watch, chain and locket as a mark of appreciation for his services.

Mr. Russell pleasantly replied to this presentation and told some stories as to his career since his graduating from the university.

J. M. F. Stewart, assistant secretary of the Association, told of his trip to the West Indies. They had visited ten places: Bermuda, St. Lucia, Antigua, St. Kitts, Dominica, Montserrat, St. Vincent, Barbados, Trinidad, British Guiana, Turk's Island and Jamaica. These colonies have areas varying from 20 square miles in Bermuda to 109,000 in British Guiana, and populations varying from 2,400 in Turk's Island to 750,000 in Jamaica. Their total area is 116,000 square miles and they have a population of 1,600,000. Their total importations amount to £9,000,000, of which Trinidad, the most important business centre, imports to the value of £2,500,000, or £45 per capita.

The merchants of Trinidad are prosperous, although the imports exceed by three or four times the value of the exports, which consist principally of lilies, onions, and potatoes. The United States takes nearly all these exports and supplies five-eights of the imports, leaving one-quarter to be supplied by the United Kingdom and one-twelfth by Canada. The principal items supplied by Canada in 1901 were 38 tons of butter, as against 124 tons from the United States, 30 tons of cheese, as against 51 from the Republic, and the balance including box material, oats, fish and potatoes.

The objects of the Association were strongly favored by the importers in Bermuda, and the greater part of the business done outside of Great Britain can on even terms be obtained by the Canadian manufacturers if they are in earnest about it.

The Canadian preferential tariff of 33⅓ per cent. applied to West-Indian sugars comes short of the countervailing duty of the United States by a few cents. This enables the West-Indian sugar to find a better market in the United States than in Canada, but the market of the Republic cannot be depended upon as permanent.

Last year the sugar consumption of the United States was 2,372,000 tons. The home production was 493,000 tons, the Cuban production 656,000 tons, and that of their insular possessions 476,000 tons. The production of Cuba and the insular possessions can be increased by two-thirds or perhaps doubled. In a few years the United States will be able to produce at home all the sugar she can use. Canada is, therefore, looked upon as the future market for West-Indian sugars.

Better transportation between Canada and the West Indies must be provided to facilitate trade, and opportunity should be given to let their merchants know what our manufacturers turn out in textiles, leather goods, boots and shoes.

Canadian cheese is liked better than the Dutch cheese that at present supplies their market, but ours is too large. They want a cheese weighing from 9 to 12 lb.

A committee in Kingston, Jamaica, met himself and Mr. Munro, and submitted these recommendations:

That the Canadian Manufacturers' Association should investigate the freight, primage and wharfage rates on steamers from Canadian ports, compared with those from United States ports, and if found that Canada is in any measure handicapped the Association should at once take steps to have the matter adjusted.

That the Canadian Manufacturers' Association shall also take steps to procure through freight rates to and from Canadian principal centres via Canadian ports, comparing these with rates through the United States.

That the Canadian Manufacturers' Association shall also be requested to recommend all their members to name quotations for their goods f.o.b. at port of shipment. The want of this hitherto has been found to militate against business.

This committee would add that the natural conditions of the respective colonies are all in favor of mutual trade; each country is the complement of the other in natural products, and it is high time that the feeling which has so long existed in favor of improved trade relations should bear good results.

Speeches were made by several others before the meeting dispersed with singing "God Save The King."

A NEW BOARD OF TRADE.

A board of trade has been organized at Deseronto, Ont., and an application has been made for a charter. The officers are as follows:

President—P. Slavin.
Vice-President—Geo. E. Snider.
Secretary—W. J. Malley.
Treasurer—A. G. Bogart.
Executive Committee—E. W. Rathbun, F. B. Gaylord, John Dalton, W. Woodcock, W. H. Stafford, Robt Lawson, C. J. Adams, James Fairbairn, John Harvey, W. J. McMicking, W. G. Egar, Robert Miller and J. Marshall Oliver.

The drawing up of a set of rules and by-laws was left to a committee of three, and it was decided not to take up any new business until these were adopted.

To good management men and tools, add Apollo galvanized iron.

There is no way to do so good work or to make so much profit on it.

CURRENT MARKET QUOTATIONS

May 23, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Progress

Twenty-five years ago we commenced making Tarred Paper in Montreal, using a hand-power machine, with a daily output of about 100 rolls. To-day we have Paper Mills at Portneuf and St. Pezile; Factories at Toronto, Montreal and Halifax in which we are running **six** Steam Power Tarring Machines, **three** Machines for making Wire Edged Ready Roofing, and **five** Stills for the manufacture of Roofing Pitch.

Our daily capacity is **fifteen** tons Dry Paper, **two thousand** rolls Tarred Paper, **eighteen hundred** rolls Wire Edged Ready Roofing and **twenty** tons Roofing Pitch.

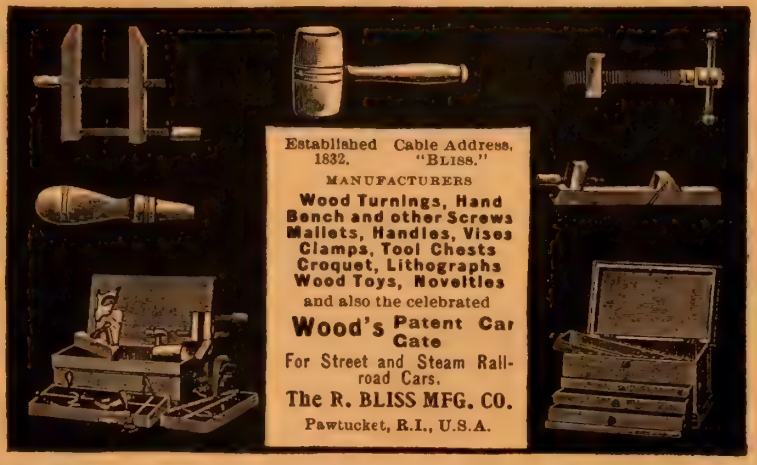
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"FACTS ARE STUBBORN THINGS."

Enterprising Merchants understand that it is easy to sell goods that are in demand, and are known to be reliable. It is an admitted fact that CHURCH'S Cold Water

ALABASTINE

is a wall-coating of wide merit. It has stood the test of time.

M. B. Church was the first to offer to the trade a practical wall-coating adapted for use by mixing in cold water. The compound is patented, and the process of manufacturing is patented in Canada and other countries.

If offered a substitute, or something "just as good," bear in mind that the party so offering may well be regarded with suspicion. There is only one CHURCH'S ALABASTINE, and nothing manufactured for the purpose equal to it.

Attempts have been made to imitate ALABASTINE, which of course is the "sincerest flattery," but it is the genuine ALABASTINE that is in demand, and in selling it there is no risk on account of infringement on anybody's rights.

Our goods, our advertising, our business methods are up-to-date. Prices are right, terms easy, and supply of advertising matter liberal. Is your assortment complete? Prompt service to all.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

AN EXCITED PARIS GREEN MARKET.

A DECIDED change has come over the market for paris green. Up to the present buyers have bought, what might be termed, sparingly, as it was felt an excess quantity was being made in the United States, and that supplies could be easily obtained whenever required. Their calculations in this respect, however, have not been realized. This is due to the turn the market has taken in the United States during the last few weeks.

Over there quite a demand has developed and the result is a scarcity of supplies with prices ¾ to 1c. higher than they were at the beginning of the season.

Referring to the situation in the United States, The Paint, Oil and Drug Reporter in its last issue says: "It is seldom that such difficulty is experienced at this stage of the season by buyers of paris green in getting deliveries on contracts, nor do those who do not take the precaution to cover their probable requirements in advance often find it so hard to get the goods when they need them. Yet, according to reports from all quarters, with the active consuming season scarcely opened, the market is almost bare of stocks, and manufacturers are unable to meet the demand made upon them for deliveries on contracts made early in the year on a much lower basis of value. * * * The situation is a strong one, and, at the present writing, all indications point to the establishment of a considerably higher range of values."

In sympathy with the condition of affairs in the United States, the demand in Canada for paris green has become active during the last week, and it is quite within the limits of possibility that the advance which took place in June of 1901 of 2c. per lb. may be repeated in the near future. Makers of paris green in Canada are calling in the options that may be afloat, and travellers are advised not to leave any figures behind them, and to take orders only for specified quantities at specific prices for immediate shipments.

DROPS FROM THE EDITOR'S PEN.

A live man can usually raise to life a dead business.

We can make money; but if we coin it the law makes prisoners of us.

Money will always keep a man out of the poor house, but it will never keep a man out of the dead house.

HOW THE GERMANS GOT THE TRADE.

AMONG the commercial nations of the world none have been more energetic and resourceful in developing their export trade than Germany. An interesting report recently sent to the United States Government at Washington by their Consul at Autofagasta, Chile, gives an interesting insight into the methods that have been employed by Germany in developing her trade with Peru, Chile and Bolivia.

It appears that about 30 years ago the trade that went to the Pacific ports of the South-American countries was monopolized by British and United States houses. The Germans at that time were only represented by jobbers and shopkeepers in the coast towns.

Not satisfied with this condition of affairs Germany carefully trained a number of young men, educating them in commercial affairs in the language of the South-American countries. These young men were then sent to South America to enter business houses as clerks, with a view to their mastering the details of the business. When these details had been mastered a number of German houses started branches in such countries as Chile, Bolivia and Peru, with these young men in charge. The result is that in many branches Germany has now a monopoly of the trade, and the British and United States houses no longer attempt competition.

There is a lesson in this for Canadian business men as well as for the business men of other countries. There is no question about it, the education of young men in this country is particularly deficient in regard to the languages of other countries. What Germany has done, Canada can do, if she only has the will.

IMPORTANT COMMERCIAL QUESTIONS.

THE convention of representatives of the different boards of trade throughout the country, which is to meet in the Parliament Buildings, Toronto, on Wednesday and Thursday next, has had a most important programme mapped out for its consideration. This programme is as follows :

Canadian Copyright.
Canadian Insolvency Law.
Commercial Depot in London, Eng.
Defence.
Establishment of Customs Union with Sister Colonies.
Fast Atlantic Service.
Importation of Canadian Cattle into Great Britain.
Metric System.
Newspaper Postage Between Canada and Great Britain.
Railway Commission.
Steamship Service for Exclusive Trade Between Great Britain and her Colonies.
State Cable from Canada to Australia.
Steel Shipbuilding in Canada.
Trade Relations within the Empire.
Trade Relations within the Colonies.
Postal and Telegraph Communication.
Winter Navigation of the St. Lawrence.

Here are in all some 17 subjects, all of which are more or less important to the welfare of the Dominion. If the Conference succeeds in getting through even half of them, it will have established for itself a record which it would take the Dominion Parliament or any other legislative body a long time to successfully emulate.

No doubt one of the first things the Conference will do when it meets will be to appoint a committee to revise the list of subjects and to bring up those first which are of the most importance. At any rate, this is what should be done.

The subject which will no doubt occupy the most attention, and around which the greatest discussion will centre, is that of preferential trade with the Mother Country. The Toronto Board of Trade has already prepared a resolution on this subject, which called upon the Prime Minister of Canada to urge at the coming Imperial Conference the securing of a Royal Commission composed of representatives of Great Britain and the colonies to investigate the trade conditions, and to suggest such preferential treatment of imports from the various parts of the Empire as shall be best calculated to insure the fullest benefits.

As we have already said, this will be the most important subject for discussion. It is one thing to desire a thing, but it is another to secure it, and especially when it is surrounded by intricate and conflicting interests.

Preferential trade between Canada and the Mother Country would, no doubt, be beneficial to all concerned if it were placed upon a sound economic basis. There are already some in Canada who find the preference irksome which Canada gives to the products of the Mother Country.

The difficulty is to secure a tariff arrangement between two countries which will prove satisfactory to these. They are asking for a higher tariff on the particular goods which they manufacture. How this can be done, and while at the same time induce the British Government to arrange its tariff in order that Canadian products will get a preference over those of the various countries, is an intricate question. If a preference means anything, it means that the parties to it must consent to such modifications in the tariff as shall allow the products of the contracting parties to enter with greater freedom than hitherto. This is a business proposition, and we can depend upon it that the Conference which is to meet next week in Toronto will consider it in a business-like way and devoid of party feeling.

The improvement of the steamship service between Canada and the United Kingdom is a question of scarcely less importance, particularly in view of the recent steamship amalgamation, engineered by Mr. Pierpont Morgan; in fact, the whole transportation question needs to be considered, for it is of more importance than even tariff arrangements. Canada is, at present, sadly handicapped, both in regard to railway and steamship transportation, and it is to be hoped that the Conferenee will be able to give this subject all the attention it deserves. Even if it meets and does nothing else but aid in the solution of the transportation question, it will have by no means met in vain.

In regard to a commercial agent in London with a depot there as well, Sir Wilfrid Laurier has already promised that something shall be done, but Governments move slowly, and it is to be hoped that the Conference will take such action as will hasten the consummation of this idea. It is several years since the agitation was started, but, thanks largely to the inaction of Sir Richard Cartwright, the appointment has not yet been made.

It is to be hoped that this conference of business men will not be the last of its kind, but that it may be the forerunner of annual similar gatherings. The business men of this country have not, in the past, exercised the influence in the commercial affairs of the State that they should have. It is to be hoped, therefore, that we are now on the dawn of a new era in this respect.

The looser a merchant is with his credit the tighter will his creditors be in their dealings with him.

CANADIAN - NEW ZEALAND TRADE.

A GENTLEMAN from New Zealand, who was in Toronto this week, expressed himself in favor of larger trade between Canada and his country. "We will favor trade with Canada, if it should cost us a little more," he said. This is a sentiment in which Canada no doubt reciprocates.

Our own official returns do not show the volume of business between Canada and New Zealand, our exports to that country being classified with those of Australia, under the name of Australasia, and the latest returns that we have, from a New Zealand source, are only up to 1900. These show that the aggregate trade of New Zealand with Canada was valued at $201,-713. Of this $1,397 were exports to Canada and $200,336 were imports from Canada. It will thus be seen that the aggregate trade is not only small, but that our sales to New Zealand, small as they are, are a great deal in excess of our purchases from them.

The population of New Zealand, according to the last census, was about 823,000, while the total foreign trade of the country in 1900 was $116,275,651. Of this $64,-464,651 were exports, and $51,811,000 imports.

New Zealand is one of the most progressive and enterprising of the British colonies, and it is to be hoped that trade between the two countries will develop a great deal more in the future than it has in the past.

The wise merchant has learned that he has got to spend money on his business as well as on his wife if he is to have peace of mind.

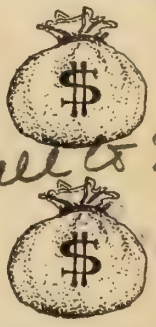
AN ENGLISH HARDWAREMAN'S VIEWS.

MR. J. N. GREENALL, a prominent hardwareman of Nottingham, Eng., was recently on a trip to Canada and the United States, and on his return expressed himself in an interview appearing in The Ironmonger as well pleased with his tour. The business and social status of the hardwareman in Canada and the United States he was surprised to find much higher than in England. He was convinced that shop management in America is far ahead of that of Great Britain. A revelation to him was the amount of system prevailing in the management of a store in the United States and Canada and he found the status of clerks and other assistants to be high. They all seemed to him to be superior, well educated men enjoying the confidence of their employers and were paid much higher salaries than the English assistant usually received.

Mr. Greenall was rather surprised at the important part which trade-literature plays in the American hardware business. Not only are the trade-papers read diligently as a matter of course, but few stores are without a number of the elaborate handbooks published by those papers, and dealing with ironmongery, heating and ventilating, and electrical work. These publications are bought and read by all who are interested. Mr. Greenall thinks the American hardwareman owes much of his smartness to his systematic reading of trade-literature.

During his trip Mr. Greenall had heard no complaints of underselling. He found that United States and Canadian hardwaremen did not deal in so many goods as English ironmongers, and there was less overlapping of trades.

The cutlery used in America somewhat disgusted Mr. Greenall, as it does all visitors familiar with ivory-handled Sheffield table knives. Although having plated blades, most of the table cutlery used in the United States is common, badly finished and ugly, much of it hafted in earthenware and solid steel. Moreover, the same patterns are to be seen in the dwelling of the artisan and the millionaire, and in hotels of all grades. The best carvers and expensive pocket-knives come from Sheffield. Mr. Greenall also prefers British plate to American.



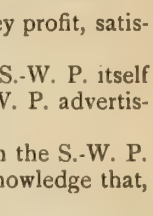
Mr. Greenall did not think much of New York as a place to live in. The hurry-scurry, the noisy train and overhead railways, the very high prices of everything and the absence of comfort or repose he did not like.

Canada was much more to his taste. He noticed throughout the Dominion that the United States were shouldering Great Britain out of the markets in all kinds of builders' goods, although Sheffield's position in plate and cutlery had scarcely been shaken by her great rival.

Metalastic

The new trade mark name of THE SHERWIN-WILLIAMS CO.'S paint for metal surfaces.

THE PROFITS OF S.-W.P.



There are three kinds of profit in selling S.-W. P., money profit, satisfaction profit, and reputation profit.

There's money profit through the paint business that S.-W. P. itself brings, and through the increased general business that S.-W. P. advertising and methods always secure.

There's satisfaction profit through the perfect satisfaction the S.-W. P. dealer is able to insure to his customers, and through the knowledge that, if rightly used, the paint will never go wrong.

There's reputation profit through the good name of S.-W. P., through its absolute certainty to do good work, through its high quality, through its spreading capacity, through its long wear, through the way it saves money for the property owner, and the satisfaction it gives him.

Isn't that the kind of paint you want to sell? Isn't it the kind it pays to sell? The "B-13" booklet tells all about S.-W. P. profits. Write for it to-day.

REPEAT ORDERS FOR SHELF BOXES

J. S. Bennett's patent shelf boxes are rapidly growing in favor. His customers are much pleased with them and large numbers of repeat orders have been received. He has just obtained an order for 212 of these boxes from Cote, Boivin & Co., Chicoutimi, Que., who stipulated that they should be like the last boxes he sent them. This is an excellent testimonial. Prices can be obtained from J. S. Bennett, Toronto.

HARDWARE ASSOCIATION MEET.

The Toronto Branch of the Ontario Hardware Merchants' Association held a special meeting in the rooms of the Retail Merchants' Association of Canada, Bay street, Toronto, on Tuesday, May 27. The chief business was the discussion of a proposition to amalgamate with the Retail Merchants' Association. This will be brought up before the next meeting of the Hardware Merchants' Association to be held on June 19 and definitely settled.

CANADIAN PIG IRON.

ONE of the furnaces of The Dominion Iron and Steel Co. at Sydney, C.B., has been altered materially in the design, and also relined, with results very gratifying to the company. The vice-president, Mr. James Ross, said that this furnace had turned out, after the change was made, about 2,000 tons of the best quality of pig iron in a week. Another furnace is being changed in the same way. It will be ready in the course of three weeks or so, and, in all probability, will be able to produce the same amount of iron.

The demand for pig iron made at Sydney has been good, and indications are that it will be an important factor in the pig iron supplies of this continent before long.

The trade in Canadian pig iron with Scotland is already of fair dimensions, and is attracting a good deal of notice from manufacturers there. The Canadian agent at Glasgow, in his report to the Minister of Trade and Commerce, says: "The importation of pig iron from the Dominion to the Clyde has created quite a sensation. Fifty-three thousand tons were discharged during the year and three or four cargoes are now on the way. The iron serves the same purpose as Scotch or English foundry iron, and is principally used by foundries; some of it, however, is used by pipe and malleable iron manufacturers."

NEW ONTARIO IRON ORE.

"WHILE it may be possible that on account of glacial erosion the product of high-grade ore in Canada may be less than in districts of similar size and geological position on the United States side of the boundary," says Mr. C. R. Van Hise in a report on the Lake Superior ore region to the United States Geological Survey, "it cannot be doubted that in the future important quantities of iron ore will be exploited in the Canadian Lake Superior region. Doubtless, also, this exploitation would have begun many years ago were it not for the duty which ores mined in Canada must pay when entering the United States."

The Vermilion iron-bearing series has been traced to Hunter's Island. Thence these rocks have been mapped by the Canadian Survey as extending first in a northeasterly and then in an easterly direction to the Kaministiquia River, and thence eastward to the Kenecnawan rocks west of Lake Nipigon. Another great belt of iron-bearing rocks with various ramifications has been traced by the Canadian Survey from Rainy Lake eastward to the Canadian Pacific Railway and to Lac des Mille Lacs. In this belt occurs the so-called Atikokan Range, in which large deposits of iron ore are said to outcrop.

East and north of the east half of Lake Superior various areas of iron-bearing rocks are also found. One or more belts are said to extend east from Lake Nipigon. A belt is found adjacent to the Black and Pic rivers. Several belts of iron-bearing formation have been found in the Michipicoton district.

At the present time the only one of these districts which is an ore producer is the Michipicoton. While this district has not been connected areally and structurally with any other area in the Lake Superior region, the likeness in the character of its rocks and its succession to the Vermilion district leaves little doubt that the two districts are in most essential points parallel. In the Michipicoton district the basement rock is a greenstone, showing the ellipsoidal structure on the great scale so characteristic of the Ely greenstone of the Vermilion district. It contains substantially all the varieties of material in the iron formation of the Vermilion district, and in addition great quantities of pyritic quartz rock. On the bluff back of the Helen mine and at many other places iron carbonate is abundant. Near the Helen mine, Mr. Merriam reports this carbonate as containing 19 to 37 per cent. of metallic iron. These abundant cherty carbonates leave little doubt that the ferruginous cherts, ferruginous slates, jaspers and iron ores have mainly developed from a carbonate as the original rock, precisely as in the various districts south of Lake Superior. However, it is clear that the pyrite of the carbonates and the pyritic quartz rocks have also made contributions. At the present time the iron formation has been developed only at the Helen mine. Here, a good body of high-grade hematite has been shown by stripping to extend in considerable areas to the rock surface.—Bradstreets.

SALESMEN WANTED.

WANTED—A few first-class salesmen to travel in American and Canadian territory, also some parts of Europe. Apply with references to Syracuse Smelting Works, Montreal.

CANADIAN ADVERTISING is best done by THE E. DESBARATS ADVERTISING AGENCY, MONTREAL.

Sealed tenders, addressed to the undersigned, and endorsed "Tender for Post Office, Clinton," will be received at this office until Tuesday, 3rd June next, inclusively, for the erection of a Post Office, at Clinton, Ont., according to plans and specifications to be seen at the Department of Public Works, Ottawa, and on application to the Macpherson & Hovey Co., Clinton.

Tenders will not be considered unless made on the form supplied, and signed with the actual signatures of the tenderers.

An accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of tender, must accompany each tender. The cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,
Secretary.

Department of Public Works, Ottawa, 12th May 1902

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

NOVA SCOTIAN COAL SHIPMENTS.

FOR the month of April, 1902, the total output and shipments of the Dominion Coal Company amounted to 174,008 tons, as compared with 126,689 tons for April of 1901, an increase of 47,319 tons. The shipments to the United States for April, 1902, were 60,117 tons, as compared with 50,920 for the same month last year, a gain of 9,197 tons. There was an increase of 85,116 tons in the shipments of coal to the United States for the first four months of this year over the first four months of 1901, the figures being 275,120 tons for that period in 1902, and 190,004 for the same period in 1901. There was also an increase of 161,005 tons in the total shipments for the first four months of 1902, over the first four months of 1901, the exact figures being 650,169 tons for that period, 1902, and 489,164 for the same months, 1901.

An increase of 2,894 tons took place in the shipments of the Cumberland Railway and Coal Co. for the month of April, 1902, over the same month of 1901, the figures being 32,966 and 30,072 tons respectively. There was a decrease, however, in the shipments of the first four months of this year, as compared with the same four months last year, the shipments being 118,692 tons for 1902 and 121,036 tons for 1901, a difference of 2,344 tons.

The Acadia Coal Co. shipped 16,748 tons in April 1902 and 17,871 tons in April 1901, a decrease of 1,123 tons, and the shipments of this company for the first four months of this year show a decline of 7,419 tons, the figures being 64,686 tons for the first four months of 1902 and 72,105 tons the same period the year before.

There is also a decrease in the shipments of The Intercolonial Coal Co. For April, 1902, as compared with April, 1901, the figures are 11,235 and 15,487 tons respectively, and the decrease 4,252 tons, while for the first four months of 1902 the total shipments were 52,848 tons, and for the same time 1901 they were 57,580 tons. This is a decrease of 4,732 tons.

On the other hand, the shipments of The Nova Scotia Steel and Coal Co. for April, 1902, show a gain of 4,116 tons over April, 1901, the figures being 15,761 and 11,645 tons respectively. The shipments for the first four months of this year amount to 59,270 tons, and for the same time last year 51,111, an increase of 8,159 tons.

MACHINERY AND ELECTRICAL NOTES.

The Jones & Moore Co., electric supplies, are shipping a 1,000-light dynamo and plant to Owen Sound, Ont., for the Balmy Beach Summer Resort there of the Owen Sound and Georgian Bay Park and Summer Resort Co., and a 30-kilowatt motor for the Sun Portland Cement Co., Owen Sound. They are also busy on a number of other orders.

The McLachlan-Joy Electric Co., Limited, and the McLachlan Gasoline Engine Co., Limited, are removing from 115 Bay street to premises on 201 Queen street east. They are installing new and up-to-date machinery in their new quarters and are making ready to do a large amount of work. At present the electrical company is rebuilding a 30 h. p. dynamo for The Elias Rogers Co.

A carload of gasoline engines is being shipped to the Manitoba agent of the McLachlan Gasoline Engine Co., Limited, at Winnipeg, and will be shipped from there to the various firms in that Province from whom he has already secured orders.

DOMINION STEEL CO.

The articles of amalgamation between the Dominion Iron and Steel Co. and the Dominion Coal Co. have been modified in several important particulars. A meeting of the shareholders has been called for June 12 to ratify the changes. Valuable concessions have been made to the iron and steel company, which will thus be relieved from the payment of some $2,000,000, representing its original obligations under the option to discharge all the debts and liabilities of the coal company. The cash deposit of $600,000 originally intended is also dispensed with. The most important concession, however, is probably that relating to the royalty to be paid by the steel company on the coal output. The old contract provided for a royalty of 15c. per ton on every ton over 3 500,000 tons in any one year. Under the concession granted by the directors, the royalty will be 7½c. a ton, a saving of $75,000 on every million tons in excess of three and a half. It is anticipated that this will mean $150,000 a year in the near future.

DEATH OF A HARDWAREMAN.

A prominent hardwareman passed away at Carleton Place, Ont., in the person of W. R. Gardner, a former well-known resident of Brockville. His death was not unexpected as he had been ailing for some time.

Mr. Gardner was brought up in the hardware trade and for years conducted a successful hardware business at Carleton Place. He afterwards removed to Brockville and established the Gardner Tool Works there. These have since been merged into the business of the James Smart Manufacturing Co., Limited. He was for some years engaged in the same line of manufacturing at Sherbrooke, Que., after he gave up business in Brockville. He took an active interest in public affairs and was a member of the Brockville Town Council at one time.

PERSONAL MENTION.

Mr. W. H. Evans, of the Canada Paint Co., Montreal, spent a couple of days in Toronto this week "doing" the races, as well as a little business.

Mr. C. C. Ballantyne, manager of the Montreal branch of the Sherwin Williams Co., was in Toronto on Thursday in conference with Mr. John Benson, manager of the firm's Toronto branch.

CHANGE IN A VANCOUVER FIRM.

Mr. Wm. Vallance, of Wood, Vallance & Co., Hamilton, is in Vancouver inspecting the branch business which his firm is opening up there. Wood, Vallance & Co. are taking over the wholesale and retail hardware business of Thomas Dunn & Co., in Vancouver, the firm name of which will become Wood, Vallance & Legget.

CATALOGUES, BOOKLETS, ETC.

ICE CHIPPERS AND BREAKERS

The North Bros. Manufacturing Co., Philadelphia, manufacturers of hardware specialties are sending out circulars descriptive of their "Crown" and "Lightning" ice chippers and their "Rapid" ice breakers. These are new machines calculated to meet the wants of a large number of people. The "Lightning" ice chipper is made in two styles, one for the use of the family, and the other for confectioners, hotels and restaurants. The "Rapid" ice breaker is durably and substantially built, is for breaking ice in small pieces, and arranged for both hand and power.

HARDWARE TRADE DIRECTORY.

A trade directory issued by The Iron Age, New York, is being sent to each of that paper's subscribers. The directory is complete in everything pertaining to the hardware trade, and will be found most serviceable by all dealers, with every one of whom the question often arises, "Where can I procure such and such goods?" Every imaginable article that hardwaremen, plumbers, machinists, or those in other kindred occupations could require is classified in this book, in alphabetical order, followed by the different firms who can supply such to the trade. The book is bound in a strong linen cover, and is clearly printed. To non-subscribers of The Iron Age the price is 25c.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

AMERICAN AND BRITISH LOCOMOTIVES IN EGYPT.

ACTING under instructions from the British Foreign Office, Lord Cromer has sent a report on the comparative merits of British, Belgian and American locomotives in Egypt, which is accompanied by technical observations by Major Johnston, President of the Railway Board, and T. H. Trevithick, chief engineer. That the report is an impartial one must be taken for granted, as the tests upon which it is based are signed by a representative of the Egyptian railroads, and also by a representative of the Baldwin Locomotive Works, the makers of the American engines. Between 1895 and 1897, the great increase in the length and traffic of the Egyptian railways made it urgently necessary to order some 70 new engines. Among the tenders presented was that of the Baldwin Works, who offered 20 engines in 12 weeks. This was accepted, as were also tenders for 50 engines by one British and four Belgian firms.

The report is of the greatest interest, first, because of the evident fairness as stated above, of the tests and impartiality of the report; and secondly, because it brings out very clearly both the advantages and disadvantages under which the locomotive industry of this country labors in its competition for foreign orders. The report is both favorable and unfavorable to the American locomotive. On the score of cheap first cost and speed of delivery we are easily ahead of British builders, while on the score of economy of operation, the consumption of fuel, etc., the American locomotive design seems to be unable to compete with the English engines. On the question of price, where the tenders were based upon Egyptian standard designs and specifications, the figures stood thus: In one tender the British figure was $11,200 and the Baldwin, $13,500; and on another tender the British price was $16,250, as against a tender of $17,875 from Baldwin. "On the other hand," Lord Cromer adds, "the Americans offered to supply engines differing in certain particulars from the Egyptian designs and specifications, but which they held to be of equal power and equally suitable to the work which had to be performed. Under these conditions the American prices fall respectively to $9,275 and $12,375. That is to say, 19 per cent. below British figures. The reason for this great fall in price is sufficiently obvious; they were able to introduce their stock standards and to advance work continuously without being hampered by, to them, unknown and unnecessary conditions. It appears, however, that it is not so much in the matter of price as in respect to the period required for the construction that the American manufacturers have had the greatest advantage. When British and American firms entered into competition, the former offered to complete the orders in 48 and 90 weeks, respectively. While the American offers, on the other hand, were for delivery in 18 and 35 weeks if the Egyptian designs were followed, or in 12 to 30 weeks if certain changes in the designs were allowed."

In the competitive tests, however, the advantages lay decidedly with the British engine. In the freight trials, three British and two Baldwin engines competed, and each group made eight runs of 1,034 miles. The American engine hauled an average of 54 cars, weighing 760 tons, and the British engines an average of 57 cars, weighing 868 tons. Doing this work the American engines consumed 62 lb. of coal per mile, the British engines, 49.4 lb. of coal per mile, while the American engines evaporated 7.78 lb. of water per pound of coal, and the British 9.1 lb. Mr. Machesney, the Baldwin's representative, and Mr. Higginson, the English representative, both signed the log at the end of each run. The coal was weighed and put on the tender in the presence of the two representatives, and what was left after the runs were completed, was also weighed in their presence. In the trials of the passenger engines nine runs were made by six American engines and two British engines, in which the average number of cars per train was 13 and 1,345 miles was the distance run. In doing this work the American engines burned 46.3 lb. of coal per mile and evaporated 6.36 lb. of water per pound of coal, while the British engines burned 30.7 lb. of coal per mile and evaporated 8.2 lb. of water per lb. of coal. The inferior efficiency shown by the American engines in these most interesting tests was certainly remarkable. Major Johnston attributes it to the following causes: Greater cylinder condensation, because of the greater exposure of the outside cylinders; increased twisting strains due to the outside cylinders; transverse strains on the coupling and connecting rods causing increased friction, due to the flexibility of the engine frame; increased friction due to the comparatively short eccentric rods and the use of intermediate rocking levers; whereas in the British type, the valve rod is directly attached to the expansion link. On the other hand, he points out the following advantages possessed by the American over the English type, and expresses surprise that they do not counterbalance more fully the disadvantages named: First, the balanced slide valves, which greatly reduce valve friction; and, secondly, the more perfect regulation of the steam, owing to the elaborate rack sectors provided.

We think it is probable that the high efficiency of the English locomotive is to be found in this case rather in the boiler than in the engine; although, no doubt, the points in the construction mentioned above have an appreciable effect. The plate frame permits the use of a firebox five inches wider than can be built within the bar frame; while the copper fire box and brass tubes of the English engines undoubtedly serve as better conductors of the heat than the ordinary steel type.

These results coming so soon after the report given by the Midland Railway, in which a similar economy was shown by English over American engines doing the same work, will attract considerable attention from locomotive builders in this country, and we would like to hear them give their own version of the great difference between the two types.—Scientific American.

NEW AGRICULTURAL IMPLEMENT COMPANY.

A company has been formed to manufacture agricultural implements at Winnipeg. It will be known as The Western Implement Manufacturing Co., and it is capitalized at $60,000. A charter has been applied for, machinery will be secured, and work on the erection of a manufacturing plant will be commenced immediately. The provisional directors are as follows: Robert Muir, E. L. Drewry, F. Atchison, Ald. Barclay, James McDiarmid and W. A. Black. The secretary is F. J. C. Cox.

PIG IRON IN GREAT BRITAIN.

THERE is a somewhat better feeling to record in the pig iron market, and more business is doing at prices which, in some instances, show an advance upon the values prevailing last week. The downward movement in warrants received a check towards the end of last week, and there has since been a marked recovery, Scotch now standing at 53s. 8½d., and Middlesbrough at 48s. 10d., as compared with 52s. 10½d. and 48s. 2d. respectively at this time last week. Makers' iron is dearer in the Cleveland district, No. 3 having averaged about 48s. 6d.; but hematite has been reduced to 56s. 9d. per ton for mixed numbers. Nothing further of any definite character is heard now of inquiries from the United States; but there is still a good quantity to be despatched thither from Tee-side under previous contracts, and in Glasgow rumours have been in circulation as to sales of special brands of Scotch iron on American account. The following is a statement of the present stocks of pig iron in public stores:

Public stores stocks, in tons:	Wednesday.
Connal's at Glasgow	52,900
Connal's at Middlesbrough	138,500
Connal's at Middlesbrough, hematite	300
West Coast hematite	15,300
N.E.R. Stores, Middlesbrough	360

During the week ending May 13, the stocks at Middlesbrough decreased by 1,800 tons, at Barrow by 50, and at Glasgow by 126 tons. On the year there is a decrease of 730 tons at Middlesbrough, 5,400 tons in Glasgow, and an increase of 350 tons at Barrow. The net charge during the week is a decrease of 2,000 tons, and during the year to date a decrease of 5,780 tons.

BRITISH TINPLATE MARKET.

The market has been fairly steady during the past week, and, taking things all round, prices are well maintained. Common 14 by 20 Bessemer cokes are, perhaps, a shade easier, sales being reported for this and next month's delivery at 13s. 4½d. per box f.o.b. Wales. Current quotations for this size run generally 13s. 6d. to 13s. 9d. per box f.o.b. Wales, with Siemens' steel at 1½d. per box extra, lights at the usual reductions.—Iron and Coal Trades' Review, May 17.

BRITISH STEEL PLATES FOR THE U. S.

It is rumored that a Scotch firm have sold 11,000 tons of steel plates for shipment to America. While the demand for shipbuilding material continues slack on the Clyde, the Scotch steelmakers are all alive to the possibility of a chance trade with America in blooms and other partly-manufactured steel, but they have not counted confidently on being able to get rid of plates and angles or other finished material. The matter is out of their hands, it depends entirely on how the pendulum swings in the States this summer. If the existing energy is sustained the demand must outrun domestic production, and we shall be called in to assist in supplying finished as well as raw material.—Iron and Steel Trades Journal, May 17.

WIRE NAILS IN THE UNITED STATES.

The urgency for wire nails is not so acute as it was a month ago, and manufacturers are catching up with orders. Recent rumors of advance in prices have proved so mythical that the trade evidently do not consider it necessary to buy much in advance of actual requirements. As the jobbing trade have generally disposed of nails bought at low figures, it is becoming a question where to obtain carload business, as jobbers' prices are quite frequently quoted to the retail trade. Otherwise the market is apparently firm.—Iron Age.

LARGE ORDER FOR STEEL RAILS.

The Carnegie Steel Co. has received an order for 30,000 tons of rails from the Cotton Belt Railroad for November and December delivery. This is the largest order that has been taken for some time for this year's delivery, and the rails will no doubt be rolled at the Ohio plant of The National Steel Co. Light rails continue in strong demand and command high prices for prompt shipment.—Iron Trade Review.

NEW YORK METAL MARKET.

COPPER—As indicated several days ago the edge seems to be off of the speculative movement in copper, and while since then the bull interests have succeeded in bidding prices up still further there have been no transactions except for a small sale of electrolytic at the extreme prices. The consuming demand also has slackened as confidence in the stability of the advance waned, and to-day, under heavy offerings of Lake, the market was distinctly weak, though the decline amounted to only a little over ⅛c. The London market instead of responding to the recent upward movement in prices here has shown an opposite tendency for several days under free selling, and closed easy to-night at a further decline of 5s. In the New York market the closing quotations were 11.75c. bid and 12c. asked for standard spot to August delivery, while Lake was freely offered for spot, May and June at 12.62½c. with 12.37½c. bid. July to September deliveries of Lake were offered at 12 60c. with 12.25c. bid. Quotations on spot to September electrolytic were 12.12½c. bid and 12.37½c. asked, and in casting spot to August 12.12½ to 12.25c.

PIG TIN—The London market was easy, spot under realizing sales declining 20s., while futures were quiet and closed but 5s. lower. The cables were without appreciable influence here. There was not very much demand, but buyers and sellers came nearer together and a little business resulted. Of May 5 tons sold at 30c. and a similar quantity at 30.10c. The market closed steady with the last named price bid for spot and May and 30.15c. asked. For June 29 60c. was bid with sellers at 29 90c. The Manitou has sailed from London to New York with 255 tons, making the stock afloat for Atlantic ports at this time 3,637 tons.

PIG LEAD—There is a moderate demand, but the market remains steady with prices based on 4 12½c. for lots of 50 tons or over. St. Louis was reported quiet at 3.95 to 3 97½c. There was no change in the London market.

SPELTER—Extreme scarcity of this metal keeps the market very firm and restricts business. Nominal quotations are $4.75 to $4.87½. The St. Louis market was reported to be unsettled with $4.50 quoted. The London cable reports a decline of 2s. 6d.

REGULUS ANTIMONY — The market was quiet but prices remain steady at 10¼c. for Cookson's, 8 to 8¼c. for Hallett's and 7½ to 8c. for other brands.

QUICKSILVER—The demand is fair and prices are maintained on the basis of $48 for 50 to 100 flasks.

NICKEL—Prices are steady under a fair demand on the basis of 50c. for ton lots.

OLD METALS—There is not much business to record, but the market remains steady.

IRON—The larger buyers of foundry pig iron seem to have completed their purchases for the year, and inquiries for 1903 deliveries are now seldom heard. The furnaces do not seem anxious for business for delivery during the balance of the current year, and some are not offering anything. In the South, a little June delivery iron has sold at $17 for No. 2 at the furnace, but interest in later deliveries seems to have subsided. Pittsburg advices indicate that there is a possibility that the strike of furnacemen on June 1 may be averted. The demand for finished materials continues fairly active. The price of plates has been advanced by individual mills, but, according to some reports, there is no prospect of concerted action in this direction, and it is intimated that the meeting scheduled for June 5 may not be held.—New York Journal of Commerce, May 28.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 30, 1902.

HARDWARE.

THE business done in hardware during the past week has been particularly good for the season, though it is, of course, much less active than a few weeks ago when the rush of spring shipments gave night and day work to the jobbing houses in order to keep up with the demand. Collections have been fair. The market is in a healthy condition and the prospects for a good season's business are bright. Wholesalers have been considerably inconvienced by the strike of the carters in Montreal, and much delay in delivering goods to the city trade has been caused. Most of the houses are carting their own goods to and from the freight sheds, at an advanced cost. Harvest tools and freezers have been among the most active lines, duplicate orders for the latter having been received in several cases. Cement and firebricks are quoted lower this week.

SCYTHES.—Scythes continue to move actively at steady prices, which are as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—There is an active inquiry in this market. Barb wire sells at $3 per 100 lb. f.o.b. Montreal.

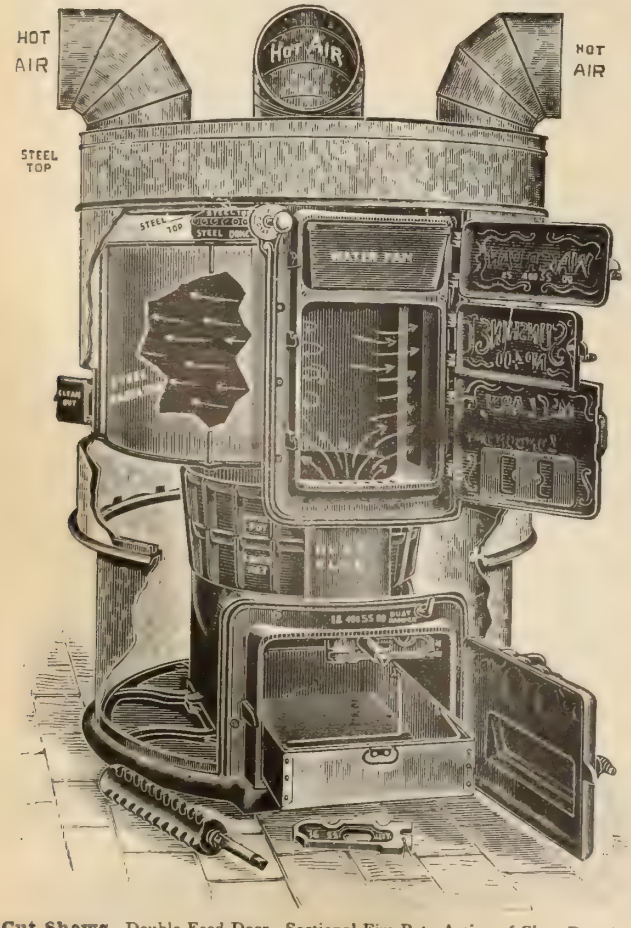
GALVANIZED WIRE.—There is a fair demand, and our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market is fairly active this week. Prices are the same. Our quotations are as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—This market is still somewhat quiet, and the discount remains at 22½ per cent.

BRASS AND COPPER WIRE.—Trade is fair, and the discount is 60 per cent. on both wires.

FENCE STAPLES.—The demand has decreased somewhat, but trade is still quite active. We quote as follows: Bright, $2.90 per 100-lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.



WIRE NAILS.—An active inquiry still keeps up for wire nails, and our quotations are now as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a fairly good demand this week. The price is $2.45 per keg in small lots, and in carlots, $2.37½ per keg. The discount on flour barrel and coopers' nails is 40 per cent.

HORSE NAILS.—The market is steady under a moderate demand. Discounts follow: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Prices have not been altered. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The market continues fairly active; the discounts remain unchanged.

Cut Shows—Double Feed Door, Sectional Fire Pot, Action of Fire, Dust Flue, Ash Pan, Water Pan, Section of Grate and How it is Removed, Galvanized Casing with Flat Cap and Pipes off Top.

"SUNSHINE" FURNACE

Made in 4 sizes—19, 21, 23½, 27-inch. Fire Pots, in either Portable or Bricksetting Form.

The "Sunshine" is a money-maker to all who handle it.

BECAUSE— It is sold at a reasonable price.
It is modern in every detail.
It can be set in a very shallow cellar.
It will burn any kind of fuel.
It satisfies every customer.
If you do not handle it, Why not?
We make prompt shipment.

as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

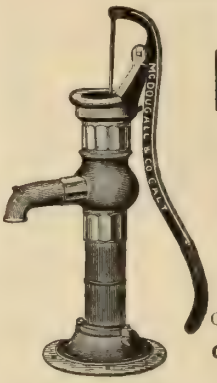
BOLTS.—The demand for bolts has kept well up in all lines, and all houses report a good business. There has been no change in the discounts, which are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—A great many deliveries are in progress, and the inquiry continues active. No change in the price is quoted. One house is looking for an advance shortly. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Trade during the week has been only fair, and our quotations are now as follows: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There has been no change in this market. Trade is moderately good. The discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is still a good demand for this article, and the price is $1.37½ per 100 square feet.



POULTRY NETTING.—The demand has considerably reduced wholesale stocks on some sizes, 16-gauge in particular being reported short with a number of houses. The discounts are: Canadian or English, 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—A big trade has been done in harvest tools during the past week. The discount remains at 60 per cent.

FIREBRICKS.—The demand for these continues fair. Both Scotch and English cements are quoted lower this week. Scotch is now selling at $17 to $22, and English at $16 to $22 per 1,000.

CEMENT.—The market is quiet. German, English and American cements have been reduced in price by 10c. per barrel. Belgian is unchanged. We quote: German cement, $2.20 to $2.30; English,

More **Elastilite Varnish**

sold up to date this year than during any previous twelve months since we introduced it. "Reason?" There never has been, there is not now, and we doubt if there ever will be a Varnish put up, either by domestic or foreign makers, equal to ELASTILITE for the same money.

In tins only, from ½-pints to 1 gallon.

MANUFACTURED ONLY BY

The Imperial Varnish & Color Co. LIMITED

Toronto, Ont., Canada.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

The very best reason we can offer for asking you to correspond with us concerning the handling of

"Ark Brand" Paint

is because we have the greater part of Canada covered by our representatives, and they all report to us as having had a very successful year, and perfectly satisfied with the quality of our goods.

If we have not as yet a representative in your town, drop us a card, and we will arrange with you.

"ARK BRAND" IS NOT CHEAP.
"ARK BRAND" IS GOOD VALUE.

THE FRANCIS-FROST C°. Limited

Canadian Distributing Agents for Grippin's Crack Filler.

$2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex cars.

METALS.

The metal market has been fairly steady all round. The feeling in pig tin continues very strong, and the primary market is advancing. Some changes in the prices of steel have been made, machinery steel having been reduced 10c. and tire steel raised 5c. Toecalk steel is quoted 5c. higher by one house.

PIG IRON.—The market is still firm at prices quoted. Canadian sells for $18.50 to $19, and Summerlee at $21.50 to $22.

BAR IRON.—There is a very good demand for this. Some houses have experienced difficulty in obtaining some of the smaller sizes of bar iron. Merchants' bar is worth $2 and horseshoe iron, $2.20.

BLACK SHEETS.—The demand keeps up, and the market is active. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—A fair business is doing in this line. Quotations are: No. 28, Queen's Head, $4.40; Apollo, 10½ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots, 10c. extra.

INGOT COPPER.—The demand is moderate. The market is quite firm, but no change in the price has been made. Copper is worth 14c.

INGOT TIN.—This market is firmer, although there is but little demand for tin. The foreign markets are advancing. Straits sells for 33c.

PIG LEAD.—Trade is quiet, and the price remains at $3.25.

LEAD PIPE.—The demand for this keeps up well. Composition waste sells for 7½c., and ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—The market continues fairly active, no quotable change having been made. Our quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ¼, $4.35; ⅜, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ¼, $5.35; ⅜, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There is not much doing. We quote: Charcoal, $4.75 to $5.25 per box, and cokes, $4.25 per box.

CANADA PLATE.—There has been a good demand for Canada plate at the prices quoted. The market retains all its firmness. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—The market is active. Machinery steel has been reduced 10c. Tire steel is up 5c. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Trade is fair and prices unchanged. Quotations follow: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The market is not as active. Our quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c., and Leonard's, 7½c.

TERNE PLATES.—There is little doing. The price remains at $7.75 to $8.

COIL CHAIN.—Trade is only fair. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The market is still quiet and unchanged. The price is $5.85 to $6.25.

ANTIMONY.—There is little doing. We quote 10c.

ZINC SPELTER.—The price of spelter is still 5c., with not much doing.

SOLDER.—This is still going well at unchanged prices. Wire solder, 20c.; and bar, 18c.

PAINTS AND OILS.

Notwithstanding that jobbers were averse to making a higher price for linseed oil it was felt that such an action was absolutely necessary in view of the continued scarcity and active inquiry. Another cent has accordingly been added to the price, making the price of raw 82c., and of boiled, 85c. The delayed shipments have caused much inconvenience. Several of the April shipments have not yet arrived, but are reported on the way. Turpentine, at last reports,

was unchanged in the primary markets. The price has been fluctuating around the figures we quote, but no marked change either way resulted. Paris green is in exceptional demand, and makers state that higher prices may be asked at any time. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 82c.; boiled, 85c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Trade in general has been fairly good during the week, and deliveries have somewhat increased. Heavy copper is now being bought at ½c. reduction, and lead is also quoted lower—about ¾c. Rubber took a sudden advance of ¼c. during the week, and for a time it was expected that further advances were to follow, but the price has come back to the original figure since. Quotations follow : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $16 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

GLASS.

Several large shipments of glass have been received, and stocks in wholesale hands are fairly large. There is very little demand, however. Our quotations are as follows : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

There is a good demand for beef hides, and prices have been well maintained. The market has not changed materially in any line. Our quotations are as follows : No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. No. 1 calfskins, 12c.; sheep skins, 70c.; lambskins, 15 to 20c. per lb.

MONTREAL NOTES.

Linseed oil is 1c. higher.

Machinery steel is 10c. lower.

German, English and American cement is 10c. lower.

Firebricks, Scotch and English, have been reduced.

Heavy scrap copper and scrap lead are lower in price.

ONTARIO MARKETS.

Toronto, May 30, 1902.

HARDWARE.

BUSINESS shows quite a revival this week, and the month is going out with trade a great deal more active than it was when it came in. The increased activity is largely due to the sorting-up demand which has sprung up. One of the features of the trade is the scarcity of lawn mowers, spring hinges and poultry netting, all of which are wanted in larger quantities than the manufacturers are able to supply. There have been very few changes in prices. In fact, about the only one worthy of special note is an advance of 12½ per cent. in the price of harvest whips. Quite a good trade is being done in barb wire. In wire nails the demand is fair. Business in bolts is still decidedly active. Rivets are in fair demand, and a good business is being done in screws.

BARB WIRE.—A large quantity of barb wire is going out. Quotations follow : F.o.b. Cleveland, $2.27½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—Business is moderate. Quotations follow : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—A good business is being done in oiled and annealed wire. We quote base price : $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is the usual steady trade being done. Discount, 22½ per cent.

WIRE NAILS.—A nice steady sorting-up trade is being done, and prices are steady and unchanged. Quotations are : $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Trade is still only of a limited character. Base price is $2.45 per keg with an allowance of 7½c. per keg on carlots.

RETURNED
MAR 18 1904
Book 18
Page 11
Lib.

HORSE NAILS.—Very little doing. Discounts are : "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2 3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—Trade continues light. We quote as follows f.o.b. Toronto : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—Trade during the past week has been active and prices steady and unchanged. Discounts are : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Trade is fairly good. We quote : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Stocks of bolts in the wholesale houses are light and in some kinds there is a scarcity. The demand is active. We quote: Carriage bolts, common ($1.00 list), 50 per cent. ; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS. There is a brisk movement, but there is still a scarcity of doors, and common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows : Walnut, stained, 3-in. style, $6.80 per dozen : stained, yellow, $7 ; natural color, oil finish, $8.15 ; 4-in. style, 20c. extra per dozen. Windows : No. 0, $1.60 ; No. 1, $1.70 ; No. 2, $1.95 ; No. 3, $2.10 ; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—The demand is good. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—There is a small sorting-up trade being done. Discount, 40 and 5 per cent.

ROPE.—Business is moderate. The hemp market is dull and slightly easier. Quotations are as follows: Pure manila, 16c.; British manila, 11½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—The demand is light and prices unchanged. We quote: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—The demand is fair. Eavetrough is quoted at $3.10 per 100 ft. for 10-in., and conductor pipe at $4 for 3-in. and $5.25 for 4-in.

HARVEST TOOLS.—Trade keeps up active in harvest tools. Discount, 60 per cent.

BUILDING PAPER.—Business is still fairly large. We quote as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—The demand is active and difficulty is still being experienced in filling orders. The discount is 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—The manufacturers of harvest whips have advanced their prices 12½ per cent.

POULTRY NETTING.—The demand continues active and the manufacturers are from two weeks to two months behind with their orders. The consumption of poultry netting this season has been larger than anticipated.

TINWARE AND ENAMELLED WARE.—Business is fair. Discount, 40 per cent.

SPORTING GOODS.—There is not much doing for immediate shipment, but a good many orders are being placed for fall delivery in loaded shells, guns and rifles.

CEMENT.—The demand is becoming heavier and the indications are for a busy season. The strength in the market still continues. We quote: Canadian Portland, $2 to $2.85; Canadian hydraulic, $1.35 to $1.60; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex cars.

METALS.

Iron and steel continue strong. Copper and tin are rather easier. Business is fairly good in all lines of metals.

PIG IRON.—The market is still active and strong. We still quote No. 2 foundry at $21 on track Toronto.

BAR IRON.—The demand keeps fair with prices firm. We quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The steel market continues strong and the demand in excess of the supply. Quotations follow: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS.—Stocks are light and the demand is rather in excess of the supply. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Prices in Great Britain are firm. Business, locally, is quiet. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—The supply is rather inadequate while the demand is good. We quote in case lots as follows: Queen's Head, $4.50 for 28 gauge; American, $4.10 for 29 gauge; Bell brand, $4.20 for 28 gauge.

TIN.—A fair business is being done in small lots. The outside markets are rather easy. Locally, quotations are unchanged at $33 to $34 per 100 lb.

TINPLATES.—The demand is good. We quote 1 C, 14 x 20, at $4.25.

TINNED SHEETS.—Trade continues fairly good and prices are fairly steady. We quote: 70 x 30, up to 24 gauge, $8; ditto, up to 26 gauge, $8.50.

COPPER.—There is a heavy demand this week for ingot copper. In sheet copper a fair business is being done. We quote ingots at $14 per 100 lb., and sheet copper at $22 to $23.

BRASS.—A moderate amount of business is being done. Discount, 15 per cent.

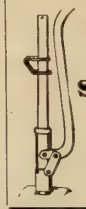
PIG LEAD.—Trade is quiet. We quote $3.50 to $3.75 for pig and $5 for bar lead.

IRON PIPE.—Trade is fair and prices are the same as they were. We quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

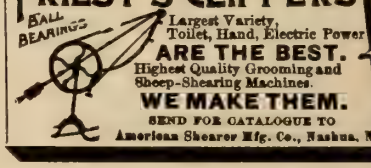
ZINC SPELTER.—Business is quiet. We quote $5.50 to $6.

ZINC SHEETS.—There is a good demand for small lots. We quote cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER.—A good business is being done. We quote: Half-and-half, guaranteed, 20c.; do. commercial, 19½c.; refined, 19c.; wiping, 18½c.



ANTIMONY.—Trade is fairly active. We quote $19.50 per 100 lb.



PAINTS AND OILS.

Business this week continues brisk, although the holidays and elections have had a quieting effect. The prices in all lines remain just as they were before. Raw and boiled linseed oils are still strong, and the scarcity thereof is still felt. The prices of turpentine are steady, and the stocks on hand are fair. The demand for white leads in oil and mixed paints is heavy this spring. Many houses report that, so far, trade this season is much ahead of that for the same time a year ago. A number of repeat orders are being received, and paint houses seem to be carrying heavier stocks this year than before. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pack-

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Trade continues moderate. Nothing yet has been heard of the glass import orders from Europe. They are due to arrive at this time, but glass merchants do not expect any difficulty will be experienced like that of last season in obtaining their glass supplies. The stocks on hand now are sufficient to last for some time. We quote : Under 26 in., $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

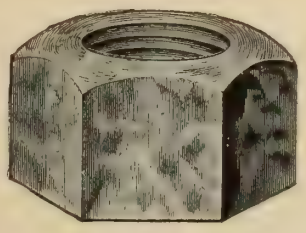
Wood
RASPS

Our celebrated Elastic Tooth Rasp is the result of much study and many years' experimenting, and we are now enabled to supply, from any of our seven factories, Rasps with **SHARP, TOUGH TEETH,** for Horseshoers, Boot and Shoe Manufacturers, Cabinet and Wood Workers.



We guarantee the material, workmanship and durability of these goods.

For sale everywhere. May be obtained from prominent hardware merchants.

NICHOLSON'S MAKE

Nicholson File Co.,

DOMINION WORKS.
PORT HOPE, ONT.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

OLD MATERIAL.

The demand continues fair and the prices of lead and No. 1 wrought iron have weakened a little. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton ; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

COAL.

The situation at the coal mines is unchanged. The soft coal miners are reported as likely to join the strikers. The advance in the local retail price of hard coal has had the effect of causing it to be bought in only limited quantities. We quote prices at international bridges: Grate, $4.75 per gross ton ; egg, stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

There has been no change in prices. Trade is fair. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Harvest whips are 12½ per cent. higher.

PORT ARTHUR BOARD OF TRADE

The annual meeting of the Port Arthur, Ont., Board of Trade resulted in the following officers being elected :

President—R. Vigars.
Vice-President—Geo. Clavet.
Sec.-Treas.—H. A. McKibbin.
Council—Geo. F. Hourigan, Geo. Hodder, Geo. T. Marks, J. G. Ashforth, J. G. King, I. L. Matthews, D. F. Burk, J. M. Neelin, Col. Ray, J. H. Woodside, J. L. Meikle, W. H. Nelson.

Two members, President Vigars and D. F. Burk, were appointed delegates to attend the conference of the Boards of Trade of the Dominion that will be held in Toronto on June, 5 and 6.

A committee on resolutions was instructed to draw up a resolution urging the necessity of dredging the harbor and the adoption of a suitable plan for such work. The committee will also forward a resolution to the proper authorities asking that a fish hatchery be established on Thunder Bay for which an appropriation had been made.

"The Road" and How to Make it a Success.

By . . .
H. A. Leak,
of Montreal.

THERE is at least one occupation not overdone, offering openings and opportunities; one line that expands with every new invention, every increase of population, offering many chances to young men possessing common, practical sense, honesty and energy, seeking employment. It is labor thoroughly organized, which never had a strike, and never as a body and rarely as individuals complains against employers; indeed, so allied are the interests of employer and employe that they work as one. I refer to the commercial travelers.

"The road" pays better average salaries than do most of the professions or trades. Over 300,000 men now earn salaries ranging from $800 to $10,000 a year as commercial travelers, and there is room for thousands more.

"The road" is a position of trust; travelmen represent millions of capital, and wield a significant, though apparently silent, moral, commercial and political influence.

It is a work that wins on merit alone, prohibiting favoritism; a firm may favor a relative or a friend for a soft berth in the office, but the man put on the road is employed, paid and advanced solely on the basis of ability. Among the patrons of the institution he represents, "the drummer" is "the house." He arbitrates differences, adjusts affairs of immediate concern that require quick decision, handles money and makes contracts. As a final course in a young man's education, "the road" gives a good finishing touch. It teaches him human nature, opens the way to higher positions, elevates and broadens. Many of the heads of the most successful mercantile and manufacturing concerns came from "the road." Books teach and imagination often leads conception astray, leaving learning frail as his theory until corrected and strengthened by fact and realism. Commercial travel is practical, and its routes include nearly all the territory of fact. In the Pullman, the waiting-room and the hotel discussions are open, introductions are rare, and mistaken assertions are quickly combated. "The road" is a school.

PRACTICAL SUGGESTIONS.

How many take the interest in their work that they do in a game of chess or billiards? Those who do, succeed. When an occupation becomes labor, it is quite certain to be a failure. There is no more work about sawing wood than playing baseball; no more work about keeping books than in playing whist; it is just as easy to get interested in sawing wood or keeping books as in playing baseball or whist. There is an opposing force in all work as in all games, the antagonistic power that makes the game worth playing or the work worth doing. In the game of both work and play there are chances to win. Everyone does not enjoy the game of baseball; everyone does not enjoy the game of sawing wood; but nearly all can become interested in some game or work.

The field for work on the road is broad. The first subdivisions are mechanical, scientific, professional and literary, which are again subdivided and resubdivided minutely, offering many games of work to select from. There is room in any of the

Mr. H. A. Leak.

above-named branches of travel for those who will make their business a study.

At this day the great commerce of the United States is largely transacted through travelling representatives. Everything grown or produced requires salesmen at once or finally when it is hewn, woven, carved, cut, dried, boxed, canned, tanned, planed, molded or turned to make it marketable through the medium of the man on the road. Salesmen are wanted every day, everywhere. Hundreds of firms send out men unfamiliar with the business they represent because they cannot get trained talent. Remuneration is good, and there is no investment of capital. Expenses are paid and salaries can be profitably invested, thus increasing earnings. On trains there is ample time to take up some study that will afford profit and pleasure. A young man who, in the past three years, has acquired a fair knowledge of Spanish by studying between stations on trains, informs me that his employers will send him to Mexico, where they desire to extend their trade, and will handsomely advance his salary.

UNNECESSARY TALKING AND LYING.

The first merchant I ever called on was a druggist in a small Illinois village. I did a great deal of unnecessary talking and some unnecessary lying. I told of where I had travelled and of large orders I had taken, endeavoring to mask, if possible, the fact that I was then taking my first order. The druggist asked, now and then, some question that called out another lie as a protection to what I had said; I argued with myself that my deceptions were not harmful because they did not misrepresent the goods I offered, but, as I thought, covered my newness. After an hour, Mr. Merchant interrupted me by saying: "Young man, I am going to give you an order. I want to help you because this is your first trip. When you go to the next man tell him frankly that you have just started out, because, if he should not know the honor of your house as well as I, he might judge them by what you tell of your travels." His polite manner of telling me that I would better tell the truth at first nettled me; but, after collecting my thoughts, I admitted to him that I was not only making my "maiden trip," but that he was the first merchant I ever called on, and his was the first order I ever sold.

Since then I have had twelve years' experience as a drummer and know that even in insignificant utterances it pays to be honest.

TRUTH IS MONEY AT INTEREST.

There are times when money seems to be lost by telling the truth, but I believe it is only out drawing interest. Honesty is the most essential quality to build up a trade on the road. Imagine a merchant wanting to become the patron of a representative that misrepresents.

I had been a traveller more than two years before I knew that I was wasting much energy by superfluous talk. A Galveston, Texas, man one day gave me audience; I told him of the merit of my goods, the standing of my house. I talked and talked and talked, often repeating the points I had made. He listened calmly and not without apparent interest. Finally I could think of nothing else to say, but hesitated to cease my argument, for I seemed to be gradually bringing my man to the buying point; but there seemed to be an end to even such a plentiful article as talk, and I said: "Well, that's all; I don't know anything else to say."

"I have been waiting for thirty minutes," he replied, "to tell you that I can use some of your goods." He said this with a touch of sarcasm that taught me another lesson. It is not the salesman who does the most

THE COLUMBIAN HARDWARE COMPANY

CLEVELAND, O.

one who studies all the good points in his line, knows them by heart, and says what he has to say briefly, and with an emphasis that is convincing. If it is only a simple "Yes, sir," or "No, sir," say it in capital letters.

APPEARANCE IS OF GREAT CONSEQUENCE.

Almost any man can be a gentleman, and a gentleman can sell goods. A dealer or buyer may be uncouth, but he respects a gentleman, and will give one both attention and patronage, in preference to the vulgar. Vulgarity is the lowest form of familiarity that a salesman can indulge in with his trade. The salesman who appeals to buyers by telling smutty stories under the delusion that he is on close terms with them, will find that some gentlemanly competitor who commands the respect of his customer, will slip in and get the order while he goes on with his questionable yarns, and will some day awake to find that he is telling the stories and the other fellow is doing the business

One of the most imprudent errors a salesman can make is to ask his customers to have a drink. A buyer knows that salesmen do not ask the hotel clerk, the barber or the banker they patronize to have a drink, and he can only judge that your treating in his particular case is to obligate him. A good buyer cannot be bought by a drink or a cigar, and it is often an insult to him. Tips should be confined to waiters and porters and paid in cash, not drinks; likewise a commercial traveller should decline drinks if not the more modest cigars, from his customers. Social favors are the beginning of familiarities that soon impress the merchant with the idea that he knows as much as the traveller about his wares; and, for the same reason that he would not engage a lawyer or a doctor that knew no more than himself, he will deal with commercial men who keep close to the business shore and who know the value of reserve.

Neatness in personal appearance must not be overlooked by the commercial man who would succeed. Clothes that look well, cuffs and collars that are clean, shoes well polished and hair well trimmed emphasize all the other necessary qualities that contribute to success. An honest man looks more honest, and a well put sentence seems better put when accompanied by proper clothes.

THE TRAVELLER SHOULD READ.

A travelling man should obtain works pertaining to the line he represents and post himself better than his trade. If possible, go through the fields where the raw goods are grown; the factories where made, and interview the laborer who helps to produce his stock, mastering the small matters and posting himself on the differences and details.

Many a sale has been lost because the salesman could not give the best freight rate or route for his goods at a moment's notice.

Salesmen are in demand. It is not difficult to sell goods. To begin, choose your line, put a value on your services, then go to some good company and sell them your ability. If you offer your services well, you will not go far before someone will conclude that you can offer your goods well also.

I watched my employer recently say "No," to a young man, an applicant for a position on the road. "No," said he, "we have applicants every day." The young man, calmly surveying a United States map on the wall, pointed to it and said: "Is there no place in all that territory where you want to extend your business or increase it?" "Oh, yes," replied my employer, "we always want to increase business." "That is why I called; I came to increase your business," the young man said, with a gentlemanly audacity by which he made his first sale. He sold his ability. Later, my employer remarked to me: "We have room for a dozen young fellows like that."

EXPORT TRADE IN BUSY TIMES.

An Interview with Mr. R. Munro, President of the Canadian Manufacturers' Association.

IN conversation with a representative of HARDWARE AND METAL, Mr. Robt. Munro, president of the Canadian Manufacturers' Association, dealt with the subject of trade with foreign markets in the following words:

"There are some men anong our manufacturers who say that we are too busy in Canada with our home trade to give attention to any business from abroad. It is quite true that the present feeling of expansion is bearing such good fruit that our factories ar all well employed. In fact, the growth of our factories has not been more rapid than the growth of our home trade. Now, any manufacturer who is so content with present conditions that he is indifferent to foreign business had better let the latter alone. Export business, to be done at all successfully, must be done carefully and well. The indifferent exporter, therefore, does only harm to the business expectation of his country with little or no correspond ing good to himself.

"The consideration remains, however, what of the trade of other British possessions who are willing to trade with us and whose trade we might indeed have by preference over foreign countries?

"In the West Indies, for example, the United States manufacturer is taking advantage of his more frequent shipping opportunities, and works these islands for all they are worth. United States goods are becoming strongly entrenched in these markets, and the longer we delay in asserting ourselves the more difficult will it be to obtain a footing, not to speak of superseding the other. The same is true in our own Yukon, in Australia, New Zealand and South Africa. Even in Great Britain are they not pressing the sale of lines which Canada should be equally able to supply?

"But you ask what need we care so long as we have enough to do at home? That's the main point I wish to suggest to our manufacturers. We look for good times, growing times even, for some years to come. But no man who has been long in business looks for perpetual activity, no matter how favorable the country's position is. The present is certainly a time to make the most of, but we must make up our minds that bad harvests, dull markets for our products abroad, and other causes will arise to make the home trade smaller in volume and less safe. How handy will it be then if we have our roots established in other markets which may be in better shape than our own, and where, being known, we will be sure of some business to help out the limited demands at home.

"Remember, Mr. Reporter, I am not advocating the example of Dickens' character, whose name I cannot recall, who was busy writing about the conversion of the heathen while her own children were running about torn and dirty. I advocate doing our home trade well. Keeping abreast of anything that competes with us, but I point out that other good markets are inviting us; that our Imperial connection gives us a priority in these markets; that while we linger others are pushing forward their exports, while of Canada it may be said, as Mr. Goodwillie said to me in Trinidad, 'We would most gladly deal with Canada. We are proud of Canada, but we do not know what she has to offer, as none of your travellers come this way.'"

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week building permits have been granted from the office of the Toronto City Commissioner to the following : A. H. Hoover, for a one-storey verandah on 163 Jameson avenue, for $700 ; W. H. Grant, for a one-storey verandah on 157 Madison avenue, for $180 ; Eli A. Bowlear, for a two-storey roughcast addition to dwelling on 125 Shaw street, for $200 ; W. H. Essery, for alterations to factory at the corner of Shepard and Richmond streets, for $500 ; Mrs. Doyle, for three brick roughcast one-storey and mansard-roof dwellings on the north-east corner of Claremont street and Crocker avenue, for $3,000 ; Dominion Stained Glass Co., for a two-storey brick and stone factory on 34 Richmond street east, for $2,200 ; Mrs. Arnold, for a two-storey roughcast dwelling on Macdonell avenue, for $550 ; Separate School Board, for a two-storey brick and stone school on the east side of Close avenue, near King street, for $10,000 ; J. F. Walsh, for a one-storey brick church on a stone foundation on the north-east corner of King street and Close avenue, for $14,000 ; Toronto Silver Plate Co., Limited, for the erection of an additional storey to factory in rear of 570 King street west, for $300 ; S. H. Knox, for a new store front of wood and glass at 182 and 184 Yonge street, for $300 ; A. D. Adamson, for alterations and a brick addition to dwelling on Queen street, near Sorauren avenue, for $1,500 ; T. Bedley, for a two-storey brick and roughcast dwelling on the south side of Gerrard street, near Jones avenue, for $1,600 ; H. Greisman, for a two storey brick dwelling and addition to 1 and 3 Centre avenue, for $1,000 ; Wm. E. Weale, for a two-storey brick and stone dwelling on 442 St. Clarens avenue, for $1,800 ; J. Trancle Armand, for a one-storey workshop on the northeast corner of Yonge and Ann streets, for $570 ; The Union Trust Co., for a seven-storey stone, brick and steel apartment house near Caer Howell street on the west side of University avenue, for $150,000; Dominion Bank, for a three-storey stone and brick addition to building on the northeast corner of Dundas and Queen streets, for $500 ; Elizabeth H. Wages, for a concrete cellar under 658 Ossington avenue, for $200 ; G. F. Watson, for a brick and stone verandah on 161 Jameson avenue, for $300 ; J. W. Russell, for a wood verandah on 276 and 278 Crawford street, for $500 ; Mrs. A. Muir, for a one-storey roughcast addition to 2 Ruskin avenue, for $300 ; J. R. Lee, for a one-storey brick addition for dwelling purposes to 310 Queen street west, for $400 ; W. B. Charlton, for a pair of brick and plaster two-storey dwellings on the north side of Victor avenue, near Logan avenue, for $2,500 ; Kane Bros., for three pairs of two-storey brick dwellings on the south side of College street, near Brock avenue, for $12,000 ; McGregor & McIntyre, for a one-storey open shed, with roof set up on iron columns and beams, on 71 Pearl street, for $225.

ALMOST SETTLED.

By all appearances the strike of the Montreal plumbers is nearing a settlement. It is stated that out of 125 master plumbers only 7 now hold out. The others have agreed to the demands of the journeymen, and their employes have returned to work. The new wage scale is now in general use ; by it the standard rate is 28c. per hour, with overtime and holidays extra, nine hours being considered a day's work. It is expected that the other employes will sign the agreement this week.

SOME BUILDING NOTES.

Wm. Barnard is building a house at London, Ont.

Contractor Wyatt is erecting a residence at Melita, Man.

John McCutcheon is building a store at Chilliwack, B.C.

The Roman Catholics will build a church at Wallacetown, Ont.

A new Y.M.C.A. brick block may be erected at Brandon, Man.

A new Jewish synagogue will be erected on St. Urban street, Montreal.

A new block of five stores will be erected at Wallaceburg, Ont., this summer.

Tenders are being advertised for the erection of a Presbyterian church at White Lake, Manitoulin Island.

G. Jackson and J. W. Westervelt have obtained building permits for the erection of brick residences on Wellington street and Albert street, London, Ont., respectively.

BUILDING PERMITS AT OTTAWA.

DURING the week the following building permits have been granted at Ottawa : Andrew Cochran, for a frame dwelling on Third avenue, for $500 ; W. H. Taylor, for alterations to dwelling on McDougal avenue, for $175 ; Bishop Hamilton, for a brick dwelling on Wilbrod street, for $7,000 ; Charles Emery, for a solid brick dwelling on Cartier street, for $6,000 ; W. H. Davis, for a stone dwelling on Goulbourne avenue, for $3,000; Thomas Askwith, for three brick stores and dwellings on Book street, for $11,000 ; J. J. Gormully, for alterations to dwelling on Daly avenue, for $1,000 ; R. J. Cowie, for a solid brick dwelling on James street, for $2,600 ; R. J. Cowie, for a solid brick dwelling on Russel avenue, for $3,700 ; Joseph A. Fryon, for a brick veneered dwelling on Freel street, for $1,200 ; Mr. Lavergne, for a frame dwelling on Willow street, for $450 ; A. E. Shaver, for three frame dwellings on Bay street, for $3,000 ; Andrew Larocque, for a double brick veneered house on Bridge street, for $2,000 ; L. K. Ade, for a brick veneered dwelling on Waverley street, for $1,000 ; and Albert Dunn, for two frame tenements on Nelson street, for $2,500.

PLUMBING AND HEATING NOTES.

Kyle & Aitchison, plumbers, Montreal, have registered.

Listowel, Ont., is preparing to construct a sewage system for the town.

The plumbing business carried on at Chatham, N.B., by Pollock & Doak, has been closed. Pollock is absent.

Guest & Co., plumbers, have secured a large order for aluminum gas tips from Philip Gies, plumber, Berlin, Ont.

Purdy, Mansell & Co., plumbers, Toronto, have secured contracts for the plumbing and heating of the new wing of the Royal Muskoka Hotel, Muskoka ; the plumbing and heating of a house on South Drive, Rosedale, for George R. Copping ; the plumbing on a house on Manning avenue, for Mr. Howard ; the plumbing on two houses on Berkeley street, for Mr. Murray ; the plumbing of a house on 15 Ross street, for Thomas G. Bright ; the plumbing and heating of a house on 106 Madison avenue, for C. A. Dinnick, and the installing of an automatic fire protection equipment, Prinkler system, on the premises of The American Cereal Co., Peterboro', Ont.

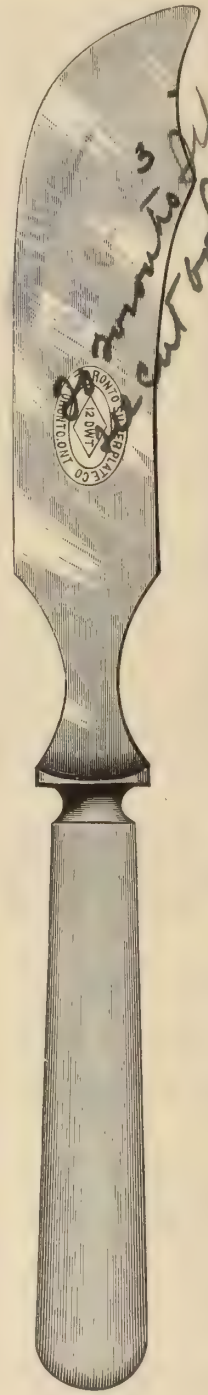
What It Means:—

The Gothic or block letter "**C**" which we have registered, and used as our Trade Mark for over a quarter of a century, was selected because it is the first letter of the word Canada and of the name of our Company.

It is the only trade mark used in Canada for a brand of Horse Nails which has been imitated. We accept this as a compliment paid to our brand, and an acknowledgement that the makers who sold them thought it better than their own. They were right, they are better. **They are the best.**



The Canadian trade for the past thirty-seven years, or since we were established in 1865, also think so, and buy more of them than any other two brands combined. We could of course, increase our business as they are trying to do, at the expense of all profit returns, or reducing our standard to the level of theirs. We shall do neither. We propose to make the best Horse Nails we know how, and rely upon our friends who want the best Nails made in the best way, having the best name, and the best to sell, to continue to give us their orders either direct or through any wholesale dealer with whom they do business.

In ordering always please specify particularly for the "**C**" brand made by us, and refuse to accept other brands if sent as substitutes.

Canada Horse Nail Company,

Montreal.

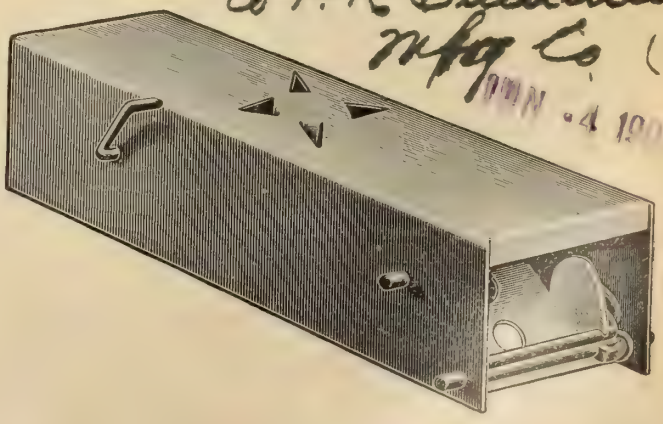
JUN -4 1902



A MOUSE

is a little thing, but it can make a lot of trouble.

THE DUPLEX TRAP

is a small affair, but it will do a lot of work. Moreover, it is a mouse catcher, and not a finger catcher. Simply pressing the lever **on the outside** sets it. Next morning you press the same lever and the mouse drops out. You don't have to touch the animal.

P. R. Cumming Mfg Co (2)
JUN -4 1902

Made only by

The P. R. Cumming Mfg. Co., Limited

Toronto.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

THE Ingersoll Metallic Manufacturing Co., Limited, founders and manufacturers of bedsteads, Ingersoll, Ont., have assigned to J. E. Ferguson.

Joseph Lavarie, sawmill, etc., St. Antoine Abbe, Que., has compromised at 65c. on the dollar.

Jas. Poirier, general merchant, Avignon, Que., is offering to compromise at 50c. on the dollar.

L. P. Garon, general merchant, St. Michel, Que., has compromised at 55c. on the dollar.

Mrs. Sarah Smith, general merchant and hotel, Metapedia, Que., has assigned to V. E. Paradis.

The creditors of Max Rosenstein, general merchant, Barachois de Malbaie, Que., have held a meeting.

Francois Provincial, general merchant, St. Gervais, Que., is offering to compromise at 60c. on the dollar.

T. W. Johns has been appointed liquidator of Kinney, Haley Manufacturing Co., Limited, planing mill, Yarmouth, N.S.

PARTNERSHIPS FORMED AND DISSOLVED.

Delahey Bros., general merchants and grain dealers, Cobden, Ont., have dissolved and the business is continued by James A. Delahey with style unchanged.

SALES MADE AND PENDING.

The estate of G. B. Murphy, saddler, Portage Du Fort, Que., is to be sold.

The stock of H. Cairns & Co., general merchants, Sawyerville, Que., has been sold.

The assets of The Automatic Steam Cooker Co., Toronto, are advertised for sale.

The assets of Joseph Bergeron, general merchant, St. Anne Du Sault, Que., are to be sold.

The stock, etc., of Wm. C. Wilson & Co., Limited, mill supplies, etc., Toronto, has been sold.

CHANGES.

Perreault & Gervais, contractors, Montreal, have registered.

H. Lasselle, painter, Russell, Ont., is retiring from business.

Denis Dufort has registered for H. Dufort, builder, etc., Montreal.

chants, etc., Vancouver, B.C., are succeeded by Mitchell, Russell & Co.

Charles E. Stewart, blacksmith, Orford, N.S., is succeeded by D. Keith.

Henderson & Potts, paint manufacturers, Montreal, have registered.

Stuart Watkins, hardware merchant, Toronto, has sold out to H. Chisholm.

Frank Ramey, bicycle dealer, Bridgewater, N.S., is succeeded by Ernst & Coffill.

Bonner & Haley, grocers and provision merchants, North Sydney, C.B., are out of business.

Hough & Crowe, general merchants, Birtle, Man., have started a creamery at Solsgirth.

The Welsh Shingle Manufacturing Co., New Westminister, B.C., has sold out to Thomas Kirkpatrick.

The style of Hughes, Cooks & Co., hide and oil merchants, Montreal, will be changed on June 1 to D. B. Martin & Co.

The Capital Sand and Brick Co., Limited, and The Guyon Pressed Brick and Tile Co., Limited, Ottawa, have amalgamated, and the style is now The Dominion Supply Co.

FIRES.

D. W. Henry, general merchant, Springfield, Ont., was burned out.

James Hamilton, carriagemaker, Lindsay, Ont., has sustained loss by fire.

Thomas Mansell, agricultural implement agent, Springfield, Ont., has sustained loss by fire.

The stables of The Breithaupt Leather Co., Limited, Berlin, Ont., have been burned.

Daniel T. Eck, harnessmaker and agricultural implement agent, Springfield, Ont., was burned out.

J. S. Fairley, general merchant and dealer in lumber, Fairley, N.B., was burned out with a loss of $1,500; there was no insurance.

The Hintonburg stock of Grant Bros., hardware merchants, Ottawa and Hintonburg, Ont., was damaged by fire and water; it is partially insured.

DEATHS.

Archibald Grant, builder, Toronto, is dead.

Wm. Douglas, blacksmith, McGuigan, B.C., is dead.

E. L. Kraft, trunk and harnessmaker, Kingston, Ont., is dead.

Wm. Coxall, grocer and hardware merchant, Colborne and Napanee, Ont., is dead

J. H. Still, president of The J. H. Still Manufacturing Co., Limited, manufacturers of handles, St. Thomas, Ont., is dead.

A NEW HARDWARE STORE.

Mr. Herbert A. Couse has severed his connection as manager of E. M. Marshall, hardware merchant, etc., Sarnia, to go into business for himself there. He has secured premises in the store occupied at present by Wm. Kellett, and is putting in a complete stock of hardware. Mr. Couse has had sixteen years' experience in the hardware business, being manager for E. M. Marshall for some time, before which he was with A. Laurie. He will be joined shortly by F. M. Couse of E. M. Marshall's.

AWARDED THREE GOLD MEDALS.

The Lucas exhibit at the Charleston Exposition made a big hit and has just been awarded no less than three gold medals. All who saw the exhibit pronounce it one of the most instructive and interesting displays of paints and varnishes they had ever seen. The exhibit was located in a prominent position in the Palace of Commerce Building. It was a handsome booth, square in shape, the centre of which was occupied by a large glass cabinet, containing a full array of paints, stains and enamels of every kind, from brick paints to the finest fresco colors and artists' gold paints. Three sides of the booth were lined with contortion mirrors which afforded great pleasure and entertainment to the hundreds who visited it.

A SHOP FIXTURE.

In renewing his subscription to HARDWARE AND METAL, W. H. Johns, hardware and tinware merchant, Southampton, Ont., says: "Keep on sending it, as we consider it a shop fixture."

The reason for using Apollo galvanized iron is: it is the best iron: works easiest: makes the best job, and costs least for labor.

Wood, Vallance & Co., - - - - Hamilton.
Geo. D. Wood & Co., - - - - Winnipeg.

CURRENT MARKET QUOTATIONS.

May 30, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

Progress

Twenty-five years ago we commenced making Tarred Paper in Montreal, using a hand-power machine, with a daily output of about 100 rolls. To-day we have Paper Mills at Portneuf and St. Bazile; Factories at Toronto, Montreal and Halifax in which we are running **six** Steam Power Tarring Machines, **three** Machines for making Wire Edged Ready Roofing, and **five** Stills for the manufacture of Roofing Pitch.

Our daily capacity is **fifteen** tons Dry Paper, **two thousand** rolls Tarred Paper, **eighteen hundred** rolls Wire Edged Ready Roofing and **twenty** tons Roofing Pitch.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

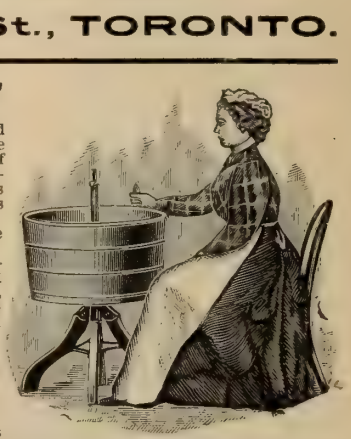
Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.



Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

This cut illustrates the latest and best machine for washing clothes yet invented

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."

It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed.

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

THE TRANSPORTATION QUESTION IN BRITISH COLUMBIA.

THE business men of Vancouver and Victoria have recently been somewhat agitated over the question of transportation of merchandise to the Yukon. For some time an arrangement has been in force whereby United States vessels from such ports as Seattle have been permitted to call at Vancouver and Victoria and carry freight between those ports and other Canadian ports via United States ports. The object of this was, of course, to give the merchants of Vancouver and Victoria the facilities to reach the Yukon with their merchandise

The present agitation has for its object the discontinuance of these privileges, it being felt that the steamship companies on the Coast were injuriously affected.

Recently the Boards of Trade of Vancouver and Victoria held meetings to discuss this question, and in both instances resolutions were passed opposing any change in the present conditions, at any rate until such transportation facilities are assured that will permit of the carrying trade being confined to Canadian vessels without injury being done to the commercial interests of the Province.

In view of the fact that no similar courtesies are extended by the United States Government to Canadian vessels, it is distasteful to most Canadians to allow our neighbors privileges which they deny us. At the same time, however, it is no use our cutting off our nose to spite our face.

To allow the United States vessels continuance of the privileges in regard to the carrying of trade to the Yukon no doubt means some loss to the vessel owners on the Coast. But the question is, whether by removing what may be termed this disability, a still greater would not be imposed upon the merchants in British Columbia who are catering to the Yukon trade. Of this the merchants are, no doubt, the best judges.

Unquestionably anything that would interfere with the transportation service would interfere with business; in fact, some of the merchants in the Yukon have already intimated to wholesale houses in Vancouver and Victoria, that if the present movement to cut off United States steamers from the carrying trade was successful they would be compelled to place their orders for merchandise in Seattle and other cities to the south instead of Victoria and Vancouver.

It is to be hoped that the resolutions which have been passed by the Boards of Trade of Victoria and Vancouver will receive that respect from the Government which is due to them.

NEW YORK TRADING - STAMP LAW.

AS our readers are well aware, the question as to the legality of anti-trading stamp legislation has been a live one for some time, both in the United States and Canada. At times the judgments of the courts are in favor of the anti-trading stamp laws, while now and again the decisions are adverse. In Ontario a few weeks ago the court decided that the Act passed by the Ontario Legislature a year ago was quite within the powers of the Legislature. Now comes the report of a judgment by the Appellate Court of New York, which declares ultra vires an Act by the Legislature of that State. The ruling of the court was to the effect that the Legislature had no power to prohibit the giving of trading stamps in the manner customary.

Although the courts are not at all unanimous in their decisions in regard to the matter of anti-trading stamp legislation, one thing is certain, the use of trading stamps is gradually being discontinued, so that the objects that are being sought by anti-trading stamp legislation are being accomplished at any rate.

TRADE QUESTIONS AT THE BOARDS OF TRADE CONFERENCE.

THE Conference of the various Boards of Trade throughout Canada, which met in Toronto three days this week, fulfilled all that was expected of it. There were some 140 delegates present, and the manner in which they have disposed of the business, which has so far come before the Conference, has been done in a way that only practical and intelligent business men could dispose of it. To members of Parliament who were present it must have been somewhat of a revelation.

Instead of picking each other to pieces and impugning motives, the members of the Conference criticized only the questions which were up for discussion. While several questions were disposed of none were done so in a perfunctory manner, due attention being given to each.

Most of the time of the first day was naturally given to the question of trade relations between Canada and Great Britain. This important question was introduced by Mr. George E. Drummond, of the Montreal Board of Trade, and the resolution to which he spoke maintained that Great Britain could best serve the interests of the Empire by giving the products of her colonies a preference in her markets as against the products of foreign countries; it being believed that it would stimulate trade and develop colonial enterprise. He pointed out that at present Great Britain gets only 16⅔ per cent. of her food supplies from her colonies, and 83⅓ per cent. from foreign countries.

A number of gentlemen spoke to this resolution, and it was eventually carried with the clause added which was recently passed by the Toronto Board of Trade, asking for the British Government to appoint a commission, composed of representatives of Great Britain and the colonies, to investigate trade conditions and to suggest such preferential treatment of imports from the various parts of the Empire as would be calculated to insure the fullest benefits.

Another important trade question which came up was with regard to the relations between Germany and Canada. As our readers are well aware, Germany has denied Canada the privileges of the minimum tariff on account of her influence in securing the abrogation of the favored nation treaties in 1897. The subject was brought up by a representative of the Kingston Board of Trade and demanded that Canada impose a countervailing duty on imports from Germany.

In the discussion which followed it was thought that this motion was a little drastic, and might result in injury to Canadian firms who were doing a large business with Germany, and eventually a motion was carried asking the Dominion Government to make such alterations in the tariff upon imports from foreign countries not having reciprocal relations with this country as to secure the protection of the natural products of the manufacturers of Canada.

The question of allowing the preferential duty only on imports coming into Canada through our own ports led to a somewhat lengthy discussion. It was brought up by Mr. W. Frank Hatheway, of St. John, but finally this gentleman withdrew his motion in favor of one moved by Mr. Robt. Munro, president of the Canadian Manufacturers' Association, asking that the preference on goods arriving by United States ports be limited to 25 per cent.

Among the other resolutions passed was one asking for the removal of the embargo which now exists in Great Britain against Canadian cattle; another, asking for State owned cables from Australia to India, and South Africa, and from South Africa as well as Canada to England. Still another resolution, was one in regard to the appointment of a practical representative in London. Mr. J. D. Allan, who has given a great deal of attention to the subject, and Mr. M. C. Ellis introduced the motion which was carried without dissent. Thus is the question of the need of such an official again brought forcibly to the attention of the Dominion Government.

The important question of commercial agents came up for discussion on Thursday morning. Mr. E. V. Roy, of the Chambre de Commerce, Montreal, who introduced the subject, urged that the Federal Government should appoint commercial agents residing in the principal cities of the world, and that the Imperial Government should be requested to recognize and accredit to British possessions and foreign Governments the agents so appointed. The subject received the hearty endorsation of the Conference, and it was only proper that it should. The United States have about 300 agents abroad, and while it would not, perhaps, be possible for Canada to have that many, at any rate for years to come, it is necessary that we should greatly increase the present number. The number of the accredited Canadian agents to-day is 15, of whom six are in Great Britain.

The subject of a fast steamship service came in for a good deal of discussion. A number of resolutions were introduced. Finally a compromise resolution was adopted, which urged the Canadian representatives at the coming Colonial Conference in London to impress upon that gathering the necessity of the Mother Country and the colonies adopting a policy under which fast lines of steamships will be secured and retained for the development and control of trade between the United Kingdom and her possessions.

The Conference expressed itself in regard to trade with South Africa and Australia, and a resolution was adopted requesting the Dominion Government to consider the establishment of a cargo steam service, subsidized so much per outward voyage, calling at Cape Town and proceeding to ports in Australia.

A resolution urging the Government to readjust the tariff on imported lead products was carried unanimously.

The question of Imperial defence proved to be the chief bone of contention of the Conference, and it was found necessary to hold another session on Friday in order to further consider it. Up to the hour of going to press no decision has been arrived at.

ADVANCE IN STOVES.

An advance of 5 per cent. has been made in the price of box stoves, coal cook stoves, wood cook stoves, cottage stoves, "Globe" heaters and "Oak" stoves. In April last there was an advance of 5 per cent. in wood cook stoves, making the total appreciation in this particular kind 10 per cent.

AN EXAMPLE FOR OUR MERCHANTS

THE merchants of New York have an organization which is one of the most progressive of its kind, at any rate on this continent. In addition to devising schemes for attracting trade, the organization devotes a good deal of attention to the government of the city. The members of the organization realize that bad government affects the business of the city as well as its moral affairs. Among its latest efforts in regard to the government of the city is an investigation into the general administration of civic affairs, the result of which is shown in an interesting document that has recently been issued to the public. The report deals with the police service, fire service, lighting, etc. The cost of these different departments is not only given for New York, but for all other cities as well, while the figures supplied are made all the more interesting by diagrams showing the expenditure per capita, etc., in New York as compared with other cities enumerated.

The business men of New York have set an example in this respect which the merchants in many Canadian cities might do well to follow. We cannot expect to get good civic or good government in any other particular unless the business men take a lively interest in public affairs. If the administration of municipal, Provincial or Dominion affairs is left to the professional politicians, the business men of the country have only themselves to blame when the results are legislation inimical to the commercial interests of the country.

KOPAL

is a good old-fashioned varnish for general use that gives good wear and is satisfying to paint dealer, painter, and property owner alike.

Kopal is a well-made varnish. Kauri gum—the toughest Kauri gum—pure linseed oil, pure spirits turpentine, and a little dryer are what Kopal is made from. There's nothing else in it but the skill of the maker.

Kopal is a good selling and profitable varnish that every progressive paint dealer should have on his shelves. It's a varnish we're pushing with all the strength of our immense organization. It's a varnish that's a prime favorite with painters.

If you are not selling Kopal now, you should not delay to write us for prices and the full particulars of a plan we have for helping dealers work up a big sale on Kopal.

There's money in Kopal.

THE SHERWIN-WILLIAMS CO.

OUR TRADE WITH JAPAN.

IT is understood that the Hon. Sydney Fisher, Minister of Agriculture, is about to visit Japan for the purpose of studying trade matters in that country. It will be remembered that about five years ago Canada sent a commissioner to Japan for this very purpose. The work he did was well done, and a great deal of information was brought back which was helpful to business men in this country who desired to do business with that country. In some lines an increased trade has sprung up with Japan as a result.

It is to be hoped that the visit of the Minister of Agriculture will be productive of still greater results. For, although our trade with Japan has increased somewhat, it is still smaller than it should be.

Last year the export trade to Japan amounted to less than $189,000, but this is an increase of over $67,000 since Canada sent her last trade commissioner to that country. The chief articles in which the increases have taken place are flour, carriages and bicycles, cotton goods, fish and fish products. There are, no doubt, great openings for trade in the Orient, and it will not do for Canada to delay in devising ways and means of securing a share of it. The United States is aggressively pushing for trade in China and Japan, and if we are not to be left behind altogether it is time we were up and doing.

CYCLING REVIVAL.

For pleasure and healthful benefits there is no exercise that can surpass bicycling. It is a bracing, broadening pastime, and no other modern invention has done so much to widen the horizon of the dweller in town, city and country.

A few years ago there was such a demand for bicycles that the factories could not supply the demand. Wheels were built by all kinds of people at all kinds of cost. Many where induced to buy cheap wheels with the poorest kind of material and construction. These wheels gave little pleasure to the rider, for they were continually breaking down. As a consequence, thousands of riders soon gave up the pastime which caused them annoyance and discomfort.

A revival of cycling has come, and this year there is a strong demand for good bicycles fitted with the best equipment, including Dunlop tires. The good names before the cycling public to-day mark the "survival of the fittest," and everybody insists on the right kind of tire.

With a mount on which one is confident and undisturbed there comes that mental poise and physical ease from which real benefit is derived.

NATIONAL PLUMBERS' CONVENTION ADJOURNED.

The National Association of Master Plumbers of the Dominion have decided, with the approval of the Halifax reception committee, to postpone their convention from July 1 and 2 to August 13 and 14, when the Canadian Manufacturers' Association hold theirs.

The simultaneous meeting of the two conventions will afford additional interest and reduce considerably the cost of transportation.

"NEWMARKET" HORSE CLIPPER.

Burman & Sons, Limited, Birmingham, England, have bought the good-will, machinery and stock of Wm. Bown, Limited. Burman & Sons, Limited, make a specialty of the manufacture of horse clippers. The "Newmarket" clipper will be made exactly as before with the addition on the handles of the words, "Made by Burman & Sons, Limited, Birmingham."

MOVED TO THEIR NEW FACTORY.

The Bailey Cutlery Co., of Brantford, have moved to their large new factory, as per illustration in their advertisement in this issue.

This company began business over three years ago, but about a year ago they added scissors, hand-forged razors, butcher knives and other lines to that of shears, and they have met with such success as to require them to obtain this fine factory, so that they can take care of their already large and increasing business.

It has been their aim to manufacture only the highest grade of cutlery, and the fact that "Bailey" brand has become well-known throughout the whole Dominion proves that they have succeeded.

Their shears and scissors are so well known as to require no further mention, but they are pushing hard their "Brantford" razors and "Bailey" butcher knives, knowing that their quality will keep the trade they are getting on them.

It is gratifying to recognize that cutlery is being made in Canada, which is establishing for itself a reputation for quality. The Bailey Company is to be congratulated upon their success.

METALASTIC.

Metalastic, the paint now being so strongly advertised by The Sherwin-Williams Co., is the name for their old paint, "P. M. 5," which has been on the market for a long time, and which is well and favorably known among leading railroads, shipbuilders, construction companies, etc.

In adopting the new name "Metalastic," The Sherwin-Williams Co. were actuated by a desire to have a name for the paint that would be more distinctive than "P. M. 5," and that would instantly convey what the paint really is, an elastic metal paint. Metalastic retains all the good qualities of the old paint, with many improvements added.

Metalastic is the result of years of searching by the Sherwin-Williams Co. after ingredients that would combine perfectly and form an entirely satisfactory and rust-preventing paint. Neither carbon nor graphite alone make the best paint for metal surfaces. Each in itself is somewhat lacking in true rust preventative qualities; properly combined in right proportions they result in the right paint for the purpose.

Metalastic is a right combination of carbon, graphite and specially treated pure linseed oil. It is ground very fine, is imperviable to air or moisture, and is a true rust preventative. The company, it is said, is meeting with marked success in the sale of Metalastic.

OUTLOOK IN THE WEST.

Mr. D. Arnot, of Slocan, B. C., was in Toronto for a few days on his usual buying trip. He reports the crops in the West looking well, despite the backward season. The mines are busy and everything promises a good season's trade.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

POWER LOST IN FLYWHEELS.

THE resistance which a flywheel offers to the air may give rise in some cases to a considerable expenditure of energy. Some tests were made in the Nurnberg central station which showed this very clearly. The station is provided with two tandem compound engines of 450 horse power, direct coupled to the dynamos and working at 95 revolutions per minute. In order to equalize the running with the great variations of load which occur, a very heavy flywheel was used with arms of a channel section. It was found that these arms offered a great resistance to the air, and created a powerful draft, and so it was decided to cover the wheel with sheet iron in order to reduce the resistance and thus gain considerable power. In order to test the amount of energy lost, the dynamo was made to run as a motor and thus drove the engine and flywheel at no load. When the latter had no protecting covering it was found to absorb 13,300 watts, but when the covering was replaced it took only 9,874 watts, thus showing a gain of 3,426 watts or 5.7 horse power, this being ½ per cent. of the power of the engine. Counting the current price per kilowatt hour and a day's run of 17 hours, it was found that this represented an economy of nearly $270 annually. Another test of a similar nature was made by M. Ingliss upon a 630 horse power engine and showed an economy as high as 30 horse power or 4.8 per cent. of the engine power which was gained by properly diminishing the resistance of the flywheel.

CONTRACTS FOR MACHINERY.

The Niagara Falls Machine Co., of Niagara, Ont., have just completed the equipment of their shop. W. H. Petrie, of Toronto, received the contract for the entire order, and the work proved so satisfactory that the company expressed great pleasure with the prompt attention given them.

The Bullock Electric Co., of Cincinnati, Ohio, have secured the contract for supplying the machinery to complete the plant of The Shawenegan Water and Power Company for service on the Island of Montreal in connection with The Lachine Hydraulic and Land Company. The machinery includes a set of motor generators capable of yielding 2,000 volts at a current of 60 cycles.

The Kay Electric Dynamo and Motor Co., Limited, report business to be good. They have recently installed for The Dominion Fence Company one 15 K. W. alternating current dynamo for electric welding; one electrotyping dynamo for Central Press Agency; one 6 H. P. motor for John Northway & Son; one 1 H. P. for Beatty Manufacturing Co.; one 5 H. P. for Dudgeon & Thornton; one 6 H. P. for W. S. Mahaffy. They have on hand orders for two 8 H. P. motors for Gowans, Kent & Co; one 25 H. P. for A. R. Williams & Co., and one 5 H. P. motor for Thompson & Martin.

FORTY YEARS IN BUSINESS.

THE first shop of The Albion Iron Works Co. was opened in Victoria, B.C., in 1862 by Joseph Spratt, and the business has continued to grow ever since until now the plant is quite extensive. It occupies an entire block, bounded by Store, Discovery, Government and Chatham streets, and an additional large boiler shop across Chatham street. The equipment of these large premises is quite modern. Included in this Victoria establishment are three machine shops, a large and well-equipped foundry, a pattern shop, smiths' shop, two steam hammers, two boiler shops and a stove foundry.

The three machine shops are fitted up with over 40 different machines and machine tools, including a lathe capable of turning out the largest marine shafts; planing machines, boring machines, facing lathes, slotting machines, and other iron working appliances.

The main boiler shop has the latest and most improved hydraulic rivetting machines for handling the heavy plates used in marine boilers, plate bending rolls, the most advanced type of pneumatic and caulking machines. This department recently turned out a huge 15-foot boiler for the steamer Pilot.

The foundry is quite extensive and has a capacity to do big work. In this department a propeller for the steamer Commonwealth, measuring 17 feet in diameter, was recently turned out.

This firm designed and built the Beaver, the first steel steamer ever turned out in British Columbian waters. The steamer Joan was also built by them.

Many marine engines in use in British Columbian seas were constructed by this company. Some of the most notable are those of the Lorne, the Pilot and the Queen City.

Besides providing the steamer Pilot with boilers this firm also equipped with them the steamers Costa Rica and Wellington.

This concern has also a large stove foundry equipped with modern machinery and capable of turning out large quantities of stoves, grates and fenders of high quality.

MACHINERY NOTES.

Lemire & Rochette, machinists, Windsor Mills, Que., have registered.

Thomas Laner, machinist, Montreal, has compromised at 25c. on the dollar.

The St. Lawrence River Electric Co., Limited, Iroquois, Que., has obtained a charter.

The Gladstone Electric Light and Power Co., Gladstone, Man., has been incorporated.

The Niagara Falls Machine and Foundry Co., Limited, Niagara Falls, Ont., has obtained a charter.

The St. Thomas Acetylene Manufacturing Co., Limited, St. Thomas, Ont., has obtained a charter.

H. W. Petrie, of Toronto, is making a shipment of a complete sawmill plant to Palubiskie & Omanique, at Barry's Bay, Ontario.

SOO INDUSTRIES ILLUSTRATED.

The Toronto Daily Star issued a special edition a few weeks ago dealing with the industrial development of New Ontario. The number is printed on coated paper, the illustrations are all on the half-tone process and give one an exceedingly good idea of the iron, steel and pulp industries, which, within the last year or two, have made Sault Ste. Marie so famous. The Star is to be congratulated upon its enterprise and the ability with which it has carried it out.

A NEW BRUNSWICK COMPANY.

The Hammond River Lumber Co., Limited, Hampton, N.B., is applying for incorporation. The capital stock of this company is placed at $40,000 divided into 400 shares of $100 each, and the purposes of incorporation are to purchase and sell logs and manufacture and sell all classes of lumber, shingles, laths, and every description of manufactured lumber; to buy and sell wholesale and retail in dry goods, clothing, groceries, hardware, paints and oils and other commodities of merchandise manufactured and unmanufactured as are usually kept for sale in a general store. The names, occupations and addresses of the applicants, the first three of whom are provisional directors, are as follows: George H. White, merchant, of Sussex, N.B.; and Edmund A. Flewwelling, manufacturer, Robert G. Flewwelling, manufacturer; Samuel H. Flewwelling, manufacturer, and Louise Flewwelling, married woman, of Hampton, N.B.

The White Mountain Freezer

helps to spread the story of its merit. You know the benefit of word of tongue advertising. Probably no household article sold to-day gets so much of this kind of advertising as the **White Mountain Freezer.** We know of hundreds of instances where a plate of good ice cream has resulted in a thirty-minute talk on the merits of the Freezer.

Think of it! You sell a freezer. The woman you sell to uses it—she serves the cream. Her guests eat it; they like it: they want a freezer that will make cream as good. She tells them where it can be had. You sell more freezers.

Is it possible to exaggerate the wisdom of selling an article that is well spoken of?

We are sole agents in Canada

The McClary Manufacturing Co.

London, Toronto, Montreal, Winnipeg, Vancouver, St. John, N.B.

If you are not thoroughly familiar with the various points of merit in the White Mountain Freezer, write us to-day for further information and prices.

MONTREAL, QUE.

MANITOBA MARKETS.

Winnipeg, June 4, 1902.

BUSINESS continues good with a heavy demand for all lines of building hardware, more especially for country trade. Jobbing houses complain, however, that collections are slower than is usual at this season. This difficulty is attributed to the bad condition of the country roads, preventing the farmers getting into town, and in that way limiting the buying. There have been few changes in prices since last writing. Solder has advanced 2c. and is now 20c. per lb. In binder twine a new schedule of prices has been issued, showing an advance of ½c. per lb. over those given at the opening of the season. However, there is practically little or no business doing at the present time, as all sales were made early and practically everyone is supplied. There will be, of course, a limited number of late buyers who will have to pay the advanced figure. Shipments of twine will begin about June 15 and will be pretty steady up to the end of July or first week in August. Profiting by the experience of last year nearly all dealers have asked for their supplies to be forwarded from ten days to two weeks earlier than last season. Dealers state there is not the slightest danger of shortage in supply this season, as there will be considerable surpluses in the South that can be drawn upon on short notice should the Western crop be so heavy as to demand a larger amount of twine than that already estimated as necessary.

In paints, oils and glass the demand is good, and there have been some sharp changes in prices since our last report. Turpentine has dropped 5c. per gallon, the present price being 75c. per gallon in barrel lots.

BINDER TWINE.—We quote: Sisal and standard, 12c.; manila, 550 ft., 13½c.; 600 ft., 14½c.; pure manila, 16c.

NOTES.

J. B. Graham has sold his hardware business, at Ochre River, to William Oliver.

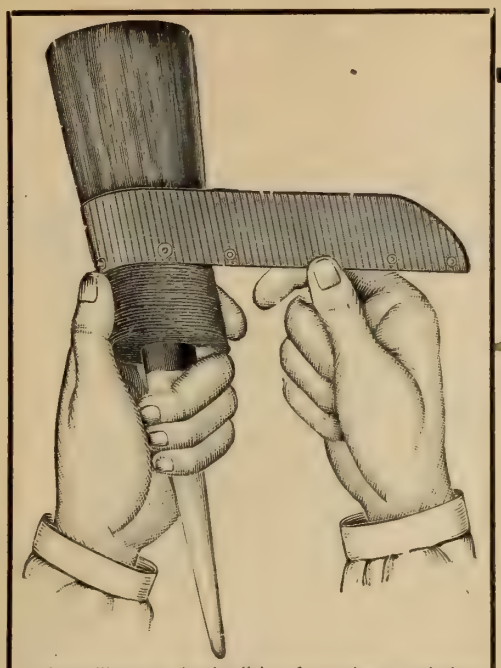
The Marshall-Wells Hardware Co. are adding a fine line of English cutlery to their stock here.

Hugh Pringle, who recently opened a manufacturers' agency at 306 McIntyre Block, is introducing to this market "The World's only Dustless Brush," manufactured by The Milwaukee Dustless Brush Co.

The strike of the Canadian Northern machinists has assumed serious proportions from the fact that the company seem steadily determined to ignore the union. It is understood the men have appealed to Ottawa in this matter.

Geo. D. Wood & Co. are calling for tenders for an addition to their present warehouse of 75 x 99 feet, four storeys and basement. When completed they will have one of the largest hardware houses in Canada, having a frontage of 210 feet on Arthur street and an average depth of 99 feet. The materials will be the same as those of the present building, rubble stone and white brick.

John Lavallee & Fils, general merchants, St. Charles Bellechassee, Que., have registered.



J. Dodds & Sons, general merchants, Carlyle, Man., have sold out to S. H. Jones & Co.

Charles L. Carter, general merchant, Hopewell Cape, N.B., has sold out to Bray & Newcombe.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, June 6, 1902.

HARDWARE.

TRADE has been somewhat quieter during the past week than in the previous seven days. A holiday on Tuesday, in some places, including Montreal, although not very well observed, was, nevertheless, a quiet day with many of the wholesale houses. The market has been steady on practically all lines of hardware. A number of orders for lawn mowers are still being received, and some jobbers are short on 12 and 14-in. sizes. Haying tools have been moving out freely, and horsepokes and pumps have been in active demand. Hardware lines of plated silverware are among the quick selling articles of the week. Carpet sweepers have been going rapidly.

SCYTHES.—The market is still active at the quotations here given, which are as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—This is not selling as well as during the past few weeks, the trade having about completed their purchases. There is, however, a fair demand yet, at $3 per 100 lb. f.o.b. Montreal.

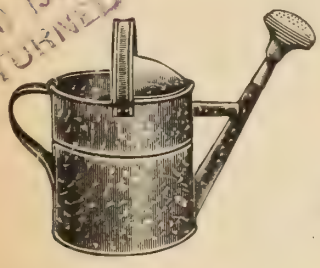
GALVANIZED WIRE.—This is in moderate demand. No change has occurred in prices, and our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is not a great demand for this wire at present. Our quotations are now as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FENCE WIRE.—Trade is quiet. Fine wire is discounted at 22½ per cent.

BRASS AND COPPER WIRE.—There is not much doing. Discount, 60 per cent.

FENCE STAPLES.—The inquiry for fence staples has dropped off considerably. Our quotations are as follows: Bright, $2.90 per 100-lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.



WIRE NAILS.—These are in active demand at $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The market is still lively, and an excellent trade is being done. Cut nails sell in small lots at $2.45 per keg, and in carlots, at $2.37½ per keg. Flour barrel and coopers' nails, 40 per cent. discount.

HORSE NAILS.—The demand for these has become very small. Discounts follow: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—There is not much demand for these. Some very low prices were being offered on cull shoes, which aroused a little interest in the market, but at a meeting of manufacturers, the cut prices were withdrawn, although each is still at liberty to make his own prices. Our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—These are moving out freely. Discounts are: Round head bright, 82½ and

Goods That Are Selling Now

Sprinklers—Galvanized and Japanned. Two styles and five sizes in each.

Water Coolers—Assorted colors and styles and handsomely decorated.

Water Coolers and Filters—Assorted colors and styles.

COMBINED

Water Compartments made of galvanized iron with filter that can be readily cleaned. Non-heat-conducting material between the Water Compartments and outside body.

A big trade is now being done in the above lines. If you require a supply, we can ship prompt.

10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—The market for bolts is quite as active as ever. Our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The feeling in this market is quite firm and the expected advance becomes more probable daily. The demand is good. Quotations are: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The inquiry for cordage is slow this week. Binder twine, however, has commenced to move out fairly well. Manufacturers are reported to be pretty well sold out of binder twine, and present indications point to a shortage in the near future. Crops are considered to be fairly heavy, and the demand will doubtless be large. A few American manufacturers have already refused orders. We quote: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is a fair inquiry at unchanged prices. Discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—The market continues quite active at $1.37½ per 100 square feet.

POULTRY NETTING.—Business is still brisk. The discounts are as follows on Canadian or English: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—There is still an active demand with the discount at 60 per cent.

FIREBRICKS.—Trade is moderately good. Scotch sell at $17 to $22, and English, at $16 to $22 per 1,000.

CEMENT.—Canadian cement is now quoted at $1.90 to $2.25, a decline of 10c. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95

per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

There is still some activity in the local market, though prices all round are steady and unchanged. Galvanized iron is one of the most active lines. Some importers are having difficulty in obtaining supplies of sheet copper from the United States, the mills there having booked all the orders they can attend to for the next two or three months. In the English markets, while some lines, like Canada plates and black sheets, show some weakness, the general tone of the market since the peace declaration is stronger. Quotations are lower on Canada plates, and black sheets are also reported to have been bought at a reduced figure lately.

PIG IRON.—There is no important change in the market. Supplies are still light in most dealers' hands, and the market remains firm. The price of Canadian is $18.50 to $19, and of Summerlee, $21.50 to $22.

BAR IRON.—Merchants' bar is quoted at $2, and horseshoe iron, at $2.20. There is nothing new to report in the market, which is still active.

BLACK SHEETS.—The demand is fair. English prices have been quoted lower, although a cable of Monday announces a rising market. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This has been moving actively during the week at the prices we quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra.

INGOT COPPER.—The market is steady. There is very little demand. The price is 14c.

INGOT TIN.—There is no change in this market. Straits is quoted at 33c.

PIG LEAD.—The market is quiet. Lead sells at $3.25.

LEAD PIPE.—There is a steady demand. Composition waste is quoted at 7½c., and ordinary, at 7c. Discount, 37½ per cent.

IRON PIPE.—A good deal of activity still prevails in this line. Prices quoted have not been changed. They are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Business continues somewhat quiet. Charcoals are quoted at $4.75 to $5.25 per box, and cokes at $4.25 per box.

CANADA PLATE.—The foreign market shows some weakness in Canada plate, and late quotations from England are placed at a lower figure. Locally, there has been no change. Our quotations are as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—The demand continues good. Quotations are as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—A moderate trade is doing. Our quotations are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is little doing in this line. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—The market is dull. The price is $7.75 to $8.

COIL CHAIN.—Chain is moving but slowly, and our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade is quiet, and the price remains at $5.85 to $6.25.

ANTIMONY.—This is still very quiet. The price is 10c.

ZINC SPELTER.—We quote 5c.

SOLDER.—The demand for solder keeps up well, and the market this week has been quite active. Wire solder is quoted at 20c., and bar solder, at 18c.

PAINTS AND OILS.

A recent advice from the Southern markets states that the position of turpen-

tine is gradually becoming stronger, and that the crop is short, there being only 4,500 barrels on Saturday, May 31, as against 19,000 barrels on the same date last year. Prices here are 2c. higher, and the same advance has been made in linseed oil. Supplies have not reached here yet in any quantity, and the market is firm.

On account of the moist weather there has been an excellent demand for paris green, which has served to stop all concessions of price. Holders are firm at the prices we quote, anticipating a shortage. A feature of the week has been the marked inquiry for ground white lead of all grades, and stocks which accumulated during the winter months have disappeared. Manufacturers have now to ship white lead as soon as it is matured. Varnishes and dry colors share in the general activity. Cod oil and seal oil are scarce with several houses, and sales have been made in the former as high as 37½c. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6½c. ; No. 1, 5½c.; in oil, pure, 7½c.; No. 1, 6¼.; No. 2, 5½c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7½c.; smaller quantities, 8½c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 84c.; boiled, 87c.; In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The interesting line in the market for scrap materials continues to be in rubbers. The advance of two weeks ago was followed by a sudden reaction, as several large rubber reclaimers of the United States stopped buying as soon as they had obtained a supply sufficient for their temporary requirements. The market is rather unsettled at present, and although jobbers are paying 6½c., the market price of rubbers is hard to decide upon. Iron is weakening since the mills have filled all their requirements from Europe, and No. 1 wrought is this week quoted at $15. Our quotations are now as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

GLASS.

The market for glass is still very quiet. We quote: First break, 50 ft., $2.10 second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

Beef hides are quoted 1c. lower this week, and are easy at the new price. Calfskins are also down 1c. We quote : No. 1 hides, 8 to 9c.; No. 2, 7c.; No. 3, 6c. No. 1 calfskins, 11c.; sheepskins, 70c.; lambskins, 15c. per lb.

MONTREAL NOTES.

Beef hides and calfskins are 1c. lower. No. 1 wrought scrap iron is $1 per ton lower.

ONTARIO MARKETS.

Toronto, June 6, 1902.

HARDWARE.

BUSINESS in general seems to be keeping up well. The demand is increasing in harvest tools, forks, scythes, and the like, and a fair sorting-up trade is being done in ice-cream freezers. There is a scarcity of lawn mowers, poultry netting, and spring hinges, and the factories claim to be away behind with their orders. There is still a good demand for barb wire and all other kinds of fencing wires. Manufacturers of cast hardware have advanced their prices in nearly all lines, and the Canadian makers of chisels and draw knives have put their prices up 10 per cent. Jobbers are compelled to put this change into effect at once. In building paper, the prices of dry sheathing and tar sheathing each have been put up 5c. per roll.

BARB WIRE.—The sales in barb wire continue large. We quote : F.o.b. Cleveland, $2.77½ for less than carlots and $2.65 for carlots. From stock, Toronto, $3.00.

GALVANIZED WIRE.—Trade is about the same as last week, and our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Business continues brisk in oiled and annealed wire. The base price is quoted at $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Trade is still fair and the prices are unchanged. Discount, 22½ per cent.

WIRE NAILS.—The demand continues steady with quite a few sorting-up orders coming in. We quote $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque, and Montreal.

CUT NAILS.—There is not much trade doing this week. The base price is $2.45 per keg, and 7½c. less for carlots.

HORSE NAILS.—The trade doing is of a limited character. Our discounts are as follows : "C" brand, oval head,

The Metallic Roofing Co., Limited,

TORONTO. MONTREAL. WINNIPEG.

50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—There is a small trade doing. We quote f.o.b. Toronto: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand keeps steady with a fair supply. Prices remain unchanged. Discounts follow: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—The demand for these is still steady, but there is a scarcity of rivets. Our quotations are as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—In bolts and nuts the manufacturers are behind with their orders and the chances of their immediately catching up are small. Our quotations follow: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—The demand is still brisk, and common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Trade is keeping up well. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—Business continues fair and the discounts are unchanged at 40 and 5 per cent.

ROPE.—There is a fair demand. The hemp market is still easy, and our quotations are as follows: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—There is a little trade being done. Quotations are: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—Trade is moderate and the prices are unchanged. We quote as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

HARVEST TOOLS.—There is an increasing demand for harvest tools. The prices are unchanged, and the discount is 60 per cent.

BUILDING PAPER.—There is still a good trade being done. The prices of dry sheathing and tar sheathing have been advanced each 5c. per roll. We quote: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—There is a brisk demand, but on account of their scarcity difficulty is experienced in filling orders. The discount continues unaltered at 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—Business is steady at the advance of last week.

POULTRY NETTING.—There is a good demand for poultry netting, but the difficulty in getting orders from the manufacturers still remains.

TINWARE AND ENAMELLED WARE.—There is a moderate trade being done and the prices are unchanged. The discount is 40 per cent.

SPORTING GOODS.—The business that is being done is mostly for future delivery in the fall. Only orders for fishing tackle, etc., are being shipped at present.

CEMENT.—The market still holds firm with no advance over the prices of a week ago. A great amount of business is already being done and manufacturers do not care to book large orders at present for future delivery. Our quotations are as follows: Canadian Portland, $2 to $2.85; Canadian hydraulic, $1.35 to $1.60; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex cars.

METALS.

The general metal business continues satisfactory and the difficulty at present is to obtain supplies. The buying movement is fairly heavy this week. At the Valley furnaces in the United States the production of iron is practically stopped owing to the strike of the blast furnace workers.

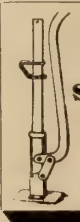
PIG IRON.—The pig iron situation in Canada remains as strong as ever. There is still a scarcity and it is impossible to get delivery of large quantities. The demand simply exceeds the supply. Quotations on track, Toronto, are: $21 for No. 1 foundry and $20.50 for No. 2. But 25c. higher is being paid in some instances in order to get the material.

STEEL BOILER PLATES.—There is still a great scarcity of these, and carload lots are being quoted at $1.80 on track, Toronto.

STEEL BEAMS.—Trade is active and prices firm. From stock we quote $2.75, and carlots on track, at $2 per 100 lb.

STEEL RAILS.—The price at which steel rails of Canadian manufacture are being quoted is $36 per ton.

TOOL STEEL.—Prices are steady and trade fair. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.



BAR IRON.—The prices continue firm and unchanged. We quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—The demand has improved since last week. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is more inquiry for Canada plates this week. We quote: All dull, $3; half polished, $3.10, and all bright, $3.75.

W. L. Haldimand, Jr., Montreal Agent.

good demand for galvanized sheets, and stocks are light. We quote in case lots: Queen's Head, $1.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.20 for 28 gauge.

TIN.—A fair amount of business is being done although the decline in the outside markets has made buyers shy. It is expected that prices will recover. The local market is unchanged. We quote $33 to $34 per 100 lb.

TINPLATES.—We quote: Charcoal at $4.75 to $5 per box, and cokes, $4.25 per box.

COPPER.—Trade in ingot copper has improved. The outside markets, which were stiff last week, are again easier. In sheet copper there is a moderate trade doing. We quote: Ingots, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—Business in brass continues fairly active. The discount is 15 per cent.

PIG LEAD.—There has been an improvement in the demand for lead. We quote $3.50 to $3.75 for pig, and $5 for bar lead.

IRON PIPE.—There is a good demand for iron pipe from the West, and a scarcity in some sizes. Prices are the same as they were, and we now quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—There is a better demand for zinc spelter. We quote $5.50 to $6.00.

ZINC SHEETS.—An improvement is noted in the trade for zinc sheets. We quote: Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—Business continues good. We quote: Half-and-half, guaranteed, 20c.; do. commercial, 19½c.; refined, 19c., and wiping, 18½c.

ANTIMONY.—There is a fair amount of trade being done at unchanged prices. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The prices of raw and boiled linseed oil this week are firm and unchanged. The scarcity in linseed oil has not been relieved and turpentine has advanced 2c. per gal. here. There is expected to be a fair supply of linseed oil on the market the coming week as manufacturers have intimated that they will make some deliveries thereof. Trade continues steady in all lines of paints, oils and dry colors, being sustained by a number of repeat orders that are coming in. In red leads, plaster paris, and white zincs, the trade doing is fair. Castor oil is more active and the demand for gum shellac has improved, but there is still a scarcity of it. There has been an appreciation of 2c. per lb. in paris green. The busy season for that article is now coming on and the demand has been stimulated. We quote as follows:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 83c.; boiled, 86c.; 3 to 5 barrels, raw, 82c.; boiled, 85c.; 6 to 9 barrels, raw, 80c.; boiled, 83c.; 10 to 60 barrels, raw, 78c.; boiled, 81c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 73c.; 2 to 4 barrels, 72c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Trade is fairly good, but there seems to be a scarcity of sizes amongst some of the jobbers. We quote as follows: Under 26 in., $4.45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5 75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The receipts are a little smaller than last week. The demand is easy and prices are unchanged. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

COAL.

The coal situation has developed no new features. No settlement of the labor troubles among the coal miners has been arrived at yet. We quote at international bridges: Grate, $4.75 per gross ton; egg, stove and

nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

The market continues steady with a fair demand. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16¼ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Turpentine has advanced 2c.

Paris green has advanced 2c. per lb.

The prices of dry sheathing and tar sheathing building paper have appreciated 5c. per roll.

CATALOGUES, BOOKLETS, ETC.

A TEXTBOOK FOR MANUFACTURERS AND ACCOUNTANTS.

A TEXTBOOK for the use of manufacturers, merchants, accountants and bookkeepers, by Wilton C. Eddis, F.C.A., and William B. Tindall, A.C.A., is "Manufacturers' Accounts." It is a new work that endeavors to deal with this subject in a practical way. The results of several years' business experience by the authors is given, making this book a valuable aid to business men. To provide a system of cost accounts applicable to all factories, they are separated into two classes, with a different method of accounting for each. Specimen accounts of varied manufactories and approved forms for recording the cost of manufacturing have been worked out and illustrated, the forms and illustrations in many cases occupying a full page. The book is divided into three parts, the first dealing with revenue account, wages, material and factory expenses, the second with cost accounts for boiler and engine manufacturers, contracting engineers, candy and lumber manufacturers, and the third with forms of books and accounts. Besides the regular index, an index to the forms and books used is provided. The retail price of the book is $3, and by remitting that amount to the publishers, Messrs. Eddis & Tyndall, 23 Toronto street, Toronto, the book will be sent to the purchaser.

SUMMER GOODS.

A catalogue of summer goods, wire rope, wheelbarrows, etc., will be issued by The Canadian Hardware Co. in two or three days. Those of the trade who do not receive a copy should drop a card to the firm for one.

CHANGE IN A HARDWARE FIRM.

W. Montgomery has bought out the premises and stock of hardware, tinware and furniture of James W. Fulbrook, Stonewall, Man. The store is a three-storey structure, 50 x 60 ft. This he is thoroughly remodelling and is adding thereto a three-storey addition, 25 x 40 ft. When all these repairs are completed Mr. Montgomery will have a thoroughly first-class and up to-date hardware store.

PERSONAL MENTION.

Mr. Isaac Weganast has severed his connection with The Vokes Hardware Co., Toronto, and has entered The Canadian Furniture Manufacturers, Limited, as buyer.

NOVA SCOTIA MARKETS.

Halifax, June 3, 1902.

THE hardware trade still keeps up the activity which it has shown for some time, and last week was a particularly busy one as six days' work had to be crowded into five on account of Victoria Day—a holiday being observed on Saturday. Every line seems to be fairly general in demand, though there has not been so much doing in fishing supplies as a few weeks ago, as the vessels are all now on the Banks engaged in the season's work.

* * *

Prices are still firm in nearly all lines, with a tendency to advance, and with the general complaint that manufacturers are not able to fill orders promptly. The manufacturers claim that the demand for steel and iron is far beyond the production, and their orders must wait some time to be filled. This state of affairs is bad for the jobbers and retailers, especially those who have adopted the system of smaller and more frequent orders. Two or three short-time orders have to be booked and kept running or they will find themselves short-stocked.

* * *

The wholesalers are having an unusually heavy demand for all kinds of builders' hardware, most lines of which are at an advance from last season's prices. Cement, sheet lead, nails, glass, paint, oils and putty make a large portion of nearly all orders shipped, and there is good promise that the demand will continue much longer this season than usual, as the building boom throughout the Province is increasing rather than diminishing. The bad weather of the last week has somewhat interfered with the shipping of orders.

* * *

The retailer, too, is having a busy season. This is the time for general repairs and cleaning up and brightening things about the house, and the supplying of this falls to the retailer. Sporting goods, such as fishing tackle, and all the requisites for the various athletic clubs, has of late years been more fully recognized as a part of the hardware trade, and more attention has been given to it. An extremely good trade has been done in these lines during the last two or three weeks.

* * *

The linseed oil and turpentine markets, which have been easier for a short time, have now become firm again. A short time ago, just after a strong advance here in linseed oil, there was a reduction of $4 a barrel in the Southern market, which was previously noted. Now that market has become stronger, but there may not be any material change in this market, as the advance was firmly maintained since the original advance. Turpentine is also fluctuating and may advance slightly. The market is now open for quotations on new season's seal oil, and shows an advance of 1 to 1½c. from last season.

The export business of Halifax is a good index to trade in general, and may be of interest. For the nine months from September 1, 1901, the exports amount to $6,920,273, being over half a million more than for the same nine months in the preceding year. The exports for last week were : To Great Britain, $68,684 ; West Indies, $17,657 ; United States, $9.113 ; Newfoundland, $6,432.

R. C. H.

LOOK OUT FOR THIS.

The Canada Hardware Co. have a "snap" for the trade in the shape of a job lot of Magnolia metal, which they are disposing of at an exceptionally low price.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

THIS season is noted for the unparalleled building operations that are at present going on in Toronto. This week building permits have been granted as follows: Canadian Express Company, for a one-storey and loft brick stable on the northwest corner of Front and Peter streets, for $25,000; Massey-Harris Co., for a one-storey brick and iron storage building, near Strachan avenue, on the south side of King street, for $1,400; J. A. McBain, for a two-storey summer dwelling on 120 Kippendavie avenue, for $800; Sisters of St. Joseph's Convent, for the erection of a four-storey brick addition to convent on the corner of St. Alban's street and Surrey Place, for $20,000; Albert Dale, for a pair of semi-detached two-storey brick dwellings at 165 and 167 Winchester street, for $4,000; Dominion Government, for alterations to east gable of armouries on University avenue, for $20,000; Ecclesiastical Corporation, for a two-storey and attic brick dwelling for priests at 438 King street east, for $3,000; E. L. McArthur, for a two-storey and attic brick residence near Elm avenue on the east side of Dunbar Road, for $3,000; E. L. McArthur, for a two-storey brick residence, near Elm avenue, on the east side of Dunbar Road, for $3,000; Standard Chemical Co., for a one-storey iron charcoal shed at the foot of John street, for $250; T. L. Madill, for a two-storey brick dwelling at 430 Summerhill avenue, for $2,300; Toronto Mortgage Company, for repairs, after a fire, to office at 28 and 30 Toronto street, for $8,000; A. Rowe, for a pair of two-storey brick residences, on stone foundation, on the south side of Bloor street west, near Bartlett avenue, for $3,000; Alfred Duncan, for a two-storey and attic brick dwelling, near Broadview avenue, on the west side of Simpson avenue, for $2,500; Isaac McHenry, for a pair of two-storey brick dwellings at 222 and 224 Gladstone avenue, for $3,500; S. J. Graydon, for a pair of two-storey brick dwellings at 109 and 111 Spadina Road, for $4,500; W. J. Foy, for a two storey brick and stone dwelling, near Rose street, on Strachan avenue, for $2,400; The Wm. Davies Co., Limited, one-storey brick and stone store and open brick shed at 171 Avenue Road, for $4 000; Bacon Estate, for three pairs of two-storey brick dwellings at 36 to 50 Elgin avenue, for $24,000; C. Davies, for a two-storey summer dwelling near Queen street on the east side of Woodbine avenue, for $700; R. B. Brown, for a two-storey brick dwelling at 1172 College street, for $1,800; Enoch Simmons, for a two-storey brick residence, near Wells street, on the east side of Albany avenue, for $1,100; John Robertson, for a two-storey brick dwelling, near Hogarth avenue, at 655 Broadview avenue, for $1,500; W. Pridisfin, for a pair of two-storey brick dwellings on the east side of Dufferin street, near Dundas street, for $2,500; Metallic Roofing Co., for a two-storey brick addition to factory on the northeast corner of King and Dufferin streets, for $3,000; Salvation Army, for an attached two storey and attic brick dwelling on the southeast corner of Arthur and Bellwoods avenue for $6,000; F. W. Horn, for alterations to store fronts at 94 and 96 King street west, for $2,000; Eleanor Wood, for a two-storey brick dwelling on the north side of College street, near Havelock street, for $2,500; Jacob Singer, for three two-storey brick dwellings, near Hanover street, on the east side of Shaw street, for $5,500; Dominion Express Co., for a one-storey addition near the Union Station, on Simcoe street, for $5,000; T. Gingros, for two two-storey roughcast dwellings on Manning avenue, north of Arthur street, for $1,200; Dominion Postal Department, for a two-storey brick and stone post office on the south side of Queen street, between Abell and Lisgar streets, for $2,500; J. B. Andrews, for a two-storey brick residence on King street, at the corner of Jamieson avenue, for $5,000; Walter Stubbing, for a two-storey brick dwelling on the south side of Grace street, near College street, for $1,600; Thomas Redford, for an addition to dwelling at 94 Yarmouth Road, for $150; Mr. Ward, for a two-storey brick dwelling, near Queen street, on the west side of Kippendavie avenue, for $2,000; McKeown & Wilson, for underpinning under dwelling at 257 Sautree street, for $240.

BUILDING IN BERLIN.

At the present time the town of Berlin is in the centre of extensive building operations. Many factories and other structures are going up, among which may be noted a sugar refinery for the Ontario Beet Sugar Co., Limited, for $600,000; a new public library building, for $17,500; a new Roman Catholic Cathedral for St. Mary's parish; a new Mennonite Church, for $3,000; an addition to the factory of J. Kaufman, for $5,000; an addition to the tannery of M. Erl & Co., for $2,500; a new pavilion at Victoria Park, for $4,500; and a number of new residences amounting to about $75,000. There are also additions and improvements to a number of churches, amounting in all to $12,000.

MONTREAL POWER CO.'S YEAR.

The Montreal Light, Heat and Power Co., incorporated on March 28, 1901, acquired the whole of the capital stock of The Royal Electric Co., The Montreal and St. Lawrence Light and Power Co., The Imperial Electric Light Co., and practically the whole of The Montreal Gas Co. Their annual statement gives earnings of about 5 per cent. on capital stock. An issue of $7,500,000 of first mortgage bonds was authorized at a meeting of the shareholders in January. Their balance sheet shows:

Assets	$18,162,188
Current assets	1,928,915
Total	$20,115 917
Liabilities (including capital stock)	$19,477,800
Current liabilities	795.644
Surplus	141,753

ALTERING THEIR SHOWROOMS.

The Keith & Fitzsimmons Co., Limited, plumbers, etc., Toronto, are altering their premises at 111 King street west. They are overhauling their showrooms and for display purposes will arrange four or five separate bathrooms fitted up with the most modern and up-to-date plumbing requisites. Their showrooms, when the alterations are completed, will be very fine.

SOME BUILDING NOTES.

A new Presbyterian Church is in course of erection at Haldimand, Ont.

A new rectory is being built in connection with St. James' Church, Condie, Assinboia.

A large brick block of three storeys, costing $15,000, is being built at Vancouver, B.C., by the Chinese Reform Association.

At Winnipeg tenders are being advertised for the erection of an addition to the warehouse of G. D. Wood & Co.; a residence for E. M. Page, and a store for Colecleugh & Co.

PLUMBING AND HEATING CONTRACTS.

Aaron Child & Son, Gravenhurst, Ont., have the contract for eavetroughing the Royal Muskoka Hotel at Lake Rosseau, Muskoka.

Drummond & Stinson, plumbers, Toronto, have dissolved; Henry Drummond retires.

NOW,

RAMSAYS EXTERIOR
WHITE LEAD

pays a painter to use it, because it goes farther than pure lead or any other lead. And besides that, it works easier, it lasts longer, is whiter and remains whiter. It will not corrode and chalk off like pure and other leads, and in every way gives a cleaner, better job. It is **RAMSAYS EXTERIOR** that does this, and not the imitations. If it pays the painter, it pays the dealer. SEND FOR OUR BOOKLETS AND PRICES.

COPPER IN LONDON.

REVIEWING the copper situation The London Ironmonger says in its issue of May 24: "In spite of statistical evidence to the contrary, the belief is generally held that the amalgamated company has cleared out its 100,000 tons accumulation in three months or so, and the 'Trust' encourages this by exhibiting a coyness regarding new business and a disinclination promptly to fulfill old contracts, sufficient in themselves to arouse distrust in a market having a memory. As we pointed out last week, if the Amalgamated party has liquidated its stock it has got rid of 123,000 tons of copper to domestic consumers and others during three months. There is no doubt that the stock has been reduced, but we decline to believe that the entire holding has thus disappeared. It is likely enough that some large blocks may be held speculatively, but even if this be the case, the metal so held exists—it is not absorbed—and it may come upon the market at any moment.

PIG IRON SOLD AHEAD.

A despatch from Birmingham, Ala., says: "The statement is made in this district that pig iron manufacturers have received inquiries for iron to be delivered in 1903, but that they will make no lower price than the prevailing figures, $16 for No. 2 foundry. This indicates that the furnacemen anticipate as strong a market as prevails now. There is very little iron to be sold now on account of the furnaces being sold ahead for almost the entire year. The present shipments are equal to the production, a most healthy condition."

IMPLEMENT MAKERS ACTIVE BUYERS.

A significant feature of the market is that the implement makers, who in March bought their bar requirements for the year beginning in July, have since then been almost equally active buyers in other lines of metal needs for the coming year and they may now be said to have covered most of their wants during that extended period. The effect of this large buying is exemplified in the condition of the mills producing merchant steel. Some of the largest have practically disposed of their entire output for the next 13 months, and accumulated business that has rarely if ever been equalled heretofore in that line.—Iron and Steel, Chicago, May 31.

PIG IRON IN ENGLAND.

The recent improvement recorded in the pig iron market has been, if anything, more pronounced this week, though, of course, the holidays have had a rather adverse effect. The prices of Cleveland warrants, indeed, have further advanced, and a price has been realized which not only exceeds anything reported this year, but also is higher than the best of last year; prices equal to those of the current week have not been realized since the latter part of 1900. This degree of strength has also pervaded the Scotch markets, as the operations continue to be greatly dominated by the position in the United States, where the scarcity of raw material for prompt delivery has been reported greater than ever. From the other producing centres similar strong reports come to hand, specially in Staffordshire, where it is considered highly probable that before next quarter day smelters will be able to command higher prices. While exaggerated reports have lately been current respecting American purchases of pig iron in this country, it is understood that further quantities have been contracted for. The following is a statement of the present stocks of pig iron in public stores:—

Public stores stocks, in tons:	Wednesday.
Connal's at Glasgow	52 724
Connal's at Middlesbrough	139,078
Connal's at Middlesbrough, hematite	300
West Coast hematite	....
N.E.R. Stores, Middlesbrough	....

Iron and Coal Trades' Review, May 23.

BRITISH TINPLATE TRADE.

Although the holidays have interfered with business during the past week, the market has been active, and a steady business all round is reported. Raw materials keep firm, and prices for the finished article are well maintained. Common 14 by 20, 112 sheets, 108 lb. Bessemer cokes have been freely done at 13s. 4½d. per box f.o.b. Wales, and in some instances a shade under this figure has been accepted. Makers' quotations, however, run generally 13s. 6d. to 14s. per box, with 1½d. per box extra for Siemens' steel.—Iron and Coal Trades' Review, May 23.

NEW YORK METAL MARKET.

COPPER.—The copper market was weak under pressure to sell and buyers still showing indifference. A lot of 30,000 lb. of spot Lake sold at 12.40c., but that was an exceptional price, the inside asking price at the close being 12.52½c. for any delivery from spot to September, with 12.25c. bid. Of electrolytic, 100,000 lb. sold for June delivery at 12.20c., the closing quotation on that grade being 12c. bid and 12.25c. asked for spot to August delivery. Casting was quoted at the same figures as electrolytic. The closing quotations on standard were 11.65 @ 11.87½c. There was a sharp decline in the London market this morning on free selling, particularly of spot copper. The market closed quiet without recovery, the quotations being 10s. below those of last night.

PIG TIN.—Continued dullness in connection with depressing cables from London had a weakening influence on this market, which closed at a decline of about 25 points, the quotation on spot being 29.50c. bid and 29.75c. asked, and on June 29 @ 29.50c. There were sellers of July delivery at 29c. and of August at 28.75c. There was a break of £1 in spot tin in London before noon and a further decline of £1 15s. later. Futures declined altogether £3 2s. 6d., and the market, as a whole, was weak at the close. The depression there is attributed to the withdrawal of support from this side.

PIG LEAD.—The market continues to decline, to-day's quotation on spot Spanish being 1s. 3d. below that of yesterday. In this market business is on a moderate scale, but prices are maintained at 4.12½c. for lots of 50 tons or more. St. Louis was reported firm at 3.95 @ 3.97½c. bid.

SPELTER.—There was no change in the situation, the market remaining firm under very light supplies. The nominal spot quotations were 4.75 @ 4.87½c. St. Louis was firm, with 4.65c. nominally quoted. London was unchanged.

REGULUS ANTIMONY.—Trading was on a somewhat contracted scale, but prices were maintained at 10¼c. for Cookson's, 8 to 8¼c. for Hallett's, and 7½ to 8c. for other brands.

QUICKSILVER.—There continues a very good demand and the market is firm at $48 for 50 to 100-flask lots.

NICKEL.—The demand is moderate and prices are unchanged on the basis of 50c. in one-ton lots.

OLD METALS.—Trade continued light and the market was easy.

IRON AND STEEL.—Latest advices are to the effect that the strike of furnace workers in the West is extending and threatens to seriously cripple operations in the steel mills of Ohio and Pittsburg district. The situation in foundry iron is unchanged, except that some of the Southern furnaces which have been booking orders for late 1902 delivery have withdrawn from the market. Philadelphia reports that the scarcity of iron increases daily so that new prices are made in almost every transaction. The buying is chiefly for shipment within the next 60 or 90 days, too much uncertainty existing to admit of long contracts. Early deliveries bring $21.50 @ $22.50 for No. 2 foundry. A good deal of foreign iron is being used in that district at prices varying from $20.50 to $21 for Middlesboro and $1 @ $2 per ton more for Scotch brands. Prices, however, are too erratic to be quoted with exactness. In finished materials, continued activity, with no abatement of scarcity is noted in structural steel. Bars and plates, while not quotably changed, command a substantial premium when wanted for early delivery.

TINPLATE.—The situation was without fresh feature. About the only business done was in the way of regular deliveries on existing contracts. Prices were unchanged.—N. Y. Journal of Commerce.

MOTHS IN YOUR BRUSHES.

Hardware and general store merchants should look over their stock of brushes of all kinds and most particularly feather dusters at this season of the year. The moth, or fly, has a yellowish tinge all over its body and wings at this time of the year. It lays its eggs now and these eggs turn into worms which do all the damage, eating brushes away very rapidly if left unmolested. The following articles will answer as a preventative: Tarred paper cut into small pieces and placed into each box, or camphor balls, cedar shavings, yellow insect powder or flake camphor. These are unrivalled as a destroyer to germs. Be sure and place some in each package or box of black bristle brushes above or below the counters. Do not blame the manufacturer if you have moths in your stock of brushes. This advice is given to the trade by The United Factories, Limited Toronto, the largest manufacturers of brushes on this continent, and should be acted upon immediately.

COLLAPSE OF HARDWARE CONSOLIDATION.

THE combination which was being formed by the leading wholesale hardware houses of the United States has collapsed. This was quite unexpected as it was understood that the undertaking would be successful. Mr. E. C. Simmons, of The Simmons Hardware Co., who was designed for the presidency of the organization, is out with the following letter in regard to the matter :

" While I did not originate the scheme I have no disposition whatever to shirk any responsibility or refrain from giving you a statement of what led up to the disruption of the proposed plan for the hardware merger.

" When I met with the other gentlemen in New York City about the last of March, we had the names of some 56 firms given us as those who were ready and willing to go into this combination. The feeling was also expressed confidently that many others would be glad to come in as soon as they knew that the merger was an assured fact, and from what others said I became sanguine of that myself. For that reason we assented to the proposition and I personally agreed to take the position of president of the new organization. Since that time, however, all efforts to induce other leading houses to join have been unsuccessful. Summing up the situation I saw that we did not have any fair proportion of the distributing power of the country, and unless we did have that I felt convinced that the scheme would not work out to a financial success. A consultation with Messrs. Marshall, of Duluth, and Hill, of Minneapolis, led to the conviction that they were impressed just as I was about it, and therefore agreed that it was our duty to state that fact to those who were going to put up the money and who were promoting the deal and to do so before any money had passed—to do it before it was too late to recover what might have been a serious mistake.

" Therefore, as a matter of conscientious duty our convictions on this subject were laid before those who had been instrumental in getting it up and who were going to do the underwriting. We did not withdraw from the scheme ; we did not ask anything but what had already been outlined. There was no issue between us and the promoters whatever, nor was the compensation that I was to receive as president of the company ever discussed for a moment. We performed a plain and simple duty when we told the promoters and the underwriters that after summing up the situation most carefully we did not think the chances were favorable for financial success, and as soon as we told them that they called the deal off, just as we felt sure they would do, so that while the three houses named—viz., Marshall-Wells Hardware Co., Janney, Semple, Hill & Co., and The Simmons Hardware Co.—were instrumental in terminating this matter, they did not withdraw from it ; at the same time they did state their convictions and that statement caused its abandonment.

" I still believe that a proper union of the large distributing forces of this country will correct a great many evils that have crept into the trade, but unless the scheme is properly constructed it cannot produce financial success, and therefore should never be entered into. Could we have gotten several of the other large houses into the organization I believe we could have influenced the manufacturers in ways that would have redounded to their benefit as well as to the benefit of the retail hardware dealer, and at the same time serve the best interests of the jobber. We had a great many other improvements and economies in contemplation which it is entirely unnecessary to mention here, but suffice it to say that it was impracticable to attempt the introduction of those unless we had at least two-thirds of three-fourths of the distributing power of this country in our organization.

" My own financial interests or the interests of The Simmons Hardware Company were not for a moment considered—the simple question before me was what was my duty in the premises, and it seemed perfectly and absolutely clear that my duty led in the direction of telling these gentlemen who were the financial end of the scheme that as it was developed it was not a sound proposition."

CLEANING UP RUSTED HARDWARE.

What to do with stock that is shop-worn or damaged and which constantly accumulates in spite of the very greatest care, has caused no end of worry to the careful merchant. How many hundreds and even thousands of dollars worth of accumulated soiled, tarnished, and scratched or otherwise damaged goods can be found in every hardware stock. Moore & Orr, of Toronto, have made a specialty of fixing up this class of damaged, rusted, soiled, or tarnished hardware stock. They are well equipped to do the work and can replate, repolish and generally restore damaged stock and tools ; also bicycle parts, and, in fact, any metal goods, to their original brightness at reasonable charges.

Hardware merchants and manufacturers who have new or second-hand goods needing replating or repolishing, will do well to write Moore & Orr, 81 Adelaide street west, Toronto.

CRUCIBLE STEEL COMPANY.

Mr. John J. Barry, who returned from a visit to New York a few days ago, has been appointed manager in the Maritime Provinces for The Crucible Steel Company of America, one of the biggest manufacturing concerns in the United States. The headquarters for these Provinces will be in St. John. This is the first time the company has opened a branch here, and the prospects are that a good business will be done under the effective management of Mr. Barry.

Progress

Twenty-five years ago we commenced making Tarred Paper in Montreal, using a hand-power machine, with a daily output of about 100 rolls. To-day we have Paper Mills at Portneuf and St. Bazile; Factories at Toronto, Montreal and Halifax in which we are running **six** Steam Power Tarring Machines, **three** Machines for making Wire Edged Ready Roofing, and **five** Stills for the manufacture of Roofing Pitch.

Our daily capacity is **fifteen** tons Dry Paper, **two thousand** rolls Tarred Paper, **eighteen hundred** rolls Wire Edged Ready Roofing and **twenty** tons Roofing Pitch.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

Purchase Department.

THE MURALO COMPANY,
New Brighton, New York. DECEMBER 21st, 1901.

GENTLEMEN :—

Referring to your favor of recent date, beg to say that we have used large quantities of Indeliblo Fireproof Paint, and are pleased to say that it gives very good satisfaction.

We are now painting the inside of our new Lard Refinery, a building five-stories high, 380 feet long by 85 feet deep.

We have just finished painting the interior of the Chipping Platforms of our new Ice House at Round Lake, a building 400 feet long, by 40 feet high, by 60 feet wide.

Heretofore we have used whitewash, but find your Indeliblo gives much better satisfaction, and adheres to the finish a great deal better than any whitewash we have ever used.

In our Felt Works, which burned down a few years ago, the interior was painted with Indeliblo, and the windows were glazed with Wire-Ribbed Glass. The Wire Glass held the fire intact for two hours, and the timbers that were painted with Indeliblo were simply charred and not burned through.

We think it a first-class paint for factories, and will give satisfactory service to those using it. We are using it throughout our entire works.

Yours truly, ARMOUR & COMPANY.

D. J. SIMPSON, Purchasing Agent.

STORAGE AND SALE OF POWDER.

A NEW by-law has just been drawn up in Montreal intended to regulate the storage and sale of explosives. This will likely be presented before the city council shortly after the holidays, to be discussed, and, if right, adopted.

An interesting clause is that dealing with the storage of powder, in which it is stated that powder must be kept in iron carts, so that in the event of fire breaking out in the building it could be quickly wheeled into the street and out of danger by the firemen. With this end in view, the fire department must be informed as to where the powder is kept in the stores. An official will be appointed whose duty will be to keep watch over all places where there are any explosives stored.

The suggestion in regard to the storing of powder in carts is ingenious and sensible, and if adopted by those who handle explosives in other places as well might some time be found of practical value to themselves. The danger in storing powder in a place where it would be impossible or, at least, very difficult to remove it in case of fire is certainly great. It is surprising that more attention has not been given to the subject by both civic authorities and dealers in such goods, and that better means have not been devised for the protection of life and property, a great loss of which could hardly be prevented from following such an explosion.

GOOD TRADE SIGNS.

The bank clearing returns for the Dominion are of a most reassuring character, showing, as they do, an active business in the country. During May the total clearings were $212,593,555, against $169,651,783 the same month last year. This means that the clearings during May were 25.3 per cent. in excess of the same month last year, while for the five-month period they show an increase of 28.2 per cent.

As our readers are well aware, the bank clearing returns are one of the most reliable of our trade barometers.

It is also satisfactory to note that the failures in May were more satisfactory than for the same month a year ago, there being 20 per cent. less and the liabilities 37 per cent. smaller.

THE SECRET OF SUCCESS.

THE man who is to-day probably more in the public eye than any other is Lord Kitchener, who, as Commander-in-Chief of the British forces in South Africa, has brought about the much-desired peace.

The success of this man is due not to what might be termed genius. His predominating characteristic is common sense, backed up by a determined will which no obstacles can thwart. As a result of this common sense of his, Lord Kitchener is a determined opponent of red-tapeism, and he follows no set rule, but acts as emergencies demand.

A London journal a few days ago, in an article on this successful Commander-in-Chief in South Africa, said: "His usefulness lays in the faculty possessed in a remarkable degree of bringing an open mind unbiased by pre-conceived notions to the human problem before him. He will use the iron hand or the velvet glove exactly as the occasion requires. He was a Dervish to the Dervishes; he was a Frenchman to Major Marchand, and a Boer to the Boers."

Although a military man, Lord Kitchener has really been successful because he has employed what are practically business methods during the whole of his career.

A business man to be successful cannot afford to be prejudiced, neither can he allow himself to be influenced by traditions or by methods which might have been successfully employed by his father or grandfather. He must have the faculty of being able to act as emergencies demand. This is what Lord Kitchener did. And this is what business men do who are successful in their particular sphere.

THE IRON AND STEEL SITUATION.

THE iron and steel situation on this continent continues strong. The strike of the furnace men in the Mahoning and Shenango Valleys, to which reference was made last week, has been settled and the men are returning to work. There are thirty-three furnaces in the two valleys, and of these more than one-half were closed down on account of the strike. Although so many of these furnaces are again starting up, the price of pig iron in the United States is by no means any easier. On the contrary, the changes that have taken place during the past week have been in an upward direction, and there is still considerable scarcity. It is said that more business has already been done in the United States in pig iron for next year than has been done up to October first in any previous year, while some furnaces, it is claimed, are oversold for the balance of the year.

In Canada the demand still exceeds the supply, and, while quotations are $21 for No. 1 and $20.50 for No. 2 foundry iron on track Toronto, premiums on these figures are being paid in order to get delivery. It is claimed by the furnace men that even at these prices they are not making money on account of the high cost of wages, material and other incidental charges. As to what truth there is in this, however, we cannot say.

The scarcity of the pig iron in Canada is not because there is not the furnace capacity in the country; it is because the makers have not been able to secure the fuel in sufficient quantities to keep the furnaces going, it having been necessary to bank them down from time to time on account of the shortage in this particular. The shortage in the supply of fuel in turn was caused by the inability of the furnace men to get sufficient transportation to bring on the necessary coke. However, there is some improvement in this respect now, although it is said one railway, the Grand Trunk, is some 4,000 cars short, and has been unable to secure these because of the difficulty of getting pig iron from which to manufacture the wheels.

Advices from Connellsville say that the coke production in that district during the first week in June eclipsed all previous records, being nearly 250,000 tons. The same despatch also said that within the last month hundreds of new steel cars had been turned out of the shops.

It is evident, therefore, that the railways are getting into a better position to carry the necessary fuel to the furnaces. While this will relieve the pig iron situation to some extent, it must be remembered that there are still a number of small foundries in the United States which have not placed their orders ahead for pig iron, the chief purchasers who have anticipated their wants being the large consumers. This will obviously tend to keep prices steady for some time to come.

In Great Britain the demand for iron and steel on United States account has kept the prices up on these lines, and at present the market there rules steady.

A WARNING NOTE FROM BANKERS.

THE general tone of the 84th annual meeting of the Bank of Montreal, held on June 2, 1902, was decidedly optimistic. Both the general manager, Mr. E. S. Clouston, and the Hon. George A. Drummond, chairman of the meeting, referred to the numerous features in Canadian industrial life, which seemed to portend great things for the future of the country. The marked increase in foreign trade, the development of home manufactories, the activity in the carrying trade, the increased immigration, were all made subjects of gratulation.

However, both these gentlemen sounded a note of warning, which finds visible expression in probably the most significant portion of the bank's statement for the past year. While circulation and deposits show a healthy increase, and the general business of the bank is in excellent condition, it is worthy of note that the rest has been increased by $1,000,000. As an act of prudence under existing circumstances this increase is commendable. Reference was made by Mr. Clouston to the dangers of excessive speculation, which at present seems to threaten Canadian stockholders, and he warned investors to look carefully into the intrinsic value of the securities they purchased. Mr. Drummond commented on the yet unknown effects of the present centralization of capital, which problem economic theory has not yet solved, and drew attention to the fact that four new banks had been incorporated. On the whole, caution seemed to be the watchword of the meeting.

STEEL RAIL TRADE IN CANADA.

MR. F. H. CLERGUE, commercial magnate of the "Soo," was in Toronto on May 10. The steel plant established there is now in active operation, turning out 500 tons of rails per day. This, after Monday next, will be increased to 600. The company during the present season will supply the Government with 35,000 tons of steel rails.

They have Canadian orders booked to the amount of 100,000 tons. They are not making any foreign shipments; the Canadian business will keep them busy for some time.

Mr. Clergue stated that the American ironmasters were underselling the Canadian market to the extent of $7 per ton in the hope of killing Canadian competition.

The Dominion last year imported 2,514,785 cwt. of steel rails, valued at $3 329.919, for use on steam railways. For the past 10 months of the present fiscal year the quantity imported was 1,764,404 cwt., and the value $1,993,790.

NON-PHOSPHORUS MATCHES.

The United States Consul at Brussels under date of May 5, writes: "In 1898, an international competition for a paste for matches not containing white sulphur was announced, and a prize of 50,000 francs ($9,650) was offered by the Belgian Government to the inventor. The commission appointed to judge results has now declared that, after four years of careful experiment and analysis, it has been found that none of the products so far submitted fill the required conditions, being defective in inflammability, igniting on all surfaces, or, in igniting, ejecting inflammable matter containing some poisonous substances. The sum already expended in the matter amounts to 8,178 francs ($1,578.35). This covers cost of printing, correspondence with foreign countries, purchase of material, analysis and experiments."

BANK OF MONTREAL.

ANNUAL GENERAL MEETING.

THE eighty fourth annual meeting of the shareholders of the Bank of Montreal was held in the board room of the institution at one o'clock on June 2.

There were present: Hon. George A. Drummond, Sir William C. Macdonald, Messrs. R. B. Angus, A. F. Gault, E. B. Greenshields, Alex. T. Paterson, R. G. Reid, James Ross, Hon. James O'Brien, G. F. C. Smith, Donald Macmaster, K.C., F. E. Meredith, K.C., H. Dobell, George R. Hooper, Henry Spragge, Thomas Irving, B. A. Boas, George Filer, C. M. Holt, C. J. Fleet, G. A. Greene, M. S. Lonergan, A. E. Ogilvie, Bartlett McLennan, M. S. Foley, A. T. Taylor, W. R. Miller, J. B. Learmont, W. J. Morrice, Alex. McArthur, Huntley Drummond, W. H. Evans and John Morrison.

On the motion of Mr. John Morrison, Hon. George A. Drummond, Vice-President, was unanimously voted to the chair, in the absence of the president, the Right Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. B. A. Boas, seconded by Mr. H. Dobell, it was agreed: "That the following gentlemen be appointed to act as Scrutineers: Messrs. G. F. C. Smith and F. E. Meredith, K.C., and that Mr. James Aird be the secretary of the meeting."

DIRECTORS' REPORT.

The report of the Directors to the Shareholders at their 84th annual general meeting was then read by Mr. E. S. Clouston, general manager, as follows:

The Directors have pleasure in presenting the 84th annual report, showing the result of the Bank's business of the year ended 30th April, 1902.

Balance of Profit and Loss Account, 30th April, 1901		$ 764,703 19
Profits for the year ended 30th April, 1902, after deducting charges of management, and making full provision for all bad and doubtful debts		1,601,152 90
		$2,365,856 09
Dividend 5 p. c. paid 1st December, 1901	$600,000	
Dividend 5 p. c. payable 2nd June, 1902	600,000	
		1,200,000 00
Amount credited to Rest Account		1,000,000 00
Balance of Profit and Loss carried forward		$ 165,856 09

Since the last annual meeting a branch of the bank has been opened at Glace Bay, N.S., and suitable premises for its occupation are now being erected at that point.

The premises which were announced at the last annual meeting as in course of erection at Point St. Charles, are now completed, and occupied by the bank.

The head office and all the branches have passed through the usual inspection during the year.

STRATHCONA AND MOUNT ROYAL,
President.

Bank of Montreal, Head Office, 2nd June, 1902.

THE GENERAL MANAGER.

Mr. Clouston then said:—

There is nothing of unusual interest calling for comment in the statement we lay before you this year. It shows a steady increase in our business, and a corresponding increase in our profits. The following are the principal changes as compared with last year. Our circulation has increased $525,000, and the deposits $14,139,000, making our total deposits here and in other countries $86,825,633; quite a respectable amount, but still not large as compared to the deposits of banks with smaller capital in Great Britain and the United States. Our readily available assets have increased about $10,000,000, and our loans and discounts $4,360,000. The overdue debts, secured and unsecured, are $77,000 greater, but we believe that we have amply provided for any possible loss. The profits show an increase of $63,630, after paying all charges of management, all additions and repairs to our bank premises, and making provision for bad and doubtful debts. I think you will agree with me that the statement is a fairly satisfactory one.

Nor have I anything of importance to say on matters outside our own statement. Generally speaking, the past year has been a prosperous one for Canada, and so far the hand of the commercial barometer still stands at "fair." The revenues of the country are large; railway earnings are steadily increasing; farmers are prosperous; the outlook for lumber is improving, and the tide of immigration has set in with greater volume, insuring to Western Canada, and, indeed, to the whole country, more rapid progress in population and material prosperity. The natural resources of the country are being steadily developed; the output of coal is increasing; and it looks as if we were on the eve of important results in the iron and steel industry. There are indications also that the recent consolidation of Atlantic steamship lines by an American syndicate will compel Canada, in self defence, to take up the question of a fast Atlantic service, and if we wish to secure immigration, retain the traffic properly belonging to our own ports, and safeguard the interests of our commerce, we must see that the service, both passenger and freight, is second to none in speed and equipment. There have been exceptions, and some industries have not shared in the general prosperity, but these can, in most cases, be traced to undue competition and bad management. Mining in British Columbia is still highly unsatisfactory, and it may be some time yet before it recovers from the collapse of the last two or three years.

The stock exchanges of Canada have shown an activity unexampled in the history of the country, and though speculation has been rife, there has been a certain foundation for the advance in the quotations of securities, and it is not entirely the wild, reckless state of affairs that foreign critics profess to believe exists here. Still, there is danger of speculation being carried beyond legitimate bounds, and we have probably reached a point where investors and lenders would do well to look more closely into the intrinsic value of the securities they purchase or accept as collaterals.

If there are any questions relative to the business of the bank on which the

E. S. CLOUSTON.
General Manager.

Shareholders wish explanation, I shall be pleased to answer them.

THE CHAIRMAN'S ADDRESS.

Hon. George A. Drummond then said :

Gentlemen,—The statements presented by Mr. Clouston will, no doubt, be received by you with satisfaction, showing, as they do, the prosperity and progress of the bank.

That it has made substantial progress you may gather from the figures periodically submitted to you.

In 1873, when the capital was raised to its present amount of $12,000,000, and the rest stood at $5,000,000, the assets were about $35,250,000.

In 1880 they were nearly 45 millions ($44,661,681).

In 1890 they were over 46 millions ($46,166,448).

In 1900 they were nearly 79 millions ($78,852,197).

And in the present year over 100 millions ($114,000,000).

The keen competition among banks necessitates a greatly enlarged business to maintain dividends, and the public gets its financial business done much more cheaply now than formerly.

The increase of our rest by one million of dollars will, no doubt, commend itself to your judgment as a prudent step, and should enhance the value of our property.

The large addition to our Head Office Building, now in progress, was rendered necessary by the inconvenient overcrowding of our present premises. The addition is on a considerable scale, and will, it is hoped, suffice for the wants of the bank for years to come. Large as it is, however, it is not more in advance of our present wants than our present structure was when erected to the conditions then existing.

The beautiful facade of our present building will not be impaired ; but the interior will be remodelled to adjust it to the new premises and make it fireproof.

The marked increase in the general banking business of the Dominion is an evidence of the prosperity of the country. Since April, 1897, the total assets of all the banks have increased from $243,400,000 to $448,300,000 ; the deposits alone having risen from $196,700,000 in the former year to $339,000,000, and the note circulation from $30,800,000 to $50,700,000.

The Bank of Montreal has fully shared in the great improvement in business above noted, the general increase in the public deposits in the last five years being equal to 72½ per cent., and that of our bank alone considerably exceeds 100 per cent.

The conservative course of your directors in continuing to strengthen the resources of the bank will, I am sure, meet with your approval, for while the general prosperity of the country shows no signs of abatement, it seems an undeniable proposition to say that bad times may be expected sooner or later.

In commercial matters generally nothing is so striking as the growth of the foreign commerce of the Dominion. In the first nine months of the current fiscal year, that is to March 31, the aggregate foreign trade has reached $302,500,000, as compared with $282,300,000 in the corresponding period of the preceding year, while only five years ago our foreign commerce for the entire period of 12 months barely reached $249,000,000, a figure which in the fiscal year ending this month will probably be exceeded by more than 50 per cent. This expansion covers both exports and imports.

The most gratifying feature of the trade returns is the increased sales abroad of Canadian products, which from 1st of July to 1st April amounted in value to $144,547,000, and for the full period of twelve months will probably exceed $190,000,000 ; whereas six years ago the value of our shipments was only $110,000,000.

Products of the soil still constitute much the largest portion of this trade, but it is satisfactory to note that in manufactures the increase is about 30 per cent., or, as $12,800,000 to $9,800,000 ; and I need scarcely refer to the enormous activity in the production of iron, steel, nickel, etc., to say nothing of the extraction of the precious metals, which for the present is under a cloud.

Meanwhile the carrying trade of the country has been in an unprecedented state of activity and prosperity ; the great railways are spending liberally on track improvements and rolling stock to meet the demands on them, and new trunk lines are under construction.

Immigration is increasing rapidly, and will have a favorable influence in every direction. Lands, especially in the Northwest, which have for years been in little demand, have latterly been actively sought for and taken up.

Turning to general conditions outside the Dominion, the immense aggregations of capital in the hands of corporations and individuals is bringing about economic results of the most startling character. The control of railway lines, the absorption of ocean transport, the consolidation of industries, all fly directly in the face of economic theories based on unlimited competition, and he would be bold who attempted to predict the outcome.

No fewer than four new banks were incorporated during the present session of Parliament.

Questions of vital importance to ourselves and the Empire are to be considered by the Imperial Government and the Premiers of the colonies, at the conference to be held in London ; its decisions will be watched with absorbing interest and involve momentous possibilities.

The present moment seems to be most favorable for securing an independent line of steamships to a Canadian port. They should in speed and equipment be equal to any afloat, and the prospects of financial success for the undertaking were never, in my opinion, so bright as now, while its realization would be of enormous benefit to this country.

It is with the highest satisfaction and gratitude that we receive to-day the news of peace in South Africa.

Compared with the proud satisfaction we feel at having had a share in bringing the harassing and protracted struggle to a successful termination, all the sacrifices made by the country are trival. But the gratitude we owe to those who fought and bled for us will never, I trust, be forgotten. The glorious record of courage and endurance made by her sons has lifted Canada into a higher plane of national life.

The auspicious visit last autumn to this country of Their Royal Highnesses the Duke and Duchess of Cornwall and York was the occasion of the unanimous display of loyal welcome from one end of the Dominion to the other, and was happily marked by the absence of misadventure of any kind.

The approaching Coronation of our Gracious Sovereign will, we trust, be succeeded by a long and prosperous reign.

I move that the report of the Directors be adopted and printed for distribution among the shareholders.

THE REPORT ADOPTED.

Mr. A. T. Paterson, in seconding the motion for the adoption of the report, said that it was quite unnecessary to add anything to the remarks which had fallen from the chair and to the statement made by the General Manager, beyond stating that he entirely concurred in them, and endorsed them. There was one thing, however, to which he might refer, and that was that on that day he had come of age, not personally, but as a director of the bank, and he wished to take the opportunity of thanking the shareholders for their long continued confidence in him. He also wished to say that his many years' experience as a director enabled him most thoroughly to endorse the statements made as to the improvement in the position of the bank.

After a few remarks by Mr. John Morrison, the motion for the adoption of the report was unanimously agreed to.

Hon. James O'Brien moved :—

"That the thanks of the meeting be presented to the President, Vice-President and Directors for their attention to the interests of the bank."

This was seconded by Mr. Donald Macmaster, K.C., and having been adopted unanimously, was acknowledged by the Chairman.

Mr. E. B. Greenshields moved :—

"That the thanks of the meeting be given to the General Manager, the Inspector, the Managers and other officers of the bank, for their services during the past year."

The motion was seconded by Mr. James Ross, and the Chairman having added that he fully concurred in it, and thought it was exceedingly well deserved, it was unanimously carried, and was acknowledged by the General Manager.

Mr. George R. Hooper moved :—

"That the ballot now open for the election of Directors be kept open until 3 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time, and for that purpose only, this meeting be continued."

This was seconded by Mr. C. J. Fleet, and unanimously agreed to.

On the motion of Mr. John Morrison, seconded by Mr. A. F. Gault, a hearty vote of thanks was accorded the Chairman for his conduct of the business of the meeting, and he acknowledged the same.

THE DIRECTORS.

The ballot resulted in the election of the following Directors :—

R. B. Angus, Esq.
Hon. George A. Drummond.
A. F. Gault, Esq.
E. B. Greenshields, Esq.
Sir William C. Macdonald.
A. T. Paterson, Esq.
R. G. Reid, Esq.
James Ross, Esq.
Right Hon. Lord Strathcona and Mount Royal, G.C.M.G.

At a meeting of the new Board on Tuesday, the 3rd inst., the Right Hon. Lord Strathcona and Mount Royal, G.C.M.G., was reelected President, and Hon. George A. Drummond, Vice-President.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

THE creditors of The Ingersoll Metallic Mfg. Co., Limited, founders and brass bedstead manufacturers, Ingersoll, Ont., had a meeting on June 12.

The referee of The People's Heat and Light Co., Limited, Halifax, N. S., is advertising for claims.

PARTNERSHIPS FORMED AND DISSOLVED.

R. E. Gordon, lumber merchant, Arcola, Man., has admitted J. E. Jamieson.

SALES MADE AND PENDING.

Hill Bros., sawmill owners, New Denver, B.C., have sold out to a syndicate.

The stock of the estate of E. L. Knight, harnessmaker and dealer in trunks, etc., Hamilton, Ont., has been sold.

The stock of A. Snyder & Co., crockery and tinware merchants, St. Thomas, Ont., has been sold at 72c. on the dollar.

There will be a sheriff's sale of the real estate of The Mineral Products Co., Dawson Settlement, N.B., on September 11.

CHANGES.

The Sunlight Gas Co., Limited, Montreal, has registered.

Lemoine, Martineaux & Fils, contractors, Montreal, have registered.

J. W. Jack, stove merchant, Truro, N.S., is succeeded by J. E. Jamieson.

David Ross, sawmill owner, Whitemouth, Man., is succeeded by Ross Bros. & Co.

Ovide Amiot has registered for Oscar Amiot & Frere, wood and coal merchants, Montreal.

John F. Moder has registered for Charles Cushing & Co., harnessmakers, Mahone Bay, N.S.

FIRES.

K. B. Demill, blacksmith, Wellington, Ont., was burned out.

C. S. Cunningham, hardware merchant, Wellington, Ont., has been burned out.

STRIKE OF BOILERMAKERS.

The boilermakers of Inglis & Sons, The Bertram Engine Works, and Polson & Co., all well-known Toronto establishments, have quit work in sympathy with the striking boilermakers' helpers. The boilermakers number 70, their helpers about 160. The demand of the helpers is for a ten per cent. increase all around on day work, time and a quarter from 6 to 8 p.m., and time and a half after 8 p.m., with double time for repair work after regular hours. The employers consider the demand unreasonable. They claim they are now paying more than outside places with which they have to compete in tendering on contracts. If increase was universal no objection would be felt.

What's in a Name?

It all depends on the man or the concern back of it. A good name is worth much in business. It's one of the most valuable assets a business man can have. It's an asset that can't be measured by money value.

The Sherwin-Williams Agency

brings with it a paint with a name known everywhere for all that is good and true in paint. It brings with it a reputation for straightforward business methods—a reputation that has been gained by over 30 years of business life.

We are looking for wide-awake dealers everywhere whose good name we can help promote, whose business we can help increase.

We are particularly interested in establishing a Sherwin-Williams Agency in your town if we are not represented there now. We would like to show you what we can do to help you make good money out of the paint business, and if you will write asking for the "B-13" booklet we shall explain our plan in detail.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

CATALOGUES, BOOKLETS, ETC.

HARDWARE LISTS.

Jaffe & Sons, Manchester, Eng., are now sending out monthly lists of all English hardware lines. These are complete, and will be valued by all who are fortunate enough to receive copies.

CATALOGUE OF VISES AND HANDLES.

The catalogue of the Columbian Hardware Co., Cleveland, Ohio, manufacturers of vises and anvils, is a handsome booklet. It is printed on paper of superior quality, and contains steel engravings of the articles and their parts described therein. There is also a large engraving of the works of the company at Cleveland. This firm succeeds the Van Wagoner & Williams Hardware Co., and the Trenton Vise & Tool Co. The goods of these concerns have always been of high repute on account of their superior quality and this their successors are determined to maintain.

REGARDING THE $4 NOTE.

In connection with the request of the Montreal Retail Grocers' Association that the $4 bills now issued by the Dominion Government be withdrawn from circulation, it is interesting to know that, according to the statement of the Finance Department, there was at the close of last April in circulation $9,487,345 in $1 and $2 notes, and, however this combination be obtained, only $526,923 in $4 notes. To as high as $892,273 has the circulation of the $4 note risen within a year, and at that time the value of the smaller notes in circulation reached nearly $10,500,000.

CANADA'S CORONATION ARCH.

The grand triumphal arch, emblematical of the agricultural resources of the Dominion, and at the same time a demonstration of loyalty, is in Whitehall, opposite the bronze statue of James II., and below the Horse Guards. It is designed on unconventional yet decorative lines. The height is 56 feet, and the width 60 feet; the arched opening in the centre being 25 feet, flanked on either side by open octagonal features draped and festooned, the whole structure being capped by an open lantern with roof of crown formation.

In the centre of the structure and under the lantern the word "Canada" appears in large letters, and immediately over the arched opening are inscribed the words, "The Future Granary of the Empire."

An illumination scheme has been designed whereby the main features of the structure, as well as the mottoes, will stand out in bold and effective manner after dark.

The design is by Messrs. Walker & Ramsay, of Glasgow, the architects for the Wolverhampton Exhibition.

HALIFAX MERCHANTS DISCUSS HOLIDAYS.

THE Retail Merchants' Association of Halifax does not like the idea of having so many holidays. At a meeting of that organization, held on the evening of June 5, the consideration of the many public holidays coming together was the main business of the evening. A communication from the Halifax Board of Trade was received, asking the Association to send members to form part of a delegation to wait on the Governor and Mayor regarding the number of proposed holidays coming so close together. A. W. Reddan was the occupant of the chair, and W. E. Hebb was secretary.

A resolution was unanimously adopted setting forth that Thursday, June 26, and the afternoon of Friday, June 27, be recognized as public holidays, providing a programme of sports be provided, and that June 21 and July 1 be not observed this year. A resolution was also passed recommending that June 21 and July 1 be combined into one holiday, to take effect in 1903, the holiday to be on the latter date. June 21 has always been recognized there as Natal Day.

The association had a thorough discussion of the travelling auctioneer and pedlar grievance, and a committee was appointed to wait on the city council and ask that some means be provided for protection against these people.

The early closing committee reported having had much success in obtaining signatures to the early closing agreement and the law will soon go into force regarding the different businesses represented.

It was reported that a number of shops in the north end of the city were kept open all day Sunday, and the Mayor is to be interviewed on the subject. The membership of the association now numbers 150.

NEW FORGE COMPANY.

The Buffalo Forge Co. have recently applied for and obtained a charter to do business in Ontario under the name of The Canadian-Buffalo Forge Co., Limited, with $100,000 of capital fully subscribed. W. F. and H. W. Wendt, of Buffalo, owners of The Buffalo Forge Co. are the chief stockholders in the Canadian company. They are two of the provisional directors, the third being Geo. F. Burton, of Toronto. The head office will be Toronto, but the company will manufacture in the Niagara Peninsula.

PERSONAL MENTION.

Geo. Phillips, a hardware merchant of Havelock, Ont., was in Toronto this week.

"DAISY" CHURN

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

DOUBLE BALL BEARING FOR MACHINERY.

FOR years inventors have endeavored to discover something which would do away with friction. After a large number of tests, it is claimed that The Chapman Double Ball Bearing Co., of Canada, Limited, does away with 98 per cent. of it.

The Chapman double ball bearing, as shown in the cut, consists of placing an idler ball between each carrier ball in such a manner that it removes all cross

JUN 18 1902

Chapman Double Ball Bearing.

friction and insures a positive revolution of the balls under all loads and conditions.

For railway car bearings the Chapman compound type is used. This comprises the Chapman double ball bearing in combination with the standard car type of straight journal bushing, or sleeve bearing, requiring no changes whatever in the axle or shaft. This combination provides for the lateral or side movement due to inequalities of the tracks, or the "throw" of the car on the trucks, which is necessary for the successful operation of a car-truck.

The durability of the bearing has been demonstrated by running under 5,000 lb. pressure for two years and four months, about 10 hours for seven months, and about eight hours for the remaining 2 months, at a speed as high as 525 revolutions per minute, without the use of oil as a lubricant. No perceptible wear can be found of the cups, balls and cones. The Chapman double ball bearing has run in an electric motor 1,800 turns, and grinding machines, 16,000 turns per minute; also on an electric car, light and heavy wagons, paper calendar rolls, etc.

Mr. Henry Souther, M.E., for years mechanical expert in the testing department of Col. A. A. Pope's Bicycle Works, at Hartford, Conn., on Thursday evening, January 16, 1902, in the course of a lecture before the Toronto members of the Canadian Manufacturers' Association, in the rotunda of the Board of Trade, said: "I believe that by so-called frictionless bearings the greatest savings possible from any one element of transmission devices can be made. The Chapman type is the best as regards wear."

Under instructions from Hon. A. G. Blair, Minister of Railways, Mr. J. L. Muhlfeld, of Moncton, N.B., the superintendent of machinery and rolling stock of the Intercolonial Railway, visited Boston in March, 1902. After a thorough investigation, under date of March 17, 1902, he made a detailed report to Mr. E. G. Russell, the general manager of the system. He notes as advantageous features as compared with the present bearings, the following: A reduced friction, resulting in less power required to haul the equipment; less liability for failure and delay; less wear and tear on the parts; less liability and cost for renewals; no cost for oil, waste and labor for packing and lubrication; no dust guards required to be maintained; less stock in the way of repair parts to keep on hand at intermediate stations; no depreciation of axles on account of wear and tear on journals. On passenger-train equipment, the greatest advantage will be from the less liability for failure and delay to trains on account of the heating of the bearings; reduced friction will facilitate the prompt starting of the trains, and to make up lost time; less fuel consumption in the locomotive to handle the same tonnage, and the entire elimination of all cost for labor and material and inspection which is involved on account of lubrication. In freight-train equipment the greatest advantage will be the reduced friction, which will enable an increased tonnage to be hauled with the one train. In locomotive service, the greatest benefit will be from the reduced liability to the heating of the driver boxes and other journal bearings, and the consequent delay and expense."

A contract has been given by the Intercolonial Railway Co. to equip a whole train of passenger cars, including locomotive. A street car equipped with the bearing, which has run over 16 months by actual tests, has shown a saving of over 60 per cent. of power. The office of the company is at 39 Scott street, Toronto.

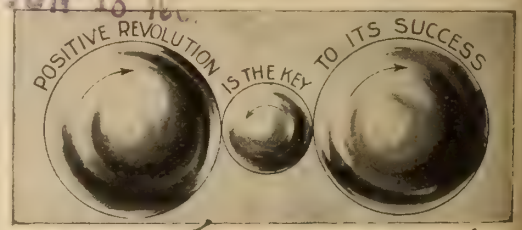
A $30,000 ELECTRIC POWER CONTRACT.

Despite the fact that the new electric motor pump will not be ready for operation till December or January, steps are already being taken by Montreal to get the electric contract ready. The contract will specify a period of five years. As about 400 horse power will be required, at about $15 per horse power per annum, an outlay of about $30,000 will be necessary. Thus, some of the electric companies of Montreal will secure a nice little contract.

At the meeting of the Water Committee the other day the matter came up for discussion. On the advice of City Attorney Ethier, tenders will be asked for. The committee are anxious to have the builders of the electric pump informed as to the exact nature of the connection to be made for the motive power. The aldermen do not wish to wait till the fall estimates are voted.

HAVE A NEW MANAGER.

Mr. J. Laishly, of Winnipeg, has taken the position of president and general manager of The Gas Engine Company, Limited, of Toronto Junction, and intends to increase their plant at once.



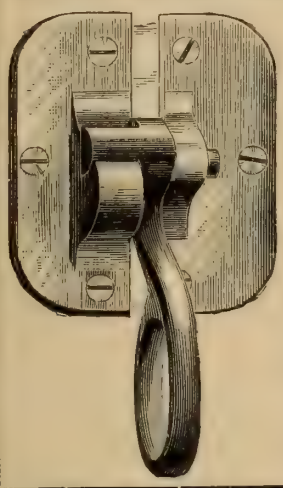
They have recently supplied McDonald & Co., brickmakers, Caulfield, Ont., with a 25 H. P. gasoline engine to operate a new brick machine made by H. C. Brandt & Son, Parkhill, Ont., and have found them to work successfully. With four men they now turn out the phenomenal average of 18,800 bricks a day, and have made as many as 20,400 a day.

This company are also equipping a 24-ft. launch for Mr. Fred. Addison, of P. W. Ellis & Co., with one of their 5 H.P. gasoline engines.

WILL EXTEND THEIR PLANT.

The Quebec Jacques Cartier Electric Company will extend their plant at Quebec within a few months at a cost of $170,000. They have awarded the contract for the installation of water-tube boilers and other necessary equipment to The Heine Safety Boiler Co., Toronto. These boilers are to be located in the new steam power house of the company at the extremity of St. Sauveur. The

JUN 18 1902



Chapman Double Ball Bearing.

steam engines will be supplied by The Robb Engineering Company, of Amherst, N.S. This whole plant will cost about $100,000 and will be used solely as a reserve steam plant, and kept in constant readiness for any emergency that may arise.

This firm are also building an arc light station in rear of the company's main building. The cost of this structure will be about $75,000, and it is expected to be ready for work by November next.

ELECTRIC CAR LIGHTING IN GERMANY.

IN Germany the methods of lighting railway postal and passenger cars have for some time been matters of considerable interest to the public, according to the advance sheets of the Consular reports issued by the Bureau of Foreign Commerce, Department of State, Washington, D.C.

Some time ago a railway accident occurred at Offenbach-on-Main, in which the wrecked carriages and imprisoned passengers were burned by gas escaping from a reservoir of the Pintch system. At that time electric lighting by the Bose accumulator system was in use on nearly all German postal cars and the stone electric apparatus had been installed as an experiment on an express train running regularly between Berlin and Cologne.

During the past 15 months the Prussian railway engineers have been experimenting with various forms of electric lighting. In an address before the monthly meeting of April 22 last of the Association of German Mechanical Engineers, Chief of Construction Wichert related the results of these trials to the members and representatives of the Imperial Railway Bureau and the Department of Public Works. Herr Wichert gave details of the experience of the Prussian Administration with the several methods of car lighting from candles to electricity, and then dwelt on the difficulties and advantages that had been found in practice with the different systems of current supply. Three methods were mentioned, by storage batteries charged at permanent stations, generators placed in each car and worked from an axle of its running gear, and a plant located in the baggage car and supplying the whole train by means of conductors connecting the different cars.

The dynamos located in each car, driven from the axle, and capable of a run of any length or duration would seem the ideal system. In addition to the dynamo only a small battery is required to feed the lights when the car is not in motion, and a regulator to equalize the current during the different rates of speed at which the train would run. The defects of this system are that the power it borrows from the axle, repeated in every car of a long train, considerably increases the heavy load upon the locomotive; a large space is occupied and much dead weight added by the dynamo regulator and accumulator; and there is always a jarring, grinding noise from the dynamo that very often annoys and awakens nervous passengers.

The Prussian Administration have carefully tested the second method, that of large storage batteries located in each car and fed from electric plants and terminal and other principal stations. It does not consume any power from the locomotives and does away with the noise and vibration of the first system. But storage batteries of sufficient capacity to carry a current supply for a long distance are heavy and costly, and the process of changing them at terminal and intermediate stations requires a special apparatus, and involves delay and technical difficulties that altogether much impair the working value of the system.

A compromise between these two systems has finally been settled by the Prussian Government. A steam-driver dynamo is placed on the locomotive under the control of the driver, and current is supplied from it to a small regulating storage battery in each car of the train. Thus an independent and separate lighting system is given to each car, the lamps being fed from its own accumulator, deriving its supply from the generator at the head of the train. According to Herr Wichert this is the most satisfactory system of all as it meets most perfectly the requirements of simple, economical and efficient construction, maintenance and attendance in regular service. On the Swedish express, a high-class vestibuled daily train between Berlin and Stralsund, the first practical tests in this method were made. It has proved so satisfactory that other trains are being equipped with similar apparatus and all appearances indicate, the State engineers feel confident, that they are on the right road to a system for lighting passenger carriages successfully and satisfactorily. In the distribution of lights, a ceiling lamp is given to each compartment in a first or second-class car, under control of the attendant, and four lamps on the sides that can be turned on or extinguished at will by the passengers.

The dynamos, conductors, storage batteries and lamps for this purpose have been specially designed by Chief Engineer Wichert and his associates, and this equipment is accepted as marking a definite epoch in the history of railway car lighting in Germany.

MACHINERY AND ELECTRICAL NOTES.

The Gee Electrical Co., of Colborne street, Toronto, report trade to be brisk. They have recently secured the contract for one 25 H.P. motor and one 8 H.P. motor for Lever Bros., of The Sunlight Soap Co. They have also a contract for one 8 H.P. motor for The William Davies Co., and besides this they have closed about one-half dozen other contracts.

The McLachlan Gasoline Engine Co., Limited, 201 Queen street east, Toronto, have just sold a gasoline launch equipped with one of their 2½ H.P. gasoline engines to James Keggie, of the Board of Trade Building, Toronto, and a 22-ft. gasoline launch, equipped with a 5 H.P. gasoline engine to B. D. Wood, of New Orleans. The latter vessel is handsomely fitted up with a canopy top, side seats, and Ostermoor patent cushions.

The Dominion Government have had one of The Jones & Moore Electric Company's new type direct-connected sets placed on their cruiser at Vancouver, B.C. A similar outfit is just completed on the Midland Queen, one of the Georgian Bay and Lake Huron fleet. The steamer Canada, to run from Owen Sound to Balmy Beach Resort, is fitted with a complete lighting outfit manufactured by The Jones & Moore Electric Company.

The Jones & Moore Electric Co. report sales of motors to The T. Eaton Co.; Toronto Lithograph Co.; Singer Manufacturing Co.; The Rocko Manufacturing Co.; Toronto Pharmacal Co.; Sexton & Co.; Strachan Bros.; Toronto Leather Goods Co.; Polson Iron Works.; Dr. Foster, C. E. Walker & Son, G. Bedford, Wm. Stock, of Peterboro'; Apostle & Montsateon, G. Pratt & Co., Sault Ste. Marie; Darling Bros., of Montreal; J. Shipton, Vancouver, B.C.

The Meteor Cycle and Electric Machine Company, King street, Toronto, are working on contracts for the renovating of the wiring and fixtures of the branch of the Imperial Bank at the corner of York and King streets, installing an electric wiring and fixture system in the premises of A. Clubb & Sons, King street west; the installing of electric wiring and fixtures in the building of The Canada Permanent and Western Canada Mortgage Corporation, 72 King street east: the putting in of wires, electric fixtures, electric bells, etc., in the house of Mr. Walter Clubb, at 38 Manning avenue: and the wiring and electric fixtures of two houses for John B. Smith, on Brunswick avenue. They have just completed equipping the steamer Montreal with annunciators, electric bells, wiring, etc., and the renovation of the annunciators, etc., of the steamer Kingston.

MOTORS AND DYNAMOS FOR YACHT LIGHTING.

"Hardware and Metal" is enabled to illustrate a new line of small power motors and generators lately placed on the

Small Power Dynamos.

market by The Toronto Electrical Works Co., Limited, 42 Adelaide street west, Toronto. This company has also placed on the market a small dynamo and storage battery outfit to be used on yachts for the ignition of gasoline engines. It furnishes not only light for port and starboard lights, but also a powerful searchlight and lights for the general illumination of the yacht.

A valuable feature is that the running of the engine has no influence on the availability of the light. No longer is a separate engine necessary.

The outfit is compact; it will be equally appreciated on a steam yacht.

The company has contracts for fitting out Fred. B. Fetherstonhaugh's gasoline yacht, Ed. Leadley's steam yacht; also in gasoline yachts for E. E. Smalley, Beaumaris, Ont., for J. M. Robertson, Tweed, Ont., and Wilbur Lawless.

MANITOBA MARKETS.

Winnipeg, June 10, 1902.

As far as prices are concerned the feature is an advance of 5c. in building paper and of 4c. in No. 8 copper rivets and of 2c. in No. 12. Crop conditions are favorable throughout the entire country. The fact that cooler weather has marked the end of the week is regarded with favor in grain circles, as it was feared that should the extreme heat continue the amount of moisture would make the growth of straw too rank, and delay the ripening of the grain. The growth made during the week is enormous, and the whole country looks beautiful. Having had so much rain in May farmers are hoping for a comparatively dry June. The sowing of flax and barley has practically been completed this week. Jobbing houses report good sales, but collections are still rather slow.

The price list for the week is as follows :

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire, 10	3 85

SOLD ONLY THROUGH THE WHOLESALE TRADE.

NOVA SCOTIA MARKETS.

Halifax, June 10, 1902.

THERE is the same to report this week with reference to hardware, as in every other line—business has slackened off considerably, yet the various dealers are all fairly busy and do not seriously complain. Orders are coming in regularly, though smaller than has been the case for the last two months. The spring business opened early and it is quite natural that it should ease off earlier. On the whole, the season's business will be quite up to the average, if not beyond it. The latter is claimed by the majority of dealers in both the wholesale and retail lines. Payments are being met quite as well as formerly, and business is evidently on a sound basis, both here and throughout the Provinces generally.

* * *

Though the foreign markets have been noted as making advances, and in some cases declines, the local quotations have, in most cases, not responded. In fact, the dealers are recognizing that to some extent these fluctuations are only nominal, and in the line of "stock market" changes. They generally wait until an advance or decline is clearly apparent. This is no doubt the principle on which the smaller markets should be gauged, and it has a tendency to strengthen business. The only notable change in the market to report is an advance in horseshoes of about 15c. all round. There has also been an advance in the primary market of 5c. a roll in sheathing papers, which, as yet, has not affected the local market.

* * *

The demand for large quantities of builders' materials is not so great now as it has been for some weeks, as the contractors generally bought their supplies for the greater part of the season in quantity, so as to get the benefit of trade discounts. There are, however, numerous small orders going out, which keeps business fairly active in this line. All kinds of paints and oils are still in demand, and the retailers are doing a fair trade with those who are doing small jobs of repairing and brightening up their premises. Screen doors and windows are now more in demand as the last week has brought us, if only for a day or two, the first signs of real summer weather.

* * *

Linseed oil and turpentine are still an unsettled feature in the trade. Reports come from the producers that the market price has advanced. Even at Savannah, where linseed oil dropped $4 a barrel some weeks ago, there is a call for even a greater advance. There is no change in the local market yet, but as small stocks only are available in both these articles, the price will, no doubt, soon advance, unless the reported advance in the primary market proves unwarranted.

* * *

The exports, which to a great extent denote the state of business here as well as give an idea of Provincial trade, are keeping up to the lead on previous years which we have previously indicated. For the last week the amount was $186,559. The several countries are represented as follows: Great Britain, $66,551; West Indies, $56,555; France, $23,127; United States, $21,275; Belgium, $7,453; Newfoundland, $6,498; Brazil, $3,000; Italy, $2,100. The exports from September 1, 1901, to date are $7,098,517 as compared with $6,430,750 in the same period of the preceding year.

R. C. H.

HANDY TOOLS.

Below are illustrations of two new and handy contrivances made by North Bros. Manufacturing Co., Philadelphia, U.S.A., the "Yankee" automatic drill No. 43, and the "Yankee" spiral-ratchet screwdriver, No. 31.

The "Yankee" automatic drill No. 43 is designed for the use of carpenters, cabinetmakers and others. It is for boring wood for various purposes, such as setting screws, brads, and nails. The drill is made to revolve by pushing down the handle, and a spring in the handle pushes it back in its place, the drill point revolving during the return movement and clearing away chips and dust. It is made of the best materials and highest workmanship, all parts, excepting the handle and spiral spindle, being nickleplated and highly finished. The tool is handsome as well as useful. It is made for three sizes of drill, 1-16, 1 5-64 and 3-32.

The "Yankee" spiral-ratchet screwdriver No. 31 is a heavy pattern of their No. 30. It is for use in carshops and other places where heavy screws are to be driven or drawn, and its length is 17½ inches when closed and 26¼ inches when extended. It is right and left handed, and rigid, and is highly finished.

POLSON WORKS' CONTRACTS.

The Polson Iron Works, Sherbourne street, Toronto, report a brisk business. At present they are building an 8 cubic yard dipper dredge for Mr. W. J. Poupore, contractor, for harbor improvements for Montreal, to be used in the Montreal harbor; also a ¾ cubic yard dipper dredge for the Dominion Government, to be used near Nakusp, B.C. The hull was built there and launched on June 2. They also have contracts for machinery for a marl dredge for The National Portland Cement Co., at Durham, Ont.

In the boat line they have just completed a steam launch for A. McDonald, bridge builder, of New York, to be used on the St. Lawrence.

At present they are building a steam barge for The Hudson's Bay Co., to be sailed from Toronto by way of the River St. Lawrence, to be used on the coast of Labrador. Besides, this firm has secured the contract from the Dominion Government for machinery for a sea going hopper dredge.

VICTORIOUS AMMUNITION.

The following letter received by The Canada Hardware Co., Montreal, will be found interesting and useful to retailers handling the goods referred to:

THE CANADA HARDWARE CO.:

GENTLEMEN,—Knowing that you and your salesmen are always looking for talking points, we take pleasure in reporting a few things accomplished with our ammunition during the past few weeks.

The great victories of our metallic cartridges continue. For the fifth consecutive year they have won the world's championship record. They are constantly winning other events also. For instance, last week, in the Telegraphic Match between 25 picked men from the Chicago Metropolitan Police Force and the same number from the St. Louis force, the St. Louis men won by 87 points, and they ascribe their good fortune to the fact that all but two or three of them used Peters' cartridges; only a little more than one-half of the Chicago team used our goods.

The record of Peters' loaded shells bids fair to be as brilliant as that of its metallic ammunition. Since we began loading Ideals and New Victors with King's, Du Pont, Hazard, E. C. and Schultz powders, the number of trap-shooters using our loads has greatly increased. The fine work accomplished not only by experts, but also by amateurs, has attracted widespread attention.

In the Grand American Handicap Tournament (live birds) at Kansas City, Charles G. Spencer won the second place in a field of 454 entries. He scored 89 consecutive kills, shooting four days without a miss. Fifty-two shooters used Ideal and New Victor shells in this event. The same ammunition won the State Trophy at the Kansas State Tournament last month; also the first six averages, excepting part of the first at the Peru, Indiana, Tournament, and high averages without number everywhere. The Grand American Handicap Target Tournament, Interstate Park, L. I., May 6 to 9, was the last scene of special success. In the preliminary handicap 26 out of 93 contestants used Peters' factory-loaded shells with the various powders. Out of 20 prize-winners 11 using Peters' shells were in the money, including the winners of the first and second, tying for the third and fourth, or four out of the first six prize-winners. In the Grand American Handicap nine out of the twenty-one prize-winners used our shells, including winners of the second, third and fifth. The Consolation Handicap on the third day resulted in another victory, Peters' ammunition winning the cup; a total of two out of three of the big handicaps. In these three events one-half of the prize-winners used Peters' ammunition.

At the Natchez, Miss., Tournament recently, Walton, Sessions and Wilson won the trophy, using our loaded shells.

We could give you a very long list of recent victories, but the above, we believe, will be appreciated and put to best use. Shall be pleased to write a similar letter to each of your salesmen if you will give us name and address. Now is the time to use it and the result will be—orders. The retail dealer and his clerks want all these pointers. Thanking you for past favors, and hoping we may help you to largely increase your trade, we are,

To the Trade:

We make the best selling line of high-class Silverplate that is sold in Canada. This is rather a broad assertion, but we contend that it is strictly in accordance with the facts of the case.

An order placed with us will not only prove to you the truth of our claim but will also demonstrate to you the money-making properties of

SILVERWARE THAT SELLS.

Our motto has ever been **EXCELSIOR,** and our aim to produce as fine goods as are made anywhere.

The articles shown here are some of our new goods, our own original designs, and are, we think, as high-class goods as are made. We trust that you will agree with us when you see them.

The base metal of all our goods is a specially prepared hard white metal and is, we believe, the hardest and best Britannia Metal on the market.

Write for our Catalogue—it is worth having.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, June 13, 1902.

HARDWARE.

THE situation in the hardware trade as well as in other lines of business, in Montreal, is somewhat brighter than last week, though in comparison with former years the market is not as active as it might be, owing in a measure to the cold, rainy weather. The settlement of the three or four strikes, however, has had a good effect on business. Building contracts can now be taken with assurance of their being carried out, and operations are in rapid progress. The manufacturers are all busy, many of them having difficulty in keeping up with the demand. Chisels have advanced this week. The discount on socket firmer, socket framing, socket corner and carpenters' slick is now 67 per cent. instead of 70 per cent. Paring chisels are now discounted at 12½ and 5 per cent. instead of 20 per cent.

SCYTHES.—There is a fair movement in scythes this week, although the trade has been in most places well supplied. The prices here quoted are unchanged from those of last week. They are as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

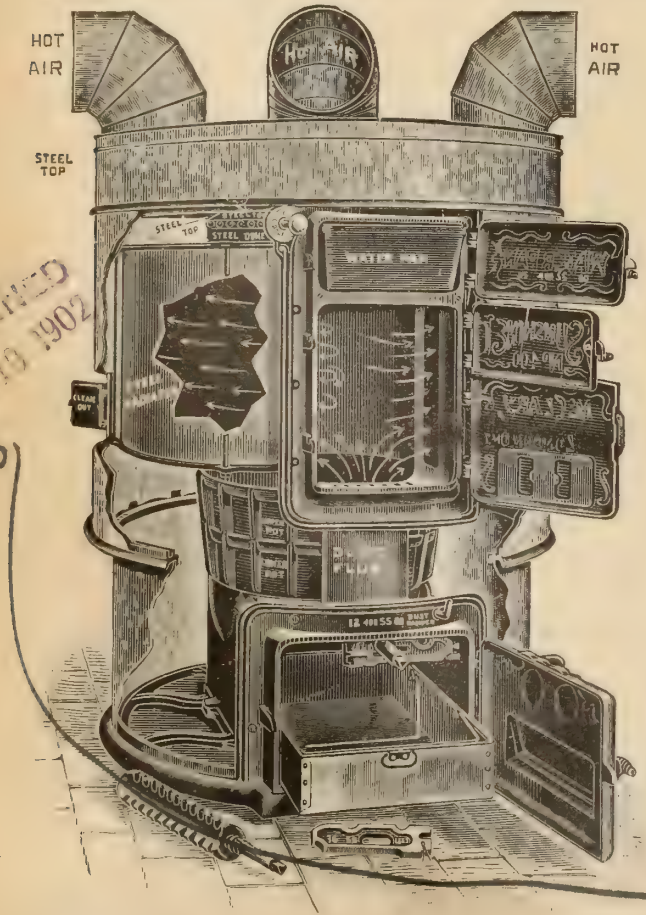
BARB WIRE.—There are a few orders still coming in, and the price per 100 lb. f.o.b. Montreal is $3.

GALVANIZED WIRE.—Business in galvanized wire is still quiet, and sales are made at unchanged figures. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The inquiry continues light, and the market is quiet but steady. Quotations are as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is little doing in fine wire. Discount, 22½ per cent.

BRASS AND COPPER WIRE.—Trade in these lines is still quiet. Discount, 60 per cent.



FENCE STAPLES.—A few orders have been received for staples this week, but the trade throughout the country is now fairly well supplied. The price of bright staples is $2.90 per 100-lb. keg, and galvanized, $3.25. For 25 and 50-lb. packages, 25c. extra is charged.

WIRE NAILS.—The market for wire nails is in a fairly active condition, and the price is $2.25 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a good demand for cut nails at the prices here quoted, and the market is quite active. In small lots the price is $2.45 per keg, and in carlots, $2.37½ per keg. The discounts on coopers' nails and flour barrel nails is 40 per cent.

HORSE NAILS.—Jobbers report but a light inquiry for these, the season's active trade being about over. Discounts follow: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—The market is not active. The combination of manufacturers came to an end last week and each is making his own prices. These, however, have been well kept up so far and no change is yet in sight. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller,

Cut Shows—Double Feed Door, Sectional Fire Pot, Action of Fire, Dust Flue, Ash Pan, Water Pan, Section of Grate and How it is Removed, Galvanized Casing with Flat Cap and Pipes off Top.

SUNSHINE is the most profitable furnace for

U to handle, because it

MIDLAND, ONT. Limited

$3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is an active movement in screws this week. No quotable changes have been made. Discounts are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—The demand for bolts and nuts keeps up and a good business is being done. The discounts are now as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—An advance in dry and tar sheathing of 5c. was made last week. At the new figures the market is firm and quite active. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 15c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Business in rope is rather quiet this week. The demand for hay-fork rope will soon commence. In binder twine, supplies in manufacturers' hands are becoming light. No advance, however, is anticipated at present. Quotations are as follows: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—In this market there is a moderate trade doing. No change has been made in the discounts: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is still a good demand for this, although the heaviest portion of the trade is over. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—There is a good trade doing at unchanged prices. Canadian or English are discounted as follows: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—Business in har-

More **Elastilite Varnish**

sold up to date this year than during any previous twelve months since we introduced it. "Reason?" There never has been, there is not now, and we doubt if there ever will be a Varnish put up, either by domestic or foreign makers, equal to ELASTILITE for the same money.

In tins only, from ½-pints to 1 gallon.

MANUFACTURED ONLY BY

The Imperial Varnish & Color Co. LIMITED

Toronto, Ont., Canada.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

The Reason . .

a great many hardware merchants are not making the paint end of their business pay is because they have been working on a cheap line of goods.

No real, good house paint, backed by a guarantee such as ours, can be sold for one cent less per gallon than

"Ark Brand" Paint

and yet, while we claim "Ark Brand" to be good value, we cannot say it is cheap. Stock a paint that will increase your trade.

EVERY CAN GUARANTEED.

THE **FRANCIS-FROST CO.** Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

vest tools is brisk this week. The discount is still 60 per cent.

FIREBRICKS.—There is a fair demand for firebricks on this market. The price of English is $16 to $22, and of Scotch, $17 to $22 per 1,000.

CEMENT.—Since the decline of last week no further change in price has been reported. The demand is more than fair. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The metal market is active and prices in most lines have been steadily held. It is expected that the termination of the war will bring on an increased demand for iron and steel, though it will be difficult to meet this if the present local demand keeps up. The English metal market, in some lines, has lost its firmness. Canada plates are being offered at considerably reduced prices, and pig lead is quoted 2s. 6d. lower. Sheet zinc and spelter, however, have advanced. Locally, the only change to report is in pig tin, which is quoted higher.

PIG IRON.—The market continues firm at the figures here given. The inquiry keeps up, but it is difficult to secure deliveries. Canadian is quoted at $18.50 to $19, and Summerlee, at $21.50 to $22.

BAR IRON.—Trade is active. Some irregularity in bar iron was reported, the largest producer holding prices above the independent mills. This, however, is expected to soon be remedied. The price of merchants' bar is $2, and horseshoe iron, $2.20.

BLACK SHEETS.—There is a moderate inquiry for black sheets. No quotable change is to be reported. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market continues active. Prices quoted are unchanged. They are: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There is a firmer feeling in the local market and some dealers are looking for an advance. At the present price of 14c. there is a fair trade doing.

INGOT TIN.—The demand for ingot tin is increasing. Trade this week has been fairly good. The price of Straits has been advanced ½c., and is now 33½c.

PIG LEAD.—Locally, there is only a light inquiry. On the English market a decline took place of 2s. 6d., but the price here is still $3.25.

LEAD PIPE.—There is a good, steady movement in lead pipe at unchanged prices. Composition waste is sold at 7½c., and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—Trade is brisk. No quotable change has been made. We quote as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There appears to be some scarcity of these on the local market. The demand, however, is not great. Charcoals are now quoted at $4.75 to $5.25 per box, and cokes, at $4.25 per box.

CANADA PLATE.—The English market for Canada plate has shown considerable weakness, and further declines are reported in the price. On this market there has been no important change. Our quotations follow: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—The market has been steady under an active demand, and our quotations are now as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—The inquiry continues fair and no change in price is reported. Our quotations are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The market remains very quiet. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—There has been some inquiry this week, and a small amount of business was done at $7.50.

COIL CHAIN.—The demand for chain has not improved and the market remains quiet. Our quotations are as

follows : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.95 ; 9-16, $3.85 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—This has advanced on the English market about 10s. Locally, the price is $5.85 to $6.25, with a quiet trade.

ANTIMONY.—There is little doing. We quote 10c.

ZINC SPELTER.—The market is quiet and unchanged. An advance is reported on the English market. The price here is 5c.

SOLDER.—Wire solder sells for 20c., and bar solder, 18c. A good steady movement continues.

PAINTS AND OILS.

Turpentine and linseed oil are still quoted at the same figures this week. The market for turpentine has kept firm, both locally and in the South. Shipments of linseed oil have not arrived in any large quantity, and supplies on hand continue light. Nothwithstanding this, there is a much easier feeling in oil, in sympathy with the English market, and the opinion obtains that the next change made will be a reduction in the price, if anything. The scarcity of linseed oil is the only feature of the market which causes any check to the brisk trade. Paris green continues to be shipped in increasing quantities. There has been no advance in the price, but there is, at the least, no inclination to shade the schedule figures for quantity orders. Red lead, litharge, orange mineral and all their products are moving out steadily at firm prices. There is some shortage in dry white lead which is hampering grinders to some extent. A certain amount of cutting is reported in varnishes, which seems to be very unwise, in view of the high cost of turpentine and gums. Painters are all very busy, and a first-class workman is hard to get. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 84c.; boiled, 87c.; In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

Experienced Builders VALUE

EASTLAKE SHINGLES,

Galvanized or Painted,

because they are easier and quicker applied, last longer, and give better protection than others.

Experienced dealers are doing a big business in these reliable shingles. They satisfy the requirements of those who want permanent fire and lightning proof roof protection that withstands all weather conditions and is economically trustworthy.

We would like you to realize the practical value of all our many lines of metal building materials and architectural requirements.

One thing sure, you hear no after complaints from customers when you sell our lines—they are of uniform reliable quality. Have You Our Catalogue?

The Metallic Roofing Co., Limited,

TORONTO. MONTREAL. WINNIPEG.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The position of scrap metals is practically unchanged. There is a fair trade doing. There has been no further reduction in the price of iron, which, however, is easy at present figures. We quote as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

GLASS.

There is very little doing. We quote as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

The market is quiet. Calfskins show the only change in price, having declined 1c. more. We quote : No. 1 hides, 8 to 9c.; No. 2, 7c.; No. 3, 6c. No. 1 calfskins, 10c.; sheepskins, 70c.; lambskins, 15c. per lb.

MONTREAL NOTES.

No. 1 calfskins are 1c. lower.

Ingot tin has advanced ½c. for Straits.

Chisels have advanced from 3 to 7 per cent.

Dry sheathing building paper and tar sheathing are 5c. higher.

ONTARIO MARKETS.

Toronto, June 13, 1902.

HARDWARE.

THERE is still a steady business doing in hardware and trade is gradually shifting more toward harvest tools, including scythes, scythe-stones, grindstones and other lines that the farmers require for the season. There is every indication of a large crop of hay, and so the demand for scythes, snaths and cradles will be heavy. The woodenware manufacturerrs have advanced their prices 10 per cent. on some lines, such as step ladders, towel rollers, rolling pins, pastry boards, sleighs, etc., and the appreciation in prices of cast hardware of Canadian manufacture noted last week has been maintained. This advance is placed on the higher prices of raw material and labor. There has also been an advance of ½c. in cut lengths of lead pipe, and fittings of soil pipe are now being quoted at the same prices as the pipe.

BARB WIRE.—There is a good sorting trade being done in barb wire, and the prices are unchanged. We quote : F.o.b. Cleveland, $2.77½ for less than carlots and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—Business in this line is also good. Advices from the United States say that the demand there is much better. Quotations are : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—In all kinds of smooth steel wire the business doing is brisk. We quote base price at $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Mont-

real, with freights equalized on those points.

FINE STEEL WIRE.—The trade doing is fair, and the discount is still 22½ per cent.

WIRE NAILS.—There is still a steady demand and the prices remain as they were last week. We quote $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque, and Montreal.

CUT NAILS.—There has been no improvement in the demand for cut nails, but only a few smaller sizes are being called for. The base price is $2.45 per keg and 7½c. less for carlots.

HORSE NAILS.—Trade is picking up. The makers are claiming that the prices are too low and should advance. Discounts follow: "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—In horseshoes there is a fair trade still being done. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—Trade has improved, but the lightness of stocks on hand makes it hard to fill orders. The discounts are now as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—The active demand for rivets and burrs makes it impossible to keep sufficient stocks on hand to fill orders. Our quotations are now as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand is still good, but the market is bare of supplies owing to the scarcity of raw material. Quotations follow: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—A good sorting-up business is springing up and orders are coming in from all directions. We quote: Common doors, two or three panel, f.o.b. factory points as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—There is in green wire cloth a steady sorting trade being done. Our quotations are unchanged at $1.37½ per 100 square feet.

SPADES AND SHOVELS.—There is merely a small sorting-up trade being done. The discounts are 10 and 5 per cent.

ROPE.—Business in rope is starting up nicely, especially for hay fork sizes, and trade in this line should this year be very large. We quote as follows: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—We quote: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—Trade is good in eavetroughing this week. Quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

HARVEST TOOLS.—Evidently the trade feel that it is good to have a heavy stock of harvest tools on hand for business has been good this week and the sorting orders are larger than usual. Orders in "D" handle goods have not been filled yet by the manufacturers. The discounts remain at 60 per cent.

BUILDING PAPER.—The trade doing has been steady. Quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—There is a larger demand for lawn mowers than jobbers can supply, and the factories are still behind with their orders. Discount is 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

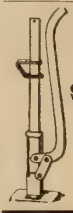
HARVEST WHIPS.—There are some being sold, but trade has not yet quite started.

POULTRY NETTING.—There are a good many orders coming in and the prices are unchanged.

TINWARE AND ENAMELLED WARE.—Trade in this line is good and the prices are steady.

SPORTING GOODS.—There has developed quite a trade in ammunition, and some early orders for guns have been received. There are a good many loaded shells being shipped all over the country.

CEMENT.—The strength of the cement market is still a feature. Trade is now active, and manufacturers are busy. We quote as follows: Canadian Portland, $2 to $2.85; Canadian hydraulic, $1.35 to $1.60; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl.



METALS.

The local condition of the general metal trade continues satisfactory, the demand in most lines being well maintained. The feature of the outside market this week was the sharp advance in New York of spot tin, owing to the limited offerings there. The demand was light, but urgent. The weakness in the London spot tin market still prevails.

PIG IRON.—The situation is unchanged from last week, the difficulty of obtaining deliveries still being felt. The market is strong and unchanged. In the United States there have been some slight advances. We quote on track, Toronto: No. 1 foundry, $21; No. 2, $20.50.

STEEL BOILER PLATES.—These continue scarce and wanted. Quotations are $1.80 for carload lots on track, Toronto.

W. L. Haldimand, Jr., Montreal Agent.

STEEL BEAMS—There is an active trade being done in this line, and the market is strong. Our quotations are, from stock, $2.75, and carloads on track, $2 per 100 lb.

STEEL RAILS—We continue to quote steel rails of Canadian manufacture at $36 per ton. The Clergue works next week are increasing their capacity to 600 tons per day.

TOOL STEEL—The demand is good, and although there is a fair supply, stocks in this line are lighter than they were. Prices are steady and unchanged. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

SPRING STEEL—The demand is active. New quotations will probably be out July 1, and are likely to be higher than those at present ruling.

MILD STEEL—This line, next to boiler plates, is the scarcest article in the metal trade.

BAR IRON—The deliveries in this line are still slow and it is almost impossible to get supplies of raw material. We quote $1.95 to $2 05 base. Extras cut to length while rolling; 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft. 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS—These have been active during the week. Quotations follow: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—The demand for Canada plates is starting to set in. Our quotations are as follows: Al dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — The stocks are light and the demand is good. Quotations in case lots are as follows: Queen's Head, $4.50 for 28 gauge; American, $4 40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN—There has been some business in small lots doing. Outside prices in the United States have been advancing this week, but the weakness of the London market has become more pronounced. Quotations are $33 to $34 per 100 lb.

TINPLATES—There is a fair amount of business being done in tinplates, with rather more inquiry. We quote: Charcoal, $4.75 to $5 per box, and cokes $4.25 per box.

COPPER—A fair amount of business is being done in ingot copper, and the prices are the same as last week. We quote: Ingot at $14 per 100 lb., and sheet copper at $22 to $23.

BRASS—In this line there is a better trade being done. The discount is 15 per cent.

PIG LEAD—The demand for pig lead continues to improve. We quote as follows: $3 50 to $3.75 for pig and $5 for bar lead.

IRON PIPE—The trade doing is still good and prices are unchanged. We quote per 100 ft.: ¼-in., $2.40; ⅜ in., $2.65; ½-in., $2.85; ¾-in., $3 65; 1-in., $5.20; 1¼ in., $7.35; 1½-in., $8 95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

ZINC SPELTER — Trade in this line is quiet this week. Quotations are $5.50 to $6.

ZINC SHEETS—These were fairly active during the week. Quotations follow: Cask lots, $6 to $6.25, and part casks $6.25 to $6.50.

SOLDER—A fair amount of business is being done at unchanged price. We quote: Half-and-half, guaranteed, 20c.; do. commercial, 19½c.; refined, 19c.; wiping, 18½c.

ANTIMONY—The trade doing continues fair. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The market this week is without any particular features. No changes in prices have occurred, and the scarcity of raw and boiled linseed oil is still felt, though not so acutely as last week. A lull in the wholesale trade is being experienced after an unusually busy May, during which much stuff was sold and delivered to outside points. White leads are still active, and turpentine continues firm and unchanged. Paris green is quiet, very few orders being received. Liquid paints are still moving to a considerable extent, and the demand for putty is fair. Owing to some cause hard to define our quotations of raw and boiled linseed oil last week were quoted 1c. too low, and we hasten to make the required correction. We quote as follows:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2 40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 84c.; boiled, 87c.; 3 to 5 barrels, raw, 83c.; boiled, 86c.; 6 to 9 barrels, raw, 79c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 73c.; 2 to 4 barrels, 72c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a shortage in stocks and no immediate prospect of this being relieved. The demand is good and the prices are unchanged. The shipments of glass from Europe are now due and ought to be heard of in a few days. Quotations follow: Under 26 in., $4.45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The trade during the week has been a little better and the market is steady. We quote: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The market continues steady and the prices are unchanged. Quotations follow: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8 to 8¼c.

SKINS — Sheepskins are unchanged in price and the season for long-woolled skins is about over. Lambskins and shearlings are plentiful. We quote: No. 1 calfskins, 10c.; and No. 2, 8c; deacons (dairies), 60 to 70c. each; sheepskins, 80c. to $1; lambskins, 20 to 25c.

WOOL—The weakness in the wool market continues without relief and trade is stagnant. Fleece wool brings 13c. and unwashed 7c. per lb. f.o.b. Toronto.

TALLOW—The scarcity of tallow continues and the prices are unchanged at 6¼ to 6½c. per lb.

COAL.

The continued trouble amongst the hard coal miners in the United States has resulted in all quotations on hard coal being withdrawn, and the dissatisfaction amongst the soft coal miners has resulted in an advance of from 50 to 75c. per ton in that commodity. We quote at international bridges: Soft coal, $3 to $4 per ton.

PETROLEUM.

Business continues steady and the prices are unchanged. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Some lines of woodenware have appreciated 10 per cent.

The list prices of cut lengths of waste lead pipe have been advanced ½c.

H. S. Howland, Sons & Co. are in receipt of a shipment of "Storm King" barn-door hangers and tracks, after experiencing considerable difficulty in getting the manufacturers to fill the orders promptly.

The Humphrey Plating and Hardware Co. is a new concern that is starting business at 364 Queen street west. They placed their first order this week.

All quotations on hard coal at the international bridges have been withdrawn, and the prices of soft coal have advanced 50 to 75c. per ton, owing to the labor troubles at the mines in the United States.

PLUMBING AND HEATING CONTRACTS.

McGuirk & Co., plumbers, Toronto, have the contract for the plumbing and draining of the new stables of The Canadian Express Company.

The John Ritchie Plumbing and Heating Co., Limited, Toronto, have just finished their plumbing work on the new buildings of The Grant-Hamilton Oil Co., on Strachan avenue.

Guest & Co., plumbers, Toronto, have the contracts for the plumbing of houses on Lee Grove for Messrs, Clayton, Worths, Sellars, Jupps, Lougheed and Johnston ; two houses on Beech avenue for A. J. Russell Snow ; a house on Hammersmith avenue for Mr. Jordan ; a house on Waverly Road, for the Rev. Mr. Dingham, and a house in Kew Gardens for Mr. Williams ; the gas fitting of a house on Beech avenue, for Mr. Alexander, and a house at Balmy Beach, for Mr. Snyder ; the plumbing of a house on Tyndall avenue, and one at Island Park, for McDonald & Wilson, and the plumbing of a house on Lee avenue, for James Gunn.

The John Ritchie Plumbing and Heating Co., Limited, Toronto, have many contracts. Among others they are working on the plumbing and heating in connection with the alterations on the Union Loan Building, on Toronto street ; the plumbing of a stable on Bloor street east, for P. Mason ; the hot-water heating of a residence on Queen street west, for C. Boeckh ; the plumbing of the National Hotel, on the corner of Sherbourne and King streets ; the plumbing work on a pair of houses on Withrow avenue, for Frank Hillock ; the plumbing, gas and hot-water heating of a residence on South Drive, Rosedale, for Hugh Munroe ; the plumbing on a house on Wellesley street, for R. J. Christie ; the plumbing of a dwelling on the corner of Concord and Dewson streets, for W. J. McClure, and the plumbing of a house at the corner of Downey and Laxton streets, for John Laxton.

BUILDING PERMITS AT OTTAWA.

DURING the week building permits to the aggregate value of $10,900 were issued in Ottawa to the following : Mrs. Lowham, for a brick-veneered dwelling on Patterson avenue, to cost $2,000 ; Consumers' Electric Co., for a storehouse on Maria street, for $200 ; James Maloney, for a brick-veneered shop and dwelling on Rideau street, for $1,200 ; Wm. Shaw, for a brick-veneered dwelling on McLeod street, for $2,400 ; G. L. and M. Orme, for alterations to block on Wellington street, for $1,500 ; W. A. MacFall, for a brick-veneered dwelling on Archibald street, for $1,000, and S. J. Davis, for two brick tenements on O'Connor street, for $2,600.

PLUMBERS AND ASSOCIATIONS.

Editor "Hardware and Metal" :—Association in its bearing on the plumbing trade, is to the master men to-day what the Guild of Plumbers was formed for in historic London long before the Elizabethan era, and which recently dazzled the world by the introduction to its membership of Mr. Andrew Carnegie. That event alone imposed on those bookless towns, that invited his munificence the obligation of performing the plumbing work in its interior and exterior finish, so that the pride of the citizen may be, that his health and his mind are so provided for, that he has bright chances of becoming mildewy with age.

Where Mr. Carnegie has not been given the chance to improve the obligation, it is the duty of the Master Plumbers' Association to ask why the rate of mortality is so high. We have the talented medical society to stop it, yet it continues, though they have the auxiliary aid of an enervating climate. Many blame the summer heat for incubating pests that "millionize" every second ; true, and we have to have winter to destroy them. Heat, then, is generative of life in its myriad form. Take away the object that is focussed and you have unadulterated warmth which is God-given and wholesome.

Don't blame the climate then. Winter is the only life preserver we have. It is the nation's scavanger.

But if we desire to populate we must reduce the mortality rate. God helps those who help themselves. Are we doing our share ? Look around and see.

H. A. KNOX.
Secretary N. A. M. P.

Ottawa, June 3, 1902.

CALCIMO AND MURALO.

AN interesting lecture was given by Prof. P. W. Nelson before painters and decorators of Montreal the other evening, on the "Muralo" and "Calcimo," manufactured by The Muralo Co., of New York. A. Ramsay & Son, agents for these decoratives, sent out the invitations, and are also introducing Prof. Nelson to Toronto and Hamilton audiences.

The lecturer was a thorough master of his subject, and in his practical demonstrations of the effects that could be produced by "Muralo," he was heartily applauded.

Speaking first of the "Calcimo," he showed its advantages over other kalsomines. The glue used in it was of the most superior quality, and would dissolve easily in cold water, thus saving all the time of making hot water. It would also cover much more surface than the ordinary kalsomine ; in fact, it would "do anything a first-class kalsomine would do, and do it in a better way." Another superiority it possessed over some other kalsomines was that it could be worked in any weather, hot or cold. Some goods, in hot weather, needed ice to make them jell. This was not the case with "Calcimo," and it could also be worked at a freezing temperature as well as at any other time.

The effect of the "Muralo" was much admired by the audience. The lecturer produced some handsome specimens of work in sight of his hearers, in a manner that reflected much credit, both on himself, as an artist, and on the medium he was using. The raised work done with "Muralo" is certainly beautiful, and when one sees it one does not wonder at the enormous sale it has. The raw material for this preparation comes from Nova Scotia.

Several specimens of work done by the "Calcimo" and "Muralo" were passed through the audience, and were much admired by all.

If You Desire

to strengthen your paint business, it is always well to carry in stock a few genuine leaders that will eclipse anything of their kind on the market. It's one of the best ways you can build up a reputation for your store.

We believe that we can help you specialize in this way profitably, and would like to interest you in the famous Lucas Greens, the acknowledged standard of Greens for upwards of 50 years.

Lucas Greens

are clear, fresh, brilliant, and unexceptionally the best in fineness of texture, body, or covering capacity and durability. They're acknowledged as the "Old Reliable" throughout the United States, Canada and the West Indies.

Beware of counterfeits. None genuine without the Lucas brand stamped in the head of every package. Dry and in Oil.

Made in large and small sizes. Write for catalogue.

THE THOS. DAVIDSON MFG. CO., Limited

General Agents, MONTREAL, CANADA.

HOW MUCH DO YOU SAVE? ONE CENT!

If you buy the best Horse Nails, they will always have our name in full on each box and registered trade mark, the Gothic letter "C."

In Ontario, Quebec and the Maritime Provinces the retail price for "C" brand on the average size, No. 8, will be two dollars and seventy-five cents ($2.75) per box of twenty-five (25) lbs., or eleven (11c.) a pound. One pound of this size is sufficient for three full sets of shoes, and therefore the average cost of the thirty-two (32) nails used in a set of shoes is, say, four (4c.) cents. Understand that this procures the best Nails made in Canada: that are fully guaranteed; will drive easiest, last longest, and do what any other horse nails made in the world will do under the same conditions.

How much is the Farrier going to reduce his cost by shoeing with lower-priced nails? Assume he buys (as he can) Horse Nails at fifty to seventy-five cents a box lower than the "C" brand, **it means only one cent less at the outside, in the cost of the third of one pound of Nails used in shoeing a horse.**

"Don't sink your ship for a cent's worth of tar, nor leave the old reliable "C" brand for a cent. Have the best; which means, insist on being supplied with "C" Nails.

Sole Manufacturers:

THE COLUMBIAN HARDWARE COMPANY

CLEVELAND, O.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

NEW REDUCTION WORKS. The Northern Aluminum Co., Limited, has obtained a charter. The share capital of this concern is placed at $500,000, divided into 5,000 shares of $100 each and the incorporators are: George Green Foster, Samuel G. Archibald, both advocates; Sewell Franklin Belknap, clerk, all three of Montreal and district; Arthur V. Davis, of Pittsburg, Penn., manufacturer, and Frederick Arthur Stoughton, Shawenegan, Que., manufacturer. The reasons set forth for incorporation are the reduction of refractory ores and the production of bronzes and commercial alloys, and the manufacturing and dealing in the same, the construction and acquisition by lease or other means of all buildings, water and electrical works, machinery, etc., necessary to carry on the business of the company and to operate these and dispose of their products. The company will carry on these operations throughout the Dominion of Canada.

RAILWAY AND ELECTRICAL SUPPLIES. Letters patent have been issued incorporating James Carruthers, merchant, Wm. Carruthers, merchant, both of Montreal; Hiram L. Piper, manufacturer, Charles W. Bond, merchant, and James Edgar Carruthers, merchant, of Toronto, into a joint stock company to be known by the name of The Hiram L. Piper Co., Limited. The total capital stock is $40,000, divided into 400 $100 shares, and the purpose of the company is to carry on throughout the Dominion of Canada the business of manufacturing and dealing in railway supplies, electrical supplies, railway signals, ship lamps and other business of like nature, and the right to acquire by lease, purchase, or otherwise, patent rights in connection therewith.

TO OPERATE CORUNDUM MINES. For the purpose of acquiring and operating certain corundum mines in the Township of Carlow, Hastings County, Ont., an Ontario company has been formed, known as The Corundum Co., Limited, with a capital stock of $100,000, divided into 1,000 shares of $100. The incorporators are: Lewis Robinson Speare, of Boston, manufacturer; Charles Albert Sandt, Easton, Penn., manufacturer; John Allen Way, Walpole, Mass., manufacturer; Edmund Foster Burritt, barrister, Ottawa, and Robert George Code, barrister, of the same place. The company will also lease and operate other corundum mines in the Dominion, erect mills and mining plant where necessary, develop other mines and mineral lands, build and operate railroads, steamers and other vessels, and construct and maintain docks, wharves and piers, and do any other thing necessary to promote the objects of the corporation.

ON THE USES OF MURALO.

Tho painters of Toronto were entertained on the evening of Friday, June 6, in St. George's Hall to a smoker and lecture by The Muralo Co., of New Brighton, N.Y. This company is endeavoring to bring before the Canadian trade its wall coatings and finishes for use in cold water, and is having a special decorative artist visit all the principal cities in Canada and give lectures and practical demonstrations to the painters and decoraters on the uses and capabilities of "Muralo." The Montreal agents of this firm are A. Ramsay & Son, and the Toronto agent, Jas. W. Paton. The firm's advertisement is on another page of HARDWARE AND METAL.

UP-TO-DATE.

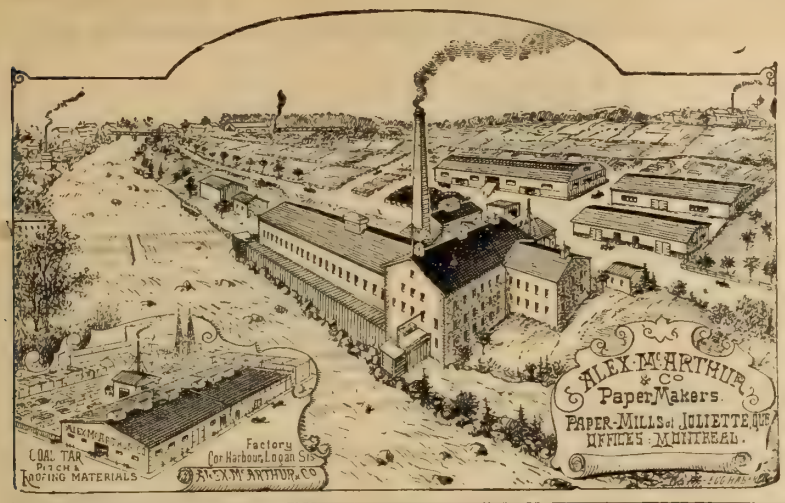
A number of the wholesale hardware houses in Montreal are now installing a long-distance telephone equipment. This will be a decided convenience for both the firms and their customers, as well as a saving of time and money, in dealing with buyers in the surrounding country, communication with whom will be thus greatly facilitated.

APPOINTED AGENTS.

The Canada Hardware Co. have been appointed agents for The National Wire Fence Co., of Merrickville.

DID A GOOD BUSINESS.

J. H. Rogers, representing Alexander Gibb, has just returned from a trip through the Maritime Provinces, where he reports business as having been highly satisfactory.



The hardware trade in the Provinces is in a healthy condition, and Mr. Rogers was able to open up many good accounts for the different lines represented by Alexander Gibb, especially for those of Jaffe & Sons, Manchester, Eng., whose goods were well received.

PAINT FIRM AT THE CORONATION.

The Canada Paint Co., Limited, is boasting that it will be represented at the Coronation. The explanation is that Lieut.-Col. Pellatt, the secretary of the company, is, as every Canadian knows, the commander of the Coronation Contingent.

In the grand procession, which will consist ot colonists from all parts of the world — brave fellows, all! — Lieut.-Col. Pellatt was anxious that Canada should show up as a distinct factor in celebrating this auspicious event, therefore, at his own expense, and by permission of the Canadian Government, he is taking the crack Bugle Band of the Queen's Own Rifles with him to follow the colors which were presented to the Canadian Contingent by the ladies of Canada. When the spectators see the smart and soldierlike appearance of the Canadian troops and hear the soul-stirring music of the drums with the shrill, hair-raising notes of the bugles, the cry will go out "There go the Canadians." In addition to their patriotic repertoire, such as "The Maple Leaf Forever," the band will also play the well-known Canadian airs, "A Toronto Swell am I," "Sweet Mabel Sugar," and the quickstep "The Telephone Belle."

CURRENT MARKET QUOTATIONS

June 13, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

A. C. LESLIE & CO., Montreal, Managers.

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

If you have not our Catalogue, write to us.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

AN UNJUST STRIKE.

IN striking under the conditions which they have the journeymen plumbers of Toronto are flying in the face of public opinion. As a rule, the sympathy of the masses is on the side of the striking wage-earners; but it is not so in the present instance.

The public may at times be misguided in its judgment, but it loves righteousness better than iniquity, and aims to dispense justice rather than injustice. It is this that explains the attitude of public opinion towards the strike of the working plumbers of Toronto.

A more flagrant breach of contract than the present strike could scarcely be conceived. After many conferences an agreement was signed on March 19, 1901, by the representatives of the Master Plumbers' Association and the Journeymen Plumbers' Union. This agreement was to remain in force until January 1, 1904. Both masters and men expressed satisfaction with the agreement, and the former entered into contracts feeling satisfied for at least two years and nine months there was no danger of their calculations being upset by labor disturbances. A copy of this agreement will be found printed on another page.

In spite of that agreement the men unblushingly declare they are justified in breaking it, because trade conditions are more favorable to-day for a higher rate of wages than they were 16 months ago.

The men, in striking under such conditions, have no doubt broken the moral law; and it is an open question as to whether they have not also broken the statutory law governing contracts. In both Great Britain and the United States the courts have given decisions which would appear to bear out this contention. Certainly no agreement between individuals could be broken with such impunity without coming within the pale of the law.

And what applies to individuals ought to apply with equal force to the acts of organized bodies of individuals.

PRAISEWORTHY ACTION.

Nothing that the Toronto Board of Trade has done for many years has so increasad its popularity and received the general endorsation of the public as its action in regard to the difficulty between the Street Railway Company and its employes.

While up to the time of going to press there is still grave danger of a strike, it is certain that the citizens of Toronto would have been experiencing the inconveniences of at least a partial paralysis of the street railway service but for the timely intervention of the Council of the Board of Trade, and particularly of its representatives, President Ames and Messrs. J. D. Allan and W. J. Gage and Secretary Jarvis.

If their efforts are not finally successful it will not be due either to the want of intelligent or energetic action on their part. It will be simply due to the stubbornness of either one or the other of the parties to the dispute.

THE YOUNG MAN.

DURING the recent conventions of the different churches in Canada the young man came in for a great deal of consideration.

But it is not only in his relation to the Church that the young man is coming in for a great deal of consideration. His relation to commercial life is also a live topic.

There has probably been no time in the history of the world when the young man has received greater attention. This is largely due to the new commercial conditions, which demand a higher state of efficiency than was at one time deemed necessary on the part of those designed for mercantile careers. To-day there is positively a dearth of young men of first-class ability. There are numbers of young men seeking positions, but there are also a great number of positions, which are seeking desirable young men—men who can think and act for themselves, and who have energy to keep them going.

APPOINT A COMMISSION OF BUSINESS MEN.

AT a recent meeting of the Brantford Board of Trade the resolution of the Halifax Board regarding the Intercolonial Railway came up for consideration. This resolution, it will be remembered, was in favor of the management of the I. C. R. being handed over to the Canadian Pacific Railway.

The resolution found little sympathy with the Brantford Board, which is its experience before every board of trade in the country that has discussed it.

During the discussion of the question at Brantford the other day, one of the members said that the proper solution of the I. C. R. problem was the appointment of a Government commission "composed of sound, capable business men who should be given a free hand to manage the road."

This is practically the position this paper has taken since the question was first mooted. And it seems to us the only solution. No matter how zealous the Government may be, whether it be Conservative or Liberal, it is practically impossible for a railway to be managed in a businesslike way under its direct control. It is only natural in order that a good report may be annually submitted that the party in power should desire to present a favorable statement, but it is practically impossible for it to do so, on account of the demands which are continually being made upon the Government by its supporters for privileges or appointments for themselves or for their friends, which no Government has yet been able to successfully resist.

The earnings of the road are steadily increasing, and last year were the largest on record, being over $5,000,000. The expenses are also increasing at an equal ratio, and last year exceeded the earnings by nearly half a million dollars. Both the passenger and freight traffic last year were the largest in the history of the road.

As our readers are well aware, the road in the first place was not built as a business venture. The route laid out had, first of all, in view military exigencies, and not commercial requirements, and was suggested by the Imperial authorities. Had the road been built for purely commercial purposes, the route taken would have been an entirely different one. However, the road is now built, and it is without a doubt one of the best equipped, both in regard to rolling stock and roadbed, on the continent, as everyone knows who has travelled over it. The only thing wrong with the road is that it does not pay.

But in spite of the geographical drawbacks, there is no reason why every effort should not be made to manage it on a purely commercial basis, and this can only be done by the road being managed by a commission composed of men with practical business experience and untrammeled by political interference. This is a matter which the boards of trade throughout the country should persist in impressing upon the attention of the Government, and it is to be hoped that at the annual meeting of The Canadian Manufacturers' Association in Halifax, in August next, due attention will be given to the matter.

NEEDED LEGISLATION.

THE practice of business men making over their property to their wives in order to escape payment to creditors in case of failure or other reverse in business, has become only too common, and any legislation which can be effected to remedy the evil should be welcomed by all honorable men.

The subject was brought up in the Quebec Legislature during the last session, and an amendment was made to Article 1834 of the Civil Code regarding the registration of marriage contracts, which has since been assented to. This amendment read as follows :

Every married person doing business as a trader, whether alone or in partnership with others, shall be bound, under a penalty of a fine of $200, to register in the office of the prothonotary of the Superior Court of the district wherein such business is carried on, within sixty days from the date on which trading commenced, or within sixty days from the date of his marriage, a declaration in writing stating if he is under community or is separate as to property, if by contract of marriage, and in case of separation of property, if by marriage contract or judgment. If by marriage contract, the declaration shall mention the date, the name of the notary before whom the deed was passed, and the domicile of the latter when the contract was made; and if by judgment the declaration shall mention the number of the case, the date of the judgment, and the name of the district in which the judgment was rendered.

The prothonotary of each district shall keep a register for this purpose.

The following persons are subject to the provisions of the code :

1. Merchants, viz., persons habitually engaged in the buying and selling of goods, wares and merchandise for profit.
2. Manufacturers of goods, wares or merchandise for sale.
3. Bankers and dealers in money and commercial paper and securities.
4. Factors or commission merchants.
5. Auctioneers.
6. Insurance and underwriters.
7. Common carriers for hire, whether by land or water.
8. Hotel and tavern, eating house and boarding-house keepers.
9. Warehousemen and wharfingers.
10. Mechanics and tradesmen who buy goods, wares or merchandise, either in the form of raw materials or wholly or partially manufactured, with intent to sell, after having by their labor improved the articles so purchased, or converted them into something else; such as jewellers, boot and shoe makers, builders, merchant tailors, hatters and furriers, watch and clockmakers, shipbuilders, printers, butchers and millers.

Those who have been married in Ontario and are residing in Quebec are considered entirely separate as regards property.

AUTOS AND THE POST OFFICE.

A REPRESENTATIVE of HARDWARE AND METAL one day this week interviewed the manager of a prominent cycle company as to the decision of the Post Office Department to abandon the quad motor machines used in the collection of mails and to return to the old system of driver and horse.

The manager intimated that he had read about the Department's decision, and expressed no surprise that it should have taken such a course. The autos, he declared, were preeminently adapted to that style of work, but Toronto was not as yet adapted to the autos. The character of the pavements was not suitable to the high rate of speed that had been demanded. He believed unnecessary expense had been incurred owing to the fact that it had been impossible to get experienced men to work all the autos.

This is simply another case illustrating the misfortunes of living ahead of the times. When the Postmaster General becomes also pathmaster or road superintendent the autos will again be installed.

NEW USE FOR TRADING STAMPS.

Trading stamps are being devoted to a rather new purpose in Indiana. A despatch from Indianapolis says that a fire insurance agent there is offering trading stamps with each policy which he negotiates.

His competitors are naturally up in arms against him, and threaten to make a direct rebate of 5 per cent. below his rates.

Trading stamps were for a long time a disturbing factor in mercantile circles, and they now promise to be equally so in fire insurance circles in Indiana.

INDUSTRIAL GOSSIP.

THE Cockshutt Plough Co., of Brantford, intend to build, at an early date, a new factory on their property in the eastern section of that city.

Only one vote was recorded against the proposal submitted by the town council of Welland to exempt from taxation the Welland steel plant.

Boring operations for coal will last all summer in Prince Edward Island. Dr. Ellis, of the Geological Survey Department, will advise where tests will be made.

The Toronto sheet metal workers' contract with their employers expires on July 3. A conference between both parties is called for Monday evening, June 23, at the Builders' Exchange.

Near Thessalon a large deposit of copper, with vein nearly a mile in length and about 15 feet wide, has been discovered by Mr. J. S. Dobie, C.E., of Bruce Mines. Test pits prove the existence of a rich supply of copper ore.

The structural iron workers' strike at Toronto has been ended. The new scale grades the men from 27½ cents an hour down to 25 cents. Thus the men of other trades who were called off work on the Canada Foundry Company's new building at Toronto Junction now return to work.

A MOUNTAIN OF HEMATITE. The C.P.R. has a mountain of hematite at Kitchener, Crow's Nest Pass. This property, the former owners, the British Columbia Gold Fields Company, worked for copper, but threw it up. The C.P.R. has now refused an offer of $1,000,000 cash for this as iron property. The offer was made by The United States Steel Co. The C.P.R. is arranging the details of an agreement looking to the allotment of territory in which the steel company will allow the C.P.R. monopolistic privilege.

HAMILTON STEEL CO. The Hamilton Steel Co., Limited, is taking advantage of the boom in steel and iron stocks to bring itself more prominently before the investing public. A limited company formed in July, 1899, with an authorized capital of $2,000,000, took over the plant of the Hamilton Blast Furnace Co. and the Ontario Rolling Mills Co. Capital stock is issued to the amount of $1,513,600, with no preferred stock and no bonded indebtedness, dividends being payable quarterly. Last year's dividends were 5 per cent. exclusive of 1 per cent. last quarter. The company has two mills at Hamilton and one at East Hamilton.

BRICKS AND BARGES. To manufacture, buy, sell and deal in bricks for building, paving and other purposes, with the power to acquire patent rights in relation thereto; also, to buy, sell and deal in sand, with the right to acquire and own limekilns; also barges and such other vehicles of transportation as may be necessary for such business, has The Montreal Silicate Brick Co., Limited, been incorporated. The total capital stock of the company is $100,000, divided into 1,000 shares of $100. The incorporators are David Robertson, merchant; George J. Sheppard, manufacturer; Alfred Joyce, confectioner; John McLean, contractor, all of Montreal, and Charles W. Trenholme, manufacturer, Westmount, Que.

A NEW MICA CO. The British Columbia Mica Co. is applying for incorporation under the laws of New Brunswick. This company has for its objects the purchasing of certain mining lands and premises in the Cariboo District, British Columbia; to acquire and develop any mining properties in that district; to mine, prepare for use and sale, manufacture and dispose of mica and all the products thereof; to operate and control tramways, bridges, electric and steam railways, ships, rolling stock, machinery, and the right to buy out any other mining businesses, plants and factories, and dispose of them. The chief place of business is Louisville, N.B., and the amount of capital stock of this company is to be $1,000,000, divided into 10,000 $100 shares. The shareholders of this company are as follows: Samuel Winter, merchant; Wm. Christie, baker; James McD. Cooke, druggist, all of Moncton, N.B.; Gurney R. Jones, lumber merchant, Lewisville; Andrew H. Jones, banker; E. Albert Reilly, barrister, of Moncton, and James P. Geddes, New York, N.Y. The first six named are the provisional directors.

METALS USED IN BLACKSMITHING.

IN an address on "Metals, Methods and Tools Used in Blacksmithing," read at a recent meeting of the New England Railroad Club, Matthew Burns said:

Wrought iron is frequently found to present peculiar phases of character, and they must not be overlooked in working the iron, as they affect its strength. Sometimes wrought iron is brittle when red-hot, but perfectly pliable when cold. This peculiarity is usually considered to be due to the presence of a small quantity of sulphur in the iron. Then there is wrought iron having the opposite quality, being comparatively brittle when in the cold state and perfectly pliable and workable when red-hot. This is said to be due to the presence of silicon, or phosphorus, in the iron. These conditions are so marked as to suggest the idea that the gas occasioned by the impurities forms a coating which envelops and separates the molecules of the iron, thereby greatly diminishing the value and usefulness of the iron for many practical purposes.

Wrought iron is a very silvery metal, fusing with difficulty, and is moderately strong and tough. It is obtained from cast iron, and during the transformation passes into a pasty condition, and is worked while in this condition under steam hammers and by being passed through between heavy rollers. With good material, and workmen who would properly heat and work the iron, we would be able to get iron that would not be so brittle and full of seams, slag and sand. Careful working at the furnace rolls and hammers would remove largely the foreign substances, as well as the carbon in the iron produced by the manufacturers.

Every blacksmith has used Norway iron, and has also read how it is made. In the making of magnetic iron in the mines of Danemara, Sweden, such of it as is smelted with wood charcoal is free from all impurities, and contains a large percentage of pure iron; hence it is very soft and very fibrous, and free from what some of our manufacturers put in their iron—stone. In Sweden they use the pure iron ore. This iron is very good for some purposes, but not for others, as it is very soft. Under hard strain it will stretch and leave small open places, which, of course, will break easily. All kinds of iron and steel have their peculiarities, and these must be watched and carefully taken into consideration. Especially is this true of steel of all kinds. In working forgings, for instance, the danger is greater at a descending than at an ascending heat. Our theories and ideas regarding this matter may be all wrong, yet in wrought iron and steel there remains the peculiar feature of suddenly breaking off at what blacksmiths call "the short red heat," or some others "the fatal blue heat." I have been studying and working a long time trying to find out what caused this peculiarly sensitive effect in these two metals, but I have not satisfactorily solved the problem yet, and I would be glad to hear from anyone here this evening who can throw any light upon the matter. It will be greatly to our advantage to investigate those mysterious fractures which occur in steel and iron at the "short red" and "fatal blue" heats. Steel being

a very sensitive metal, we should avoid all that is short and brittle, because it will not stand much bammering, hot or cold. It is my belief that heat or cold causes a movement of the particles which are striving to collect or adjust themselves. Without a doubt, a partial separation of the crystals and particles takes place; and heat no doubt causes the molecules of the iron to become restless, thereby causing it, for the time being, to lose its natural cohesive force, and if struck at such a time it will break like cast iron; and the poorer the steel or iron the harder it will be for the smith to keep it from breaking. So let us have good iron and steel to work with, and blacksmiths generally will do more and better work.

As there are a large number of different kinds of wrought iron, having distinct grades of softness or hardness, it behooves all blacksmiths in making welds to see that the pieces they are about to weld together possess the same physical and chemical constituents; either let both be hard or both be soft; for if they are not alike, the metal will not flow in a straight line, for the soft metal will flow in an unequal manner, and the hard metal, resisting the soft, destroys the proper bond of harmony which should prevail at all times in the welding of iron. But with good coal, a good clean fire, and a good workman, this difficutly can be overcome to a great extent.

CATALOGUES, BOOKLETS, ETC.

GUN CATALOGUE.

AN exceedingly fine catalogue has just been issued by Lewis Bros. & Co. to show to the trade their range of guns, revolvers, and gun accessories, and the prices at which they are sold. It contains 68 pages, bound in cardboard covers and is splendidly illustrated. The first portion of the book deals with double-barrel breach-loading guns, hammerless guns, single-barrel breach-loading guns, muzzle-loading guns, Winchester repeating shot guns and rifles, Marlin repeating rifles and carbines, Lee-Enfield rifles, single shot rifles, air rifles, etc., each class shown in a number of grades and makes, and illustrated so that the various parts, together with the ammunition used, can be examined closely. Then come the revolvers, of which the variety is immense. The illustrations of these are perfect samples of engraving, and show the revolvers and pistols from various points of view so that all the parts can be inspected. The remaining portion of this catalogue is taken up with cartridges of all sorts, cleaning implements, reloading tools, and every other article that could possibly be required in this line. Prices are given with every article. This catalogue should be in every dealer's hands. By its use, mail-order business is made much easier, and can be conducted with greater advantage to the retailers.

A HARDWARE CATALOGUE.

Emerson & Fisher, St. John, N.B., have just issued their No. 10 Hardware Catalogue —an excellent specimen of enterprise and workmanship. With its 450 pages of printed matter and 2,500 cuts, its clean, bright type and its excellent binding, this edition deserves to rank as a classic among catalogues. Two thousand copies of the catalogue, requiring five tons of paper, have been issued.

An examination of the catalogue reveals a full and complete line of up-to-date hardware, selected with a view to the special needs of the trade of the Maritime Provinces. The exhaustive index and classification index which have been compiled will be found very useful. The words Emerson & Fisher, St. John, N.B., in circular form are neatly stamped in blue on alternate pages.

The book is divided into 32 divisions, each dealing with one distinct class of goods, thus, cutlery comprises pages 188 to 218, while farm hardware will be found to occupy pages 345 to 373. Notice is given the trade that the accompanying illustrations, though they are most exhaustive, do not represent their complete line, but only some of the most staple patterns. The full line of samples, the reader is reminded, is carried by the company's travellers.

An excellent arrangement and classification of goods is given. Prices are quoted for each article except where prices are liable to frequent changes.

On the whole, the catalogue is highly creditable to Messrs. Emerson & Fisher, and its usefulness will be greatly appreciated by retailers.

A BOOK ON ROOFING.

Some valuable information concerning roofing and roofing material is to be found in a little booklet issued by The Paterson Manufacturing Co., Limited, of Toronto and Montreal. What good roofing material is, what outfit a roofer needs, how to cover a flat roof properly—these are all described carefully with many details. Then follows a trade price list and catalogue of the various materials manufactured by this firm. Special attention is directed to their patent, wire-edged, two and three ply ready roofing, which is an excellent substitute for shingles or slates on sloping roofs. By the annual use for the first three years after putting on the ready roofing of liquid asphalt cement, also manufactured at the company's factories, the roof requires no further attention for many years. A perusal of this little booklet by builders and hardwaremen is recommended.

HARDWAREMAN'S BRAVE BROTHER

Sergt. Harry A. Lee, mentioned in despatches as having been brought to the notice of the General Commanding-in-Chief for gallantry and good service in action, is a brother of Thos. B. Lee, of Rice Lewis & Son, Limited, Toronto. The Army Order printed at Pretoria says: "In action Lee twice tried to carry despatches through enemy's lines under heavy and close fire, having two horses shot under him."

ASSOCIATIONS TO AMALGAMATE.

The recently organized Toronto Branch of the Ontario Retail Hardware Merchants' Association held a meeting in the rooms of the Toronto Branch of the Retail Merchants' Association of Canada on Thursday evening, June 19, and decided to amalgamate with the Retail Merchants.

There was a good attendance of members and the meeting was unanimously in favor of amalgamation.

Speeches were made by the president, E. R. Rogers, of the Hardware Merchants' Association, and secretary-treasurer of the Retail Merchants' Association of Canada.

The chief inducements offered were free rooms for meeting in and the services of a salaried and permanent secretary.

A meeting to perfect the amalgamation will be held on July 17, when delegates will be appointed to the coming Retail Merchants' Convention in Toronto on September 9 and 10.

HARVESTER COMPANY AT HAMILTON.

The ratepayers of Hamilton, Ont., voted down a by-law to grant a bonus of $50,000 to The Deering Harvester Co. The company, however, proposes to build in Barton township, just east of the city limits. The council will then apply to Legislature to have that portion of the township annexed to the city; also that the company be exempt from taxation on plant and machinery for 20 years, the land to be taxed at its present value.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

A BAILIFF is in possession of the premises of A. E. Bergoine, dealer in bicycle supplies, Toronto, and his stock has been sold.

The creditors of Joseph Bourque, general merchant, St. Gertrude, Que., have held a meeting.

P. Boucher, general merchant, St. Damase, Que., is offering to compromise at 55c. on the dollar.

J. W. Smith, jr., brickmaker, Montreal, has assigned, and a meeting of creditors has been held.

H. Fairfield & Co., commission and manufacturers' agents, St. Johns, Que., have dissolved.

Chauvin & Rondat, general merchants, Comber, Ont., have dissolved; D. L. Chauvin continues.

D. N. Kenzie, general merchant, Dutton, Ont., has assigned to James Pool, and his creditors meet June 21.

SALES MADE AND PENDING.

The assets of C. L. Ramsdill, general store, North Hatley, Que., have been sold.

G. M. Yeomans, lumber merchant, Dryden, Ont., is advertising his business for sale.

PARTNERSHIPS FORMED AND DISSOLVED.

Charpentier & Chagnon, contractors, Montreal, have dissolved.

G. M. Webster & Co., coal merchants, Quebec, have registered a dissolution of partnership.

Matthews & Villeneuve, painters, Montreal, have dissolved, and Samuel R. Villeneuve continues.

CHANGES.

R. Beaudon & Co., masons, Montreal, have registered.

Verret & Cie, carriagemakers, Quebec, have registered.

Rochon & Bosquet, contractors, Montreal, have registered.

F. C. Hirsch & Co., hardware merchants, Montreal, have registered.

Albert Dawson, blacksmith, Port Lambton, Ont., has sold out to M. Stubs.

Mr. Stonichson, blacksmith, Victoria, B.C., has sold out to John McSweeny.

Wm. Spears, general merchant, Listowel, Ont., has sold out to Gray, Birnie & Co.

W. H. Drake, general merchant, Mount Pleasant, N.B., is succeeded by S. W. Smith.

James Park, general merchant, Lucan, Ont., is advertising that he is closing out his business.

Mrs. Ernst Mireau has registered for The Dominion Window Bolt and Latch Works, Montreal.

What's in a Name?

It all depends on the man or the concern back of it. A good name is worth much in business. It's one of the most valuable assets a business man can have. It's an asset that can't be measured by money value.

The Sherwin-Williams Agency

brings with it a paint with a name known everywhere for all that is good and true in paint. It brings with it a reputation for straightforward business methods—a reputation that has been gained by over 30 years of business life.

We are looking for wide-awake dealers everywhere whose good name we can help promote, whose business we can help increase.

We are particularly interested in establishing a Sherwin-Williams Agency in your town if we are not represented there now. We would like to show you what we can do to help you make good money out of the paint business, and if you will write asking for the "B-13" booklet we shall explain our plan in detail.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, CLEVELAND, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY

Peterson & Co., general merchants, Skagway, B.C., are moving to New Whatcom.

Hugh McDougall, lumber merchant, Moose Jaw, N.W.T., is succeeded by Woodley & Sharpe.

Mrs. Pallascio has ceased trading under the style of The Dominion Window Bolt and Latch Works, Montreal.

FIRES.

W. S. Greenshields, manufacturer of hoops, Paisley, Ont., was burned out.

The mill of James McNair, general and lumber merchant, Plaster Rock, N.B., was burned.

The sawmill of J. Fenderson & Co., lumber merchants, Sayabec, Que., was burned; insured.

George White & Sons Co., Limited, manufacturers of engines, etc., London, Ont., have sustained loss by fire.

The premises, etc., of The Amherst Foundry and Heating Co., Amherst, N.S., sustained loss by fire to the amount of $500; insured.

DEATHS.

John Baird, banker, Lynden, Ont., is dead.

Elias Woodworth, general merchant, Port George, N.S., is dead; Mary L. Woodworth continues.

A NEW STREET SPRINKLER.

The most up-to-date thing in the way of street sprinklers is in use on the streets of Colorado Springs, Col. Here there is a necessity for sprinkling the streets all the year round, and as the avenues are all unusually wide the proposition has always been a difficult one and a matter of serious expense. An electrical sprinkler has been recently put to work and its performances seem marvelous as compared with the machines which are more or less familiar to all. The use of the arm on one side of the machine is dispensed with entirely and the water is thrown from both sides at one time, and by the use of an electrical sprayer it is not only broken up into very fine particles but is thrown a great distance. The tank capacity is 2,600 gallons, and the vehicle is propelled by two 60 horse-power motors. The sprinkling heads are in the centre of the car on each side, and the water is forced from these by two individual force pumps operated by a 30 horse-power motor and a street 120 feet wide can be watered from curb to curb. The amount of water thrown and the distance is under complete control at all times.

Alex. Wilson, general merchant, Oil Springs, Ont., has sold out to A. D. Armstrong.

LARGER NORTHWEST WHEAT CROP.

From reports gathered from reliable sources throughout Manitoba and Assiniboia there is not a doubt but the wheat crop there is making excellent progress. At Winnipeg a few weeks ago a sample of wheat in the stalk was exhibited measuring 18 inches. This sample was hardy, and was taken from the Cartwright District, where one farmer is stated to have said he had 100 acres of crop all 18 inches long. With fair weather from now till the middle of August it seems an assured fact that Manitoba and the Northwest will harvest this year even a greater crop than the record-breaking one of last year.

Mr. F. W. Thompson, vice-president and general-manager of The Ogilvie Flour Mills Co. has received the following Manitoba crop bulletin from Hon. Robt. Rodgers, Minister of Public Works, dated Winnipeg :

	Acres.
Wheat	2,039,940
Oats	725,060
Barley	329,790
Flax	41,200
Increase in all grain crops	223,149

DEPRESSION IN BARBADOS.

It appears too true that severe depression exists in Barbados, the oldest British colony, although Newfoundland puts forward an arguable claim to that distinction. One of the pleasantest features about Barbados is the affection which the old families, which have been connected with it for centuries, it may be said, still have for it. The representatives of these old families are proud of it still, and think there is no place like it. The Earls of Harewood, under their family name of Lascelles, have long been engaged in commerce and production there. Mr. Forster Alleyne, too, owns a name that was prominent in the early days of the colony. For many years he lived in England and practised at the Bar. He has now made his permanent home in the island, and it is gratifying to observe that he has been called upon to take part in public affairs as a Legislative Councillor, a position for which his experience and his considerable stake in the colony eminently qualify him.—Home and Colonial Mail.

COMMERCIAL-TRAVELER TAX IN JAMAICA.

United States Commercial Agent R. N. Snyder, of Port Antonio, under date of May 27, 1902, reports that an Act abolishing the tax of £22 10s. ($109.49) on commercial travellers dealing in spirits and of £12 10s. ($60.90) on those not dealing in spirits was passed at the last session of the Legislative Council, and received the assent of the Governor. During the existence of this law, adds Mr. Snyder, many salesmen arrived in the Island intending to transact business, but, owing to what they considered an excessive tax for a stay of a week or fortnight, they left without selling any of their wares.

YORK METAL POLISH

An improvement on the best. It eclipses all others.

Dealers everywhere should not fail to have it in stock.

It cleans and polishes Gold, Silver, Nickel, Brass, Copper, Bronze, Tin, Steel and Plated Ware, etc.

Rust and dirt disappear, leaving a new lustre. Articles operated upon do not turn a greeny hue after being polished with YORK METAL POLISH.

Contains no acids or grit. Therefore will not injure the article or the skin.

Saves time, saves money, saves trouble, saves metal, saves your temper. Ahead of all other polishes. Buy it, try it, and get satisfaction. Put up in attractive tins.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

ELECTRICAL ENERGY FROM NIAGARA.

A MEETING of manufacturers from Galt, Guelph, and a number of the surrounding towns, was held in Berlin on June 9, to consider how power could be best secured from Niagara Falls.

One suggestion considered was that the factory owners should themselves organize a joint stock company and thus obtain the power desired.

Ald. Spence, of Toronto, who was present by invitation at the meeting, suggested that the municipalities should ask for the appointment of a Government commission, which would have the power to arrange for the transmission of electricity to the various municipalities desiring it. This commission would issue its own bonds in payment for the transmission lines, these bonds to be covered by the bonds of the various municipalities interested, the latter to be deposited with the commission. The Government, through a commission, would undertake the transmission of electrical energy from Niagara Falls to the municipality desiring it. The municipalities would guarantee by their bonds the cost, and sell in turn to all manufacturers at an even rate, preventing in this way the power from falling into the hands of any monopoly and securing the industries of the Province the advantage of cheap electrical energy.

Mr. Mitchell, consulting engineer of The Ontario Power Co., stated that after October of next year power could be delivered in the manufacturing towns of mid-west Ontario at $17 per year per horse-power and that for the 24 hours of the day. Mr. Mitchell pointed out as an argument for immediate action, that the price of copper had gone down 2c. per lb. to 13c.

A committee was appointed to draft a practicable scheme.

MACHINERY AND ELECTRICAL NOTES.

The Jones & Moore Electric Co. have recently installed one of their new 25 K. W. multipolar type dynamos and wiring complete for The Robert Watson Co., of Toronto.

The Jones & Moore Electric Co. have completed the installation of a 30 K. W. dynamo of their new M. P. type, 30 incandescent arc lamps, a large marble switchboard, on which are mounted their latest tube spring switches, etc., for The John Inglis Engine Co., of Toronto.

Milne & Grant are just completing their buildings and installing their plant for foundry purposes, and have purchased a 25 horse-power motor from the Jones & Moore Electric Co.

The Benjamin Manufacturing Co., of Yarker, Ont., have purchased from the Jones & Moore Electric Co. one of their new type multipolar generators of 25 K. W. capacity, which they will use for supplying both light and power.

The Sun Portland Cement Co., of Owen Sound, have decided to light their several buildings with incandescent arc lamps, and have placed their order with The Jones & Moore Electric Co. for the arc lamps; also for one of their 30 K. W. multipolar motors.

The Owen Sound Park and Summer Resort Co. are installing an electric plant with a capacity of 1,000 lights, located in their new hotel and grounds, and have placed their order with The Jones & Moore Electric Co., of Toronto, for one of their new type multipolar dynamos; also wiring complete and switchboards mounted with switches and meters.

SECOND-HAND MACHINERY FOR SALE.

In another column of this issue will be found a list of second-hand engines for sale by H. W. Petrie, 145 Front street west, Toronto. Parties wishing new or second-hand machinery or tools will do well to write for his monthly stock list which contains a corrected list of all stock of machinery, boilers, etc., on hand.

PROPOSED ELECTRIC ROAD.

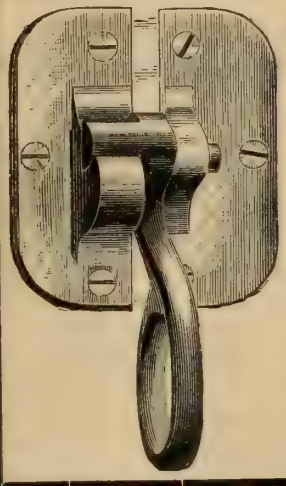
Arrangements are being made for an electric railway between Brantford and Paris, by The Von Echa Street Railway Co., of which H. Ickes is president. This company has acquired the Brantford street railway and will run both roads. The transfer awaits only the sanction of the city council.

STRIKE OF ELECTRIC LIGHT MEN.

THE electrical workers in the employ of The Hamilton Electric Light and Cataract Power Co. went out on strike at 9 o'clock on June 17. The company had been given 24 hours to arbitrate, and, on their failure to do so, 40 men, including linemen, inside men, motor and meter men, trimmers, patrol men and station operators, went out.

There was a feeling among the men that Mr. Hawkins, the general-manager, in his proposition of June 16 was dodging the real issue.

Owing to the possibility of danger through the machines being left unattended, a number of the men stuck to them till 9 45, then they pulled switches, whereupon General-Manager Hawkins himself assumed charge. The strikers also take credit for not striking on Saturday, when they claim they would have been justified in doing so.



General-Manager Hawkins said the company was not worrying about the strike, nor was it endeavoring to take on new men, for they were not needed. He was also quite certain that the steam engineers would not go out. The company, he said, was ready to submit to arbitration the question of whether the men were receiving the current wages or not, but it was not prepared to arbitrate on the matters proposed by the men some time since.

The men's side of the question is explained in the following statement which they issued:

"In the local papers last night we notice that Manager Hawkins' letter would infer that the arbitration proposal was made by the employes, which is very wrong. That proposal was made by Manager Hawkins himself to the committee representing the employes. After the proposal was accepted by the committee, Father Whitcombe was appointed as the employes' arbitrator, and the time fixed as ten days to settle the arbitration, which time was up on Friday last; but one or two days previous to that time Manager Hawkins asked the majority of the employes to sign a letter to the effect that the arbitration is not to settle the scale of wages as requested by the employes, but to decide whether we are getting paid as well as our neighbors, whose local conditions are the same as ours, which, to say the least, is an impossibility."

THE ENGINEER AND HIS WORK.

BY VICTOR C. ALDERSON.

THE relation between the engineer and the laws of nature is unique, and differs from the relation that exists between any other professional man and nature. Unlike the geologist, who is limited in his observations to those favorable localities which nature has been kind enough to unfold for his inspection, or the biologist, who must wait for nature to act and then stand as an observer, the engineer pins nature down and forces her to answer his question. It may be only a yes or no, but it is an answer, and since he can vary his questions—that is, the conditions of his experiment, he can ultimately get the information he desires. He deals with the immutable, the unchanging laws of inorganic nature. He alone of all professional men has an unvarying criterion by which he may decide the right and the wrong, the correct and the false. He gets accurate data by which he may build his bridge, construct his dynamo, or lay out his railroad. Departure from these data means failure. Other professional men are subject only to varying human laws and human notions and so get along without ever having before them an absolute standard, but the engineer is forced to be in harmony with natural laws ; his work must be absolutely truthful ; his logic must be without flaw. Sophistry and ignorance are not for him. He must know, and know accurately ; he must reason, and reason logically. If he does not know the stresses in his bridge, the endurance of his material, or the details of his dynamo, he cannot rank as an engineer. Nature, calmly and dispassionately, is always on guard over him. No other man in the world, I believe, unless it is the chemist or the physicist, is subject to such rigid and unceasing discipline ; no man's errors are so glaringly brought to light as his. The lawyer can fall back on the plea that the judge was biased, or the jury packed ; the doctor may, perchance, bury his mistakes ; but the mistakes of the engineer bury him. We accept his success as natural, because it is in harmony with nature's laws ; his errors are glaring because they are out of harmony with nature. All the world sees his failures. A mere tyro can recognize a poor roadbed, defective machinery, or a dangerous bridge. The engineer, has, then, for his ethics the most dignified and exalted standard ; he has an absolute and unvarying criterion for truth and error ; he has over him a judge who will decide with unerring swiftness that his work is a failure if he violates the law.

Every field of activity in the whole realm of nature may yield something of value to the engineer. His interests are world-wide. As man has climbed slowly up the rugged pathway we call civilization, he has needed more and more the service of the engineer. What was yesterday a theory, becomes a demonstration to-day, and to-morrow we expect the engineer to apply it for our comfort or convenience. As agencies for civilization, engineering works have been given far too little prominence. True it is that Greece has left us a priceless heritage of art and Rome a code of laws, but in the wake of the Roman armies went the engineer, building bridges, roads and aqueducts, making intercommunication the easier and civilization more advanced. To-day, thanks to our railway experts, the world is smaller than ever before—and is steadily growing smaller; for distance is no longer computed in miles, but in length of time of transit. Once New York and Liverpool were three months apart, now less than a week. With the aid of bridges like the St. Louis, the Brooklyn and the Forth ; tunnels like the Mersey, the Sarnia, the St. Gothard ; canals like the Manchester and the Suez ; trains like the limited and the Empire State Express, the engineer has done noble work for advancing civilization by making intercommunication easier and removing that ever-recurring obstacle—ignorance of other people. The influx of people to the large centres of population has brought forward new problems, not only of travel but of pure water supply, disposal of drainage, public health, all of which the engineer is called upon to solve. Industrial history may be dry reading, because it does not fire the ardor with thrilling deeds on the field of battle. Some enthusiasm may be kindled over the success of Robert Fulton with his steam engine and Edison with his phonograph, but little or none over the success of John A. Roebling in building the Brooklyn Bridge, or the struggle of our civil engineers to make our present railway travel fast and safe. But to the engineering profession as a whole we must grant the credit for being the greatest practical civilizing agent we have.—Railroad Digest.

GERMAN TRADE IN TOOL MACHINERY.

According to the United States Consul at Solingen, Germany imported only 1,872 tons of tool machinery in 1901, against 7,072 tons in 1900, The first three months of 1902 show a further decrease, there being imported only 251 tons, while in 1901 it was 615 tons, and in 1900 2,235 tons.

The export also declined in 1901, but not to such an extent, the figures being 10,194 tons in 1900 and 9,115 in 1901. During the first quarter of 1902, however, it has increased, amounting to 2,649 tons, against 2,300 tons for the same period in 1901.

Germany imports tool machinery chiefly from the United States, but these imports have greatly declined. In 1900, they amounted to 5,233 tons and in 1901 they were only 1,282 tons. It would appear that there is a development in the manufacture of tool machinery in Germany, in spite of the general business depression, and that the manufacturers are not only controlling the home market, but increasing their exports.

MEETING OF ELECTRICAL ASSOCIATION.

THE members of the Canadian Electrical Association met in convention last week in the Assembly Hall, Chateau Frontenac, Que., with President Gosseler as chairman. Short business-like meetings were crammed with bright and instructive papers and discussions. Some of the reports of committees called forth good discussion. The report of the committee appointed to consider the action of the fire underwriters showed plainly the great need of a proper bureau of inspection in connection with the progress of electrical power to remove the present responsibility for fire and accident to life. This complaint lay principally in the city of Montreal, where the insurance companies hold the electrical companies liable for their losses.

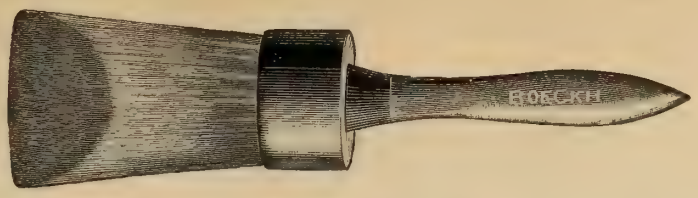
Among the instructive addresses and papers were :

"The Electrical Equipment of Our Ordinary Street Car," by A. B. Lamb, of Toronto ; Development of Arc Lighting Apparatus from 1810 to 1902, with Special Reference to Modern Arc Light Engineering," by W. D. A. Ryan, of Lynn, Mass.; "Lighting," by Mr. Spaulding, of the National Electric Improvement Co. ; "Arc Lighting," by C. M. Greene, of Lynn, Mass.; "The Use of Storage Batteries in Electric Distribution Systems," by A. A. Dion, of the Ottawa Electrical Co.; "Electric Suburban Railways," by Ed. A. Evans, of the Quebec Railway, Light and Power Co.

The members in attendance at the convention were hospitably entertained by Mr. Frederic Nicholls, general manager of the Canadian Electric Company, Limited, of Toronto ; also by the Bullock Electrical Manufacturing Company and others.

The election of officers for the ensuing year resulted as follows :

President—B. F. Reesor, manager of the Light, Heat and Power Co., of Lindsay, Ont.



First Vice-President — E. W. Slade, general manager of the Jacques Cartier Electric Company.

Second Vice-President—R. B. Thornton, of the Montreal Light, Heat and Power Co

Secretary-Treasurer—C. H. Mortimer, of The Toronto Electrical News.

Executive Committee—Re-elected, A. A. Dion, J. J. Wright, G. Yule, O. Higman, A. Sangster; newly elected, P. G. Gosseler, E. A. Evans, A. B. Smith, A. A. Wright and H. Henderson.

A vote of thanks was tendered Mr. Gosseller, the retiring president. The next annual meeting will be held in Toronto.

THE OBJECT OF EVERY UP-TO-DATE DEALER

is to keep an eye upon the future. He is aware that every transaction must please the purchaser to make him a permanent customer. Goods that must attain the eminence of excellence are :

FLAT AND OVAL PAINT BRUSHES
FLAT VARNISH, CHISELLED VARNISH
KALSOMINE BRUSHES

Alert buyers make no mistake in placing orders with us. Our large purchases of bristles and other raw materials, together with our greatly increased factory facilities, have enabled us to improve qualities with our corresponding increase in cost, thus leaving a wider margin of profit than before to the dealer.

If our representative does not visit your town, write us, and we will, if possible, arrange for him to call upon you, or we will send you quotations and full particulars of these goods by mail.

MONTREAL, QUE.

WHERE METALLIC ROOFING IS MADE.

BUSINESS is reported good by The Metallic Roofing Company, of Canada, Limited. They are taxed to their utmost capacity with a night and day force, working 20 hours per day.

At present they are making a large addition to their factory, corner of King and Dufferin streets, Toronto. It is a substantial building, with walls 18 in. thick, and will cost about $6,000. Their showroom, an admirable specimen of architectural skill, is also nearing completion.

They have at present on hand a large contract for The Canadian Northern elevator at Port Arthur; also large shipments of goods for elevators in Manitoba.

The manager conducted the representative of "Hardware and Metal" through the factory. The precision of workmanship displayed, the skill in design, the down-to-date methods of labor, the intricacy and delicacy of the output of heavy machinery easily explain how this firm has succeeded in creating a demand for its finished product.

The offices and draughting-room are finished with embossed metal work of annealed steelplate, and are very beautiful in design.

The factory, cleanly and whitewashed, has two floors. The lower floor is principally taken up with the stamping, corrugating and shipping departments. Large cranes, poised so that the slight pressure of the foot can adjust them, work the stampers. The clipping and corrugating combine to render a uniform article. Shears, 10 feet long, are used; and but one corrugation being made at a time an accurate fit is insured.

A large patented machine for automatic rivetting is a valuable accession to the equipment of the factory. This was the invention of the firm. Some of the machines to secure solidity necessary for accuracy of design have a foundation 10 feet deep. Rolls are used for the curved output.

The raw material comes to the firm from Great Britain in bundles and boxes, iron bound. The sheets range in size from 11 in. x 11-in. to 10 ft. x 3 ft.

The firm possesses excellent facilities for the manufacture of the "Hayes" patent metallic lathing, of their "Eureka" tiles, also of fireproof windows, etc.

By means of their automatic closing and locking device, when so desired for ventilation, the sashes are held open by a chain in which is a soft fusible link which readily melts when subjected to the slightest heat. The moment this fusible link melts (which is only at 150 deg.), the sash is instantly released and automatically closes and locks itself.

Large vats containing paint are used to dip the metals in. For exterior work, the metals are finished, but those for interior receive a primary coat on both sides of pure white zinc paint mixed with pure linseed oil and turpentine, which protects the metal; after they are up in position they may be decorated in any manner to suit the taste.

This firm, after a successful career of 17 years, during which new designs have constantly been added to their stock, possess a feature which it would be well for more Canadian manufacturers to imitate. The brand "Made in Canada," invariably stamps their shipping boxes.

HE FOUND THE GOODS.

Long experience in the adjustment of claims has convinced us, writes a well-known hardware firm, that no matter how positive a man may be he is apt to be mistaken and should not be offended by a courteous request to make another search when a shortage is reported. We print a letter recently received which is but a sample of many which are received every year:

"Here is one more to add to your list. On receipt of your letter the writer himself went and reopened the boxes and found the toilet set in a box which had contained lantern globes. The shipment of goods came in and was opened one day before invoice reached us. When the invoice came and we checked over and found the apparent shortage, we inquired of our young man who unpacked the shipment if he was certain he got everything out that was in the boxes. Of course he was positively certain that nothing was left in the boxes. We have long since found out that there is nothing so certain but that it will bear investigating."

WHERE THE GLUEPOT CAME IN.

There was the usual collection of commercial travellers in the smoking-room of the hotel, and the inevitable quiet man was one of them. They had been asking conundrums, many of which had been received with roars of laughter, as being particularly clever. Then the quiet man lit a fresh cigar, and spoke.

"It is easy," he said, "to think of such riddles as 'Why is your hat like a baby?' which contain one smile, but those with two are far more difficult. For instance:

"What are the differences between the son of a millionaire, an organ, and a gluepot?"

"I give it up," said the mustard traveller presently.

"The son of a millionaire is an heir to millions while an organ has a million airs! D'ye see?"

"But what about the gluepot?" inquired the hosiery representative.

"Oh, that's where you stick!" returned the quiet man. And the waiter smothered a guffaw behind a tray he was dusting, while the hosiery representative howled for soda water.

DEATH OF OLD FOUNDRYMAN.

Robert Carrol, sr., is dead at his residence, Barrie street, Kingston. The deceased was widely known through his connection with The Kingston Foundry. He was first taken into partnership by the firm of Davidson, Doran & Co. Kingston loses in him a highly respected citizen.

A NEW AGENCY.

F. C. Hirsch & Co., representing several hardware and file firms of England, have leased for five years premises at No. 228 St. James street, Montreal. This is the first firm to open agencies in Canada for the following firms: Thos. Perry & Sons, Limited, Bilston; Hartley & Synden, Limited, Halifax; Edward Johns & Co., Staffordshire; The Sanitary Lead Lining and Pipe Binding Co., London.

THE AGREEMENT RATIFIED.

AFTER some negotiation the agreement by which The Dominion Iron and Steel Company leases the property of The Dominion Coal Company has been ratified by the shareholders of the two concerns. This agreement, in short, is to the effect that $1,600,000 shall be paid each year to The Dominion Coal Company as well as a royalty of 7½c. per gross ton of coal in excess of 3,500,000 tons taken out of the mines in any calendar year.

The reports of the directors of each company were read, that of The Iron and Steel Company stating that the entire plant was almost completed, and the plant for washing coal enlarged. "When the company was first organized," continues the report, "it was intended to produce nothing but blooms and billets, but the directors subsequently decided that it would be an advantage to get more capital and provide a modern plant, capable, if necessary, of rolling all the product of the open hearth into finished rail sections. The steel framework for the rail mill, hotbed building and finishing mill building is now all erected, and some of the foundations for the machinery in place. The engines are contracted for, to be delivered August 9, and much of the machinery is well under way in the company's own shops. Were it necessary, the rail mill could probably be completed in October or November, but in the present condition of the markets, it is considered advisable to perfect the organization of the other departments before pushing the rail mill to completion." Since April, $3,000,000 has been brought into the treasury in payment of 50,000 shares of common stock at $60 per share, and this sum would be used to reduce the debt and continue the improvements on the property.

In The Coal Company's report it was shown that the output had increased from 884,000 tons in 1895 to 2,651,263 tons in 1902. The net proceeds from the sale of coal, and from steamships, railways, etc., amounted to $1,551,880.99, from which was taken the interest on bonds of $493,967, leaving a surplus net income of $1,057,913. When the sinking fund was deducted the balance to general surplus was $937,681.

The old board of directors were elected for the ensuing year, consisting of Messrs. H. M. Whitney, Boston; Sir W. C. Van Horne, Montreal; Hon. George A. Cox, Toronto; Hon. David McKeen, Halifax; Hon. Robert Mackay, Montreal; H. F. Dimock, New York; Almeric H. Paget, New York; James Ross, Montreal; F. S. Pearson, New York; R. B. Angus, Montreal; J. S. Maclennan, Sydney; Elias Rogers, Toronto; W. B. Ross, Halifax; B. F. Pearson, Halifax; Hon. L. J. Forget, Montreal.

Other interesting points in the agreement are that the Iron and Steel Company shall not sell any coal mining area or lease ships or vessels or any personal property without the consent of the Coal Company. The Steel Company shall use all reasonable means to increase the demand for coal and to increase the output of the mines by developing, expanding, and adding machinery. The price of coal is, of necessity, to be settled by arbitration, but under no circumstances shall it be lower than $1.21 per gross ton.

NOVA SCOTIA MANUFACTURERS ORGANIZE.

THE organization of the Nova Scotia Branch of the Canadian Manufacturers' Association has been completed. At a meeting of manufacturers at the Board of Trade rooms, Halifax, on June 13, officers were appointed to hold office till the annual meeting of the branch, which will be held two weeks before the yearly meeting of the parent association. The officers till then are the following :

President—Jos. Henderson, Henderson & Potts, Halifax.
Vice-President — Dr. D. H. Muir, Condensed Milk Co., Truro.
Secretary—J. R. Macleod, Halifax.
Executive Committee—John F. Stairs, N.S. Steel Co., Halifax; J. P. Longard, Longard Bros., Halifax; T. M. Cutler, Acadia Sugar Refining Co., Halifax; Wallace Buell, Dominion I. and S. Co., Sydney; James Munro, Munro Wire Works, New Glasgow; A. F. Pelton, Rhodes-Curry, Amherst; W. B. Taylor, Robert Taylor Co., Halifax; D. W. Robb, Robb Eng. Co., Amherst. C. M. Crockett, I. Matheson & Co., New Glasgow; Wm. Lithgow, Port Hood Coal Co., Halifax; T. R. Gue, Acadia Powder Co., Halifax; A. Moir, W. & A. Moir, Halifax; H. H. Hamilton, G. J. Hamilton & Sons, Pictou.

The meeting opened with Jos. Henderson in the chair and J. F. M. Stewart, assistant secretary, of Toronto, as acting secretary.

Mr. Stewart exhibited a folder having on its cover the statement that the annual meeting of the association (which has a membership of 1,000) would be held in Halifax next August. Inside of this folder were stated the aims of the association. These are to endeavor to secure from the Government at Ottawa conditions that will encourage manufacturing industries in Canada and keep our home markets for our own manufacturers. All Provincial and Federal legislation is vigilantly watched to preserve the Canadian manufacturers from encroachments from any quarter. They have made from time to time practical suggestions to the Government regarding legislation, Government returns, etc., which often have been adopted. The encouragement of Canadian export amongst its members is another object of the association, and it has special representatives in Great Britain, Europe, Australia, New Zealand, South Africa and the West Indies. Canadian buyers have, through the association, been placed in touch with foreign buyers, and without increasing responsibilities have in many instances opened up a profitable trade. During the last six months nearly 1,800 inquiries from foreign buyers were forwarded to the members. Financial reports on foreign firms are obtained at a special rate, and a bureau of commercial intelligence is open free to all members.

A deputation was introduced consisting of President Longley and Manager Wood, of the Nova Scotia Provincial Exhibition. Both these gentlemen united in asking the help of the Nova Scotia branch of the association in making the exhibition more like it should be from a manufacturer's standpoint.

This proposition for co-operation was endorsed by the association and the executive will take the matter into consideration.

The statement was made that there are at least 200 business enterprises, representatives of which are eligible for membership in the association. The 55 now enrolled are the following named :

Amherst—
- Amherst Boot and Shoe Mfg. Co.
- Amherst Foundry and Heating Co.
- Christie Bros. & Co.
- Dunlap, Cooke & Co.
- Rhodes, Curry & Co.
- Robb Engineering Co
- Starr Manufacturing Co.

Getson's Cove—
- Jos. N. Wolfe.

Halifax—
- Acadia Powder Co.
- Acadia Sugar Refining Co.
- Geo. E. Boak & Co.
- Clayton & Sons.
- Collas, Whitman & Co.
- Consumers Cordage Co.
- G. S. Campbell & Co.
- Dominion Electrical Works.
- Henderson & Potts.
- Imperial Publishing Co.
- A. Keith & Son.
- Longard Bros.
- McAlpine Publishing Co.
- McDonald & Co.
- Moir, Son & Co.
- John P. Mott & Co.
- Nova Scotia Fertilizer Co.
- Jas. Hillis & Sons.
- A. & W. Mackinlay.
- Dartmouth Rolling Mills, Limited.
- Gordon & Keith.
- Bigelow & Hood.
- W. & A. Moir.
- Davis & Fraser.
- Port Hood Coal Co.
- Nova Scotia Furnishing Co.
- H. R. Silver.
- Simson Bros.
- Smith & Proctor.
- N. & M. Smith.
- John Starr, Sons & Co.
- St. Croix Paper Co.
- Robt. Taylor Co.
- Arthur N. Whitman.

New Glasgow—
- Bailey-Underwood Co.
- Fraser Bros.
- I. Matheson & Co.
- Munro Bros. Wire Works.
- Nova Scotia Steel Co.

Oxford—
- Oxford Manufacturing Co.
- Oxford Foundry and Machine Co.

Pictou—
- G. J. Hamilton & Sons.
- A. McKenna, sr.

Sydney—
- Dominion Iron and Steel Co.

Truro—
- Truro Condensed Milk Co.

Antigonish—
- Canada Milk Condensing Co.

Lunenburg—
- Lunenburg Foundry Co., Limited.

IRON WORKS TO LOCATE IN LONDON.

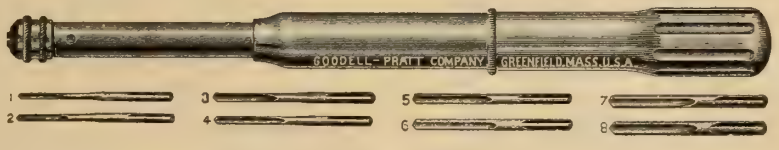
The Guelph Iron and Steel Co., of Guelph, will locate in London. The council will exempt the company, as the law may permit, from taxation upon the assessed value of their property over and above its present assessed value, and provide for the closing of Trafalgar street for the purposes of the company. The company proposes to run a double shift—night and day—also to pay $80,000 a year in wages. Forty or fifty carloads of machinery will be taken from Guelph, $20,000 to 25,000 will be expended in buildings, and from $25,000 to $30,000 in new plant. In addition to the present plant the value is $50,000. Of the hands employed from 60 to 70 per cent. will be skilled labor. The employes are mostly high-priced men, working under the International Iron Worker's Union schedule. It was decided to fix the assessment of the new foundry at $5,000.

OUR FOREIGN TRADE GROWING.

THE foreign trade of Canada is growing fast. On the basis of imports for consumption and exports on domestic merchandise only, for the 11 months of the present fiscal year, the foreign trade of Canada shows an increase of $35,000,000. The imports and exports of the former period were $348,705,085, and of the latter period $313,863 314. With corn, bullion and exports of foreign merchandise included, the increase in the total trade is a little less than $35,500,000, the total amount being $366,942,595 for the past 11 months. For the 11 months of 1901 the total was $333,472,908.

The imports for the month of May show a gain of $359,129, and for the 11 months a gain of $18,561,298. The exports for the month exceeded those of May last year by $4,079,060. For the 11 months the betterment was $17,462,516.

The exports of agricultural and dairy products and cattle for the month make a splendid showing, the chief items being : Peas, $104,118, increase $37,637 ; wheat, $2,858,505, increase $2,503,815 ; flour, $312,548, increase $92,105 ; hay, $360,248, increase $166,956 ; potatoes, $122,505, increase $95,046 ; cattle, over one year, $1,169,955, increase $659,316; butter, $126,416, increase $87,234 ; cheese, $542,041, increase 3145,655 ; bacon, $1,181,083, increase $96,489.



NEW PRESIDENT ELECTED.

The directors of The American Screw Co. have elected Mr. Samuel M. Nicholson as the executive head of their company. Mr. Nicholson is president and general-manager of The Nicholson File Co., the largest file and rasp concern in the world, which controls six large plants, with head offices at Providence, R.I. The Canadian factory of the company is at Port Hope, Ont.

MANITOBA MARKETS.

Winnipeg, June 16, 1902.

TRADE in all lines of hardware is good, but more particularly building hardware, as many of the buildings have now reached a point where these things are needed. There is a good demand also for household conveniences, oil stoves, cooking utensils and similar lines. In the city, the trade in gas stoves has never been as large as it is at present. Collections are better than they were two weeks ago. In binder twine the movement is slow, but shipments of twine will begin on Monday. They will not be active, however, until about July 1.

Paints and oils are active, but no change of price is recorded except for linseed oil which has advanced 2c. per gallon.

Scrap of all kinds is in good demand and prices are firm and without change.

The price list for the week is as follows :

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire 10	3 85

NOTES.

Moody & Sutherland, hardware merchants, of Selkirk, are erecting a fine new block of three stores on the main street of that town.

The Brandon binder factory commences operations this week. The company have secured an expert to take charge, and considerable interest is taken in the success of the project. Brandon bids fair to become quite a manufacturing centre.

MARITIME BOARD OF TRADE.

President Black, of the Maritime Board of Trade, has addressed a letter to the subordinate boards of trade in the Maritime Provinces asking their opinion as to where the June meeting of the executive committee shall be held.

The executive of the Maritime Board is required under the by-laws to be called together during the month of June, and at the forthcoming meeting arrangements are to be made for the annual convention, which is to be held in August next at Sydney, C.B.

NOW HE'S DOUBLE.

On Wednesday, June 18, at 4 o'clock in the afternoon, Mr. John W. Richardson, of the Canada Hardware Co., was married to Miss Martha D. Cleland, daughter of Mr. James Cleland, manufacturer, of Montreal. Ths ceremony was performed at the home of the bride's parents, 15 Souvenir street, Montreal, by Rev. J. Lyall George, M. A., of the Calvin Presbyterian Church. A large number of the relatives and friends of the young people were present, and the wedding was a very pretty one.

Mr. and Mrs. Richardson will spend their honeymoon at Old Orchard Beach, stopping at Portland and other places of interest on their way there. On their return to Montreal they will take up their residence on St. Hubert street.

Mr. Richardson was given a "send-off" from his fellow-employes in the Canada Hardware Co. in the shape of a purse of money. The groom is one of the most popular members of the wholesale hardware trade of Montreal, and many will be those who offer him congratulations, among whom none join more heartily than HARDWARE AND METAL.

John Bowman

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, June 20, 1902.

HARDWARE.

BUSINESS in hardware throughout the week has been active, both manufacturers and jobbers reporting a brisk demand for all seasonable lines. Trade at country points has, no doubt, suffered from the unusually inclement weather, but most of the wholesale houses say that they have felt the effects of this only lightly. Malleable fittings have been advanced from 30 and 5 per cent. off to 29 per cent. off only. The discount on malleable unions is now given at 60 and 10 per cent. off. Harvest tools of all sorts are in the most active demand.

SCYTHES.—There is an active movement in the market for scythes, and last week's prices are still quoted. They are as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—The market is growing quieter. Some business is being done at $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—Trade is fair. Prices are unchanged. Quotations are Nos. 6, 7 and 8 gauge, $3.45; No. 9, $3.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is only a small amount of business doing, and our quotations are now as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market is quiet and prices unchanged. The discount remains at 22½ per cent.

BRASS AND COPPER WIRE.—There has been no improvement in the demand. The discount on both brass and copper wire is 60 per cent.

FENCE STAPLES.—There has been no important change. The trade has settled down to fairly quiet conditions, and the prices are still $2.90 per 100-lb. keg for bright, and $3.25 for galvanized. 25c. extra is charged on 25 and 50-lb. packages.

WIRE NAILS.—Shipments of wire nails are still in active progress, the price being $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—These are still moving out rapidly with no change in price to report. Small lots sell for $2.45 per keg, and in carlots the price is $2.37½. The discount on flour barrel and coopers' nails is 40 per cent.

HORSE NAILS.—There is no change. The demand continues no more than moderate, and the discounts remain the same. Our quotations are now as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—There is but a small amount of business doing in horseshoes. Our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The demand continues brisk all round, and a good business is being done. The discounts are now as

Canada Iron Furnace Co.
MIDLAND, ONT. Limited

follows: Round head bright, $82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—There is still a fairly active market in this line. No quotable change has occurred, and the discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Many orders have been received this week for building paper, and the market is firm, as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The demand for cordage has been somewhat better this week, but a quiet market still prevails. Binder twine is becoming scarce, and our quotations follow: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The demand is fair. Prices are unchanged. We quote: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—Business has slackened somewhat, and this week the demand is no more than moderate. The price is still $1.37½ per 100 square feet.

POULTRY NETTING.—Trade has been fairly satisfactory during the week, though no very heavy demand was experienced. The discounts on Canadian or English poultry netting are as follows: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—The demand is of the best, harvest tools being among the best selling lines this week. The discount is 60 per cent.

FIREBRICKS. Trade is fair and prices unchanged. Scotch sell for $17 to $22, and English for $16 to $22 per 1,000.

CEMENT.—The market continues rather quiet at steady prices. Quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

More **Elastilite Varnish**

sold up to date this year than during any previous twelve months since we introduced it. "Reason?" There never has been, there is not now, and we doubt if there ever will be a Varnish put up, either by domestic or foreign makers, equal to ELASTILITE for the same money.

In tins only, from ½-pints to 1 gallon.

MANUFACTURED ONLY BY

The Imperial Varnish & Color Co. LIMITED

Toronto, Ont., Canada.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

A FEW QUESTIONS--

Is the paint end of your business paying you?

Have you given that branch your serious consideration?

Have you decided to chance the result of selling cheap stuff?

Have you ever thought that you might make a good showing in that branch by securing the agency for the famous

"Ark Brand" Paint?

Do you know that hundreds of Canadian merchants cannot say too much in favor of this genuine Canadian paint?

Is it news to you that we back all our statements with a strong guarantee on each tin?

THE **FRANCIS-FROST C°** Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

METALS.

The situation in metals is not materially changed, either here or on the foreign markets. It was expected that something like a boom would be felt in the English market on the close of the war in South Africa, but, so far, this has failed to materialize, and prices keep steady. The demand must come, however, soon from South Africa, where there is a great need for all metals for the building and rebuilding which must soon commence. Locally, there has been no change in prices. Pig tin is still strong and the opinion is that it will go higher. In lead pipe, composition and waste are quoted ½c. higher.

PIG IRON.—There has been no important change in this market, which continues firm at the prices here quoted: Canadian, $18.50 to $19, and Summerlee, $21.50 to $22.

BAR IRON.—There is a good demand, and prices are more settled and steady. Merchants' bar is quoted at $2, and horseshoe iron at $2.20.

BLACK SHEETS.—Trade is only fair. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is in good demand at the prices we quote, which are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25: "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—The price of ingot copper remains unchanged at 14c. The market is not active.

INGOT TIN.—The feeling in ingot tin is for higher prices, although no change has yet been made since the advance of last week. Straits is quoted at 33½c., which is a firm price. The English market is reported steady and unchanged as to price.

PIG LEAD.—There is nothing new to report. Trade is quiet at $3.25.

LEAD PIPE.—Composition and waste have been advanced ½c., making the present selling price 8c. Ordinary remains at 7c. The discount is 37½ per cent.

IRON PIPE.—The demand keeps up well at unchanged prices. We quote as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There is a good inquiry for tinplates, but on the local market there is some scarcity. Charcoal tinplates are quoted at $4.75 to $5.25 per box, and cokes at $4.25 per box.

CANADA PLATE.—There have been a great many inquiries for galvanized Canada plate, of which 60's are very scarce. No change is reported from the English market. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—Business continues quite brisk at the prices here quoted, which are unchanged from last week. Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—There is a fair trade doing. No quotable change has been made, and prices are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is little doing. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—Trade is fair. The price is $7.50.

COIL CHAIN.—There is very little doing and our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7½c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The inquiry is light and no change in price has occurred. The foreign markets for sheet zinc are steadier. The price here is $5.85 to $6.25.

ANTIMONY.—Business is quiet, and the price is 10c.

ZINC SPELTER.—No important change has been made here, and the price remains at 5c.

SOLDER.—Business is as usual, with no quotable change to report. The price of wire solder is 20c., and of bar solder, 18 cents.

PAINTS AND OILS.

The market for paints and oils is still firm. Orders are not coming in as fast

as two or three weeks ago, but the grinders seem to be still quite busy. The market is practically bare of linseed oil and dry white lead, and arrivals of both these staples are looked forward to with some impatience. Red lead is in active demand, and stocks are being thinned out rapidly. Paris green is still moving out rapidly, and at the present rate of shipment, the usual midsummer scarcity will be more accentuated than for some seasons. The optimistic feeling regarding the trade in general still prevails, and the opinion of all seems to be that the present lively conditions will continue through the summer months. Turpentine is unchanged in price. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 84c.; boiled, 87c.; In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The market has been uneventful during the past week. No changes in the prices are reported, and the trade continues quiet. Our quotations are as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

OUR METALLIC CEILINGS and WALLS

are the ideal finish for all kinds of buildings, because they combine beauty and utility.

We make an almost countless assortment of artistic designs—the plates fitting accurately, the joints imperceptible, and the pattern continuous in perfect precision throughout.

Their sanitary superiority, fireproof protection, handsome effect, and moderate cost appeal to all progressive people.

You can scarcely afford not to handle these superior goods—their uniform reliability makes satisfied customers every time.

Catalogue and price list of our full stock of unequalled metal building materials at your service.

The Metallic Roofing Co., Limited,

TORONTO. MONTREAL. WINNIPEG.

GLASS.

The local market for glass is dull and featureless, and prices quoted are scarcely more than nominal, and they are as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

With the exception of sheepskins, all classes of hides have advanced, although the market is too unsettled to be regarded as in any way firm. Outside competition is given as the cause of the higher prices, and offerings are light. Beef hides are 2c. higher this week, calfskins, 2c. higher, and lambskins have gone up 10c. We quote : No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. No. 1 calfskins, 12c. ; sheepskins, 70c.; lambskins, 25c. per lb.

MONTREAL NOTES

Malleable fittings have been advanced 1½ per cent.

In lead pipe, composition and waste are 1c. higher.

Beef hides and calfskins have advanced 2c., and lambskins are 10c. higher.

ONTARIO MARKETS.

Toronto, June 20, 1902.

HARDWARE.

IN hardware trade is unchanged. No unusual demand is being experienced, but a good sorting up business continues, making the market healthy. The stocks in some lines of goods are light, but this is the fault of the manufacturers, who claim that in some cases it is almost impossible to get the raw material. In all lines is the sorting up trade increasing, especially so in stove fixtures, screen doors, window screens and poultry netting. There are still a good many orders coming in for both plain and galvanized fencing wires. There is also a good number of transactions in churns and wringers, and manufacturers in both these lines are trying to advance the prices on the ground that the present figures are altogether too low, as the increased cost of raw material and labor has reduced the profit of the manufacturer to little or nothing.

BARB WIRE.—A good many orders are coming in for this article. We quote f.o.b. Cleveland, $2.77½ for less than carlots and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—There is still a brisk business being done in galvanized wire, which is unchanged in price, and our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There continues to be a good business done in this line. We quote base price at $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a fair demand for fine steel wire, and the discount remains at 22½ per cent.

WIRE NAILS.—A steady trade is being done in this line and prices are unchanged. We quote as follows : $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque, and Montreal.

CUT NAILS.—The trade that is being done is light and the market is steady. The base price is $2.45 per keg, and 7½c. less for carlots.

HORSE NAILS.—A fair trade is doing. Discounts are : " C " brand, oval head, 50 and 7½ per cent.; on " M " brand, 50, 10 and 5 per cent.; " Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—The demand continues fair at unchanged prices. We quote : Iron shoes, No. 2 and larger, light,

medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws continues heavy, but the supply is light. The discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The scarcity of stocks in this line still remains. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—As much difficulty as ever is experienced in getting supplies. The demand is heavy, and our quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—There is a good trade doing in this line at steady prices, and our quotations are as follows: Common doors, two or three panel, f.o.b. factory points as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4 inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Trade in this line is increasing. The prices are unchanged, the discount still being $1.37½ per 100 square feet.

SPADES AND SHOVELS.—There has been little improvement in the demand during the week. The discount is 40 and 5 per cent.

ROPE.—Trade is beginning to improve nicely and before long a good demand is expected to set in for the lighter lines of harvest ropes. We quote: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—Already there is a fair demand setting in. Trade, this season, is expected to be large, and our quotations are as follows: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—The demand still continues good. This season trade has been exceptionally heavy. Quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4 inch.

HARVEST TOOLS.—The retail trade are looking sharply after their stocks of harvest tools and a good many sorting-up orders are coming in. Jobbers are now in a position to handle "D" goods, as the manufacturers have just filled their orders. The discounts continue unchanged at 60 per cent.

BUILDING PAPER.—The trade doing in this line is moderate. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—The demand for lawn mowers is keeping up well, and prices are unchanged. Discounts are as follows: 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—Trade is still quiet, but the demand is expected shortly to increase.

POULTRY NETTING.—This article is scarce and manufacturers are unable to keep jobbers supplied.

TINWARE AND ENAMELLED WARE.—Tinware is fairly active, while the movement in enamelled ware is steady.

SPORTING GOODS.—The demand for ammunition and loaded shells continues fair, and a number of guns are still being sold.

CEMENT.—The market is gaining in strength, but prices are unchanged. The demand from all quarters is heavy and keeps the manufacturers busy with their orders. We quote: Canadian Portland, $2 to $2.85; Canadian hydraulic, $1.35 to $1.60; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl.

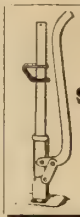
METALS.

The general metal trade continues in a satisfactory condition, and the shipments of supplies from the mills are becoming larger. The particular feature of the local market is the decline of $1 per 100 lb. in tin, owing to the prolonged weakness and inactivity of the London and New York tin markets. There is also a depression in the United States copper market, and little business is being done there, the situation not being clear enough to encourage buying on a liberal scale. The outside iron and steel position is still strong and considerably more so than a week ago, but the prices show little signs of sharply advancing, as the buying is on a limited and conservative scale.

PIG IRON.—No new features have developed in the pig iron market, the local demand continuing heavy and the scarcity of stock being still felt. The United States market continues strong with a distinct tendency to advance. We quote on track, Toronto: No. 1 foundry, $21; No. 2, $20.50.

STEEL BOILER PLATES.—These are scarce and firm and United States millers are filled with orders ahead. We quote steel boiler plates at $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—The business in this line is active with a strong market. Quotations from stock are $2.75, and carloads on track, $2 per 100 lb.



STEEL RAILS.—The price of steel rails of Canadian make remains unchanged at $36 per ton.

TOOL STEEL.—The demand continues good and the prices are steady, and our quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

SPRING STEEL.—There continues to be an active demand in this line.

MILD STEEL.—There continues a great scarcity in mild steel.

BOILER TUBES.—These are again higher, but it is difficult to say what the prices are.

BAR IRON.—This line continues very scarce and the demand exceeds the supply. Quotations are as follows : $1.95 to $2.05 base. Extras cut to length while rolling : 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is a fair amount of business being done in this line and prices are well maintained. We quote : Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—The improvement in the demand noted last week continues, and prices are steady. We quote : All dull, $3 ; half polished, $3.10 ; all bright, $3.75.

GALVANIZED SHEETS.—These are still in good demand. We quote in case-lots, as follows : Queen's Head, $4.50 for 28 gauge ; American, $4.40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN.—There is a fair amount of business being done. The continued weakness in the outside markets has resulted in a decline of $1 locally. We quote $32 to $33 per 100 lb.

TINPLATES.—The demand has improved and stocks, locally, are being reduced. The outside markets are inactive. We quote : Charcoal, $4.75 to $5 per box, and cokes, $4.25 per box.

COPPER.—Ingot copper has been in good demand. The outside markets are still weak and buying is light. We quote : Ingot, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—Trade continues fairly good. The discount remains at 15 per cent.

PIG LEAD.—There is an active demand for pig lead. There have been no new developments in the outside markets and buying there is of the hand-to-mouth order. We quote $3.50 to $3.75 for pig, and $5 for bar lead.

IRON PIPE.—Trade continues active and the prices are unchanged. The local stocks are light, and we now quote per 100 ft. : ¼-in., $2.40 ; ⅜-in., $2.65 ; ½-in., $2.85 ; ¾-in., $3.65 ; 1-in., $5.20 ; 1¼-in., $7.35 ; 1½-in., $8.95 ; 2-in., $12.55 ; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—This line is quiet and quotations are unchanged at $5.50 to $6.00.

ZINC SHEETS.—There has been quite a large business in small lots during the week. We quote : Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—This line continues in good demand and prices are unchanged. We quote : Half-and-half, guaranteed, 20c.; do. commercial, 19½c.; refined, 19c., and wiping, 18½c.

ANTIMONY.—Business in this line has been quiet during the week. We quote $19.50 per 100 lb.

PAINTS AND OILS.

Trade in paints and oils during this month has been well sustained and the prices are all steady. The market is strong for linseed oil and turpentine, the latter being very high in the South, where prices have reached the highest point ever known at this time of the year. The market there is firm and stocks are kept down by deliveries on contracts, leaving very little of that article available for daily market needs. Some local houses are experiencing a falling off in the demand for raw and boiled linseed oil that they cannot account for, as trade in other lines is keeping up well. Paris green continues inactive and firm. White leads ground in oil are still active, and quite a business has been done in red leads. We quote as follows :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. packages ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25 ; bladders, in 100 lb. kegs, $2 40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL— Raw, 1 to 2 barrels, 84c.; boiled, 87c. ; 3 to 5 barrels, raw, 83c.; boiled, 86c.; 6 to 9 barrels, raw, 79c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 73c.; 2 to 4 barrels, 72c., delivered. Toronto,

INGERSOLL, ONT.

Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a good local demand for glass, and the market is steady. Our quotations are as follows: Under 26 in., $4.45; 26 to 40 in., $4 65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There has been a falling off in trade these last few days. The prices are unchanged. We quote: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The market this week is without feature. Our quotations are as follows: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8 to 8¼c.

SKINS — Calfskins are very weak and dull, and prices are likely to be lower. We quote as follows: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies), 60 to 70c. each; sheepskins, 80c. to $1; shearlings, 20c.

WOOL—The prices are weak and unchanged. Fleece wool is quoted at 13c. and unwashed 7c. per lb. f.o.b., Toronto.

TALLOW—This article is scarce. Quotations are 6¼ to 6½c. per lb.

COAL.

The situation is much the same as it was a week ago, the strike being still unsettled. Soft coal continues firm at the advance, and a further appreciation is not improbable. We quote at international bridges: Soft coal, $3 to $4 per ton.

PETROLEUM.

Trade in this line is steady and prices are unchanged. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Tin has declined $1 per 100 lb.

NOVA SCOTIA MARKETS.

Halifax, June 16, 1902.

THOUGH business continues steady, and a fairly large volume is being done, the hardware trade has not been so brisk for the last week as it has been for a number of weeks past. Indeed, this is the season when the trade is expected to be a little slacker than usual, except in some lines which are only dealt in at this time of the year. However, there has been rather more business done in June so far than in the previous year, and dealers are quite satisfied with the amount that is doing, and with the trade conditions generally which prevail, both in the city and throughout the country. Payments are being satisfactorily met all around.

* * *

This is the season for haying tools and other farmers' implements, and a good trade has been done up to date. Considerable difficulty has been experienced in getting orders filled promptly by the manufacturers, and only those dealers who placed their orders very early have been able to put in their full season's stock. Jobbers who are not well supplied will have some difficulty from this date in obtaining supplies. There seems to be an unusual demand this season for farm implements and machinery. The prosperous times and abundance of money in circulation, no doubt, have a tendency to induce buying more largely. It is money that makes business move, and there seems to be a good supply of this in all parts of the country and among all classes of the people.

* * *

There is still a considerable demand for builders' materials, but the orders are smaller than in the earlier part of the season. Fishing gear is only in fair demand and prices firm. Paints and oils are still going out in considerable quantities. Linseed oil has advanced 3c. per gal., and is firm at that price. Turpentine has also been very firm, but there is no advance as yet in the local market quotations, though the primary market shows a strong advance tendency. Paris green is now in demand, as the season has come when the farmer has to fight the potato beetle and other pests injurious to crops. The metal markets are all firm, and in some lines there have been slight advances. During the season there has been a considerable demand for mill and mining machinery, as these industries are very active.

* * *

The export trade of Halifax, as indicating the general activity this season, is worthy of note. The value for the week reached $221,568, as against $157,642 for the corresponding week last year. The total from September, 1, 1901, to June 14, 1902, was $7,042,088, as against $6,598,392 for the preceding year. For last week the exports are apportioned as follows: To Great Britain, $168,134; West Indies, $33,471; United States, $9 532; Newfoundland and St. Pierre, $8,331; Italy, $2,100. As may be seen by the figures, by far the larger portion went to Great Britain, and includes large shipments of canned lobsters and lumber.

R.C.H.

MARRIAGE OF A HARDWAREMAN.

Mr. Wilber Gordon, a successful hardware merchant, of Tweed, Ont., was the other day united in marriage to Miss Ethel Johnston, daughter of Rev. Wm. Johnston, of Stirling. The bride was assisted by Miss Hattie Martin, daughter of Mr. D. Martin, hardware merchant, of Stirling. Mr. and Mrs. Gordon will reside in Tweed. HARDWARE AND METAL joins with their numerous friends in wishing them many prosperous years of wedded bliss.

BUILDING PERMITS ISSUED IN TORONTO.

PERMITS granted during the week in Toronto are as follows: William Crickton, for a two-storey brick residence on Smith street, for $4,000; J. J. Fraser, for a two-storey brick dwelling on Pendrith street, for $1,800; W. Marles, for a pair of two-storey stone and brick dwellings on Hamburg avenue, for $2,500; Thomas Coswell, for a two-storey brick residence on Cluny avenue, for $5,000; Mrs. J. B. Kennedy, for a two-storey brick dwelling on Perth ave., for $1,800; R. English, for two-storey brick additions to 642 and 644 Yonge street, for $750; W. T. McIntyre, for a two-storey brick dwelling on Glen Road, for $1,500; Jacob Singer, for a pair of two-storey stone and brick dwellings on Crawford street, for $3,750; E. A. Drummer, for a pair of two-storey brick dwellings at 358 and 360 St. Clarens avenue, for $1,000; Daniel Lamb, for three two-storey brick and roughcast dwellings at 404 to 408 Sumach street, for $4,000; E. A. Drummer, for two pairs and two detached brick and roughcast two-storey dwellings, for $5,000; G. W. Foster and Jno. Crawford, for alterations and brick-cladding at 99 and 101 Givens street, near Argyle street, for $500; Mrs. B. D. Larimier, for two verandahs, at 131 and 133 Avenue Road, for $285; E. J. Turner, for a two-storey brick and stone dwelling at 173 St. Clarens avenue, for $1,800; Jos. Craig, for a two-storey stone and brick house on Leslie street, for $500; Mrs. Shortreed, for addition to dwelling in rear of porch at 175 Bloor street east, for $400; E. J. Turner, for a two-storey brick dwelling at 9 Conhuy avenue, for $1,400; Conlan Bros., for a frame and galvanized iron driving house and hay loft in rear of 15 Alexander street, for $300; and Charles Leighe, for a two-storey brick dwelling at 200 Dufferin street, for $1,700.

TO PREVENT THE FREEZING OF GAS PIPES.

A simple but effective device for preventing the freezing of gas pipes is described in The Illustrirte Zeitung fur Blechindustrie, consisting merely in the insertion of a wider piece of pipe just where the conduit issues from the ground or wall. For a conduit of a diameter from $\frac{3}{8}$ to $\frac{1}{2}$ of an inch a length of from 20 centimeters to 30 centimeters of a pipe 1 inch in diameter suffices. The deposition of the water particles contained in the gas, which on leaving the works have a temperature of about 10 degrees C., naturally takes place just where the gas is subjected to the most abrupt change of temperature, i.e., on its issue from the ground. If the external temperature is sufficiently low, the deposited water immediately congeals and clogs the conduit. As soon as the gas has acquired the temperature of the conduit the deposition of water and congealing cease, and this is said to be the case a short distance beyond the first cooling point. Therefore, there should be no congealing beyond the inserted wider piece, and this piece is wide enough to accommodate a thick ice-crust and to still leave a free passage for the gas. As a matter of fact, the principle of this new method is already employed in street lamps, and with success. Anyhow, the expense involved is trifling, and it well merits a trial.

BUILDING PERMITS IN OTTAWA.

In Ottawa during the week building permits have been issued as follows: The Canadian Conservatory of Music Company, Limited, for a new conservatory of music on Albert street, to cost $7,000; Stephen Towns, for a frame dwelling on Poplar street, for $400; S. J. Davis, for a brick veneered dwelling on Patterson avenue, for $2,100; Thomas Lawson, for a frame dwelling on Veltoria street, for $1,000; James Vaughan, for two shops and dwellings on Dalhousie street, for $4,200; F. X. Talbot, for a brick-veneered dwelling on Friel street, for $1,750; R. E. Foot, for a brick-veneered dwelling on Fourth avenue, for $1,000.

CALCIUM CARBIDE VS. DAYLIGHT.

The acetylene flame has the peculiar and valuable property of being the nearest approach to the daylight of any artificial light we have, says The Plumber and Decorator. It is so nearly like that it can be used for purposes which are otherwise impossible when the sun is down. The manager of a company which manufactures artificial stone says that since his acetylene installation has been put in they have been able to accomplish the difficult task of matching natural stones by artificial light. It is also said that certain large drapery establishments have "acetylene rooms," where ribands and what not can be matched or otherwise be made to show their true colors after dark. In a large lithographic works acetylene is used for distinguishing the various yellow tints—an impossible task with either electricity or gas—and this has enabled the work and output to be rearranged to the extent of saving the cost of the installation the first year. It appears that a Californian artist uses acetylene for color mixing and painting at night, finding that color values can be judged equal to daylight, with the very important advantage that with acetylene the power of the light is unvarying, whereas daylight undergoes more or less change every hour of the day or oftener.

FIRE IN A PLUMBER'S SHOP.

Fire on Friday, June 13, did damage to the premises of W. Mashinter & Co., plumbers, 97 Adelaide street west, Toronto, to the extent of $200. The flames originated in the rear of the building and were caused by the carelessness of one of the employes, who set some oakum on fire. The fire brigade was summoned and the flames were quickly extinguished. Business is going on without interruption, and the loss is covered by insurance.

PLUMBERS PROPOSE A REMEDY.

REPRESENTATIVE master plumbers of Toronto met the civic sub-committee on water-waste prevention on the 13th inst. It was thought by the sub-committee that part of the waste might be stopped. It would cost $1,000,000 to place meters on all the services, and many of them do not yield sufficient revenue to justify the expense of maintenance, $4 per year. Many of the plumbers believed that the meter system would prevent much waste, but in a great many cases they were not practicable.

The following proposed amendments were endorsed by the plumbers:

All taps used for the drawing and shutting off of water in any premises supplied with water from the waterworks must be stamped by the city engineer, and no tap shall be hereafter attached to any service pipes which has not been so stamped by the city engineer. The city engineer shall not stamp any taps for use upon water pipes which are not acceptable to him in design and material.

The provisions of the preceding sub-section shall apply to all new taps hereafter attached to the waterworks service pipes, whether upon new work or where new taps are required to take the place of those at present in existence.

No owner, agent, tenant, plumber or other person shall place any tap on any service pipe unless so stamped by the city engineer.

A charge sufficient to meet actual cost shall be made for each tap stamped, which must be paid for in advance before the owner shall be entitled to have them stamped.

The changes would not go into effect until April 1, 1903, so that stock now on hand may be disposed of. It was proposed that the inspection of the new taps be made by a practical man, under the city engineer.

The sub-committee will hold another meeting before reporting.

CONTRACTS FOR SEWERS.

The following contracts for sewers were awarded at Hamilton on the 6th inst.: Bay street, D. Newlands, 34½c. per foot; Strachan street, J. Armstrong, 37c. per foot; Wilson street, D. Newlands, $1.07 per foot; Bay street, J. Garvey, 87c. per foot; Sandford avenue, J. Armstrong, 64½c. per foot.

SOME BUILDING NOTES.

PLUMBERS' STRIKE IN TORONTO.

AN open rupture has resulted from the trouble between the journeymen and master plumbers of Toronto.

For some time past the men have been discussing and agitating for an advance in their pay from the present rate of 27½ to 32½c. per hour to a minimum wage of 37½c. per hour, notwithstanding that under an agreement that does not expire until January 1, 1901, they had bound themselves to adhere to the present scale of wages. At the time this arrangement was made, the journeymen plumbers and gas fitters expressed themselves as well satisfied with their bargain and for over a year have been enjoying the increased pay and privileges obtained by it. So, when they approached their employers last week, asking for another advance, a meeting of the grievance committee, consisting of five men from each of the associations, was held on June 1, but no compromise was arrived at.

A special meeting of the Master Plumbers' Association was held on Friday evening, June 13, to consider the problem and decided to refuse the demands of their employes, urging that no reason of any importance was given why the present contract should be violated, and that, relying on the agreement, many of them had tendered for work they will be compelled to perform.

In the face of all this at a meeting of the Plumbers, Steam and Gas Fitters' Union on the evening of June 16, the men decided to go on strike the next day. The only reason given for breaking this contract by the men is that living is much more expensive than it was a year ago. So on the morning of June 17 about 250 plumbers and gas fitters in Toronto laid down their tools and quit work.

This action is regarded by the employers as wholly unreasonable, and at a conference between a committee from the master plumbers and the executive of the union on June 18, the employers declared that they were prepared to stand or fall by the agreement entered into by both parties, of which mention has been made above. The men, on the other hand, asserted that they would remain out until their demand for an increase is complied with.

The master plumbers were represented by Messrs. Robt. Ross, W. Mansell, J. H. Wilson, G. Clapperton and W. J. McGuire.

The Master Plumbers' Association will hold a meeting next Monday night, June 23, to map out a plan of action.

Indignation is expressed on all sides at the action of the men and there comes up the question of the validity of agreements entered into between employers and unions. Not long ago it was decided in a United States court that such an agreement is a contract which, if violated by the union, leaves it liable for damages, and an English court recently gave a similar decision, causing quite a stir in labor circles.

For the benefit of all our readers we publish below a copy of the contract just broken by the Union of Journeymen Plumbers, Steam and Gas Fitters.

THE AGREEMENT.

The agreement entered into by the Journeymen and Master Plumbers, Steam and Gas Fitters' Associations, in the city of Toronto, March 19, 1901, is as follows:

Clause 1. The hours of labor shall be from 8 a.m. to 5 p.m. with one hour for dinner. Saturday, 8 a.m. to 12 noon.

2. The minimum rate of wages shall be 27½c. per hour; and the men now receiving 27½c. per hour to get 30c., those getting 30c. to get 32½c. per hour, and that to be the maximum rate.

3. All overtime to be paid at the following rates: Saturday afternoon, time and one half; from 5 p.m. to 7. a.m. time and one half; and statutory holidays and Sundays, double time.

4. Wages to be paid before 5.15 p.m. on Fridays or 12.15 noon on Saturdays, on pay week, with a recommendation that every second Friday be pay day.

5. Time spent to and from out-of-town work, during working hours only, to be paid at the usual rate of wages, and if travelling all night a sleeper will be provided by employer.

6. All expenses for board and fares on out-of-town work to be paid by employer.

7. In case of any grievance arising, said grievance shall be referred to a committee of five from each association; committee to meet within three days of notice thereof, the committee to have full power to settle same.

8. That no plumber, steam or gas fitter shall perform any labor pertaining to his trade or put in any material supplied by or for other than his employer, who shall be a bona fide master plumber, steam and gas fitter, and a member of the Master Plumbers, Steam and Gas Fitters' Association, but no enforcement of same to take place before being sanctioned by a joint meeting of the grievance committee of both associations, and three months to be given from date of signing this agreement.

9. The members of the Master Plumbers, Steam and Gas Fitters' Association agree to employ none but members of the Journeymen Plumbers, Steam and Gas Fitters' Association.

10. That no boy at either trade be allowed a kit of tools until he has served three full years at the trade.

11. That the time for the enforcement of this agreement takes effect from the first day of April, 1901, and to stay in force until the first day of January, 1904, and should either party to this agreement wish to change, add, or amend the above, they shall give at least three months' notice in writing prior to the termination of the agreement.

Signed on behalf of the Master and Journeymen Plumbers, Steam and Gas Fitters' Associations.

PLUMBING AND HEATING CONTRACTS.

Guest & Co., 86 Church street, have secured the contract for overhauling and heating the dwelling of the late Senator Frank Smith, Bloor street, Toronto.

The Purdy, Mansell Co., Adelaide street west, Toronto, have contracts for plumbing in the following houses: Stephen Haas, Madison avenue; Bacon estate, Elgin avenue, eight houses; T. G. Bright, Ross street; Isaac W. Plewes, Wells street.

DISPUTE OVER PLUMBING.

Before Judge Morson in the Division Court, Toronto, on June 12, T. J. Nixon, plumber, sued J. R. McKenzie, builder, for $25.55 damages for alleged breach of contract. Mr. McKenzie put in a counter claim for $25 damages as he had, he said, to pay another plumber to finish the job. Much evidence on both sides was submitted, after hearing which Judge Morson gave judgment against McKenzie for $5.55, the counter claim being dismissed.

combines the efficiency of the coal range and the convenience and comfort of the gas range at a fraction of the expense of either. An absolutely safe and clean stove; will not smoke or get greasy; can't explode. Can be moved anywhere.

Made in large and small sizes. Write for catalogue.

THE THOS. DAVIDSON MFG. CO., Limited

General Agents, MONTREAL, CANADA.

"THE BLACK PRINCE"

That is a brand of horse nails we are confronted with just now. We propose to give it a little free advertising, and our friends some information. The "Black Prince" is the Prince of Darkness as his prototype the Devil is. They both want watching. The horse nail brand bearing this title is one that the makers evidently are ashamed to put their name on in conjunction. Why? Because they are not good enough in their own opinion. They sell them down South and are known in the trade as "nigger nails." Anything is good enough for niggers—and Canadians—they think.

We challenge The Capenell Nail Co. who make this nail to send in their regular goods at their regular prices obtained by them in their own market which is double what they are asking the Canadian buyer for their "Black Prince."

Every box of Yankee nails you buy displaces a share of Canadian money to American workmen. Canadian horse nails for Canadians should be your watchward, and above all that the old reliable "**C**" brand which has served you so faithfully for 37 long years should have your preference as they are better and don't cost you any more than the Yankee "nigger nails."

Canada Horse Nail Company

MONTREAL.

SMALLER PIG IRON OUTPUT.

THE current issue of the Iron Age contains the usual monthly summary of blast furnaces in action on June 1. Following are extracts:

"The troubles in the Shenango and Mahoning Valleys led to the banking and blowing out of a number of furnaces in the last days of May and on the first day of June, so that the furnace capacity active on entering the current month was temporarily reduced quite sharply. This is reflected in our monthly returns. Since then the majority of the furnaces have resumed work, so that probable production is now proceeding at quite the normal rate of over 1,500,000 tons per month.

"Our statistics show that the May output was 1,570,243 gross tons, the month having 31 days.

"The weekly capacity of the furnaces in blast on June 1 compares as follows with that on the preceding periods:

	Total capacity per week. Gross tons.	Coke capacity per week.	Charcoal capacity per week.
June 1, 1902	344,748	337,492	7,256
May 1	352,034	345,6.7	6,437
April 1	337,424	331,140	6,284
March 1	323,028	316,039	6,989
February 1	332, 45	32 ,440	6,605
January 1	298,460	291,992	6,468
December 1, 1901	324,761.	3 7,358	7,403
November 1	320,824	313,775	7,049
October 1	307,982	300,538	7,444
September 1	299,861	293,256	6,605
August 1	303,847	297,.09	6,578
July 1	310,950	303,793	7,157
June 1	314,505	306,991	7,514

"The position of furnace stocks, sold and unsold, was as below on June 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron:

FURNACE STOCKS:

Stocks—	Jan. 1.	Apl. 1	M y 1.	June 1.
Anthracite and coke	179,993	69,974	63, 83	5 ,939
Charcoal	38,091	23,289	20, 76	10,677
Total	218,084	93,263	83,859	62,616

"The sharp decline in the stocks of charcoal iron is noticeable."

FEELING THE PUBLIC PULSE.

An immense increase of business in Western Ontario has shown the United Factories, Limited, the advisability of greater shipping facilities. To meet the great and growing demand for its standard goods this firm (embracing Boeckh's Toronto factories, Bryan's London factories and Cane's Newmarket factories), has greatly enlarged and remodelled its London offices and warerooms. Dealers will be glad to know that prompt shipment of Bryan's brushes, Boeckh's brooms and Cane's woodenware can now be assured upon direct application to this branch, 65 Dundas street, London, Ont.

TRADE OPPORTUNITIES IN NEW ONTARIO.

By "Traveller."

IT seems marvelous that Canadians should have known so little a very few years ago of the value of the resources of their own country. It is true that the great development to the south of the line has brougbt about such a consumption of raw material that in relation to many substances the supply has grown short. Of pulp wood, for instance, and of all kinds of timber, of chrome iron and asbestos, this is eminently true. The creation of a new market for many of these substances has been the cause of many openings presenting themselves in the new districts of Canada, notably in New Ontario, the development of whose water-powers, and timber and mineral wealth, has already built up many small towns as well as such places of importance as Sault St. Marie and Sudbury.

One is struck by the great difference in prices that obtains between this New Ontario and Old Ontario. Take such a necessary article as bricks. They are difficult to get anywhere from Algoma Mills to Sault St. Marie for less than about $19 per 1,000, and yet there is plenty of clay, cheap fuel, sand and labor, although the latter costs a little more than in the east, but the difference in price of labor is nothing compared to the difference in price of bricks between that section and further east. The same can be said of poultry, vegetables, butter and many other articles, of which there is a large importation into the country. Lumber, too, in spite of the large local supply, is high in price.

There is a good opening for a sawmill on the Mississaga River at Dean Lake or Dayton Station, and another for a hardwood mill north of Desbarats.

Sault Ste. Marie, Bruce Mines, Victoria Mines and Sudbury are great markets for garden stuff of all kinds. The neighborhood of these mines is not fitted for gardening, owing to the fact that fumes from the blast furnaces and roasting heaps destroy all vegetation. One would have to go more than five miles away to be rid of the influence of the gases. Points 30 miles away from these centres are just as advantageously situated as those nearer, as the railway rates for milk and all products of the garden are less than it costs to drive five miles in a clay country with occasional very bad roads.

Both the Canadian Pacific Railway and the Algoma Central Railway have officials who attend to the developing of the country and are ready to give information about these openings. Our own knowledge leads us to class as among the best places offering good openings, North Bay, Sturgeon Falls, the country both north and south of Warren Station, particularly the French River valley, Massey, Webbwood, the country north of Dean Lake and Dayton, and Desbarats, and the country north of Echo Bay and Garden River. It would be well for the intending pioneer to correspond with the railway officials above mentioned before starting, so as to get some detailed information as to their particular requirements. Their addresses are "The Colonization Agent, Canadian Pacific Railway, Montreal," and "The Land and Labor Agent, Algoma Central Railway, Sault Ste. Marie, Ont."

There is an opening for a store and hotel combined at Dayton Station, a tinsmith would find an opening at Desbarats, and a saddler would also do well at the latter place.

It seems almost needless to say that the fisherman and hunter can find a territory after their own hearts' desire in this region.

The climate of the North Shore of Lake Huron is almost identically the same as that of Peterboro' or Montreal, but drier than Montreal, owing to a higher elevation.

OPENING FOR MANUFACTURERS' AGENT.

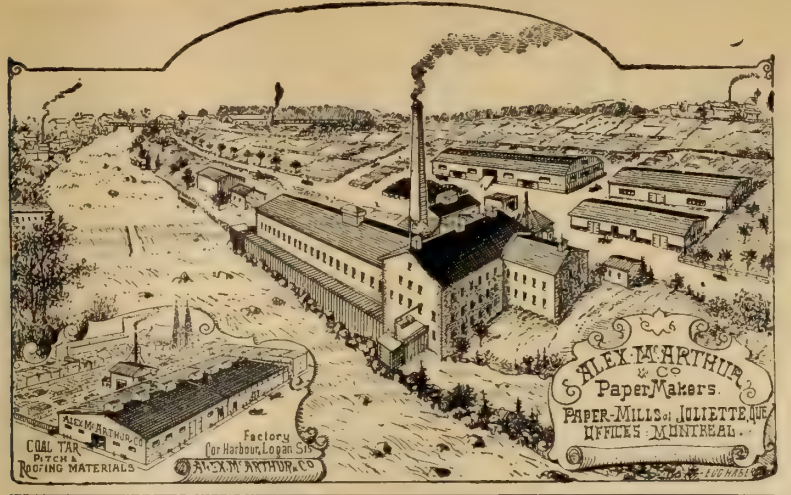
The manufacturer of a knife-cleaning machine, whose advertisement is running in HARDWARE AND METAL, is making inquiries of us regarding a manufacturers' agent to represent them in Canada. These machines are in general use in the Old Country, but have not yet been introduced to the Canadian trade. Any manufacturers' agent who would like further information may have the same by dropping a line to the editor of HARDWARE AND METAL.

A CHANGE IN A WINNIPEG FIRM.

Mr. E. S. Cooper, of Galt, Ont., has arrived in Winnipeg to join Mr. James Burridge in the late firm of The Burridge Co., agents for the Goldie & McCulloch Co., Galt, Ont.

Mr. Cooper has long been associated with The Goldie & McCulloch Co., as salesman and manager of their gasoline engine department, and is also thoroughly experienced in the other lines of their business.

Mr. Cooper will take the active management of the outside work of the new firm, Burridge & Cooper, and within a few weeks, it is expected, they will open out and carry a large stock of the product of The Goldie & McCulloch Co., Galt, Ont., of the different lines of machinery, safes and vault doors, which they make, and we bespeak for the new firm a prosperous career.



Mr. Burridge has been identified with the business community of this country for over 23 years, and we are satisfied that Burridge & Cooper will make a success of the above business.

They expect to extend their business from Port Arthur, Ont., to Victoria, B.C., and will be prepared to furnish estimates on complete power plants, flour mill machinery, planing mill outfits, and transact a general machinery business.

Apollo galvanized iron commands more money and shorter credit—at wholesale—than any other—but saves the worker money.

CURRENT MARKET QUOTATIONS

June 20, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

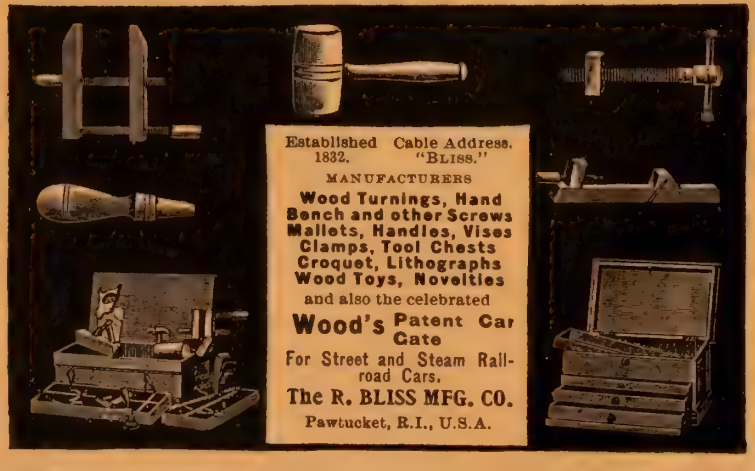
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

BRITISH HARDWARE EXPORTS.

EXPORTS of hardware and kindred lines to Canada from Great Britain continue to increase. The British Board of Trade Returns recently issued show this.

During the first five months of 1901 the exports of cutlery to Canada were valued at £17,922, while for the same period this year the value has increased to £23,275. This increase is all the more significant when the fact is taken into consideration that the total exports in cutlery to all countries show a slight decline.

The exports of pig iron to Canada show a large increase, the quantities for the respective five-month periods being 1,191 tons and 6,505 tons. In tinplates, there was also a material increase, the quantity for the first five months of 1901 being 5,010 tons, while this year it was 7,341 tons.

One of the largest increases was in the export of railroad iron, Canada taking 9,437 tons, against 2,946 tons during the same period last year. And the trade papers which are to hand this week show that one of the features of trade in railroad steel is the increase in the purchases on Canadian account.

Exports of galvanized sheets to Canada continue to increase, the returns showing the quantity to have been 2,641 tons against 1,374 tons for the same period last year. In unenumerated hardware the values were £9,130 and £12,305 respectively.

The Board of Trade returns show that in the general exports to all countries during the five months' period there were decreases in cutlery, pig iron, steam engines, plate and plated ware, and increases in tinplates, wrought goods, railroad iron, black plates for tinning, galvanized sheets, unenumerated hardware, agricultural machinery (not steam), bar, angle, bolt iron, etc., implements and tools, wire and wire rods, unwrought steel, sewing machines and cycles.

GOODS ON THE COUNTER.

In a good many stores it is a common thing to see the counters crowded with merchandise.

It is, no doubt, the proper thing to make neat displays of goods on the counter, but it was never intended that the counter should be filled with goods so as to inconveniently limit the space necessary for the clerks to wait on the customers.

By all means use the counters for tasty displays of goods, but be careful not to overcrowd them.

TRADE WITH WEST INDIES.

THE Canadian commercial agent in Trinidad, Mr. Edgar Tripp, in his report to the Department of Trade and Commerce, states that for the year ending March 31, 1902, Canada exported to that Island goods to the value of $98,958, an increase of $32,713 over the previous year. Other Canadian products amounting to $39,715 were shipped through Canadian ports.

The opinion has more than once been expressed by some of those who supply the hardware and kindred trades with goods that there was little or nothing in their line that Canada could export to the West Indies. Mr. Tripp, however, appears to think differently, He strongly advises our manufacturers of paints to give their attento that market, Cordage and twine manufacturers could also find customers on the Island, and there is also an opening for Canadian made furniture. He says our coal would be bought there, and makes the suggestion that owners of coal mines in Canada should cultivate the West-Indian trade, all the coal imported there now coming from the United States, which has driven British coal completely out of the market. Mr. Tripp is of the opinion that the visit to the Islands of the president and secretary of the Canadian Manufacturers' Association will be productive of much good, in the way of fostering trade between the two countries.

SEEKING RECIPROCAL TRADE WITH CANADA.

MINNEAPOLIS is endeavoring to create interest sufficient to secure the calling of a convention for discussing the question of closer trade relations with Canada. Some of the boards of trade in this country have received notifications to that effect, and asking for their cooperation.

For some time Minneapolis has been quite a centre in the movement for closer trade relations with Canada. In this, the western city is only following in the footsteps of Boston, Portland, New York, Chicago and other cities in the United States.

So far, however, the movement has excited little, if any, interest in Canada. We have not forgotten the time when this country importuned the United States again and again for commercial treaties, which would modify the restrictions which were placed upon Canadian products entering that country. The rebuffs which we on several occasions received, together with the McKinley and Dingley tariffs, finally deterred us from continuing a policy which brought us humiliation but no remedy.

The result has been in many ways to our own advantage, for, while our exports to the United States have been practically at a standstill for a number of years, our export trade with Great Britain and other countries has increased enormously, until to-day we are practically as little concerned about closer trade relations with the United States as we were some 10 or 15 years ago concerned in securing them.

As a matter of fact, we are quite passive in regard to the question of reciprocity with our neighbors to the south. No doubt, if a fair measure of reciprocity was offered us, interest would be awakened, and the matter might again come within the province of practical politics. At present, however, there is no indication of the development of any such interest, and if our cousins in the neighboring Republic are at all disposed to make us a reasonable offer, the sooner the better as far as their own interests are concerned. This country is developing at such a rapid rate that we are becoming more and more independent of the United States in matters of trade, and naturally the more independent we become the more exacting are we likely to be.

At present our tariff is on an average one-half as high as that which is in force in the United States, and there is more disposition on the part of the people of this country to raise it than to lower it on merchandise that would affect the United States.

A convention of business men representing the two countries is to be commended. It would at least result in an exchange of views that would be helpful rather than otherwise. But we have no faith that it would produce practical results in the way of reciprocal trade. We have not yet forgotten the opinions that were expressed at the convention of the manufacturers in Philadelphia held to consider the question of reciprocity. The manufacturers talked of reciprocity; but the resolutions they adopted showed that they wanted to take but not to give. And we have not yet seen any evidence of a change of heart.

CANADA'S TRADE WITH FRANCE.

LA CHAMBRE DE COMMERCE, of Montreal, has started a movement having for its object the enlarging of our trade with France.

It will be remembered that in 1894 Canada successfully negotiated a commercial treaty with France. This treaty was somewhat limited in its extent, but at the same time it has been beneficial to the commercial relations of the two countries.

During the last five years our export trade with France has increased about 129 per cent. and our imports from that country about 115 per cent.

The last figures we have are for the fiscal year ending June 30, 1901, and these show that our trade with France, both in regard to exports and imports, was the largest on record. Our imports from France were valued at $5,398,021, and our exports to that country $1,581,331, a total trade of $6,998,352.

While in France Sir Wilfrid Laurier is to interest himself in the matter and it is to be hoped that the trade between Canada and the French Republic will in the years to come develop still more rapidly than it has during the past few years.

To France as well as to Great Britain the Dominion is attached by ties of consanguinity.

WIRE NAIL SITUATION IN THE UNITED STATES.

IT is significant that while the iron and steel trade in the United States is in such an active and satisfactory condition, that a most unsatisfactory state of affairs has developed in regard to wire and wire nails. A large business has been done, and, in fact, is still being done, but the trouble is that large as the consumption is the productive capacity of the country is much greater.

The report recently issued of the American Iron and Steel Association says that the production of iron and steel rods in the United States in 1901 amounted to 1,365,934 gross tons, against 846,291 tons in 1900. This is an increase of over 61 per cent. The production of wire nails last year was 9,803,822 kegs, as compared with 7,233,979 kegs in 1900, an increase during the year of over 35 per cent.

In order to relieve the situation it is likely that a number, at least, of the mills will be closed down on July 1, for a period of three weeks. It will be obvious, however, to our readers that this closing down of the mills will only act as a temporary remedy, and the future has yet to be taken into account.

At present, practically no wire nails are exported from the United States into Canada as a result of an understanding with the Canadian manufacturers, the conditions being that the latter purchase their wire rods from the makers in the United States. This, of course, is nothing new to our readers. As long as this agreement lasts it is, therefore, unlikely that this market will be troubled with the competition of wire nails of United States make. That, however, this will always be so is scarcely probable, particularly during a period of depression.

Should the wire nail mills close down, as suggested, it will have the effect of releasing a certain quantity of crude steel and allowing it to be utilized in lines where the demand at present exceeds the supply.

It is, perhaps, worthy of note that, while the wire nail market in the United States is in such an unsatisfactory condition, the demand is fairly good for cut nails and prices are quite firm.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

FINISHED IRON IN GREAT BRITAIN.

IN all the manufacturing centres the mills and forges appear to be fairly well employed, but there is not very much improvement as yet reported in the demand for future supplies. Prices are everywhere well maintained, but until after the Coronation festivities are over, no general opening out of business can be expected. Scotch makers are reported to have booked more export orders lately, and there have been inquiries for common Cleveland iron for export to the East. Bars are offered at £6 5s. The Staffordshire works are steadily employed, and the amount of work in hand has increased. Makers of best iron in West and South Yorkshire have secured some good orders lately.—Iron and Steel Trades Journal, June 14.

PRICE OF NUTS HIGHER IN THE STATES.

At a meeting of the United States manufacturer of nuts in Atlantic City recently an advance of 2-10c. per lb. was made in the price of both cold punched and hot pressed square nuts, and an advance of 3-10c. per lb. in both cold punched and not pressed hexagon nuts. Iron Age says the manufacturers united in giving gratifying reports in regard to the volume of business and the prospect of the continuance of satisfactory conditions.

STEEL TRADE IN SHEFFIELD.

Orders for steel from the home railway companies are light but steady, and colonial and foreign railways are providing this important department of Sheffield trade with a fair amount of work. The returns of the exports of steel last month tell a rather depressing tale. Nearly all the markets of the continent as well as Australia showed a decrease, the only cheerful items being increases to Canada and the United States, due to the fact that the demand for steel in the latter country has caught up to production, a condition of things which can only be regarded as temporary. Seeing that the figures are compared with a bad month last year, it is clear that Sheffield is sending abroad much less than the average tonnage of tool and other kinds of crucible steel.—Ironmonger.

PIG IRON TRADE IN THE STATES.

More of a disposition to buy for the first half of 1903 appears among the foundries, and considerable business has been closed or negotiated in the week with Northern furnaces. Southern producers as a rule are not quoting for next year. Ohio furnaces are selling for 1903 on the basis of $21 and $21.50 at furnace. The recent reports of purchases and negotiations by the United States Steel Corporation for Bessemer iron for the second quarter of next year are erroneous. No purchases have been made since that of two month ago for the six months ending with March 1903. It is not expected that business for the second quarter of 1903 will be put through in the near future, as Valley furnacemen and the steel corporation are at variance on the matter of prices.—Iron Trade Review.

BRITISH PIG IRON TRADE.

There is a considerable amount of activity in the pig iron trade, and the current output is passing readily into consumption. Under these circumstances makers are in a position to firmly adhere to their quotations, and a few advances have taken place during the past week. Makers, however, have not in all cases been able to do much business at the higher prices, and, on the whole, pig iron remains at about the same level as last week. In the Cleveland district No. 3 was put up to 49s. 6d. by some producers; but 49s. 3d. has been more generally quoted, and this figure has not been obtainable for forward deliveries, for which consumers offer 3d. less. The lower qualities of Cleveland pig are rather dearer this week; but in the local hematite market the same weak and dull conditions which we have had occasion to note of late are still prevailing. In Barrow, however, hematite is in active demand, and mixed numbers are about 3s. 6d. dearer than on the East Coast. The following is a statement of the present stocks of pig iron in public stores:

Public stores stocks, in tons:	Wednesday.
Connal's at Glasgow	52,640
Connal's at Middlesbrough	143,800
Connal's at Middlesbrough, hematite	300
West Coast hematite	14,030
N.E.R. Stores, Middlesbrough	....

During the week ending June 10 the stocks at Middlesborough increased by 1,320 tons. At Barrow they decreased by 160 and at Glasgow by 70 tons. On the year there is a decrease of 4,360 tons at Middlesborough, and a decrease of 1,040 at Barrow and 5,700 at Glasgow. The net change during the week is an increase of 1,090 tons and during the year to date a decrease of 2,400 tons.—Iron and Coal Trades Review, June 13.

BRITISH TINPLATE TRADE.

During the past week the demand for tinplate has been well sustained for both prompt and forward deliveries, and a steady business is reported. Spot plates have changed hands at 13s. 6d. and 13s. 7d½d. per box of I C. 14 x 20 112 sheets, 108 lb. Bessemer cokes, and sales for July and August delivery have taken place on the same basis. Most makers are comfortably booked over the next couple of months, and are, consequently, firm in their quotations, which range from 13s. 7½d. to 14s. per box f.o.b. Wales, for Bessemer cokes, Siemens' cokes being generally quoted at 1½d. more money.—Iron and Coal Trades Review, June 13.

INQUIRIES ABOUT CANADIAN TRADE

Among inquiries received by the Canadian Section of the Imperial Institute were the following:

1. A firm of wholesale and export stationers is prepared to appoint a suitable Canadian resident agent.

2. A company manufacturing fireclay goods asks to be placed in communication with Canadian importers of these materials.

3. A company which manufactures electric lamps and all kinds of electrical materials and appliances wishes to develop trade in Canada, and seeks the services of an influential resident agent.

4. A London house wishes to hear from Canadian producers of "pine wool" and excelsior, with samples and prices.

RETAIL MERCHANTS TO ASSEMBLE

There will be a big convention of retail merchants from all over the Province at Toronto on September 9 and 10. This meeting will be held under the auspices of the Retail Merchants' Association of Canada, and over 500 delegates are expected to attend.

The various sections of that organization will meet during the two days at various places, and a general meeting will he held on the evening of the first day, which will be followed by a banquet on the second night.

GALT BOARD OF TRADE.

At a meeting of the Galt Board of Trade, June 20, reports from the sugar-beet committee stated the result of an interview with Mr. McCormick, secretary and manager of the Wallaceburg factory. Prospects were bright. To defray the expenses of the past campaign the town council will be asked for $200 and the township council for $100.

Considerable complaint was expressed at the mail service from the east, all mail being held over at Hamilton.

The railway committee were instructed to take action to secure a reduction in the excessive coal rates.

Notice was given of a resolution to make the membership fee $2 instead of $1. President F. H. Hayhurst submitted his report of the Board of Trade Conference in Toronto. The Board of Trade will hold its annual meeting on July 10.

THE BRITISH LUMBER TRADE.

THE arrival of lumber vessels in Great Britain from British North America during the past month have been 18,587 tons register, as reported in Farnworth & Jardines's Wood Circular of June 2, against 12,605 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1900, 1901, 1902, has been 119,404, 117,416 and 137.121 tons respectively.

The timber business in Great Britain during the past month has, on the whole, been of a satisfactory character, the deliveries have realized expectations, and values have been well maintained. Stocks, with the exception of pitch pine, are within a moderate compass.

Of Canadian woods, there have been no importations of either waney or square pine during the past month. The consumption has been small, but the stock is very light ; values are firm. In red pine there has been little inquiry ; stocks are small. Oak has not been imported during the past month ; there has been a fair inquiry for first-class wood, the stock of which is now considerably reduced, and prices are firm. In elm, rock elm is in fair demand ; the stock of this wood is moderate. Ash is in limited demand, and the stock is sufficient. Quebec pine deals have arrived freely, the consumption has been satisfactory, but stocks are still too large ; values remain practically unchanged. Red pine deals are not in good demand ; stocks are sufficient.

In New Brunswick and Nova Scotia spruce and pine deals, the import, amounting to 8,870 standards, is considerably in excess of the quantity imported during the month last year. The deliveries, however, have been satisfactory, and the present stock, amounting to 9,450 standards, is light ; values are well maintained. Pine deals continue in fair request, stocks are moderate, prices firm.

In birch, logs have been imported on a moderate scale, the consumption has been satisfactory and the stock is not excessive ; values remain unchanged. Planks have been imported more moderately. There has been a good consumption, but the stock is still heavy.

One corgo of British Columbian and Oregon pine arrived containing 71,000 cubic feet. There has been a satisfactory consumption and stocks are not excessive.

A SMELTER IN EASTERN QUEBEC.

An effort is being made to develop the mines in the Eastern Townships of the Province of Quebec. Under the auspices of the Canadian Mining Institute a series of meetings were recently held at Sherbrooke, Que., at which there was brought up for discussion the mineral wealth of these townships. There was exhibited a map descriptive of 50 copper properties existing within a radius of 35 miles of Sherbrooke, and it was advocated that there be established a custom smelter there of at least 100 tons daily capacity. It is stated that the copper ore already in sight would keep this furnace running for at least three years.

A committee has been appointed to arrange for the erection of a smelter and to interview the Government for a grant.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

NEW STEEL ELEVATOR. It is expected that the Grand Trunk Railway Co. will construct next year, at Windmill Point Pier, Montreal, an elevator at a cost of $750,000.

The structure will be of steel and concrete, fireproof, with a storage capacity of 1,000,000 bushels of grain and equipped with the best working house machinery for receiving grain from the freight cars and loading it into ocean steamers.

The Hon. J. I. Tarte has written stating his willingness to expend $200,000 to raise the Windmill Point wharf to facilitate the location of the elevator and warehouse of the Grand Trunk Railway.

The project is now before the Montreal Harbor Board.

PERSONAL MENTION.

Mr. Wm. Smaill, of The Canada Horse Nail Co., Montreal, was in Toronto at the beginning of the week.

Mr. Thomas Davey, manager for John Lysaght, Limited, in Melbourne, Australia, passed through Canada last week en route for England, stopping a day each in Toronro and Montreal.

Mr. J. M. Collins, hardware manufacturers' agent, Montreal, spent Sunday, June 22, in Toronto. He has been travelling in Ontario since 1876, and business he finds better this year than it has ever been in all his experience.

CATALOGUES, BOOKLETS, ETC.

PRICE LIST ON PIPE AND FITTINGS.

The Fairbanks Co. have just published their price list of pipe, valves, fittings and steam specialties. In case any of our readers have not already secured a copy of this price list, by dropping a post card to headquarters one will be gladly mailed them.

AMERICAN SCREW CO.'S REPORT.

THE statement of earnings of The American Screw Company for the year ended December 31, 1901, has just been issued. It shows the following income account :

	1901.	1900.	1899.
Profits	$152,109	$413.956	$349,153
Dividends, 5 per cent .	162,199	162,500	*97,500
Surplus	†$10,000	$251,456	$251,653

* 3 per cent. † Deficit.

The balance sheet as of December 31 is as follows :

ASSETS.

	1901.	1900.	1899.
Accounts and bills receivable	$192 416	$377,098	$621,089
Supplies, goods, materials, etc.	982,700	834,782	676,259
Cash	378,158	406,055	165,621
Treasury stock	4,789	.....	.....
Quick assets	$1 558 064	$1,617,934	$1,462,969
Plant	2,456,015	2,427,771	2,430.565
Total assets	$4,014,079	$4,055,705	$3,893,534

LIABILITIES.

Accounts payable	$77.287	$47,124	$136,408
Capital stock	3,250,000	3,250,000	3,250,000
Surplus, Dec. 31	686,792	758,581	507,126
Total liabilities	$4,014,079	$4,055,705	$3,893,534

President Thurston, in his report, says : "Notwithstanding the aggressive competition throughout the year, forcing the selling price of the company's product to very low levels, the volume of its products and sales has been greatly enlarged. The settlement of matters connected with associations which expired during the year 1900, and the refitting of a large quantity of machinery which has stood dismantled for years, called for extraordinary expenditures in 1901, which have been written off. By a liberal expenditure for repairs, needed improvements and further reorganization of the mills during 1901, all of which has been written off to mannfacturing expenses, the plant has been fully maintained and its efficiency still further increased. All inventories of goods and materials have been taken on very conservative valuations. During the current year we anticipate that selling prices may decline still further, until none but the best equipped screw plants can handle the business. Under such conditions your best interests may require that dividends should not be paid unless fully earned.

THE FUTURE OF THE COAL TRADE.

"HARDWARE AND METAL" is in receipt of the "Coal Number" of The Indian Mercury, published by C. Kraaig, Amsterdam. This sheet, which has now reached its 25th year of issue, is an independent colonial weekly, the representative organ for commercial, agricultural, engineering and mining purposes in the Netherlands, and East and West Indies.

This number of The Indian Mercury contains statistics of, and remarks upon the coal trade and coal production of British India, Ceylon, China, Cochin China, Formosa, Hong Kong, Japan, Corea, Labuan, the Netherland Indies, the Philippines, Port Said, Sarawak, Siam, Siberia and Straits Settlements, also various data bearing upon international coal trade.

The greater part of the contents of the "Coal Number" is conveyed in the English language, the rest of the text is in Dutch. The figures convey many remarkable facts. The volume contains a vast amount of information, concisely put; the arrangement of the subject matter is methodical. Mr. Kraaig has obviated the difficulty of statistics becoming obsolete by arrangements that the principal tables may be kept up until the year 1905 inclusive. Mr. Kraaig draws the following conclusions:

1. That there is every appearance that, in the course of time, British coal—so far as export is concerned—will lose ground, of course, supposing that no abnormal political or other circumstances interfere.

2. That for the export trade American, Japanese, Australian, German, Canadian and eventually the British-Indian coal trade will come more and more to the front in the comparatively near future, and, in a more remote future, Chinese coal also.

3. That the co-operation of the following factors now already exercises an unfavorable influence upon the export of British coal, or otherwise cannot fail to do so in course of time, viz.:

(a) Growing competition with coal produced in other countries, in consequence of an increase in the output of the latter, accompanied by a decrease in the output of British coal during the year 1901.

(b) Difficulties with British workmen and the numerous consequences thereof.

(c) The much-discussed British export duty.

(d) The fact that, in America, coal is mined by machinery to a far greater extent than is done in the United Kingdom.

(e) The foundation of The Deutsche Kohlendepot Gesellschaft, in Hamburg (whose object is the establishment of coaling stations on the route to China in order to render the German mercantile marine independent of British coal contractors), and of The Centrale fur Bergwesen, Frankfurt A-M.

(f) The French Shipping Bounty Law.

(g) Eventually, "The American Ship Subsidy Bill," and "The Russian Shipping Subsidies."

(h) And, last but not least, the appointment of the "Donetz Coal Committee" (Russian).

(4) That, as regards China, the signing of the Pekin final protocol in September, 1901, and of the Anglo-Japanese treaty on January 30, 1902, will certainly have the result that, unless another serious uprising takes place, foreigners will engage in mining and railway construction in China on a much larger scale than is now the case.

5. That then it is to be expected that, slowly but surely, Chinese coal will become an important article of export.

6. That American coal, which is gaining ground in Europe, was in 1900 shipped for the first time in quantities worth mentioning to Singapore, as well as to Port Said.

7. That — considering the increase in America in the quantity of the output, accompanied by a decrease in the cost of production there (as a result of the regular and important improvement of the methods of exportation)—there is every chance that, also at Singapore and at Port Said, American coal may, in course of time, become a serious competitor.

Whether or not Mr. Kraaig's forecasts will be realized, the conditions of the coal trade as depicted by him deserve careful consideration.

A Definition.

In mathematics RESULTS is defined as meaning "a quantity or value ascertained by calculation."

In painting and paint selling RESULTS may be defined as meaning on the one hand "Economy in cost, good appearance, and long wear," and on the other "Satisfactory sales, a paying profit, and a reputation for the right goods."

When calculated from these points of view

THE SHERWIN-WILLIAMS PAINT

never fails to produce RESULTS.

It gives economy through its large covering capacity and long wear; it gives a good appearance through its splendid colors; and it gives long wear through the materials used in making it and the way it is made.

It brings satisfactory sales through its own worth and the way it is advertised; it affords a paying profit through the sales it brings and the margin there's in it; and it brings a reputation for the right goods through the satisfaction it gives and its own good reputation of over thirty years' standing.

It's the paint for you to sell. The B-13 booklet tells about it. Sent free for the asking.

COPPER PRODUCTION OF THE WORLD.

HENRY R. MERTON & CO., of London, have compiled their annual circular on the copper production of the world in 1901. We give below the estimates of this firm, for all countries save the United States and Canada, and we substitute for the former country the figures collected by The Engineering and Mining Journal, and for the latter, those of the Government. Here are the figures in long tons:

	1901.	1900.
Austria	1,015	865
England	600	650
Germany	21,720	20,410
Hungary	320	490
Italy	3,000	2,955
Norway	3,375	3,935
Russia	8,000	8,000
Sweden	450	450
Spain and Portugal	53,621	52,872
Turkey	980	520
Totals, Europe	93,081	91,147
Bolivia	2,000	21,000
Chile	30,000	25,700
Peru	9,520	8,220
Totals, South America	41,520	36,020
Canada	18,282	8,446
Mexico	24,795	22,050
Newfoundland	2,000	1,920
Totals, North America	45,077	32,396
Australasia	30,875	23,000
Japan	27,475	27,840
Cape of Good Hope	6,400	6,720
Totals, outside of U. S.	244,428	217,123
United States	270,616	268,229
Totals	515,044	485,352
Totals, metric tons	523,285	493,118

The increase in the total copper production of the world in 1901 as compared to the previous year was 29,692 tons, or 6.1 per cent. The increase in the production of the United States was only 2,387 tons, or 0.9 per cent., while that of the rest of the world showed a gain of 27,305 tons, or 12.6 per cent. In 1900 the United States furnished 55.3 per cent. of the world's supply, while in 1901 the proportion was 52.5 per cent. The important increases shown in production last year were those of 17 per cent. in Chile, of 16 per cent. in Peru, of 34 per cent. in Australasia, of 13 per cent. in Mexico, and of 116 per cent. in Canada. Spain remains the largest producer, next to the United States.

NOVA SCOTIA MARKETS.

Halifax, June 23, 1902.

THE hardware trade continues on an even basis, although the volume of business being done is not so great as in March, April and May. The volume continues fairly good, and is quite on an equal with previous years. There is no complaint about the promptness of settlements, and the business all over the Province may be considered as in a prosperous and healthy condition. Retail business is good.

* * *

Linseed oil has had another advance and is now being quoted at 87c. for raw in bbl. lots and 92c. for smaller quantities ; boiled is quoted at the usual rate of 5c. over raw. Turpentine has also advanced slightly, and is now quoted at 78c. in bbls. or 83c. in smaller quantities. The demand for both oil and turpentine continues good, and the supplies in stock are moderate. The situation for oil may be stated as very firm, but turpentine shows signs of unsteadiness. White lead is quoted at $5.87 for pure, and $5.50 for No. 1.

* * *

The demand for builders' material is still very good and prices are firm. Some lines have slightly advanced and all are firm. Three-ply roofing is now quoted at $1.15 per roll, two-ply, 90c.; tarred felt, $1.80 ; tarred sheathing, 40c. ; dry, 35c. Cement quotations are : Belgian, $2.40 ; English, $2.75. Considesable of this article has already been sold this season and is still in heavy demand. Pig lead had a recent advance of 25c. Quotations are : $3.75 to $4, and firm with expectation of further advance. Lead coil is $4 75. Considerable sheet lead is being handled and quotation is for 3 lb. or heavier rolls, $4.25.

* * *

All kinds of cordage are firm. Large quantities of the various lines were sold earlier in the season in fitting out the fishermen, and there is still a fair demand. All lines are firm. Manila is quoted 16c. base. British manila, which was subject to a recent advance, is now 14½c. Sisal is quoted at 13c. and is very firm. The fishing vessels will soon be returning and fitting out for the autumn work, which will create a heavy demand in nets, lines, twines and vessel canvas and cordage.

* * *

Wire and cut nails have been and are still in good demand. The price is firm at $2.45 for cut and $2.55 for wire. Large orders for wire fencing have been filled, and there is still a good demand. Quotations are : $3 base for fencing and 3½ to 4½c. for staples. Prices firm.

* * *

The following may be noted as important changes, only some of which have affected the local quotations : Horseshoes have advanced 15c. per keg all around ; Canadian chisel and sharp-edge tool manufacturers announce an advance of about 10 per cent,; chain coil is higher; insulating copper wire advances ½c.; linseed oil and turpentine are advancing in the Southern market ; it is reported to-day that there is liable to be a reduction of ½c. per lb. on rope and seining twines. MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

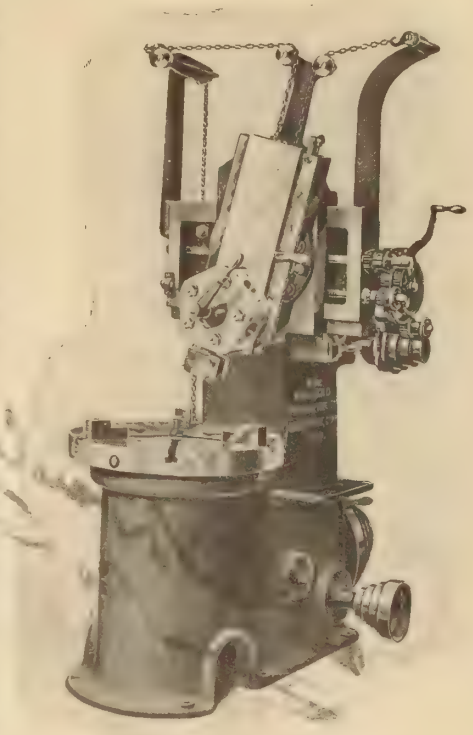
A TREATISE ON BORING AND TURNING MILLS.

THE proprietors of machine shops being sometimes in doubt as to the advantages derived from the use of vertical boring and turning mills, we wish to present for their consideration a short description of the Bullard mills, cut of which is shown herewith.

As the boring mill is essentially a vertical face-plate lathe, the makers have endeavored to embody in their design all the characteristics of the lathe, avoiding all the defects inherent to the horizontal construction, and taking advantage of the vertical construction to make a more rigid and accurate machine.

The advantages of the mill are that the work lies upon the horizontal table, and that the total weight of the table and work is taken on a large angular bearing provided for that purpose, which gives great rigidity and smooth cutting.

Face-plate lathes were originally made by leaving off the tail stock from the regular engine lathe, and to this day many makers continue the practice. Had the face-plate lathe been built previous to the engine lathe we venture to say that it would have been made vertical as was the planer.



As it is an admitted fact that the strength, life and accuracy of a lathe are largely dependent upon the main spindle. The makers of the Bullard mills have adopted a construction peculiar to the vertical spindle, which is not applicable to a horizontal machine.

Aside from the fact that the spindle referred to has large diameter and consequently large bearing surfaces, it also has a self-centreing tendency, so that the weight of the table and the spindle combined, as well as the weight of the work upon the table, tends to preserve and not destroy the alignment.

That the angular bearing is ample is shown by the fact that when a solid body of cast iron (cylindrical in form, the full diameter of the mill) weighing 33,500 lb. is placed upon the table a maximum pressure of but 84 lb. to the square inch is exerted on the bearing ; while under ordinary working conditions a pressure of but 15 to 20 lb. to the square inch would seldom be exerted.

Should, however, the spindle be raised for fast running, as is advocated by some makers, the pressure on this bearing would be greater than is generally accepted as good practice.

In the Bullard spindle the straight bearings act in conjunction with the angular bearing to receive the side strains, and the nut and washer on the lower step of the spindle act as a precaution against any lifting tendency. To still further obviate trouble of this kind, the tooth form of the pinion and gear by which the table is driven is so designed as to have a rotative effect only, with the result that wide finishing cuts can be taken, leaving the work free from chatter or tooth marks.

Bullard Vertical Boring Machine.

These machines are made with two tool heads, and both can be run to the centre of the table, which position is determined by an absolute centre-stop. While in that position they are bored to a standard, so that a boring bar passing through the vertical slide may be supported in the table, and large, double-ended cutters, drills, or standard seamers may be used.

In order that small drills, boring bars, etc., may be employed without removing the tool posts from the slides, each post is bored to a more taper concentric with the centre of the table spindle. The heads can be swivelled to any angle and are accurately graduated ; so that taper work may be turned, or heads adjusted for boring straight holes, or both heads may be used on work of a small diameter. After exhaustive practical tests the makers have adopted the positive feed, that is, driven by gearing. The convenience and facility with which work can be set on a vertical machine is so apparent that we will refrain from too many details.

It is manifestly easier to lay a piece down than it is to hang it up, and it is also a more simple matter to secure it, the weight of the piece being on the machine and not on the securing device.

On work taken from a lathe the mills are frequently able to effect a saving of from 40 to 70 per cent., the amount saved depending upon the character of the piece.

In conclusion, we wish to state that these machines can be seen at the warehouse of H. W. Petrie, 141 to 145 Front street west, Toronto, who is the Canadian representative of The Bullard Co.

A NEW WINNIPEG MACHINE FIRM.

Mr. E. S. Cooper, of Galt, Ont., for many years associated with Goldie & McCulloch Co., of Galt, as salesman and manager of their gasoline engine department, has gone to Winnipeg to join Mr. James Burridge. Mr. Cooper will take the active management of the outside work of the new firm, Burridge & Cooper, who will carry a large stock of the product of the Goldie & McCulloch Co., Galt, in the different lines of machinery, safes and vault doors. They will extend their business from Port Arthur to Victoria, B.C.

POWER PLANT FOR THE MERSEY TUNNEL.

THE Westinghouse Electric and Manufacturing Co. will make a large shipment of machinery to be installed in the power plants of the Mersey Tunnel Railway. They secured the contract for the conversion from steam to electricity. The plant will consist of three main railway-type generators of 1,200 kilowatts capacity each. These machines are to be direct-connected to cross-compound engines of 1,500 horse-power each. The power house lighting and the electric light of all stations, sidings, etc., will be supplied from a separate generating plant. Two compound wound generators, each having a capacity of 200 kilowatts, direct-connected to compound engines, are to be installed for this purpose. No locomotives will be used ; the first and last cars of a train will be motor cars, each equipped with four 100 horse-power motors. The price to be paid to the Westinghouse company is £635.303, payable as to £620,000 in new 4 per cent. first perpetual debenture stock and £15,303 in cash. The large traffic between Birkenhead and Liverpool last year—about 9,000,000 passengers by steam road and nearly 23,000,000 by ferry-boat—will, it is expected, result in the new electric line being placed among the most important in the world. The contract with the British Westinghouse company calls for the completion of the system by January 15, 1903.

MACHINERY AND ELECTRICAL NOTES.

The Toronto Woollen Machinery Co., of Toronto, has dissolved.

"Salada" Tea Co. have ordered another electric motor from The Jones & Moore Electric Co.

The Citizens Water, Gas and Electric Co. of Strathroy, Limited, Strathroy, Ont., has obtained a charter.

The Standard Electric Co. (late of Toronto), has assigned to D. A. McDonald, and a meeting of creditors is to be held on June 28.

The Jones & Moore Electric Co. have recently installed a motor for The Kennedy Co., Toronto, and a large plating machine for Major Tassie, of Toronto.

The Jones & Moore Electric Co. have received an order from The Parry Sound Lumber Co. for one 30-light arc dynamo ; also one of similar size from W. Carter, Fesserton, Ont.

W. Galbraith, Government surveyor of Bracebridge, Ont., is having a beautiful gasoline launch, 20 ft. long, fitted with a 5 horse-power, double cylinder, gasoline engine, manufactured by The Gasoline Engine Co., of Toronto Junction.

Business is brisk with The Gee Electrical Co., of Colborne street, Toronto. They have just closed contracts with T. Cruttenden, druggist, Howard and Sherbourne streets, Toronto; also with Frank Roden, Poplar Place Road. They recently sold a 100-light dynamo to The Lyons Electric Co., Brantford, Ont. The firm is forced with its number of daily contracts to work day and night.

BOILER INSPECTION.

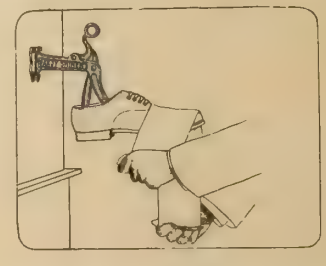
At a representative meeting of the stationary engineers of Eastern Ontario, held in Brockville on June 23, boiler inspection received considerable attention. The law was decided to be a failure. In the discussion on the Engineers' Bill, those members of Parliament who were absent when divisions were made in committee, especially those who pretended to favor the different Bills, came in for considerable censure.

A NEW GASOLINE LAUNCH.

McKeough & Trotter, of Chatham, Ont., have on the stays a beautiful new gasoline launch with which they will navigate the Thames River during the summer months. The craft, which is about 25 ft. over all, is capable of accommodating 30 people. A Wallaceburg firm is responsible for her lines, the owners installing the machinery. An engine of 4½ horse-power drives a 10-inch propeller at the rate of 400 revolutions per minute, while the noise usually so characteristic of a small launch is precluded by means of a special exhaust.

INQUIRIES AND ANSWERS.

C.N.S. writes : "Can you tell us the name of a firm who manufactures machines for making fish hooks? We want to get into communication with such a firm for a patent wire device which we want die to stamp."



[Remarks : We know of no such firm. Pephaps some of our readers can supply the desired information.—THE EDITOR.]

GONE TO VANCOUVER.

Mr. T. M. Cullen, who has been bookkeeper for some time with The Fairbanks Co., Montreal, left on June 16 with his bride for Vancouver, B.C., where he assumes the position of bookkeeper and cashier in the new branch of the above firm. Mr. Cullen was given a send-off by his fellow workers and presented with a purse of gold as a token of the esteem in which he is held by his friends in the company.

THE "DANDY" SHINER.

HARDWARE dealers in Canada have attained the commendable reputation of always being ready to take hold of a good thing and push it along, providing the good thing proves itself to be a desirable article. L. H. Packard & Co., Montreal, are now placing on the market a shoe-shiner, which has already proven itself most popular, which fact is evidenced by the large demand for it. Hardware merchants would find this shiner a good seller. When you can tell your customers that there is no further necessity of their leaning over

and nearly breaking their backs in order to shine their shoes, it stands to reason they will be interested. The "Dandy" shiner altogether eliminates straining of backs, and adds to the blessings of a household. The contrivance is easily clamped on the wall, or any other convenient place, and the shoe is readily placed on a neat wooden last, the ratchet tightening it to fit the shoe. Three lasts of different sizes go with the shiner. The shiner is nickle-plated, and is by no means unornamental. It can easily be removed from its socket and hung up. The illustration published in this article will give the reader a slight idea of the shiner, the retail price of which is $1, but your customers will consider this price a mere trifle when compared to the usefulness of this shoe-shining device. It will pay all wideawake dealers to "get into line" and order a supply of these shiners, which should sell well.

THE TRADE LIKES THEM.

Since the opening of the spring trade there has been an enormous demand for "Comet" galvanized Canada plates and galvanized sheets of the same brand. Alexander Gibb, who is the agent for these goods in Canada, reports business even more satisfactory than anticipated.

RAIMES & CO., 164 DUANE ST., NEW YORK CITY.

SCALES USED CENTURIES AGO.

As though some hideous giant had wakened in his wrath,
And hurled the hate of hell along his path.

MORE than eighteen centuries ago that unchained vent of the Plutonian furnaces bleched forth its awful smothering elements of ruin and wrapped the city of Pompeii within its

shroud of death. The story of that dreadful hour is again unfolded in its awful counterpart—the St. Pierre disaster of May 8, 1902. Only those who saw and lived to describe this awful repetition of the destruction of Pompeii can imagine it in all its horrible aspects, but the story of Pompeii has lived as St. Pierre will live, through its survivors and eye witnesses. On the afternoon of November 5, in the year 79, when life in Pompeii was running its sands, much as life is now running in an active city of 30,000 souls, its streets and shops filled with activity, and its theatres filled with pleasure seekers; in the midst of this commercial activity and abandon to revelry, Vesuvius burst forth in awful eruption. Darkness reigned supreme. Escape was well nigh impossible; the crazed and stricken inhabitants dying in their tracks. What we know of the horrible agony of that hour of doom is told us by the hideous images the Sculptor Death has cast in the matrix of molten lava and ashes. For more than half a century men have been engaged in the exhumation of this city whose souls have occupied a single grave since the beginning of the Christian era. Many thousand signs of life as it was moving along on that fateful day of November have been taken from Pompeii ruins. Objects of art in marble, bronze and fresco, the bakers' oven filled with bread, as it was being prepared for sale to the hungry populace, and the weighing instruments taken from this tomb of ages.

The accompanying illustrations are made from actual photographic reproductions of pictures of some of these most remarkable finds, and reveal the almost incredible fact that the Spirit of Invention seemed buried with Pompeii; for not until the dawning of the century just ushered into history were there any improvements in the crude weighing devices that have come down to us through the ages. It is indeed interesting to look upon these scales, buried as they were so long from human sight. It remained for the last decade of the 19th century to develop the first and only radical deviation from the patterns of these old heirlooms. The Computing Scale Company, the pioneer manufacturers of computing scales, gave the public the first and basic improvements of money-weight or computing scales, and proudly claim the honor of inventing and marketing the first complete departure from Pompeiian relics. Not unlike the buried treasures of Pompeii are the sunken treasures of merchants who have clung to the old methods of weighing. Thousands upon thousands of dollars to-day lie buried under the elements of a Vesuvius—a Vesuvius of waste, error and down weight. Will you continue to cling to these old Pompeiian scales which still infest the market, and leave a legacy to posterity in a fortune saved by the Money-Weight System?

Relics of the Pompeiian Disaster.

CORRECT BOTH TIMES.

A young fellow who was looking for a clerkship was recently recommended to a Kalamazoo merchant by a Vicksburg gentleman. When the two friends met some time thereafter the Vicksburg gentleman ventured to hope that his recommendation had been productive of good results.

"On the contrary," replied the merchant.

"You astonish me," said his friend.

"I thought he would suit you exactly; he was so full of go."

"And so he was. He has gone off with $1,000 of my money."

"Is it possible? And I thought he was the very man you were looking for."

"You are right there. He is the very man I am looking for."

WIRE NAILS IN THE STATES.

The prompt shipments which are now obtained from mills indicate that the demand for wire nails is not so pressing. In fact, orders are not being placed in nearly so large a volume as previous to the beginning of the month. Shipments on contracts placed some time ago are now being made.—Iron Age.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, June 27, 1902.

HARDWARE.

IN general the market has been marked by a continued activity throughout the week. Jobbers report an increased number of buyers from outside points in the city, and with a continuance of bright weather this condition of affairs is expected to improve. The mills have been fairly busy, but no great rush has been necessary. A meeting of manufacturers was held last week in regard to wire nails, but nothing of importance came of it. The meeting was adjourned to Muskoka. There seems to be some scarcity of heavy goods on the market, and prices are somewhat firmer on such lines. A reduction of ½ to 1c. has been made on manila rope.

SCYTHES.—The demand this week is fair with no change in prices to report. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—There is not much doing in this line. Barb wire is quoted at $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—There has been no important change in this market which is somewhat quiet this week, and our quotations are now as follows: Nos. 6, 7 and 8 gauge, $3.15; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Trade continues dull and prices quoted are unchanged, which are as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is not much doing in fine wire. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—Both these wires continue to move very slowly and the discount remains at 60 per cent.

FENCE STAPLES.—Business in fence staples is of a quiet nature this week, and the prices of both bright and galvanized are unchanged. These are $2.90 per 100-lb. keg for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—There is a continued lively movement in wire nails. At the meeting of manufacturers last week the prices and terms were not altered, and we still quote small lots at $2.55, and carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The market is still active. The price has not been changed, and small lots are worth $2.45 per keg; carlots, $2.37½ per keg. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—Trade in this line is still quiet. We quote the discounts as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—The conditions on the market are practically unchanged. The demand is light and trade is quiet, and our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

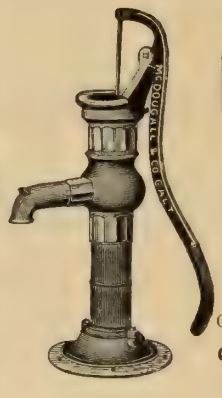
SCREWS.—Jobbers report a continued good demand for screws, and shipments are in active progress this week. Discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—Bolts are still moving out quite freely at unchanged prices. Discounts follow: Norawy carriage bots, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3⅜c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER. The firm feeling in this market still prevails and prices are maintained on all lines. The demand is good. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Business in cordage has not been very active and a reduction in price has been made in manila and British manila. The former is ½c. lower and is now quoted at 15½c., while British manila sells at 13½c., a decline of 1c. There has been a good demand for binder twine, and the scarcity is more pronounced this week, and our quotations are now as follows: Manila, 15½c.; British manila, 13½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is a moderate inquiry. No quotable change has occurred, and we quote as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.



SCREEN WIRE CLOTH.—Trade continues fair and at an unchanged price. This is $1.37½ per 100 square feet.

POULTRY NETTING.—Jobbers report an improvement in the demand this week. The market, however, is still quiet. The discounts on Canadian or English netting are: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—There is an active movement in harvest tools at unchanged prices. The discount is 60 per cent.

FIREBRICKS.—The market is not active. Scotch firebricks sell for $17 to $22, and English for $16 to $22 per 1,000.

THE **FRANCIS-FROST C°. Limited**
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

CEMENT.—There has been no change in this line, which is in fair demand at the prices we quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The local metal market has not altered very materially since our last report. A much better business has been done in coil chain, which is now being inquired after very freely by western firms. The English market has been steady in most lines. Canada plates and tinplates, however, have shown considerable weakness.

PIG IRON.—The demand for pig iron keeps up, and supplies being still light, the market remains as firm as ever. Canadian pig iron is quoted at $18.50 to $19, and Summerlee, at $21.50 to $22.

BAR IRON.—The market is active and prices have been unchanged. Horseshoe iron is quoted at $2.20, and merchants' bar at $2.

BLACK SHEETS.—There has been no improvement in the demand for black sheets, and the market remains rather quiet. Prices, which have not changed, are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The English market is reported firmer on galvanized iron. Locally, prices are steady under a good demand. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" Brand, $4.20. For less than case lots 5c. extra is charged.

INGOT COPPER.—Trade is not active. The price is 14c.

INGOT TIN.—The advanced price of last week for ingot tin has been well maintained. There is a fairly good demand at 33½c. for Straits.

PIG LEAD.—No quotable change has occurred. The market is still quiet, and the price is steady at $3.25.

LEAD PIPE.—No further advance has been made this week. Business is fairly active at 8c. for composition and waste, and 7c. for ordinary. The discount is 37½ per cent.

IRON PIPE.—There is a good movement in iron pipe, and prices are unchanged and steady. Quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—These have been weak on the English market. Locally, there has been no change in prices. We do not hear of further scarcity this week. The price of charcoal tinplates is $4.75 to $5.25 per box and of cokes, $4.25 per box.

CANADA PLATES.—Dealers here report a satisfactory business and steady prices. The demand for galvanized plates has been exceedingly heavy. On the primary market the situation is different, and it is reported that considerable weakness has developed in Canada plates. On the local market these prices are quoted: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—The market continues active in nearly all lines. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—The demand for sheet steel is no more than moderate, and the prices are steady and unchanged. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Some improvement is noticed this week, but trade is still very unsatisfactory. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—The inquiry is only fair. The price quoted is $7.50.

COIL CHAIN.—Chain is reported very active this week, especially with points in Western Canada. This is a big improvement over the past few weeks, and it is expected to continue for some time. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—No change worthy of note has occurred in this market. Business remains quiet, and the price is still $5.85 to $6.25.

ANTIMONY.—The trade doing in antimony is of small proportions. The price

is 10c., but with very little inquiry.

ZINC SPELTER.—Spelter sells for 5c. The market is quiet and featureless.

SOLDER.—This continues in steady and active demand at the prices here quoted. Wire solder is worth 20c., while bar solder sells for 18c.

PAINTS AND OILS.

The market for turpentine has developed no new feature of any importance since our last report. The price is unchanged and the feeling is firm. Linseed oil continues at the same high price as last week and is as scarce as ever. Several shipments have arrived, but the demand seems to be quite equal to the supply, and the goods are distributed quickly. The extraordinary demand which prevails at present for paint materials of all kinds does not give cause for thinking that market conditions will change for some time, and with high-priced oil and turpentine in all probability we shall soon have an advance in liquid paints before long. While the extreme pressure which has prevailed for some months past in regard to delivering goods has somewhat abated, yet there is still a lively business being done on small orders. The recent cold weather has retarded the sale of paris green to some extent, but the price is still firm. It will not do to rely too much on present quotations, as the demand is likely to again assume large proportions, should warm weather be experienced, and an advance might then be looked for. Varnishes and japans are meeting with a good demand. Gum shellac is still maintained at the present high price on the primary markets. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 84c.; boiled, 87c.; In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

The Handsome Effect Of Our Sheet Metal Fronts

Makes them wonderfully popular, either for new buildings or improving shabby exteriors.

We make them complete, including Cornices, Door and Window Caps, etc.—a most durable, economical finish, giving fireproof protection, as well as fine appearance.

These, and our other improved metal building materials for exterior and interior use, are favorably known throughout Canada for their reliable merit—a merit we intend to maintain. So you stand certain of satisfied customers when you sell our goods.

A look through our catalogue will be profitably interesting to anyone in the trade.

The Metallic Roofing Co., Limited,

WHOLESALE MANUFACTURERS,

TORONTO. MONTREAL. WINNIPEG.

SCRAP METALS.

There has not been any important change in the scrap metal market during the past week. Iron and brass are both quiet, as are most other lines. We now quote : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼c. per lb.

GLASS.

The situation of glass is about the same as a week ago. Very few orders are now being received, and trade is dull. We quote : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

The advance of last week has been well maintained in all lines. The market, however, continues somewhat unsettled. We quote : No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. No. 1 calfskins, 12c. ; sheepskins, 70c.; lambskins, 25c. per lb.

MONTREAL NOTES.

Manila rope has been reduced ½c., and is now quoted at 15½c. British manila is 1c. lower, and is quoted at 13½c.

ONTARIO MARKETS.

Toronto, June 27, 1902.

HARDWARE.

BUSINESS in hardware is keeping up well. With the advancement of the season the orders assume more of a sorting up nature. The Canadian makers of axle pulleys, bench screws, sad irons and other cast hardware have made another advance in prices. Axehandles are also higher as are also sash weights. There has been a decline of 1c. on British manila and ½c. on pure manila rope. Trade in this line is now principally in the small sizes for harvest use. Lawn mowers still continue active and the factories are unable to turn out enough spades and shovels to fill the demand therefor from the jobbers. The feature of the harvest tool trade this week is the great demand for beet hoes. It looks as if there would be a big demand in the fall for forks, and in anticipation of this some dealers may place their orders early. There has been a recent appreciation of 20 per cent. in the United States on steel squares.

BARB WIRE.—Trade in barb wire is being well sustained. We quote : $2.77½ for less than carlots f.o.b. Cleveland, and $2.65 for carlots. From stock, Toronto, $3.00.

GALVANIZED WIRE.—The business that has been done in this line continues good. We quote as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Trade is still fairly active and the prices are unchanged. We quote base price at $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a moderate movement in fine steel wire from stock. The discount is still 22½ per cent.

WIRE NAILS.—The market in this line is steady with no remarkable features. Our quotations are as follows : $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque, and Montreal.

CUT NAILS.—There has been no marked improvement in the demand for these and the prices are unchanged. We quote base

price $2.15 per keg, and $2.37½ per car lots.

HORSE NAILS.—The movement continues fair, and the prices are steady. Discounts are: "C" brand, oval head, 50 and 7½ per cent., on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2 3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—There is still a moderate trade being done in this line, and our quotations are now as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws is good and the factories are now in a better position to fill their orders, and the discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—Trade in rivets and burrs is brisk. Quite a few of the large sizes are moving, and in the smaller sizes the demand is heavy. The stocks on hand are still light, and quotations are now as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent., copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The difficulty in getting supplies continues as great as ever. The excitement among the mechanics in Toronto during the last few days has made it hard to keep them at work, and the deliveries are light in consequence. Quotations follow: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent., machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2 3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—There are still a good many sorting-up orders coming in for both screen doors and windows, and the prices are steady. Quotations are: Common doors, two or three panel, f.o.b. factory points as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—There is a fair amount of business being done in this line. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—There is a scarcity in this line, the factories being unable to turn out the goods that are required. The discount is 40 and 5 per cent.

ROPE.—There has been a decline of 1c. in British manila and ½c. in pure manila rope. The demand is now principally for the lighter lines of harvest ropes. We quote as follows: Pure manila, 15½c., British manila, 13½c., sisal, 13c., lath yarn, 12c., sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—The demand has not been very active for binder twine as the season is not far enough advanced. Our quotations are as follows: "Blue" Ribbon, 650 feet, 15c., "Red Cap," 600 feet, 13c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

HARVEST TOOLS.—The factories in this line state there has been a large demand this year for beet hoes, and it looks as though there will be a large demand later on for forks. There has been no change in the discounts which are still quoted at 60 per cent.

EAVETROUGH, ETC.—The market in this line still continues active and no changes in prices have been made, and we now quote: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—Nothing remarkable is noted in this line. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—There is still a fair business doing in lawn mowers. Discounts are: 50 per cent. on high wheeled lawn mowers, "Star" mowers, 9 inch wheel, $2.25 to $3, "Daisy" mowers, 17 inch wheels, $2.25 to $2.50.

HARVEST WHIPS.—The market in these has not yet become active.

POULTRY NETTING.—There is no new feature in this market this week.

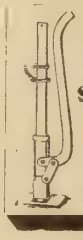
TINWARE AND ENAMELLED WARE.—The activity of this market continues and the prices rule steady.

SPORTING GOODS.—There are a good many orders coming in for ammunition, guns and rifles from various parts of the country.

CEMENT.—The market this week is considerably stronger than before, and the prices of Canadian Portland cement have advanced 25c. The manufacturers have booked quite a number of orders ahead and inquiries have been received from some trade centres in the United States, situated along the lakes. There is no foreign cement at present on the Canadian market. We quote: Canadian Portland, $2.25 to $2.85, and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

The general business continues satisfactory for this time of the year. The buying movement is not large, but some orders are being booked for fall delivery which shows that buyers have confidence in the strength of the market. Most metals are being sold at fair values and there does not appear to be any considerable inflation in any line. The outside tin markets are this week at a standstill, the buyers all holding off from buying. The copper market has an easier tone and the feeling in the iron trade has grown optimistic during the past week, and the general prediction is that consumption will be heavy enough to keep all the productive capacity going clear through till next year.



PIG IRON.—The stocks on hand locally continue scarce and hardly equal to the demand. The United States market is even stronger than it was a week ago. We quote on track, Toronto: No. 1 foundry, $21 and No. 2, $20.50.

STEEL BOILER PLATES.—The outside markets for these are even firmer than last week, and the demand is good. We quote: Steel boiler plates, $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—The strength of this market still continues. We quote from stock, $2.75 for steel beams, and in carlots on track, $2 per 100 lb.

STEEL RAILS.—The United States

Prices Consistent With Quality.

For sale by all prominent Hardware and Mill Supply Merchants throughout the Dominion.

Dominion Works, - - - PORT HOPE, CANADA.

markets are strong and active, and the manufacturers have many orders booked ahead that it will be impossible for them to fill this year. Steel rails, of Canadian make, are quoted at $36 per ton.

TOOL STEEL.—The prices are steady and unchanged. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL. This line is still scarce and unchanged.

SPRING STEEL.—Trade in this line is still active.

BOILER TUBES.—The market for these is strong and unchanged.

BAR IRON.—There is not much business being done just now in this line, owing to The Guelph Iron and Steel mills closing down for a time. The United States bar iron market is strong. Our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is nothing new to report in this line. A fair amount of business continues to be done, and the prices are unchanged. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Trade in Canada plates is active and stocks are light. We quote: All dull, $3; half-polished, $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—These continue in active demand. We quote in case-lots, as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

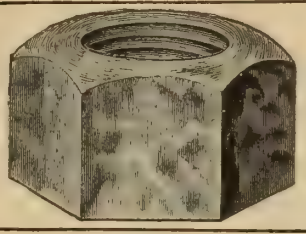
TIN. There has been a considerable business done in small lots. The outside markets are at a standstill. We quote $32 to $33 locally per 100 lb.

TINPLATES.—A good demand for these is reported at steady prices. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER. Ingot copper is still in good demand and prices are unchanged. In the United States there is an easier feeling in the market, which is inactive. We quote: Ingot, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—A moderate trade is doing in this metal at unchanged prices. The discount is 15 per cent.

PIG LEAD.—This line is quiet, and the prices on the outside markets have steadied. We quote: Pig lead, $3.50 to $3.75 and bar, $5.



IRON PIPE.—There is still an active demand for this from outside parts, but locally, trade is inactive. We quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—More activity prevails in this line this week. We quote $5.50 to $6.

ZINC SHEETS.—These are in good demand, and prices are unchanged. We quote: Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER. Trade in this line is brisk and the market is steady.

ANTIMONY.—There is nothing new to report in this line. Prices are unchanged at $19.50 per 100 lb.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

PAINTS AND OILS.

The business that is being done in paints and oils is not so heavy as last week, but there are a few sorting-up orders still being received. The demand for linseed oil and turpentine is not so good as last week, and the stocks on hand of the latter are small, owing to the buyers here holding off and only importing in small quantities on account of the high prices prevalent in the South. Recent advices from there state that prices are easier, owing to heavier receipts of turpentine within the last few days, due to the favorable weather for production and shipment. But stocks are still low there, and receipts for the season so far have been short, so there is no expectation of any considerable drop. There are a number of sorting-up orders being received for ready-mixed paints, and white leads ground in oil, though not so active as they were, are still moving out fairly well. White zincs and dry colors are quiet, but paris green has shown signs of becoming active. Some inquiries have been received for it from outside points, and jobbers are looking forward to quite a good trade in this commodity. The local trade has been dull during the week on account of the unfavorable weather. We quote as follows:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6 25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2 40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 84c.; boiled, 87c.; 3 to 5 barrels, raw, 83c.; boiled, 86c.; 6 to 9 barrels, raw, 79c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls.

and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 73c.; 2 to 4 barrels, 72c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

COAL.

There is nothing new to report in this market. Soft coal miners continue at work, and so there has been no famine in that line as yet. Quotations at international bridges are as follows: Soft coal, $3 to $4 per ton.

PETROLEUM.

There has been no change in the price of petroleum this week, and it continues in moderate demand. The summer trade has not yet set in. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Mrs. Potts No. 5 nickle-plated sad irons have advanced 5c. per set.

A. R. Price, hardware merchant, Queen street west, Toronto, has bought a full line of hardware from Lewis Bros. & Co., of Montreal.

F. H. Clergue, of Sault Ste. Marie, Ont., has already delivered between 6,000 and 7,000 tons of steel rails at Montreal for the Government.

WANTED

A TINSMITH, GOOD ALL AROUND MAN, steady employment, good wages. Joseph Laing, Ridgetown. (26)

HEATING AND PLUMBING

TORONTO PLUMBERS' STRIKE.

THE situation in the plumbers' strike has not changed. Inquiries made at the parties interested is practically what it was a week ago. When seen by a representative of "Hardware and Metal" Mr. James H. Wilson, of the Master Painters' Association, said that at a meeting of the Association on the 23rd almost everything but the strike was discussed.

Mr. Wilson was asked about the item which appeared in The Montreal Star to the effect that a considerable number of plumbers and steamfitters were now on their way out to Toronto from Scotland, having been engaged by the bosses to enable them to carry out contracts which have been tied up by the recent strike. (By the men's passage was paid by the employers and the amount will gradually be deducted from their wages. Mr. Wilson declined to make any statement for the attitude was interpreted to mean that such a course of action was not heard of then for the first time.

It is said that all is not harmony in the ranks of the striking plumbers. Other union bosses in the city have viewed adversely the action of the men in violating the agreement with the bosses.

The Plumbers and Steamfitters' Union is an international body, and for some time past there has been a movement on foot in the United States to separate the two trades. The plumbers, through the parent body, are outnumbered by the gas and steamfitters four to one. The fitters wish to withdraw and form a union of their own. The relations between the two factions have been somewhat strained as a result.

When the proposition came before the union in Toronto to go out on strike it is alleged that the plumbers opposed the measure. They were outnumbered by the gas and steamfitters, however, and the strike order was voted through. There are 250 men on strike and of this number less than 75 are plumbers, the remainder being made up of gas and steamfitters.

While obeying the call, a number of the men still contend that the agreement should have been lived up to. In the contract entered into it is expressly set forth that should either party desire a change or amendment notice of it should be given at least three months prior to the termination of the agreement. The agreement does not expire until January, 1904 and according to the employers' interpretation of the clause, should no notice have been received three months prior to the date of expiry the agreement would remain in force without renewal until such notice had been given. A section of the men put forward the plea that during the existence of the agreement all that was required to terminate it was a three months' notice.

The master plumbers are simply marking time. They feel that they have justice on their side and are prepared to wait developments. The employers are determined to hold the men to their agreement and are willing to take them back within a reasonable time.

The men feel that the employers have broken the agreement. They declare that the increase demanded from 27½ to 37½c. per hour, is quite in keeping with the changed conditions and will in no way conflict with existing contracts, as the employers had been notified that the raise would be asked for.

BUILDING PERMITS IN OTTAWA.

Building permits amounting to $20,150 were recently issued in Ottawa, as follows: F. H. Wells, for a solid brick dwelling on McLeod street, for $2,500; Sir Wilfrid Laurier, for a solid brick addition to residence on Theodore street, for $800; the Wise estate, for two solid brick houses on Daly avenue, for $1,200; George Taylor, for a frame dwelling on Flora street, for $800; Alex. J. J. Burke, of Burke Bros., general merchants, St. Jacques, Nfld., is dead.

James M. Martin, of Martin Bros., hardware merchants, Rossland, B.C., is dead.

J. H. Scummell, of J. H. Scummell & Co., shipbrokers and lumber merchants, St. John, N.B., is dead.

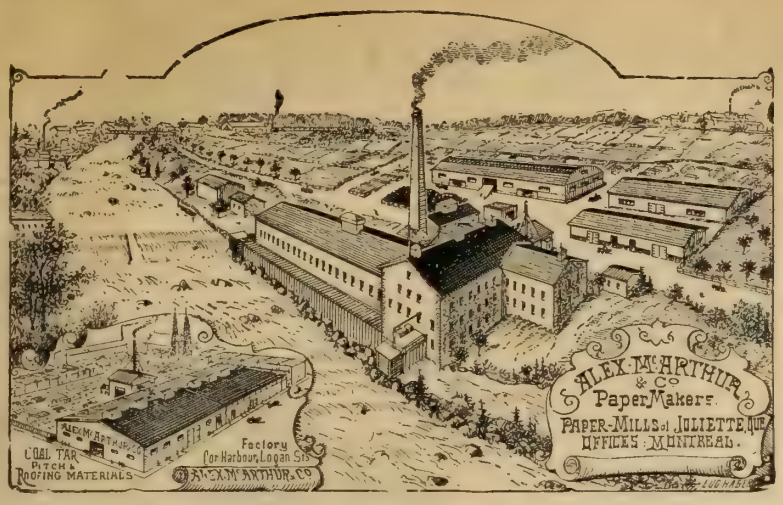
LOOKING FOR AN OPENING.

A hardwareman who has had many years' experience in Great Britain, both as a salesman and employer, is desirous of securing either a situation in Canada or of purchasing a suitable business. Any communication addressed to the Editor of HARDWARE AND METAL will reach him.

OUT OF THE EAST.

Alexander Gibb has just become the western representative of Campbell Bros., St. John, N.B., manufacturers of axles, springs, axes, hatchets, etc., and has received a handsome line of samples, which will be shown to the trade in a short time. The firm of Campbell Bros. have a large business in the Maritime Provinces, and do a considerable export trade in ship adzes with various shipbuilding centres in the United States. The axes, hatchets, adzes, etc., are finished in aluminum paint and are handsome tools. The trade should not fail to see them.

Common galvanized iron



has all the faults there are;

the worst one is its varying.

Apollo is uniform.

It will pay intending purchasers to obtain our prices before buying.

CURRENT MARKET QUOTATIONS.

June 17, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

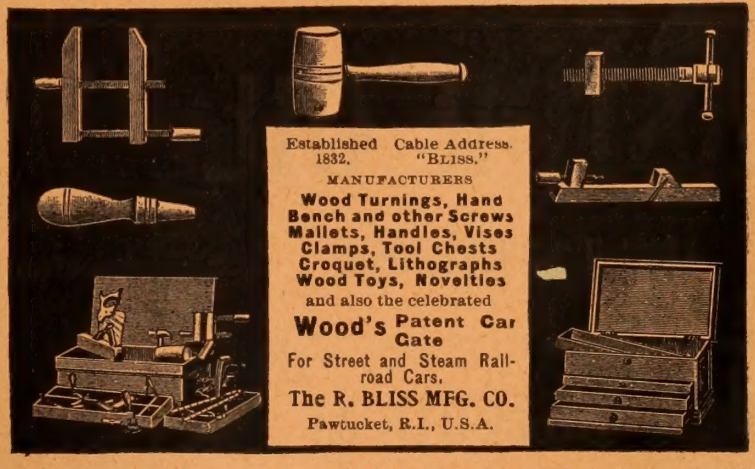
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**
